In the greenhouses preparations for a good season are very evident. The establishment has been catering to the florists' trade more and more during the past few years and now has some very large wholesale offerings. Phœnix Rœbelenii, the new palm, is prominent in one house, many specimen plants running from 1½ to 3½ feet high being seen on the benches. A block of plants 3 feet high are 3½ years old from seed. The preparations made to disseminate this palm may be understood when it is known that there are over 200,000 seedlings available for immediate sales. There is a fine house of crotons in varieties suitable for the holiday trade. A house of begonias looks very pleasing. There are a dozen new varieties, seedlings, in course of propagation for dissemination next spring.

Caladiums are quite a feature here, one house being filled with a beautiful collection of plants in all sizes and a variety of colors. There are to seen many unnamed seedlings of great promise, and novelties in colorings and marking. A notable new variety is Snowstorm, a beautiful white and green caladium, with extremely large leaves, and very bushy in habit. Another is Glowing Coal, a red black, with bright markings.

A. Jaericke, the superintendent of the greenhouse department, is very proud of the showing made of caladiums, and justly so.

Toronto.

TRADE ACTIVE.

Unusual activity prevails for the summer months, and business especially with the retailers is the best ever known. There has been a number of good weddings, with the usual amount of funerals, and the better grades of roses, carnations and good stock have been utilized to advantage. Being so near the gladiolus bulb center, there are so many flowers thrown on this market that from a wholesaler's view, they are not disposed of to very great advantage, but the last week some of the retailers have used as many as 1,000 a day, which has helped to make an inroad on the wholesaler's supply. Asters, which a short time ago were a glut, have shortened considerably, the dry season not being favorable to the later varieties,

At the Toronto Exhibition.
G. Mills, W. J Peak, H. G. Dillemuth.

and at present there are only one or two growers who are bringing good stock into town.

The convention at Guelph and also the Industrial fair have brought many visitors to the city, among whom were Mrs. and Miss Scrim, Ottawa, Ont.; Thomas Best and wife of Muir's, Chicago; E. E. Piser, Chicago; M. Skinner, of Mitchell Nursery Co; H E. Philpot, Winnipeg, Man.; W. Peak, Buffalo, N. Y.; Jas. Mortimer, Boston, Mass.; Chas. E. Russell, of the Gasser Floral Co., Cleveland, O.; A. J. Stephens, London, Ont.; W. Hall, Montreal, Que.

St. Louis.

THE MARKET.

The weather during the early part of the week was cool, but at time of writing it has warmed up considerably. There is nothing doing. The openings

Raymond, Son of F. J. Foster, St. Louis, Mo.
On prize pony Bobby B.

of the schools and theaters and the closing of the summer gardens will help things a little, especially in the downtown district. Carnations arrive with small blooms and short stems. A few long stemmed Enchantress can be seen and are eagerly sought. Most of the roses are wretched; even American Beauty is soft and lacks substance, which makes its keeping qualities very poor. Some good asters are in the market. A great deal of the smilax now coming in is of very poor quality. Asparagus Sprengeri and A. plumosus are coming in and selling well. Most of the retailers have been repainting and fitting up their stores during the dull season, and are now anxiously waiting for something to turn up and start the wheel awhirling. Labor day developed a good demand at the market.

NOTES.

Shaw's garden was opened September 2 to the general public, according to the will of Henry Shaw. Owing to the very warm weather, only 12,255 persons visiting the garden. Professor H. C. Irish, superintendent of the garden, stated that the plants are in better condition than they have been in years. A thousand new plants have been brought in, mostly from the botanical garden in Sicily. Among the older plants are orchids, dahlias, and chrysanthemums, which will be in fine condition about the latter part of October.

Wm. Osseck, manager for Frank M. Ellis, deserves great credit for the good management he has shown in handling the business of Mr. Ellis, who has been away at Panama for over nine months. Will has treated his customers, both growers and retailers, with the greatest courtesy. Mr. Ellis is very lucky in leaving in charge a man who takes such an interest in his business and has not caused it to suffer in any way.

Geo. Reater, who has for several past seasons handled holly, evergreen and all kinds of Christmas holiday decorations, has gone north to oversee the shipping of his lycopodium. He will return November 1, and about November 15 will open his work rooms at 806 North Third street, where he employs men women, boys and girls in the making of festooning, wreaths and other decorative articles.

Geo. Angermueller has returned. He is getting ready for fall trade. He expects to receive some extra fine stock during the winter. George is smiling. A fine bouncing baby girl met him on his return from the wholesale house September 2.

Billy Winter's greenhouses, at Kirkwood, are in fine shape. All his carnations are housed and looking well, also a fine crop of violets. Billy has always been a very successful grower of violets. His stock is handled by H. G. Berning.

N. Jablonsky, of Wellston and Central, has everything in good shape. His carnations are all housed and his roses are all looking fine. His houses at Central are in charge of Henry Braun, who seems to be a very successful grower.

Ed. Gerlach, of Chas. Kuehn's, is spending his evenings at Delmar Garden. He can be seen on the main promenade escorted by a double escort. It is rumored Eddy favors the lady he is leading by his right.

Mr. and Mrs. Ellison of the Ellison Floral Co. has returned from the northern lakes and are ready for business in their handsome new store on Olive street, near Taylor. This is a very wealthy location.

We are glad to announce that Alex. Waldbart, Jr., is rapidly recovering from his injuries. He has been removed from

the hospital, and is now at home with his father. He hopes to be on his feet within a month.

Vincent J. Gorley is out with a very unique pamphlet, a boost for the birthday bouquet. His idea is to make the birthday bouquet a fad, which would help considerably the sales of the retail florist.

Theo. Miller makes a fine showing in his store windows during the summer season. It is one of the most prettily illuminated stores in the west end.

Jos. Widmer, Highland, Ill., was a visitor here. He speaks favorably of his houses, which are stocked with carnations and violets.

Siegel & Burke will have one of the largest of the store fall openings. They have secured the opening of the new Grand Leader store.

It is rumored that King's highway from Lindell boulevard to the south line of Forest park will be made a boulevard next year.

Andie Hoffman, with Geo. Waldbart, reports trade as picking up. He has full charge during the absence of Mr. Waldbart.

H. G. Berning and wife have returned from their much needed vacation Henry is always up and doing and ready for work.

Wm. Young, of Young & Sons, has returned from the east very much pleased with his visit to Dayton.

J. F. Wilcox, of Council Bluffs, Ia., is shipping good Bride and American Beauty roses to Frank M. Ellis.

Chas. Kuehn has just returned from the east. He went from Dayton to Detroit to visit his folks.

Fred Pape is growing some fine Mamam Cochet, also some fine tuberoses and asters.

R. J. Windler reports trade as fair with large funeral orders during the past week.

Will Adels, with the Ayres Floral Co., has just returned from his well merited vacation.

From all reports Chas. Beyer is having a fine old time at Niagara Falls.

Visitor: E. J. Fancourt, with S. S. Pennock, Philadelphia, Pa.

W. F.

NEWS NOTES.

ARVERNE, N. Y.—More than 5000 persons recently witnessed the first floral parade ever held here.

CLEVELAND, O.—The Cleveland Cut Flower Co. will erect a new heating building on Eddy road, N. E.

AUSTIN, TEXAS.—A. J. Seiders is starting in business as a grower at 1106 W. Thirty-eighth street.

WATERVLIET, N. Y.—Julius Gabriels is building two large greenhouses at Quedar park on the Spring street road.

DENVER, COL.—A. C. Sinram recently announced the opening of a well-equipped and modern retail store at 1555 Arapahoe street.

NEW ORLEANS, LA. — U. J. Virgin's new place on Canal street, will, when completed, be one of the finest show places in this part of the country.

PHILADELPHIA, PA.—The Peacock Dahlia Farm Co. was incorporated with a capital of $25,000 August 21. The farm will be located in the southern section of Camden county.

SOUTH PORTLAND, ME.—Hiram Dyer, who has of late been at the Ward greenhouses at Morrills, has entered the employment of J. W. Minott & Son, Pleasantdale, as foreman of their houses.

MORRISTOWN, N. J.—R. A. Elliott is preparing to change the location of his greenhouses to make room for the trolley line which it is expected will pass through the property in Park place occupied by him.

NEW CANAAN, CONN.—B. S. Woundy has been enjoying a two weeks' vacation, having visited in his absence Massachusetts, New Hampshire and Maine. His foreman, Ernest Wood, had temporary charge of the greenhouses.

ST. JOHNSBURY, VT.—James Burns, who leased the St. Johnsbury Greenhouses about two yeags ago from Mrs. C. F. Gibbs, has purchased the property. He will enlarge and improve the plant to accommodate his increasing trade.

RACINE, WIS. — On account of the bankruptcy of R. J. Mohr, the Asylum avenue greenhouses have passed into the hands of A. J. Fiddler, former owner. Mr. Fiddler will be pleased to meet old and new friends. He will keep on hand a large assortment of flowers, plants, etc., and attend to orders with promptness and dispatch.

MILWAUKEE, WIS.—One of the smallest lean-to greenhouses probably erected with modern equipment is one built by H. W. Brotzman on Twenty-eighth street. The house has three benches, water connections, ventilators, etc. The heating consists of one of the Herendeen Mfg. Co.'s boilers and 2-inch pipe coils under each bench.

BOSTON, MASS.—A pleasant celebration on the beautiful roof garden of the Civic Service house, the feature of which was an address suited to the occasion by Gov. Guild, marked the awarding of the cash prizes, offered by Mrs. J. L. Gardner, for the prettiest roof garden, or flower decked area way, in the north, south, and west ends.

FINDLAY, O.—J. J. Waaland, doing business as J. Waaland & Co. at 608 South Main street, has bought out the business of Barnd, Karg & Co., good will, real estate, stock, etc., of this city. The Barnds will leave for the south during the latter part of September, where they expect to start in the fruit business. Mr. Waaland intends making material additions to the greenhouses next spring.

RICHMOND, IND.—The Wayne County Horticultural Society held its regular meeting at the court house, August 11. Several reports on the general condition of fruit, grains and vegetables were read by the various members. Secretary Walter Ratliff read a history of horticultural work in eastern Indiana for the past century which was ordered to be published. The next meeting of the society will be held at Jackson park September 8.

OWENSBORO, KY.—The Nanz Floral Co. has filed articles of incorporation with the county clerk, the capital stock to be $2,000. The business of the organization will be growing, importing and selling of ornamental, flowering and bedding plants, blubs, evergreens, cut flowers and floral designs. R. W. Nanz is president of the corporation, the incorporators of which are the children of the late C. G. Nanz. An addition to the greenhouses is shortly to be built.

SOME OF THE NEW YORK DELEGAIES AT THE DAYTON CONVENTION.

OBITUARY.

R. S. Johnson.

R. S. Johnston, proprietor of the Sussex Nurseries, near Stockley, Del., died early the morning of August 28, aged about 65 years. His remains were taken to Philadelphia for cremation. A widow and two grown daughters survive him.

HALLOCK'S CHESTNUT.—Æsculus.

MAKE all heavy shipments of tender plants before September frosts.

PROTECT outdoor flowering stock from the early frosts. After the first few cool nights there is often a prolonged period of fine weather.

WE are advised that every wife, daughter and sister of the members of the S. A. F., also lady members, will soon receive a letter, asking co-operation to form an auxiliary for social and instructive advantages from a lady member of the society.

The American Rose Society.

A $10 special prize is offered by an amateur for an exhibit at the next exhibition of the best foliage rose for garden planting in village dooryards.

The society is receiving additional life members, the latest to send in his check being S. S. Pennock, Philadelphia, Pa.

"A rose for every home, a bush for every garden."

BENJ. HAMMOND, Secretary.

Society of American Florists.

A LETTER OF THANKS.

The secretary of the Society of American Florists has received the following from John E. Freudenberger, landscape gardener to the N. C. R. Co., Dayton, O.:

The handsome ring the S. A. F. presented me was certainly the most unexpected as well as highly appreciated token of gratitude that was ever given to me. I certainly give my most hearty thanks to one and all and cannot find words to express my feeling on being the recipient of such an elegant present. I am positive that I shall always keep a warm corner in my heart for the S. A. F., and as long as I live this ring will remind me of an everlasting debt I owe to your society.

In case I ever can be of any assistance to you in the future, rely on me, for I will always be willing to help the S. A. F.

Thanking you all again and hoping to see you at the next convention, I am, yours sincerely,

JOHN E. FREUDENBERGER.

Deformed Gladiolus Spikes.

ED. AMERICAN FLORIST:—

We have quite a nice bed of gladioli which look very healthy, but most of the spikes are bent or turned in odd shapes. Can you tell me the cause of this and remedy? A. H.

In regard to the crooked gladiolus spikes, I know of no remedy or preventive. It is a characteristic of some varieties and is such a serious defect that no variety possessing it should ever be named. When conditions are favorable for a rank growth it may be that more of the spikes are crooked, but I am not sure of this.

M. CRAWFORD.

Vegetables for House with Ground Glass.

ED. AMERICAN FLORIST:—

I have a square house about 40 x 40 with curvilinear roof about 15 feet high at the center. There are in the house side benches under which runs hot water piping sufficient to keep up a temperature of 50° in the coldest weather. The sides are of clear glass and the roof is glazed with ground glass; side and top ventilation. What kind of vegetables can I grow in the winter months in such a house without taking out the ground glass and replacing it with clear glass.

X. X.

In a general way a house such as described could be used to advantage in the winter for such crops as Grand Rapids and similar varieties of lettuce, parsley and other crops of a leafy nature, much better than for root crops such as radishes and beets, or for tomatoes and cucumbers, where the fruits must be developed. During the spring months, however, almost any crop could be grown.

L. R. T.

To Heat a Range With Steam.

ED. AMERICAN FLORIST:—

I have six greenhouses, each 20 x 50 feet, five connected and one standing by itself. How many runs of 1-inch pipe will it take to heat each house by steam, temperature to be 55° in zero weather? I want to run a 2-inch supply pipe for each house. Three of the houses are piped with 2-inch pipes for hot water, having 10 runs in each house. Can I use them for steam or would there be too many runs of pipe for steam heat?

J. W. S.

Ten 1-inch pipes will answer for all except those with one or more exposed walls, in which another run should be used. If the supply pipe passes through the house this would take the place of two 1-inch pipes. If steam is used in 2-inch pipes only six will be needed. With a large boiler there will be no great objection to using this size of pipe for steam heating.

L. R. T.

Heating Two Small Houses.

ED. AMERICAN FLORIST:—

I have two small greenhouses, side by side, 10 x 53 feet with a ridge 7 feet high. The sides are made of double boards with paper between. I wish to place a hot water heater at the west end of the house and heat by means of a box coil walled up with brick to make the furnace. What size of pipe should I use to make the coils and how many runs of pipe and what size should I use in the houses?

J. N. H.

While it would be possible to make a coil boiler for heating the greenhouse it will be nearly as cheap and more satisfactory to put in a regular hot water boiler, selecting one with a rating of 500 to 600 feet according to the temperature desired. For the construction of the coil boiler it will require 18 1½-inch pipes 4 feet long and a grate 1½ x 2 feet. To heat each of the houses to 60° eight 1½-inch pipes will be needed. Six would answer for 50°.

L. R. T.

Coming Exhibitions.

(Secretaries are requested to supply any omission from this list.)

BOSTON, MASS., November 2-4, 1906.—Chrysanthemum exhibition Massachusetts Horticultural Society. Address Wm. P. Rich, Horticultural hall, 300 Massachusetts avenue, Boston, Mass.

Address GEO. VATTER, Marinette, Wis.

FOR SALE.

At a sacrifice, greenhouse well stocked and long established business of the late J. P. Coen, Lexington, Mo., one of the best paying little businesses in the country and in perfect condition; no competition within 30 miles. The place consists of 3 greenhouses 85x20, 1 lean-to and cold frames, 1½ acres of ground, an excellent 7-room house, with all modern conveniences, steam heat, electric light, etc., out-houses, good barn, laundry, chicken houses etc. The entire place is lighted with electric light, heated with self-regulator steam boiler, and city water throughout the grounds and houses. Good wholesale trade as well as retail. Lexington is noted for its colleges and schools; one boys' military academy, two girls' colleges and a number of minor schools, all of which keeps the cut flower business very brisk during the school season. The place can be bought for $6,500, which amount wouldn't pay for the improvements; $2,000 cash, balance to suit. For further information address ARTHUR NEWELL, 12th & Baltimore Aves., Kansas City, Mo.

For Sale—Worthington duplex steam pump, capacity 30-40 gal. per minute in good condition, $45.00; No. 1 receiver and fittings for pump, good as new, $50.00. Dean pump for hand or steam, almost new, $20.00; 6-inch pressure regulator used two seasons, $50.00; 2½-inch pressure regulator, $18.00. Carnation supports $15.00 per 1000; $125.00 for 10,000. JAMES W. DUNFORD, Clayton, Mo.

For Sale—Books: Practical Floriculture, Gardening for Profit, (Henderson); Practical Forestry, Grape Culturist, Small Fruit Culturist, (Andrew Fuller); How To Grow Cut Flowers, (Hunt); 90 cents the copy; $5.00 the lot. Valuable to a beginner. All books in good condition. Address H. BENTLAGE, P. O. Box 361, Springfield, Ohio.

FOR SALE.

4,500 Carnation Supports

Galvanized wire, 24 inches high, two 8-inch rings, used two years, at $10.00 per 1000. Free sample by mail.

Slack Coal as Fuel.

The article that was published in THE AMERICAN FLORIST, of August 18, page 130, regarding the use of cheap coal or slack, as it is most generally termed, gives some splendid ideas, so far as it goes, but one thing that is very important is omitted. Nothing is said about the benefit of wetting the slack. After continuous use of slack for over a dozen years I found from practical experience that it burned better, heated more, and what was best of all, lasted longer, besides being easier to handle. The kind of slack I refer to is that of bituminous or soft coal and the productions of Ohio, Pennsylvania, West Virginia, Kentucky and since coming to the coast that from the mines of Washington.

I found trouble with all kinds and grades of it whenever I tried to use it dust dry. The loss through the grates was greater and always required attention more frequently. The plan of heaping up in the center and giving draft at the edges always proved best and the use of other looser fuel, wood, cobs and other materials, proved helpful in some cases when a low-grade coal of fine particles was used, but were not of any special benefit when a good quality was used. When a good coking grade of coal is to be had it will not be so necessary to use wood, cobs or other loosening material. After having burned many carloads of slack as well as lump coal I am of the opinion that lump coal is not worth more than a dollar or a dollar and a half more than the slack per ton. As regards the extra work to keep up the fire I did not find any large percentage in favor of lump coal, but that probably was owing to arrangements or the boiler in which it was to burn. Getting rid of the soot is the worst feature of the slow burning of slack, but in fact that is always the trouble with all soft or bituminous coals.

Strong draft and firing often keeps the soot accumulating down to the minimum, even if slack is used that is quite wet. Of all the slack coal I have burned only once did I find a grade too poor to burn profitably, and that once was enough. Some troubles we can never forget and that time when an extremely cold spell came along and coal in the central east was practically out of the market I had to stay up nights with my troubles, slack troubles though they were.

S. L. HARPER.

Toads Will Exterminate Ants.

Toads are most useful reptiles, and devour thousands of small insects that would otherwise eat up the vegetation. Gardeners well know this when they turn them into the hothouses. Mr. Frank Buckland gives the following testimony from a gardener: "In the autumn of last year a pit wherein I grew melons was so much infested with ants as to threaten the destruction of the whole chop, which they did first by perforating the skin, and afterwards eating their way out of the fruit; and after making several unsuccessful experiments to destroy them, it seemed to me that I had seen the toad feed on them. I accordingly put half a dozen toads into the pit, and in the course of a few days hardly a single ant was to be seen." —Journal of Horticulture.

Des Moines, Ia.

MARKET STEADY.

Market conditions remain practically unchanged. Roses are improving some. Carnations are still very scarce. Good asters and gladioli are still in the market and are used for funeral work. The thermometer has dropped several degrees the past week, much to the relief of the trade.

NOTES.

Mrs. I. W. Lozier, widow of the late I. W. Lozier, was married a short time ago to Rev. Joshua Jester, an east side Methodist minister.

Miss Alice Kinney has again resumed her position with the Alpha Floral Co. after several weeks spent camping out near Des Moines.

L. P. Springer and wife of Indianola were among our visitors last week, taking in the Iowa state fair.

Gus Pappos, of the Alpha Floral Co., has returned from a two weeks' vacation spent at the lakes.

Visitors: J. F. Wilcox and two sons, Council Bluffs, Ia.; John T. Temple, Davenport, Ia.; G. A. Heyne, Dubuque, Ia.; Chas. Sherwood, Waterloo, Ia.; Henry Fields, Shenandoah, Ia.

THE IOWA STATE FAIR.

The space of 8,000 square feet, one-third of which was devoted to cut flowers, and two-thirds to plants, was taxed to the utmost capacity by the exhibitors, the exhibits of the amateurs being especially noticeable. Superintendent Wesley Greene says he hopes next year to have a new building, large enough to have the exhibits twice as large. J. T. Temple, of Davenport, Ia., and Geo. T. Heyne, of Dubuque, Ia., were the judges and awarded the following premiums:

Best collection of plants in bloom, not less than 50 varieties.—Lozier, first; Vaughan's Seed Store, second; Iowa Floral Co., third.

Best collection of foliage or decorative plants, not less than 20 varieties excluding palms and ferns.—Vaughan's Seed Store, first; Iowa Floral Co., second; Lozier, third.

Best collection of palms.—Iowa Floral Co., first; Vaughan's Seed Store, second; Lozier, third.

Best collection of ferns. — Lozier, first; Vaughan's Seed Store, second; Iowa Floral Co., third.

Best collection of coleus. — Iowa Floral Co., first; Lozier, second.

Best collection of geraniums.—Lozier, first; Iowa Floral Co., second.

Best collection of flowering begonias.—Lozier, first; Iowa Floral Co., second.

Best collection of rex begonias.—Lozier, first; Iowa Floral Co., second.

Best collection of cannas.—Iowa Floral Co., first; Lozier, second.

Best specimen palm. — Vaughan's Seed Store, first; Iowa Floral Co., second.

Best specimen cycad.—Lozier, first; Lozier, second.

Best specimen fern.—Vaughan's Seed Store, first; Iowa Floral Co., second.

Best specimen araucaria.—Vaughan's Seed Store, first; Lozier, second.

Best specimen new or rare plant.—Vaughan's Seed Store, first; Iowa Floral Co., second.

Best vase of plants.—Vaughan's Seed Store, first; Iowa Floral Co., second.

Best basket of plants. — Vaughan's Seed Store, first; Iowa Floral Co., second.

Best table decorations (centerpiece).—Vaughan's Seed Store, first; Iowa Floral Co., second; Lozier third.

Best bride's boquet.—Iowa Floral Co., first; Lozier, second; Vaughan's Seed Store, third.

Best basket of flowers.—Lozier, first; Vaughan's Seed Store, second; Iowa Floral Co., third.

Best display of cut flowers.—Vaughan's Seed Store, first; Iowa Floral Co., second; Lozier, third.

Best display of roses. — Vaughan's Seed Store, first; Iowa Floral Co., second; Lozier, third.

Best display of carnations. — Iowa Floral Co., first; Lozier, second; Chas. Gay, third.

Best display of gladioli.—Vaughan's Seed Store, first; Iowa Floral Co., second; Lozier, third.

Best display of asters.—Vaughan's Seed Store, first; Lozier, second; Iowa Floral Co., third.

Best display of dahlias.—Lozier, first; Iowa Floral Co., second.

One of the competitors was late entering his floral design, so the judges compromised matters satisfactorily to all, the Iowa Floral Co., taking first honors.

MARKET FIRM.

With the return of society, comes prosperity for the wholesale man. Trade conditions brightened visibly under the influence of September and continued good weather. Stock arrives in good shape and brings normal prices. There is any quantity of first-class roses and carnations to be seen at all houses as many of them are now cutting heavily of both old and young plants. There is neither an influx nor scarcity of any kind of stock. American Beauty is quite plentiful. It is arriving in splendid condition and moving at normal rates; Bride, Liberty and Chatenay can be had in any quantities desired, most of the material being first-class in all respects. Bridesmaid is a trifle short in supply. Carnations are also quite plentiful, although the stock, as a whole, does not compare favorably in quality with the roses. However, there is enough good material to meet all demands. Gladioli are abundant and move well. Good late asters are rapidly taking the place of the poorer stock of the past few weeks. Altogether there is a general feeling of satisfaction at the present state of affairs and a gradual increase of business is expected.

NOTES.

Mr. Rice of the Terre Haute Rose & Carnation Co., of Terre Haute, Ind., spent several days in the city last week. Mr. Rice now controls about 25,000 feet of glass and is making preparations to enlarge upon this. He has recently installed a self-cooling refrigerator which maintains any temperature desired without the aid of ice and finds it a profitable investment.

C. W. McKellar is again receiving consignments of fine orchids. He says the work of introducing these flowers into general use has been a severe tax on patience and energy, but that the quantity now used is considerably in excess of former years, with excellent promises for this season.

The Bentley-Coatsworth Co. will quadruple its supply of Richmond roses this season. The firm has a large quantity of young grafted stock, which looks exceptionally fine. The installation of a new boiler was one of the features of some minor improvements made last week.

The birthday bouquet, according to prominent retailers, is steadily gaining favor with the public. Mangel's flower store on Monroe street, is displaying a large advertising placard which is doing much to promote this novelty.

Scheiden & Shoos are now established in John Cook's old stand in the Flower Growers' Market. The firm is doing a commission business in addition to handling stock grown in the firm's greenhouses.

John Simpson, 1585 Ogden avenue, reports a good business since purchasing the greenhouses formerly owned by C. S. Stewart. He is now adding another house to his establishment.

There has been some comment recently about the number of nelumbians seen in the windows of retail stores. These are said to be grown quite extensively in the vicinity of this city.

Wietor Bros. are figuring prominently in the rose situation this week. The firm is cutting a large and exceptionally fine crop of American Beauty and other varieties.

U. J. Virgin and wife, New Orleans, La., who attended the Dayton convention and remained here with friends a few days, returned August 31.

The J. B. Deamud Co. is headquarters for sheet moss this week. The firm is receiving some large consignments of chemically dried stock which sells readily.

L. H. Winterson and wife returned to the city September 4. The couple made an extensive trip through the east, after attending the Dayton convention.

D. J. Murphy, who has been with Heim Bros., Blue Island, for some time, is no longer in that firm's employ.

S. S. Skidelsky, according to rumor, has purchased or leased a greenhouse property in this vicinity.

The date of the next Florists' Club meeting is September 13.

Visitors: John J. Stuppy, St. Joseph, Mo.; Master Henry Hess, Omaha, Neb.; H. B. Sullivan, Rockford, Ill.

W. A. Peterson Returned from Abroad.

Wm. A. Peterson returned from an extensive tour of Europe, August 22. During the several months of his trip, Mr. Peterson visited many nurseries in Holland, France, England and Italy, where he purchased stock and collected many ideas on the general nursery, peony and landscape business. He was much impressed by the Dutch nurseries which he says number no less than 160 in the neighborhood of Boskoop alone. All of these places are well kept and handle only small trees and shrubs, it being possible for a man of medium height to look over the nursery from end to end. This he ascribes mostly to climate and soil which are not adapted to the raising of large stock. Water lies but a few feet beneath the surface of the land and ditches are used to transport the products from point to point. Mr. Peterson was surprised to see about 50,000 Colorado blue spruce in this country.

From here he pushed on to Germany where he visited the famous Spath's Nursery. This, in his opinion, is the finest in the world. Mr. Peterson covered the 700 acres of neat, well cultivated land and beautiful sample park in an automobile.

Mr. Peterson was much surprised at the modern trend of German landscape gardening. He says the idea seems to be to crowd as much foliage into a given space as possible. Instead of setting trees and bushes, artistically spaced, about a lawn or estate, the Germans crowd them promiscuously together. Shrubs are planted beneath large trees, thus creating an impression of dense, green foliage. Azaleas and rhododendrons are used almost exclusively in garden plots.

While in England, Mr. Peterson visited the Temple show. He says the crowd present was surprising in view of the exorbitant prices charged for admission. There were many fine displays of annuals transplanted from seeds. One of the features of this show was 1,000 Japanese maples which attracted universal comment. In France he attended the Fete Des Fleures. Apparently this ceremony consisted in riding up and down the streets in a carriage and throwing peonies at each other, somewhat on the order of the New Orleans mardi gras.

Altogether, Mr. Peterson had a very enjoyable and prosperous trip. He has absorbed many little tips and hints which will be of inestimable benefit to his business and feels well repaid for his trip.

Salt Lake City.

PROSPECTS BRIGHTER.

Business is beginning to brighten up a little in this locality. People are beginning to return from the mountains where they have been for the summer. As the summer resorts close the season's business is expected to take an upward shoot shortly. Carnations are in demand. Some of the new crop are coming in from several of the growers, the flowers are fine but of short stem. The cloudbursts that we had recently damaged the sweet peas somewhat, but they are recovering again. Asters are at their best just at present. Gladioli, antirrhinum and golden glow constitute the balance of the flowers on the market just at present.

D. E. and L. M. Law left for Senecaville, O., on the evening of August 25, in response to a telegram stating that their father was very ill. He passed away within the next 24 hours. All their brother florists and the entire community extend their sincere sympathy to the sons in their affliction.

Jack Kraus has resigned his position with the Salt Lake Floral Co. and is now employed at B. C. Morris' greenhouses. Jack is a fine grower and a general all-around good fellow.

Albert Alt of the Roserie is wearing one of those "smiles that won't come off." Wonder if "Al." is going to get married. Ask him and see.

The Sugar House Floral & Seed Co. has its new houses completed and planted with carnations, ready for winter business.

The E. A. Lambourne Floral Co. is remodeling its store and has also added a new horse and delivery wagon to its equipment.

Ralph Rieben is sending in some fine asters from his establishment on the hill.

UTAH.

STERLING, ILL. — Robt. Lundstrom, manager of the Sterling Floral Co., is having large additions built to the greenhouses of the company in the east end of the city.

ASHTABULA, O. — The Ashtabula Greenhouse Co. has commenced the rebuilding of its entire plant on Bunker Hill, and when complete the new buildings and equipment will represent an outlay of $4,000. Eighteen houses and a new engine house are going in with good foundation and metal framework. The capacity will be increased also and when complete the plant will represent 50,000 feet of glass.

THE MARKET.

Business is very quiet among roses. American Beauty and Killarney sell best. White roses are also in demand, as is nearly always the case. Asters are plentiful, some coming from New York state. Dahlias are now to be had in quantity and of very good quality. The air is redolent with the odor of the Clematis paniculata, which is now in full flower, covering the porches and arbors of the suburban residences with its lovely blankets of blossoms. It makes up nicely in much of the work now going out. The long continued wet weather has been very hard on outdoor carnations and it is estimated that at least 25 per cent of the crop has rotted off in the fields.

FLORISTS' CLUB MEETING.

The September meeting of the Florist's Club was full of interest from the call to order until the motion to adjourn was made. Reports of the Dayton convention were given by the various members who attended. G. C. Watson read a paper on how it appeared to the seedsman which was full of good ideas. Wm. P. Craig spoke of new Nephrolepis Amerpohlii, which he said was far ahead of other similar types. He predicted a great future for this variety. W. H. Taplin said that it had been a great convention for business. He did not approve the admission of the general public. Leo Niessen suggested that a better method of casting the ballots should be devised, as he thought the present system could be much improved. He also spoke of the great system seen in the business conducted by the National Cash Register Co. The new white hydrangea was discussed and an effort made to determine its origin. Robt. Craig said it was a beautiful variety and one that could likely be forced for Easter. John Westcott presented the club with a fine picture of H. B. Beatty, which will adorn the club room. Next Monday there will be a match game between the Dayton team and one selected from the associate members of the club. The Beatty cup will be filled with something suitable for the occasion and a good time is guaranteed to all who will come and celebrate the winning of this trophy. The next meeting of the club will be to arrange and lay out the work that is to begin at once to make the 1907 convention the greatest the society has ever held.

NOTES.

The event of the week that has had most effect on the business has been the failure of the Real Estate Trust Co., one of the largest moneyed institutions of the city, whose stock par $100 has sold as high as $350, the last quoted price before the failure. Its directors were mostly successful business men, gilt edged and with few exceptions, millionaires. Its handsome office building at the southeast corner of Broad and Chestnut streets is one of the landmarks of the city. There were $27,000,000 of trust securities in its vaults, while 25,000 depositors have over $7,000,000 to their credit on their books. Now it is thought that while the trust funds are for the most part intact, the depositors will get but little unless the wild cat securities on which most of the money was loaned grow into the values placed on them by the promoter, who so hypnotized the president that he could get almost anything he asked. The president, who was a great church member, on the eve of being discovered ended his life with a pistol. Quite a number of the trade were unfortunate enough to do part of their business with this company, prominent among them being the heads of departments of the H. A. Dreer Co., some of whom had suffered before in a recent bank failure and had finally selected this as one of the safest places in the city. Frank Polites, of Chestnut above Broad, was in it, as was Edward Reid and Chas. Meehan, also the Flower Market, which carried its entire account in this institution. E. A. Stroud, of Strafford, Pa., also did his banking here. It is the same old story, everything was left by the directors to the president, who was too good to go wrong and whose duplicity was not discovered until his suicide opened their eyes to his real character. It is sincerely hoped that the efforts to put the company on its feet will meet with success, but each day's revelations since the failure, August 28, seem to make matters worse, the last account being that it would take at least $10,000,000 to see them out of the trouble and pay the depositors.

Alfred Campbell opened his new commission house, Sansom street above Fifteenth, on September 1 and gave all the boys a call over the 'phone. Mr. Campbell is a hustler and should build up a business in his location which is a good one.

The new Bayersdorfer store, factory and warehouse on Arch street, below Twelfth, when alterations are completed, will be one of the largest and best in the country. Nothing will be left undone to make it a model of its kind.

Wesley Floyd, recently with Wm. J. Moore at the market, is now with Edward Reid. Wm. Reynolds has succeeded Mr. Floyd with W. J. Moore and now drives the newly painted wagon over the route. K.

Boston.

TRADE ACTIVE.

The trade conditions of the past week exceeded the best anticipations of both growers and retailers. Owing to the opening of the different theatres, fall openings at the business houses, a great deal of funeral work, etc., there was quite a demand for stock. There is an abundance of all grades of goods coming in and they are selling at exceptionally good figures. The late varieties of asters are arriving in large quantities. The shortage of carnations still remains apparent and those in the market are very short stemmed. The market is flooded with gladioli, which are hard to move, as many of the stores are being supplied from outside sources at exceedingly low prices. Sweet peas are out of the question. Hardy hydrangeas, phlox, etc., sold well, being used principally for decorative purposes. There is a plentiful supply of roses with American Beauty, Kaiserin, Carnot, Killarney and Wellesley among the best sellers. Lilies are to be had in sufficient quantities. Cosmos and bouvardia are now putting in an appearance.

NOTES.

A most successful flower show was given by the North Shore Horticultural Society Aug. 29 and 30, under a tent on the grounds of the Essex country club. A special feature was five tables arranged by ladies. The society prize was awarded to Mrs. Scott Fitz, who had a most artistic arrangement consisting of lavender and white. Flowers used for this table were asters, phlox and scabiosa. The second prize was won by Mrs. Geo. T. Cabot with an arrangement of miscellaneous material. Another feature was four tables aranged with flowers for effect. The prizes were donated—first being awarded to Mrs. H. L. Higginson, J. Scott, gardener; second prize to Mrs. L. Leland, E. Wetterlow, gardener. A very pretty table was arranged by Robt. A. Mitchell, consisting entirely of lavatera and statice. The Lord & Burnham cup for a group of 20 plants was awarded to R. C. Hooper, W. Swan, gardener. The group consisted of Oncidium varicosum and palms. A certificate of merit was awarded to Mrs. L. Leland for a large group of greenhouse plants. A fine specimen of Cibotium Schiedei was exhibited by G. W. Black. The Schlegel & Fottler Co.'s prize of $35 in gold was awarded to Mrs. G. M. Lane, H. Shaw, gardener, for display of annuals. Among the vegetables the R. & J. Farquhar Co.'s cup was awarded to Mrs. W. B. Walker, Wm. Jack, gardener. The society prizes were won by R. Dexter, J. Salter, gardener; second, Mrs. E. C. Swift, W. P. Wakefield, gardener. Other exhibitions of note were those of J. Heurlin with perennials, W. W. Rawson with over 200 varieties of the latest dahlias. The North Shore Ferneries exhibited some fine garden furniture. Baskets made up of garden flowers were exhibited by A. Magnuson and R. A. Mitchell.

The annual sale of stalls of the Music Hall Market was held September 1, Mr. Tailby officiating as auctioneer. Refreshments were served throughout the sale. The sale was the most successful the market has had, about 30 new growers enlisting in the ranks. The first floor has been entirely remodeled, has all the latest improvements, such as electric fans, electric heating, etc., and the directors are now installing an extensive cold storage system.

N. M. Silverman, of Winter street, visited New York August 26 to 30 on a business trip. He informs us he has purchased a fine assortment of palms, also has arranged for a regular shipment of American Beauty roses.

Vacations being about over and stores looking spick and span, the retailers are now settling down for an extensive fall and winter trade; in fact, some of the stores have already booked several decorations.

There was a novel display of Physostegia Virginiana in the show window of Thos. F. Galvin's, August 28 to 31, which attracted widespread attention from the trade as well as the public in general.

J. W. Simpson is cutting some fine blooms of Rawson's midsummer branching asters.

The annual sale of stalls of the Park Street Market takes place September 8.

Wm. Nicholson is cutting some fine yellow and white chrysanthemums.

Visitor: Geo. E. Worcester, of Thetford, Vt., on a business trip. B.

MARKET IMPROVES.

There is a slight improvement in the market, and as it has been carried along for a day or two it may be considered to be of the permanent character expected at this time of year. Staples of all kinds are taking on strength, and while values are not advanced to any great extent, everything along the line is active to the point of making a clean-out easy. Roses are called for to an extent which makes good stock something sought for, and lower grades have moved up a bit as far as demand is concerned. American Beauty roses in special grades are in better supply, and are somewhat stronger in price. Shorter stock is still rather difficult to move. Bride roses are rather scarce, and judging from the influx, it looks as though this variety, as a commodity, will be on the short side for a season, at the least. Kaiserin Augusta Victoria is arriving in fine shape, and sell well. Carnot is also a good thing. Killarney is asserting a popularity which is deserved, and as a summer pink it is in the front rank. Richmond is disappointing as a crimson, for the heated season, and the returns to growers shipping to this market are small. Cool spells have been rather rare this summer, but when they have happened the appearance of Richmond has recorded the condition. Carnations from outside plants are coming in quite plentifully, and sell well, as might be expected at this season. By mid-month inside grown stock may be expected, and the market is waiting for the superior stock which is in demand. Gladioli are reaching the end, and shipments within the past few days have been light in character. Asters also are shortening up, but the quality of arrivals in general is very good, long stalked and large headed stock being quite common, and bringing remunerative prices. Lily of the valley is in better demand, but the offerings are not of high grade. A few chrysanthemums have made an appearance and make the usual returns for something not wanted. Fancy dahlias are beginning to come in, and will be in abundance for a week or two. With the weather of the past few days outside stock is shortening in supply and the market should show a slight increase in values.

NOTES.

Milford Parks, the Cleveland, O., retailer, was another visitor last Friday. He was looking up one or two sources of specialty supplies, also openings for the starting here of a new idea in the florists' business which he has successfully tried in his own city.

Alex. J. Guttman and Charles Weber spent a day or two in Niagara Falls and Buffalo on their return trip from Dayton. Alfred Zeller of Flatbush and his daughters also spent some time at Niagara on their way home.

Henry Graves, a wealthy broker of Orange, N. J., died last week. He was a patron of the Botanical Gardens, and an enthusiastic grower and collector of orchids well known to the trade.

The reconstruction of the old Metropolitan hotel building, in which Chas. Thorley's retail florist's store is located includes the extension of the store to the full depth of the building.

J. A. Peterson, of Cincinnati, was in town last Friday and Saturday and carried away some good orders for Adiantum Farleyense. pandanus and begonias.

Alfred H. Langjahr spent a few days this week with his family at the seashore, recuperating from the effects of the heat at Dayton.

Several prominent wholesalers have arranged to extend the early closing season to September 15.

Next week will probably see the resumption of the auction business.

Buffalo.

TRADE FAIR.

Everything in the store and greenhouse trade is about as one would expect at this time of the year. Outdoor stock is very good and roses are improving. The weather has been cool the past week, consequently the cut flower trade has not diminished. Gladioli continue good.

NOTES.

The Daytonites have been arriving daily, headed by J. H. Dunlop, president of the American Carnation Society, A. Guttman, New York, C. Weber, Lynbrook, N. Y., Louis Winterson and wife, Chicago, E. Russell, of the Gasser Co., Cleveland, O., J. B. Stephens, with H. H. Fudges, Rosedale, Toronto, Ont.

Mrs. Newman, of Akron, N. Y., has three new houses, 26x120, for carnations. Mrs. Newman is new in the business and gradually got into it from growing asters, tulips, daffodils and other outdoor stock.

The drummers are dropping in. Recently we had C. Kakouda, of the Hinode Florist Co., Whitestone, L. I., N. Y., and Arthur Zirkman, of M. Rice & Co., Philadelphia, Pa.

S. A. Anderson has a fine lot of Boston and Piersoni ferns that he is selling rapidly as a herald of an early fall.

Miss Lou Faul, formerly of J. H. Rebstock's, is now in charge of S. A. Anderson's Elmwood salesroom.

All are anxiously awaiting the annual picnic. It promises to be a hummer and a big crowd is expected.

President Kasting is now back and looking pleased after the successful convention at Dayton.

Reichert Bros., Pine Hill, have about completed three new houses, 20x100 feet, for general stock.

Miss Edna Goehring, of S. A. Anderson's, has returned after a month's vacation in Detroit.

Wm. Kalisch and wife, of St. Louis, called on their way to Niagara Falls.

BISON.

Washington.

MARKET IN HEALTHIER TONE.

With improved weather the market has assumed a healthier tone. Not that there is any great amount of business, excepting funeral work, but prospects look much brighter. Of good stock there is but little in sight. This week will about finish the asters and only a few dahlias have thus far appeared. During the wet spell it was all the rose growers could do to save their stock from black spot and mildew without thinking much of blooms. Nearly all the roses that come in are weakly and without substance, but continued good weather will improve conditions.

NOTES.

George H. Cooke, after leaving Dayton and its attractions, took a trip into Kentucky, the Mammoth cave being his objective point. He remained there two days, making three tours into the cave, being both awed and astonished with its magnitude and natural wonders.

J. A. Peterson, of Cincinnati, stopped off for a short time last week on a combined business and pleasure trip to New York.

James Quinn, for some time past foreman for A. B. Garden, has transferred his services to the Department of Agriculture. S. E.

Pittsburg.

MARKET IN HEALTHIER TONE.

The market is getting toned up as the days go by, the demand is healthier all along the line. Although there is as much going to the barrel, more is going out the front door. Asters of every kind are arriving in quantities; the quality is very good. The best gladioli of the season are now coming in. It is a pity they do not move better. Roses of young stock are being cut but have not much length of stem. The demand is mainly for white, with pink going fairly well. Some fine red roses are seen but go no farther than the commission houses. Lily of the valley is unusually scarce. The demand for carnations is far greater than the supply. The usual scarcity of smilax at this time is now noticed.

NOTES.

E. G. Hill, of Richmond, Ind., was a recent visitor. He states that the output of 100,000 additional feet of glass will be disposed of in Pittsburg.

The storeroom of C. T. Siebert is undergoing extensive repairs. When completed Mr. Siebert will have one of the finest places in the state.

Mr. Sackerman of J. Stern & Co., Philadelphia, was calling on customers during the week.

L. Baumann, the western supply man, is booking Christmas orders here.

W. B. Ague will open again this week in the Liberty Market.

Mrs. Foss contemplates a trip into Canada via Detroit.

Miss Ida Elicker, of Homestead, has been ill with fever. J.

ARGOS, IND.—The Argos Floral and Plant Co. was lately organized with Wm. E. Hand as president and general manager and Noah E. Bundy secretary and treasurer. A number of greenhouses are being erected for the production of plants, cut flowers and vegetables.

FALL RIVER, MASS.—John Lambert is taking considerable pride in a walking stick recently presented to him by James J. Booth, of Pittsburg, which he is glad to show to all interested. It was made from a stick picked up by Mr. Booth on the field of Gettysburg, and bears near the handle a bullet imbedded in the wood during the war.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

THE Michigan bean crop gives good promise.

INDIANAPOLIS, IND.—W. H. Everett has removed to California.

RED TOP seed dealers are asking $8 per 100 pounds for fancy in growing districts.

HIRAM W. SIBLEY, son of the former seedsman, is interested in the new Canadian silver mines.

VISITED CHICAGO: A. J. Brown, Grand Rapids, Mich.; Edw. H. Jacobs, of National Nitro-Culture Co., West Chester, Pa.; J. B. Lewman, Louisville, Ky.; C. H. Lane, of the Ottumwa Seed Co., Ottumwa, Ia.; S. A. Wilson, with the L. L. Olds Seed Co., Clinton, Wis.

NEBRASKA vine seed growers report cucumbers likely to be less than 50 per cent of the crop formerly expected, owing to rust and aphis. Musk melons are doing better than cucumber, but show too light setting of fruit. Squash, pumpkin, water melon and sweet corn are looking well.

HENRY A. BERTOLI has resigned his position with the W. W. Barnard Co., of Chicago, and accepted a similar position with the Bromfield-Colvin-Ries Co., Bay City, Mich. Mr. Bertoli is well known to the seed trade, having made a thorough study in the field work of peas and beans for the past 10 years.

SANTA ANA, CAL.—Articles of incorporation were filed recently by the Santa Ana Easter Lily Co., the object of which company will be the growing of lily bulbs in large quantities for the market. Of the $15,000 worth of stock mentioned as capital, $4,000 has actually been subscribed. The directors are: E. A. Metcalf, formerly connected with the government experiment station here; Dr. C. D. Ball, J. M. Hough, J. P. Parsons and Senator John N. Anderson.

Parcels Post for Denmark and America.

Acting Postmaster-General Hitchcock has signed a parcels-post convention with Denmark, to take effect on October 1.

It provides for the exchange and transmission through the postal services of both countries of parcels which weigh no more than four pounds and six ounces nor measure more than three feet six inches in length and six feet in length and girth combined. The value of the parcels carried is also limited to $50. Postage must be prepaid in full at the following rates: In the United States, on parcels for Denmark, 12 cents for each pound or fraction of a pound.

In Denmark, on parcels for the United States, 60 ore for a parcel not exceeding one kilogram in weight, and 1 krona for other parcels. A delivery charge not exceeding 5 cents in the United States may be collected of the addressees of each parcel. The parcel post regulations applicable to parcels for Norway apply also to parcels for Denmark. Parcels post mails for Denmark will be made up at the New York postoffice.

5,400 ACRES OF GARDEN SEEDS IN CULTIVATION.

Braslan Seed Growers Co.

WHOLESALE SEED GROWERS.

SAN JOSE, CALIFORNIA.

Kentucky Blue Grass Seed.

Under date of September 4 E. F. Spears & Sons, Paris, Ky., issued the following:

We beg to call your attention to the fact that some central Kentucky seed dealers are offering fancy Kentucky blue grass testing 12 to 15 pounds to the measured bushel, calling it "export," and endeavoring in this way to injure the demand.

"Export" has always been the synonym for the best grade of seed, and this year tests 19 to 20 pounds. These offers are, to say the least, misleading. This light seed is made by mixing in the chaff from the cleaning, and can be sold 25 cents to 50 cents per bushel less than regular "export." We caution you against being thus misled.

Farm and Garden Seeds in Manchuria.

Consul-General Sammons, of Newchwang, reports that the authorities there are exhibiting much interest in the procurement of agricultural seeds, and suggests that American producers have an opportunity to introduce their products. He writes:

In this province the Chinese government is examining into the question of utilizing foreign agricultural seeds. The same is true of other provinces. Letters addressed to the viceroys in Chinese would no doubt receive consideration. The governor-general at Mukden informs me that he is very much interested in this subject, and is anxious to obtain various new varieties of seed suitable for the southern Manchurian climate, which, from an agricultural standpoint, is somewhat similar to Utah. Through the Japanese agricultural adviser, Sojiro Yokoyama, new varieties of grass seed are now being ordered from Japan for lower Manchuria. Many of the Japanese plants and seeds suitable for a mild, damp climate do not thrive in the dry climate that prevails in some sections of Manchuria. American beet seeds are to be extensively experimented with in Manchuria next season.

The new agricultural college at Chinanfu, province of Shangtung, is in charge of S. Yatsui and other Japanese agriculturists, and American seed houses may deem it worth while to communicate with the parties in charge of institutions of this nature as well as advisers to viceroys and governors-general in agricultural matters, etc.

California Seed Growing.

A reputable Santa Clara valley newspaper says it was a man by the name of Haywards, from Rochester, N. Y., who was the father of seed growing in California. He experimented here in 1874 in his back yard with onions and sweet peas. The result was so favorable that the following year R. W. Wilson, also of Rochester, set out some 20 or 30 acres in onion, lettuce, beet and carrot. The annual output 15 years ago was about 10,000 pounds, but it has since grown to an average annual crop of 400 tons, 800,000 pounds of onion seed and 750,000 pounds of sweet pea seed, giving present employment in this industry, and other seed growing, to over 1,500 men. And this is not all, for many more ranches are used exclusively in the growing of sweet peas for cut flowers.

JESSE WHITE.

What is the Function of an Invoice.

An action was raised in the court of session at the instance of Fotheringham & King, nurserymen, seed and potato merchants, Dumfries, against C. E. Anderson & Son, Limited, potato merchants and seed growers, Old Station road, Coupar-Angus, for £100 as the price of 5 tons Twenty Century potatoes, at £20 per ton, sold to them in October, 1904. The sale was made at National Potato Society's show at the Crystal Palace, London, to be delivered free on rail at Dumfries station up to the end of December last, but the delivery was postponed by agreement, as defenders had not disposed of the potatoes in December. On March 3 pursuers intimated that they proposed to load the potatoes on the following day, and this was done. At defenders' request they were consigned to Coupar-Angus, where they arrived March 6. It was an essential part of the bargain, defenders say, that the potatoes, which were of a new variety were guaranteed as pure and true stock; but an invoice was sent with them which contained the following clause: "Fotheringham & King give no warranty, expressed or implied, as to description, quality, productiveness, or any other matter, of any seeds or roots they send out, and they will not in any way be responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned." As defenders considered that this was directly at variance with the terms of the contract, and in breach of the warranty given, they returned the potatoes on March 7, intimating to pursuers that they rejected them; and they pleaded that the contract was at an end.

Pursuers explain that by a clerk's mistake the invoice was filled up on a printed form containing in print the stipulation quoted, which is in general use in the seed trade, and occurs as a matter of form upon most of the invoices sent out of their office. It was not intended to vary, and did not and could not vary, the terms of the contract which had been entered into; and as soon as defenders took exception to the printed stipulation a fresh invoice was sent, referring only to the terms of the contract note of October 19, 1904, which stated that the potatoes were "guaranteed true stock." They say that the real reason for defenders' refusal to pay for the potatoes was that they had fallen in price since the date of the purchase, and they had made repeated overtures to pursuers to be released from their bargain, which the latter refused to cancel.

Lord Ardwall in July last gave judgment in favor of the pursuers (Messrs. Fotheringham & King). The defenders reclaimed against the lord ordinary's decision, and the appeal was heard by the judges of the first division on Saturday, when their lordships adhered to Lord Ardwall's judgment. Their lordships pronounced the following interlocutor: "Edinburgh, June 16, 1906. The lords having considered the reclaiming note for the defenders against the interlocutor of Lord Ardwall, dated July 8, 1905, and heard counsel for the defenders, adhere to the said interlocutor. Refuse the reclaiming note and decern. Find the pursuers entitled to additional expenses since the date of the interlocutor reclaimed against, and remit the account thereof to the auditor to tax and to report. Dunedin, I. P. D."—Horticultural Trade Journal, June 27, 1906.

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester N. Y., Sec'y.
Thirty-second annual convention, Detroit, Mich., June, 1907.

PROF. H. HAROLD HUME has returned to Florida to become associated with G. L. Taber, whose nursery business at Glen St. Mary has for a quarter of a century enjoyed the confidence of the southern trade.

, WEST CHESTER, PA.—The Morris Nursery Co. has applied for incorporation papers, under the direction of Geo. Achelis, Peter A. Keene and Martha G. Lear. This extensive nursery has for years been known as the "Morris Nursery," having been started by the late Paschall Morris, but carried on by Geo. Achelis for the last 25 or 30 years. It has very extensive property, many farms and lots hereabouts being leased and planted with trees, etc. The incorporation is for the purpose of extending the business.

Plans for Cincinnati Park System.

McAllister & Co., landscape gardeners of St. Louis, have been awarded a contract to prepare plans for the great public park system to be inaugurated in Cincinnati. They will receive $5,000 for their plans, which must be completed by January 1, 1907. The available cliffs and hillsides about the city will be transformed into swinging gardens, with winding pathways. Scores of public playgrounds will be mapped out. The park system when completed will cost millions of dollars and will make Cincinnati one of the most beautiful cities in the world.

Government Appraisals on Imports.

Nursery stock importers and growers are much perturbed over the constantly increasing conflicts with the United States customs authorities regarding the values to be placed on entries for dutiable purposes. Under the tariff regulations customs officers are required to levy an ad valorem duty on nursery stock and kindred lines on "the actual market value and wholesale price of the merchandise at the time of exportation to the United States."

This requirement works a hardship on the buyer of foreign products for the reason that, strictly speaking, there is no "foreign market value" for most of the importations of this kind. In this respect, nursery stock differs from many other classes of imports. Among the nurserymen of Europe there are as many as 20 different values placed on identically the same article.

It is probable that an appeal to the treasury department will be made, asking the restoration of a former practice whereby importers were advised by the government what values would be accepted by appraising officers as foreign market value.

A rule of this kind, importers believe, would put an end to existing differences and save thousands of dollars now paid out in extra duties and penalties. It is said that the treasury department discontinued the practice of giving information because the administration reached the conclusion that it was no function of the government to advise importers how to invoice their goods.

As matters stand at the present time, however, importers are wholly at sea as to what prices will be received by the appraising officers as correct foreign market value.

Saves Many Times
ITS PRICE.

$2.00

Postpaid to any address.

THE AMERICAN FLORIST COMPANY'S DIRECTORY saves many times its price to every one who catalogues or circularizes the trade. Fully revised to date of publication, it puts the mail only to live names, avoiding waste of postage and printed matter, time and labor.

Contains 476 pages, lists of Florists, Seedsmen and Nurserymen of the United States and Canada by states and towns, also alphabetically; firms that issue catalogues, foreign merchants, horticultural societies and much other up-to-date information which makes it a reference book of daily utility wherever a wholesale trade is done.

R. DREYER, WOODSIDE, L. I., N. Y.

MABELLE, New Pink Carnation for 1907.

Color—A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson. Unlike most pinks, the brightest sun does not injure the color. Size—3 to 4 inches in diameter when established. Odor—Pleasing but not strong. Stems Invariably strong but always graceful, ranging from 12 to 30 inches during the season. Habit etc.—A very quick, active grower, making specimen plants in a short time, even from late cuttings. On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start. Productiveness Prodigious is the best word we know of to use here. It is the most incessant bloomer early and late we have ever grown. Stock limited. Delivery January 5 to 10 and later. Price, $12.00 per 100, $100.00 per 1000.

Araucaria Excelsa

The Best of All Decorative Plants Nature Produces

OUR SPECIALTY.

Every man in business and life to be successful must adopt one thing as his specialty and that specialty, whatever he select, of whatever nature it may be he must guard, study and push to such an extent that it not only benefits himself but he must conduct it so that everyone who seeks his aid service or his article, which he advertises or practices, will share a slice of his activity and prosperity. I made the importation and cultivation of Araucarias as a special study in my life. The figures below will show my success in business: In the first year I commenced with an importation of 250. In the eleventh year now, 1906 my importations have grown up to 6,000 (come and see it), and on account of the Araucaria growing yearly more in favor by the plant consuming people all over the country, as a much admired decorative plant for the parlor, bed, dining and sitting room, stores, hotels lawns and porches the outlook will be for an importation at least of 8,000 to 10,000 in spring of 1907. To secure this vast amount for 1907 I am now on the ocean, per steamer New Amsterdam, leaving Hoboken Aug. 15, striking for Belgium, making contract for next year 1907. I also shall at the same time bring over with me a large lot of choice Azalea Indica and Palms, etc., for Christmas and Easter flowering. No money will be spared in obtaining for my customers the cream of the Belgium greenhouses only.

Please note lowest prices now going on for August and September:

Araucaria Excelsa.

12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old. $ .50
12 to 14 in. high, 5½-in. pots 3 to 4 trs., 2 yr. old. .60
16 to 18 in. high 5½ to 6 in. pots, 3 to 4 trs., 3 yr. old ..... .75
18 to 20 in. high, 6-in. pots, 5 to 6 trs., 4 yr. old. 1.00
20 to 24 in. high 6-in. pots 5 to 6 trs., 4 yr. old. 1.25
36 to 50 in. specimen, 7-in pots 6 yr. old, $2.50 to 3.00

Araucaria Compacta Robusta, have 1000 of them, never were so nice as this year. Plants are as broad as long from 12 to 20 in. in height, 3 to 4 perfect tiers, 20 to 30 in. wide across from one tip of tiers to the other, 3, 4 and 5 years old 6 to 7-in. pots $1.25 $1.50 $1.75, $2.00, up to $3.00 each.

Araucaria Excelsa Glauca, are perfect jewels in shape and size: their beautiful green-blue tiers make them of such a striking appearance that everybody seeing them must fall in love with them on sight, and cannot help it. Plants, 6 to 7 in pots, 3, 4 and 5 perfect tiers 15 to 25 in. in height from 15 to 30 in. across, $1.25 $1.50, $1.75, $2.00 to $2.50 each.

Please bear in mind these mentioned varieties are the cream of Belgium importations. We have thousands of them: can meet all demands.

By Aschmann, in Philadelphia. I bought
An Araucaria a pet for our little girl—
Now we have two pets the pride of our thought
The little girl so sweet a head full of curls.
And the Araucaria with their everlasting green—
A more joyful home you never have seen.

GODFREY ASCHMANN, Importer and Wholesale Grower of Pot Plants, 1012 Ontario St., PHILADELPHIA, PA.

No "Baiting" Advertising Rates.

WE have received several requests lately to insert trial advertisements free of charge "as other trade papers offer."

We wish to state that

THE AMERICAN FLORIST

has nothing to offer free of charge or at cut rates. We have no privileged customers.

We give advertisers full and overflowing value, and that is all any honest advertiser needs.

Advertisers are paying double for so-called cheap advertising in useless correspondence.

THE AMERICAN FLORIST

readers are buyers who pay their bills.

American Florist Company

Kansas City.

MARKET CONDITIONS.

Supplies of stock remain practically as reported last week. Roses continue to improve in quantity and quality. Carnations are too poor to be considered. Asters are everywhere and are a glut on the market. Some very good stock is to be had, but much of the common grade is left over every day. While there has not been any marked increase in business the past week there is a more optimistic feeling caused by the approach of the season when we all know there will be "something doing."

QUEER BUSINESS METHODS.

This city has, I think, the reputation of being one of the best flower markets in the country, yet it has some peculiar conditions which may or may not be due to local causes. From time to time articles have appeared in the trade papers for and against the sales of cut flowers in department stores, and the question of a benefit or a detriment is never satisfactorily settled. The same is true of the Greek with his street stand. Much can be said for and against either of these propositions, but they will probably always remain questions upon which there will be differences of opinion. But to the legitimate florist in this city neither of the above-mentioned causes for concern can be compared to the peculiar business (or lack of business) methods, which prevail. Whether or not the association with beautiful flowers dulls our business instincts and makes us less alert than men who deal in the more common products of Mother Earth, the fact is evident that we fail to observe the caution and finished detail that prevails in transactions in other mercantile lines.

The keen rivalry for orders has gone so far that an unknown party can, by the flash of a single large order, establish such a credit, without further backing, as to enable him to underbuy and undersell and demoralize the business generally, much to the detriment of the man who buys in quantities such as he can afford, and who expects to meet his obligations. This was proven here in a most convincing manner during the past season. Again, the retailer is not afforded the protection by the wholesaler as in other lines. Goods have been sent into this city to parties not in the business, and at a price far below any quotations offered to the regular dealer; yet when these goods are refused from the transportation companies the shipper instructs the express agent to give to some retailer, and asks that he sell to best advantage. When taken to task for such methods, the shipper excuses himself with "the stuff was only junk anyway."

Another peculiar condition here is the fact that quite a little stock is sold without regard to its market value. The law of supply and demand is usually supposed to govern the market price of any article, and this is especially true of products of a perishable nature. Here, however, other factors not only make the price, but control the available supply in some cases. Plants that are worth $4 per dozen wholesale are being retailed at 25 cents each. A new variety of roses, for which one retailer pays the grower $2.50 per dozen, is retailed within a block of him at the same price. Friendships that will enable one or two men to profitably retail stock at the prevailing wholesale prices, make conditions such that some salaried positions are to be preferred to the worry and responsibilities of owning a business.

Another feature of the lack of system is the chance for the present day evil of graft. This is shown by the fact that stock is peddled around to the different stores and offered for sale at prices so ridiculously out of proportion to its real value, as to leave no question of how the stock was acquired. The persons most vitally interested seem to be wholly unaware of existing conditions, but it is to be hoped these few lines will enable them to grasp the situation and to remedy the evils, to the benefit of the trade in general.

NOTES.

The fine growing season has been productive of a great crop of amateur gardeners who form a continuous procession to the flower stores trying to find a market for their stock. Owing to the fact that their stock is, in most cases, very inferior, these embryo florists meet with keen disappointments.

The W. L. Rock Flower Co. is doing business under difficulties these days, as their store is in the hands of an army of carpenters, painters, etc. When the improvements are completed this will be the only store in the city using the artificial refrigerating system.

At R. S. Brown & Son's everybody was busy. This firm has made quite a specialty of ferns this season, and has handled them by the thousand. Their chrysanthemums, of which they grow nearly every known variety, are looking very fine.

W. J. Barnes reports everything as satisfactory as summer conditions will permit. Mr. Barnes grows his asters in frames, and just now is cutting some extra fancy stock which finds a ready sale.

"The Rosary will occupy this property" is the wording on a signboard on South Main street. The sign has been there for several months, but the Rosary does not seem to materialize.

John Schneider, who recently opened a new store on Grand avenue, is very anxious to dispose of his interests here, so that he may go to Oregon.

Miller Coster of W. L. Rock's, and wife, who are taking a honeymoon trip through the Rockies are spending a week at Colorado Springs.

V. Anderson, of Chicago, has leased the greenhouses at Forty-seventh and Berlinder boulevard and will grow roses for the wholesale trade.

Arthur Newell has for sale the J. P. Coen place at Lexington, Mo. This is a bargain for some one, as it has always been a money-maker.

There is an excellent opening for some one to grow smilax and asparagus for this market; these items are always scarce here.

"Bargain store methods" was the verdict when a Main street retailer put a wreath in his window marked at 95 cents.

This city is the only city in the United States of its size that can't have a florists' club. Why?

M. E. Chandler has returned from a two weeks' fishing trip to the lakes of Minnesota.

K. C.

Montreal.

BUSINESS IMPROVES.

The dull season is over at last. Many of the people are returning to town and with the reopening of schools business will become normal in a short time. The carnation planting is about done, the probabilities are there will be less planted than last year, but more roses. Chrysanthemums are doing well. Growers are busy at present taking the bud.

NOTES.

The Lachine Horticultural exhibition which was held on August 24 was a very creditable show for a place of the size of Lachine. Many of the Montreal members were there. A somewhat unexpected experience 12 of them had by getting a drive in the police patrol, at its termination. G. A. Robinson who acted as judge fined each ten cents for the driver. C. A. Smith had the misfortune, when picking exhibition apples, of falling from the tree and breaking his collar bone but he was able to attend the opening of the exhibition although all bandaged up like a mummy. He is secretary of the Lachine Horticultural Society.

Frederick G. Todd, landscape architect and manager of the Canadian Nursery Co., has been a very busy man this season. Although only a new concern it has handled thousands of dollars worth of nursery stock this year.

At J. Bennett's they were found busy refilling the big carnation house. The plants are of medium size but otherwise well grown and healthy. His Boston, Scottii and Tarrytown ferns never looked better.

McKenna & Son are greatly enlarging their store which only a few years ago was the largest in this country, but it is found too small now to properly handle the volume of business done within.

LUCK.

Tacoma, Wash.

SUMMER BUSINESS GOOD.

Business in this city has been keeping up very well during the dull months of July and August, and while the quality of cut flowers in this locality is poorer than usual the demand continues very good. The amount of glass being used in addition to the growing establishments in and close to this city is far ahead of any past season and while the city is growing in population at a very rapid rate the chances for abundance of florists' stock are better than ever before. Most of the planting-in of carnations is done and a very favorable start-off seems to be the general report. In the past the things hardest to procure were cut asparagus and smilax but this season's prospects are better.

S. L. HARPER.

COLORADO SPRINGS, COL.—The eighth annual flower show of the El Paso Horticultural Society opened in North park August 22. Five tents had been erected to care for the unusually large exhibits. The exhibits of sweet peas and dahlias were the most striking features. These were located in the main tent. In the adjoining tent were the tea and refreshment tables. In a third were the displays of plants, shrubs and perennials. Two tents were devoted to vegetables.

Palms, Ferns, Etc.

WHOLESALE PRICE LIST.

Bouvardia, field-grown, pink and white ready to plant into bench for winter blooming. $8.00 per 100.

Hydrangea Otaksa, field grown. $1.50 and $2.00 per doz.

Louisville.

BUSINESS GOOD.

Business last week averaged very good, and the month of August as a whole was the best experienced for a good many years. Stock was generally obtainable in adequate quantities, and of satisfactory quality. Roses of fair quality are in good supply, and have a satisfactory demand. Carnations are rather poor in quality. They find a fair demand, and the supply is great enough. Asters seem to be the flower, and have a very satisfactory demand. The quality averages good, and the supply is adequate. Lilium album and L. rubrum can be had in small quantities, and find some demand. Such outdoor stock as phlox, rudbeckias, hydrangeas, etc., is becoming scarce, and is greatly missed. Other stock can be had in satisfactory quantities. Green goods are in fair supply.

NOTES.

The next meeting of the Florists' Bowling Club will be September 11, the alleys to be announced later.

Jacob Schulz has been displaying some philodendron blooms, which have proven very attractive.

Visitors: Martin Reukopf, of H. Bayersdorfer & Co., and E. J. Fancourt, representing S. S. Pennock, Philadelphia, Pa., and a representative of the A. L. Randall Co., Chicago. F. L. S.

San Francisco.

That there is more than 100,000 not here now that went to bed in this city on the night of April 17, is not disputed. But, according to a number of prominent florists, none will be more regretted than that of Wm. J. Dingee, an old-time resident, an active member of Golden Gate park commission and a flower-lover often seen in the park with superintendent McLaren as referee on any point contemplated by the superintendent for any beauty spot to be added here or there. It is said by florists here that Mr. Dingee has never been seen without a buttonhole bouquet, and that he seldom passes a flower stand without stopping to purchase a fine bunch of flowers. Recently in the San Francisco trade news column of THE AMERICAN FLORIST reference was made to the choice blooms grown in Mr. Dingee's home conservatories; that he was reared in the West Grove, Pa., nurseries that are still advertised in this journal in the name of the Dingee & Conard Co., and incidentally that he had just then sold for $11,000,000 his controlling interest in the Oakland water supply reservoirs. The reliable news this week is that Mr. Dingee has bought for upward of $1,000,000 a palatial residence numbered 858 Fifth avenue, New York, located between the Yerkes and Gould houses, and that he will depart for this new home within the next few weeks.

Gutters, Jennings, improved iron gutters. Diller, Caskey & Co., Sixth and Berk Sts., Philadelphia.

INSECTICIDES.

Insecticides, tobacco paper, 24 sheets, 75c; 144, $3.50; 288, $6.50; 1,725, $35.10. Nico-Fume Liquid, pint, $1.50; ½ gal., $5.50; gal., $10.50; 5 gal., $47.25. Kentucky Tobacco Product Co., Louisville, Ky.

Tobacco dust and stems. Swisher Bros., Newark, O.

Fumigating Supplies, vaporizing pans for tobacco extracts, improved. Diller, Caskey & Co., 6th and Berk Sts., Philalephia.

Fumigating Supplies, tobacco dust for fumigating. Edwin L. Koppelman & Co., 31 Pine St., New York.

Fumigating Supplies, tobacco powder and stems. The H. A. Stoothoff Co., 117 West St., New York.

Insecticide, Nicoticide, Bug Killer, the best bug killer and bloom saver. P. R. Palethorpe Co., Louisville, Ky.

Insecticides, Carman's Antipest insecticide and fungicide, $1.50 per gal. Perfection Chemical Co., Flushing, N. Y.

Wilson's Plant Oil for all kinds of plants. In 4-oz. to 1-gal. sizes. Andrew Wilson, 437 Springfield Ave., Summit, N. J.

LAWN MOWERS.

Lawn Mower. The Clipper, lawn mower, No. 1, 12-in., $5; No. 2, 15-in., $6; No. 3, 18-in., $7; No. 4, 21-in., $8. Draft, money order or reg. letter. Clipper Lawn Mower Co., Dixon, Ill.

LEAF MOLD.

Leaf mold. A. Schultheis, 19th St. and 4th Ave., College Point, L. I., N. Y.

MASTICA.

Mastica, for glazing greenhouses. F. O. Pierce Co., 170 Fulton St., New York.

METAL DESIGNS.

Metal signs, send for prices. A. Hermann, 404-12 E. 34th St., New York.

MISCELLANEOUS.

Engravings, best engravings and illustrations of every description for catalogues. Send for estimates. Globe Eng. & Elec. Co., 427 Dearborn St., Chicago.

Printing, large runs of catalogues a specialty. Write for figures. Regan Printing House, 89-91 Plymouth Place, Chicago.

Florists' overdue accounts and bad debts collected by the National Florists' Board of Trade, 56 Pine St., N. Y.

PAINT, PUTTY, ETC.

Paint, Ideal Greenhouse Lead; Special Greenhouse Putty. Lord & Burnham Co., 1133 Broadway, N. Y.

Paint, Putty, etc. H. M. Hooker Co., 59 W. Randolph St., Chicago.

Paint, Putty, etc. The Jas. H. Rice Co., 80-82 Wabash Ave., Chicago.

Putty, Twemlow's Old English Glazing. Hammond's Paint and Slug Shot Works, Fishkill-on-Hudson, N. Y.

PIPE, FITTINGS, ETC.

Pipe, iron fittings, etc., galvanized iron sash hinges, screw eyes, screw hooks, U bolts, galvanized iron buckles and wires. Fittings for purlin and ridge supports. Foley Mfg. Co., 471 W. 22d St., Chicago.

Iron Fittings, patent iron bench fittings and roof supporters. Diller, Caskey & Co., 6th and Berk Sts., Philadelphia.

Pipes, valves, fittings of all kinds. Chicago House Wrecking Co., 35th and Iron Sts., Chicago.

A Bargain, 4-in. cast iron pipes, 5 feet lengths at 12c per foot. C. C. Pollworth Co., Milwaukee.

Iron Fittings, etc.; send for prices. Lockland Lumber Co., Lockland, O.

POTS, PANS, ETC.

Pots, standard flower, 1½ in., $2.77 per 1,000; 2-in., $3.33; 2½-in., $3.88; 3-in., $5.27; 3½-in., $6.10; 4-in., $7.77; 4½-in., $10; 5-in., $13.60; 6-in., $22.20; 7-in., $4 per 100; 8-in., $6; 9-in., $8.88; 10-in., $13.33; 12-in., $22.22; 14-in., $38.88; 16-in., $66.66; 20-in., $1.25 each. Azalea pots and bulb pans same price. 2x2½ in. rose pots, $3.50 per 1,000. A. F. Kohr, 1521 N. Leavitt St., Chicago.

Pots, standard, seed pans, cut flower cylinders, hanging baskets, lawn vases, etc. Hilfinger Bros. Pottery, Ft. Edward, N. Y.

Pots, standard flower pots. The Whildin Pottery Co., Philadelphia, Pa.; Jersey City, N. J.; Long Island City, N. Y.

Pots, before buying write for prices. Geo. Keller & Son, 361-63 Herndon St., near Wrightwood Ave., Chicago.

Pots, red standards, full size and wide bottoms. Detroit Flower Pot Mfy., 490 Howard St., Detroit, Mich.

Pots, pots of all kinds. A. H. Hews & Co., No. Cambridge, Mass.; Long Island City, N. Y.

Pots, red standard, azalea pots. The Keller Pottery Co., 213-223 Pearl St., Norristown, Pa.

Pots, red standard. Paducah Pottery Co., Paducah, Ky.

Pots, all sizes. Ionia Pottery Co., Ionia, Mich.

Pots, Syracuse red, Syracuse Pottery Co., Syracuse, N. Y.

Pot hangers, Kramer's $1 doz. by exp., $1.25 by mail. I. N. Kramer & Son, Cedar Rapids, Ia.

PUMPING ENGINES.

Pumping Engines, two streams of water for 1 hour cost 2 cents if you use a Standard pumping engine. The Standard Pump & Engine Co., Cleveland, O.

RAFFIA.

Raffia, samples free if you mention the American Florist. Large assortment of colors. R. H. Comey Co., Camden, N. J., 810-24 Washburn Ave., Chicago.

SEED CASES.

Seed cases, Heller's mice proof. W. C. Heller & Co., Montpelier, O.

STEAM TRAPS.

Steam Traps, the Standard return steam trap has no equal for its simplicity of working. E. Hippard, Youngstown, O.

Steam traps, Morehead Return. Morehead Mfg. Co., 1047 Grand River Ave., Detroit, Mich.

SUPPLIES.

Supplies, milkweeds, wire designs, cut wire, all kinds of letters, immortelles, cycas leaves, sheaves of wheat, ribbons, corrugated boxes of all kinds. Henry M. Robinson & Co., 8-11 Providence St., Boston, Mass.

Supplies, cape flowers, cycas leaves, metal designs and all florists' supplies. A. Herrmann, 404-12 E. 34th St., New York.

Supplies, importers and manufacturers of florists' supplies. L. Baumann & Co., 78 Wabash Ave., Chicago.

Supplies, importers and manufacturers of florists' supplies. Reed and Keller, 122 W. 25th St., New York.

Supplies, wire designs, etc. The Cleveland Cut Flower Co., 215 Huron road, Cleveland, O.

Supplies and novelties of all kinds. J. Stern & Co., 1928 Germantown Ave., Philadelphia.

Supplies of all kinds. E. F. Winterson Co., 45 Wabash Ave., Chicago.

Supplies, wire designs. Pittsburg Florists' Ex., 228 Diamond St., Pittsburg, Pa.

Supplies, flower baskets, novelties. Riessner Bros., Lichtenfels, Bavaria.

Supplies of all kinds. S. S. Pennock, 1610 Ludlow St., Philadelphia.

Supplies of all kinds. Barteldes Seed Co., Denver, Col.

TOOTHPICKS.

Toothpicks, wired, $1.50 per 10,000 $6.25 per 50,000. W. J. Cowee, Mfr., Berlin, N. Y.

VENTILATING APPARATUS.

Ventilators, the Standard ventilating machinery; original machine with self-oiling cups, most powerful, least complicated, very compact. E. Hippard, Youngstown, O.

Ventilators, The Advance Ventilating Apparatus. Write for estimates and circulars. The Advance Co., Richmond, Ind.

TWEMLOW'S
Old English Glazing Putty
SEMI-LIQUID,

For Bedding Glass in Sash or for Filling Cracks or Seams in Roof Joints or Frames of Greenhouses or Hot Beds.

THIS PUTTY

Is used in Machine or Bulb.

If too thick for bulb, thin with a little Pure Linseed Oil, boiled.

So thinned, it can be brushed into any crack or leak, making a solid filling.

THIS PUTTY

Makes a solid bed, impervious to moisture, and holds glass in its place, and will stop any crevice or fault.

When once set on dry wood it does not leave.

Manufactured in the United States only by

HAMMOND'S PAINT & SLUG SHOT WORKS,
FISHKILL-ON-THE-HUDSON, N. Y.

THE LOW PRICE HEATING PLANTS

The Chicago House Wrecking Co. is in position to offer you an interesting proposition for furnishing you with a heating plant at a saving of at least 30%. Send us a sketch of your houses with preferred location of the boiler, the points of compass and the desired night temperature for zero weather, and we will gladly submit you an exact detail quotation of all material required to install the plant. We have ***heaters*** and ***boilers*** of every kind, both new and rebuilt. We have always ou hand a large number of rebuilt boilers suitable for greenhouse heating. Our stock embraces ***fire box boilers, horizontal tubular boilers, Kroeschell boilers, cast iron sectional boilers, Erie City economizers*** and other types

We can save you considerable money on ***pipe, valves*** and ***fittings;*** also on ***doors, glass, sash*** and everything needed in the construction of your buildings.

Ask for our Special Catalogue No. 47.

CHICAGO HOUSE WRECKING CO.,
35th and Iron Streets, CHICAGO.

Florists' Forcing Bulbs and Roots.

Copyright 1906 by the American Florist Company.

I—LILIUM HARRISII.

Acknowledged queen of bulbous flowers is the lily, and among the lilies the Bermuda grown Harrisii claims preeminence. It is this well defined type which has given impetus to the widespread and extensive cultivation of lilies, as witnessed to-day. Its introduction years ago marked the beginning of a new epoch in lily culture. Old time hit-or-miss methods gave way to systematic, closely timed forcing. The growing of lilies is now one of the most important features of commercial floriculture, with Lilium Harrisii still in the front.

The bulbs are among the first to arrive, usually due here in August. If wanted for early forcing no time should then be lost in having them planted. They are graded into several sizes, and whether the small or larger bulbs prove most profitable to florists is still an open question. While some growers, probably most of them, prefer the 5 to 7 inch size, others use none but the 7 to 9 inch grade, claiming that the large bulb can be depended upon as being the best matured and therefore the surest to bloom. It may be set down as a rule that for the general run of trade small sized bulbs give entire satisfaction; for high grade stock in potted lilies the larger should be chosen.

The smaller bulbs are planted into 5-inch pots, the large ones into 6 and some even into 7-inch pots. If, at the time of planting, room is scarce or the grower believes it to be of advantage otherwise, the bulbs might first go into 4-inch pots, to be transplanted into a larger size later, after a start in growth has been made. This practice has fallen into disfavor with growers and is now generally considered a waste of time and labor. However, in the starting of very large bulbs, a midway shift deserves commendation.

As regards the soil to be used in potting there is no need of being over particular, since lilies do well in almost any good soil. Three parts of nice garden loam and one of well decayed cow manure or that from spent hotbeds, well intermixed and broken up, is as good a soil for the purpose as any. Fresh or green manures should not be made use of in preparing the mixture. The bulbs are set deep enough to allow nothing but the extreme tip to be visible. A frame outdoors is the place for the pots.

After a thorough watering, which will firmly settle bubs and soil, a covering, in a layer of an inch or more in thickness, of earth, sand or rotted manure is spread loosely over the pots to prevent rapid drying out. This covering is removed when top growth has started. Before this shows, another good watering may become necessary. An examination of the pots occasionally will tell, and it is always best to make sure on this point. The sashes, at this stage, are of little use, only in long continuing spells of heavy rains they would prove of service in carrying off the water. They should then be raised high enough all around to invite the free circulation of air above the pots.

When top growth shows and after the covering has been removed, the most advanced of the lilies may be taken to the greenhouse for very early forcing, first of all making sure, that root formation is well under way. A lily, backward in top growth, but with an abundance of roots holds out a greater assurance of success in actual forcing than one showing a well advanced crown but no roots, a condition which in most cases is evidence of faulty treatment. A light shading for a week or so, after being brought into the house, will prove of benefit to the earliest lots. Later on this will not be needed, but instead an increased amount of moisture at the roots and overhead. Plenty of light and ventilation, daily syringings and regular tobacco fumigation will promote a healthy and rapid growth. In a night temperature of about 65° a goodly percentage of these early started will come into bloom by the latter part of November, most of them just in time for Thanksgiving day.

A somewhat less severe course in forcing, about 5° lower right through, will lead to a timely finish of the stock

intended for the great winter holidays. High pressure forcing should only then be resorted to, when a seemingly backward lot of lilies must be brought out for Christmas or some other festive occasion, and then only when they have already set their buds. A night temperature of 75°, a heat which sound and well rooted lilies will stand without harm, should nevertheless be considered the limit. Harrisii lilies for the general mid-winter and early spring trade are planted any time from September to November. The pots are kept in outdoor frames, protected against frost, until the bulbs are rooted, when they are removed to the house in successive batches and forced in a moderately high temperature. The forcing of Bermuda lilies for Easter should begin from December 15 up to January 10, all depending on whether that holiday is early or late.

E.

Influence of Artificial Light on Plants.

Paper read by John Craig, Professor of Horticulture, Cornell University, Ithaca, N. Y., before the Acetylene Association, July, 1906.

Three types of artificial light have been investigated in their relation to plant growth since 1861. It was in this year that Hervé-mangon, a Frenchman, studied the effect of electric light on plant growth. He proved that electric light could produce chlorophyll and was capable of causing heliotropism. Dr. Seamons, of England, carried on a comprehensive series of experiments in 1879, '80 and '81, during the course of which he demonstrated the injurious quality of the ultra violet rays. He concluded that a 1,400-candle light about ten feet above glass, under which the plants were grown, was about half as efficient as sunlight.

Déherain continued experiments with arc light in 1889, using a 2,000 naked candlepower. He found the unprotected light injurious, but he also found that the harmful rays could mostly be eliminated by using clear glass. His studies did not suggest that there was a promising field for the exploitation of electric light in forcing-house work.

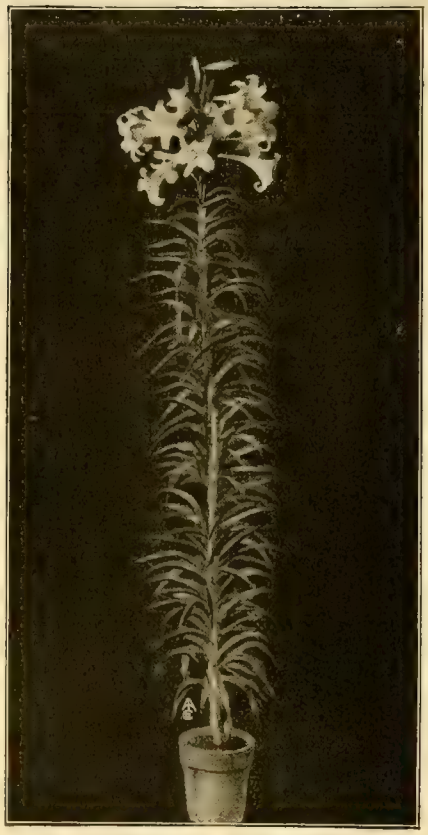
Studies in electric light, in its relation to plant growth, were instituted at Cornell experiment station by Bailey in 1891 and continued for three or four years. The results of these investigations have been set forth in Bulletins 30, 42 and 55. The results were conflicting; some plants were benefited, while others were injured, without regularity or apparent reason. The conclusion was reached that electric light promoted assimilation, hastened growth and maturity; that periods of darkness are not necessary to plant growth; and that it might sometimes be used with profit in certain branches of forcing-house work.

Electric light as a stimulating agent has not been generally adopted by gardeners or florists. Its use is exceptional. At the third annual meeting of the Society of Horticultural Science an interesting paper was presented by Professor Close of the Delaware experiment station on the results of his experiments with the Cooper-Hewitt mercury vapor light, in which he showed the failure of the light to maintain plant growth for any considerable length of time, and also showed the remarkable modification of form which occurred under exclusive illumination of this kind.

The writer has been interested in acetylene as an illuminant since 1896, when he was instrumental in bringing added cheer and comfort to the occupants of the rambling Canadian farm homes where his growing days were enjoyed, by replacing the numerous kerosene lamps with natty acetylene burners, which have since then continued to act as an important factor in country life.

ACETYLENE APPROXIMATES SUNLIGHT.

The discovery of this gas occurred in 1836, but it was not officially christened



Lilium Harrisii.

until 1862. It had no commercial or economic standing until 1892, when a new method of manufacture was discovered at the works of Thos. Wilson, Spray, N. C., by Messrs. d'Chalmont and Professor Morehead. The composition of the light rays is the point which directed attention to its possible use as a growth stimulant. Acetylene more nearly approximates sunlight in its make-up than any other artificial illuminant used. It is composed of the same colors and in very similar degrees of intensity. As for color values of the acetylene rays, let 1 equal the value of each color of sunlight, and we have the following comparison by Münsterberg:

	Sun.	Acetylene.
Red	1	1.03
Yellow	1	1.02
Green	1	.71
Blue	1	1.46
Violet	1	1.07

Indigo and orange are not given. In electric light studies it has always been found that the chemical ultra violet rays were the injurious factors in that illuminant. In the case of the acetylene, the ultra violet rays are practically absent, although blue and violet are as strong or stronger than they are found in electric light.

THE EXPERIMENTS AT CORNELL.

The methods of conducting experiments with acetylene on plant growth at Cornell university were to add the acetylene illumination to the day light illumination by turning on the former after twilight fell. We endeavored to make comparisons on the influence of this light under different conditions, so that a warm, a medium and a cool house were used.

Temperature of warm house, 60 to 65° at night; soil area, 235 square feet; 410 candlepower; five feet from ground.

Temperature of cool house, 45 to 50° at night; soil area, 129 square feet; 350 candlepower; three feet from ground.

Temperature of medium house, 50 to 55° at night; 100 square feet; 270 candlepower; two feet from bench.

I have pleasure in acknowledging valuable assistance from the following firms, who furnished acetylene generators: Radiant Acetylene Generator Co., Canandaigua, N. Y.; Monarch Acetylene Co., Buffalo, N. Y.; Davis Acetylene Generator Co., Elkhart, Ind.; Sunlight Gas Machine Co., New York.

From the following houses, who furnished burners and other fixtures: W. M. Crane Co., New York; Drake Acetylene Burners & Supply Co., Cleveland, O.; State Line Co. and American Lava Co., Chattanooga, Tenn.; J. B. Carroll, Chicago, Ill. Finally the experiments were made possible by the generous aid of the Union Carbide Co., which supplied practically all the carbide used, about two and one-half tons. American Carbolite Co. co-operated, but the carbide arrived too late for use in these experiments.

I should make it clear at the outset that while the main features of the experiments were planned and directed by the writer, the execution of the details, the making of the daily records and the compilation of these records were carried out by M. J. Iorns, who undertook the task as a major problem for a Ph. D. degree in the department of horticulture. The investigation covered two university years.

Scope.—The lights in two houses were run nearly 5,000 hours, during which time something over 2½ tons of carbide were used. In making the investigation, 150 plant forms, embracing 25 families, 50 genera and 65 species were employed.

GENERAL RESULTS.

Influence on top growth for culinary use: Most of the salad plants were studied. Lettuce, parsley and spinach were considerably hastened. The seeding period was also accelerated. The plants under acetylene were crisper and apparently more succulent than those grown under sun alone.

PLANTS GROWN FOR FOLIAGE.

Coleus.—The vigor of the plant was increased, but no other marked change, either as to color or consistency of foliage, was noted.

Asparagus Sprengeri and plumosus.—Very little, if any, difference was observed between the plants in sun and

those in acetylene. Such difference as was noted was in favor of the acetylene plants.

Begonias, rex and tuberosa.—With both types the vegetative growth was considerably stronger under acetylene than under sun alone, but in most cases the flowering period was materially delayed. This might be an advantage in the case of the rex type, but would be a disadvantage in case of the tuberous varieties grown primarily for flowers.

Cobœa scandens.—This produced 15 to 20 per cent more vine under acetylene than under sun alone. No other modification was observed.

Ferns.—These did not show any marked difference, except in the matter of color, which was lighter in the plants under acetylene than those under sun. In these crops and in some of those following, electric light was contrasted with acetylene:

ROOT CROPS.

Leeks.—Here again very little difference was noted between plants grown under acetylene and plants grown under electric light. Both series were a little ahead of those under sun only.

Onions.—Very light differences. Electric, acetylene and sunlight compared. Top growth slightly increased, bottom growth but very slightly affected by either electric light or acetylene. Difference between either electric or acetylene over sun almost inappreciable.

Beets.—Top and root growth practically equal under electricity and acetylene, and the difference between these plants and those under sunlight was so trifling that the use of these artificial lights cannot, in the light of our trial, be commended as an economic proposition.

Radishes.—Under high temperature, that is, in the warm house, the results were slightly in favor of acetylene over electricity or sun. In the cool house the results secured in the dark days of autumn were strikingly in favor of acetylene over the sun. In this house electricity was not used. The plants under acetylene gave more than double the weight of root product and the time period was increased 62 per cent and the maturing period shortened approximately 20 per cent. The results with radishes were not uniform throughout. Crops harvested later in the season, when the sun approximated its maximum, showed less difference between acetylene and sun than those harvested when sunlight was at a minimum as regards intensity. It was also observed that plants on which the acetylene light was applied as soon as the seed was sown became drawn during the seed leaf period. This condition was not observed if the light was not turned on until the true leaves appeared. I am of the opinion that acetylene can be applied to the forcing of this crop with advantage and profit during unfavorable atmospheric conditions.

INFLUENCE OF ARTIFICIAL LIGHT ON PLANT GROWTH.

Cornell experiments on strawberry plants.—Effect of acetylene on two at left.

FRUIT AND EDIBLE TOP CROPS.

Strawberries in the cool house.—Growth increased 25 per cent over those grown under sunlight. Plants ripened fruit 16 days ahead of other plants carried in a similar temperature uninfluenced by acetylene.

Peas.—In both cool and warm houses the effect of acetylene was very marked. There was very little difference in the temperature of electricity and acetylene, both being artificial.

Bush Beans.—In the case of the specifically forcing varieties the results in regard to vine and fruit, both quantity and quality of fruit, were in favor of this artificial light. Acetylene produced the best results, although electric lighted plants were in advance of those lighted by sun only.

Pole Beans.—The results with this crop were conflicting. The effect on vine growth was marked and unquestionable, it being much more vigorous under acetylene and electricity. There was some difference in favor of acetylene in this plant, but less difference than in the case of bush beans. This superabundant vegetative growth had the influence of delaying the time of the maturing of the fruit.

The net result of this experiment, in which electric light, acetylene light and sun light were compared, was that the acetylene lighted plants ripened more fruit, of a larger size, but considerably later than those under the sun only. The vine growth was also greater.

INFLUENCE OF ARTIFICIAL LIGHT ON PLANT GROWTH.

Cornell experiments on narcissus.—Pot on right subjected to sunlight and acetylene.

This was to be expected. The plants under electric light did not produce more fruit than the sun plants, but the fruit averaged somewhat larger in size.

The inference from these results is that acetylene might be used to advantage in the fore part of the season in order to stimulate vegetative growth and make framework for producing fruit. In the latter part of the season, when sunlight increases, the artificial light might be withdrawn.

Cucumbers.—The results, so far as fruit is concerned, are inconclusive. Electric light was not used in this experiment. In the case of the vines, the addition of acetylene lights was a direct detriment. The leaves were smaller and of a less vivid green. The length of vine was about the same in both cases. It is to be remembered in this instance that the temperature of the room was high; that is to say, it was run from 75 to 85 degrees in daytime, with a 10-degree drop at night. Under these forced conditions of growth, acetylene served to be a disadvantage. The additional stimulant was injurious.

VEGETABLE SUMMARY, BY MR. IORNS.

Comparing the results of the different vegetables, we find (1) that with the exception of the cucumbers, all the forms had a decided increase of the foliage parts.

(2) That the time of fruit maturing is variously affected. The strawberries and peas maturing earlier, the tomatoes and pole beans later, and the cucumbers and other forms practically unchanged.

(3) That there is, as a rule, an increase in the amount of fruit, also in size of individual fruits, the cucumber being the chief exception.

(4) That the chief beneficial effects of the light are to make up for deficiency of sunlight, give with few exceptions stronger, more vigorous top growth, and help overcome unfavorable conditions in certain other lines.

(5) That there seems to be a limit in rapidity of growth, beyond which plants cannot be forced at all proportional to the attendant expense. Just what conditions govern this limit or where the limit is in our forcing-house plants, is as yet unknown.

Photosynthetic processes are completed to the point of starch making; root systems increased in the main proportionately with top development.

INFLUENCE ON TIME OF BLOOMING.

Mr. Iorns notes that with three exceptions all forms bloomed earlier under acetylene than under sun alone. Most notable differences are in the case of geraniums. In some cases plants under acetylene bloomed 20 days before those under sun light. In the case of carnations the blooming time was hastened, but the stems were elongated to an injurious extent. Therefore, from the standpoint of hastening the blooming, it is beneficial.

Lilium longiflorum was also greatly benefited. The per cent of gain of plants under acetylene varied from 6 to 15. L. speciosum under acetylene bloomed two to three weeks ahead of those unlighted. In conjunction with either the effect was very marked.

Quantity of bloom.—The influence on quantity of bloom is pronounced. In every case the amount of bloom was increased. In some plants two or three times as many blossoms were produced as in the sun.

Influence of Artificial Light on Plant Growth.

Golden bell buds, under acetylene, one week ahead of others.

Duration of bloom.—Here we have an apparent contradiction. The addition of acetylene shortened the number of days

Influence of Artificial Light on Plant Growth.

Cornell experiments.—Acetylene caused larger plant to flower three weeks ahead of its mate.

which cucumber flowers remained on the vines, but in the case of lily and narcissus the flowers lasted a greater number of days than where only sun was used. This may be due in a measure to the innate character of the flower itself.

GENERAL SUMMARY.

Between 90 and 95 per cent of the plants experiment with responded favorably to the stimulus given by the acetylene light. The remainder were usually negative. There was no uniformity of results within a group of related plants. Lilies, for instance, gave markedly positive results, while some tulips failed to respond entirely.

No markedly injurious results were noted except where plants were growing under optimum conditions. The general influence of acetylene seems to be that of weak or highly diluted sun light.

Under unfavorable conditions of temperature and sun light, acetylene can be used to considerable advantage in stimulating plant growth. It must not be regarded as a magic agent, with which miraculous plant growth may be wrought, but as a supplement or co-operative force to aid the gardener under unfavorable conditions, or at times when natural stimuli must be augmented it promises to be useful. Under such conditions, with certain forcing-house crops, I believe, it can be profitably applied.

In conclusion I would have it understood that I regard these experiments as merely preliminary. There are many questions yet to be answered. For instance, should acetylene be used only in the daytime, during the natural period of plant growth, or on dark days, when the sun light is deficient? What degree of illumination should be employed? If at night, is it best to run a weak light all night or a strong light in order to give a period of rest part of the time?

Why do some plants respond, and others not? What is the fundamental reason? Will the discovery of this reason give us further light in pursuing our investigations?

Deformed Gladiolus Spikes

In further reply to your correspondent's inquiry in THE AMERICAN FLORIST of September 8, on page 314, I would say that the inherent peculiarity of crooked spikes comes from the species G. purpureo-auratus, one of the original wild species of the so-called Lemoine section of hybrids.

Many of the more advanced types of these hybrids do not show this peculiarity at all, and some only under unfavorable weather conditions, to which certain seasons are subject. Aside from the above stated inherent peculiarity, any season of adverse climatic conditions may be expected to cause some of the best and heaviest spike producers to go crooked.

If the early part of the season be warm and humid, with luxuriant plant growth, and sufficient heat to cause the young spikes to droop from this cause, as the conditions of excessive heat relax, the spikes will again turn upwards in their efforts to assume their normal position, but without straightening the crooked stalks.

H. H. GROFF.

CHRYSANTHEMUMS

Cultural Reminders.

Now, that most of the varieties are having the buds taken or are in a state of development, is a good time to give the beds a good mulching. The beds should be gone over first to remove all the weeds and suckers and some of the bottom leaves. Then an inch or two of some good old manure should be put on. A good top-dressing could be made up of about half old horse manure and half fresh cow scrapings, into which has been mixed a little soot or bone meal. The plants should then be given a good watering.

Keep the plants well tied up, and keep down the suckers and lateral shoots. Keep sharply after any insect pests, especially the green and black aphides. The latter is easy to find, but the green aphis is just as bad and harder to locate. It is from now on up to time of blooming that these pests can do the most harm. If first-class blooms are wanted the aphides must not be allowed to get much of a start. Liquid manure should now be applied once or twice a week as the plants require.

G. T.

INFLUENCE OF ARTIFICIAL LIGHT ON PLANT GROWTH.

Cornell experiments on geraniums.—Larger ones had benefit of acetylene.

THE ROSE.

Roses to Date and Their Requirements.

Paper read by John H. Dunlop, of Toronto, Ont., at the annual convention of the Canadian Horticultural Association, at Guelph, August 29, 1906.

The subject assigned me or that I am asked to speak upon is one of considerable magnitude: "A Review of Roses to Present Date and Their Requirements." At first glance it would seem an easy task, but as one analyzes the subject, the first question to confront you is, are all soils alike? Are all conditions similar? Do all growers handle their plants in similar manner? The answer to each of these questions is a positive no. Then in that case the paper will deal entirely with the condition of soil, etc., as existing at my greenhouses and as far as I am able to learn through intercourse with those growing the varieties enumerated and of the forcing varieties grown under glass for cut flowers.

The rose growers have not been as favored as other branches of the profession in the number of varieties put upon the market or disseminated by originators each season. Look at the list of carnations and chrysanthemums; in fact, the number of varieties that have remained permanent or standard forcing varieties have been comparatively few.

There are so many points required in a rose to make it profitable. Probably it is a good grower but the color may not be right. The flower may be too single or too double to open freely. In winter it may have a tendency to be weak stemmed in dark weather or a shy bloomer at the same season. There are so many points to be considered in a forcing variety that there are very few that come up to the requirements of the ideal flower.

Look back for the past 10 years, which is a comparatively short time, and note how many varieties have been introduced with glowing descriptions and how many are grown today. The majority have been tested and found wanting and discarded, as the critical public, to whose taste we cater, are capable of judging the variety and are not slow to detect the weak points. No matter how much we would like to grow them, the patrons of our stores have to be considered and it is the popularity of the variety that we have to look to. But there is a better day coming. A good many of the supposed forcing varieties may have excellent points when grown in the open and may be admirably adapted to outdoor cultivation and I think this is the part that is misleading. Almost all of the new varieties are raised in Europe where the conditions are entirely different and unsuitable to the requirements of this country. But I am sanguine of better things. Have we not men who feel the necessity and have the courage to risk the raising of seedlings who are spending time and money in the endeavor to give us something more and better suited to our requirements who know the conditions, and I am proud to say have achieved success and have overcome obstacles that have appeared unsurmountable?

INFLUENCE OF ARTIFICIAL LIGHT ON PLANT GROWTH.

Cornell experiments on Japanese lilies.—Plant "G" had been etherized.

Have we not John Cook, of Baltimore, who gave us Cornelia Cook and Wootten, Alex Montgomery with Wellesley, E. G. Hill with Gen. McArthur and Richmond? During the past week a visit was paid to this noted establishment and there he has a house 300 feet in length devoted to this years' seedlings, and seedlings of one and two years in limited quantities under extended trial. We should be proud of such men that have the perseverance and skill to devote to this very important branch of our profession.

Of the most recent introductions, and what might be claimed the most important forcing varieties, I would name Richmond, originated by E. G. Hill, Richmond, Ind. This is an American seedling, a cross between Lady Battersea and Liberty. It is a hybrid tea with a much larger percentage of tea blood than most of the hybrid teas, the color an ideal shade of bright crimson, delicately scented, of remarkably free growth and a free bloomer. This variety can be grown successfully with Bride or Bridesmaid, in fact, it is benefited by a few degrees less heat, say a night temperature of 55° suits it better than 58°.

It does not require any particular culture or soil, as it has been grown successfully in both light and moderately heavy soil, but I would recommend a clay loam where it is procurable as I am inclined to think that there is more substance found in the flowers where the heavier soil is used. I would caution growers not to be too liberal in feeding Richmond. It was recommended at time of dissemination to feed it liberally, but as I said before, some soils being stronger and richer than others, caution and care must be exercised in feeding or disaster will be the result. I had a house of this variety last season where the instructions were carried out too closely and the result was that the variety got indigestion and had to be handled very carefully in order to put it in good working order again. There is nothing to be gained in this; better to be cautious with a little underfeeding rather than overfeeding.

Madame Chatenay is a comparatively new variety but has found many admirers. It is of easy culture, being one of the strongest growing teas and easy to force and like Richmond is not particular, as to soil. We have found a temperature of 55° well suited to it. The variety takes well to feeding and in the early spring luxuriates with frequent waterings of liquid manure and a good mulch as the days grow longer. The color is of a soft peach pink on upper side of petal and a lighter shade on under side. It has a delicate perfume.

Killarney is a variety that has been neglected or overlooked. It originated with Dickson, of Belfast, although on the market for some three years its merits were not brought out till a year or so ago where it was grown in different sections in moderate quantities and the value became known. Now it is being largely grown with excellent results as one will note from the reports in the trade papers last season. It is a very free grower and has a fascinating appearance from the fact that the young growth is so showy, being a reddish plum color in comparison with the deep green of the matured foliage. The stems are stiff and erect at all seasons of the year. The bud is pointed and delicately scented and produced in profusion. The color is a deep shade of rose pink although I have seen it very different, in some sections being of a light wash pink. The odor is of the briar. When the hand is passed over the unopened bud it is like the odor of a briar hedge which is always refreshing and appreciated. Similar temperature to Bride and Bridesmaid is best suited to Killarney.

Kate Moulton is a variety that has only been disseminated and in its first year's trial. Its faults, if any, have not been discovered. I had a bunch sent me from Minneapolis, Minn., which arrived in good condition considering the long journey. It is of a soft shade of pink, globular in form and with good stem although the neck was inclined to be weak. Whether that is a fault or not is to be seen. The variety appears to be a good grower.

Wellesley, although on the market a couple of years, has not been grown around Toronto. I had an opportunity of seeing it at Natick, Mass., where it originated and appeared to be a promising variety. The color is a bright shade of medium dark pink of the Bridesmaid type, a good grower and a free bloomer. This is an American seedling raised by that enthusiastic grower, Alex. Montgomery, who is also giving considerable time and thought to the raising of seedling roses. A visit to the Waban Conservatories is always a pleasant and profitable one, where rose growing is a science and everything on the most approved plan.

Gen. McArthur is a variety raised by E. G. Hill, but was not intended for winter forcing, or rather he did not consider it suitable. However, the stock was brought by the Storrs & Harrison Co. and John N. May. This variety was received with considerable enthusiasm, as the list of red forcing varieties was very meager, relying largely on Meteor, which of late has shown considerable deterioration. Gen. McArthur is of a bright cherry red and very fragrant, a free grower and a moderately free bloomer. There is quite a tendency to throw strong shoots which are too heavy for most purposes and are covered with large thorns resembling hardy roses. This variety has been grown successfully in the neighborhood, but most people prefer Richmond and it looks as though Gen. McArthur would be discarded before long. A temperature from 52° to 55° is best suited to it and moderately heavy soil.

Franz Deegan, of comparatively recent introduction, is the best of the yellows eliminating the habit of Perle which is prone to come bullheaded and deformed in dark weather. Franz Deegan opens as freely in midwinter as any season in the year with no deformed flowers. Of an exquisite shade of yellow deepening to a deep shade of orange in the center, a strong grower and continuous bloomer, this is a variety that improves with age as plants undisturbed for four seasons are stronger and produce superior bloom to young plants. This variety is almost immune from mildew and for that reason can be grown where it would not be possible to grow Bride and Bridesmaid, of easy culture. Similar temperature to Bride is suitable for this variety. It enjoys a fairly good feeding. This variety is benefited by being grafted.

Joey Hill, a French variety introduced last season, is of the Perle type in appearance and habit. A soft shade of peach pink, but an entirely different shade from either Sunrise or Sunset in color, being a combination of both. It has long pointed buds and good stems and is the most attractive variety of this color.

Rosalind or English: This variety has not proved itself as good as its companion Richmond. There was a tendency to black spot and the growth was unsatisfactory. The flower is medium in size, of a bright, clear pink Hermosa shade. I expected better results from this variety but found other varieties more satisfactory.

As this is an age of progress and improvement, we are finding new ways and methods of fighting some of the pests that have been very troublesome in the past. Comparatively few growers will content themselves with burning tobacco for the extermination of the green fly. Although the preparations put on the market are comparatively expensive and increase the cost of producing bloom, yet the results are so much more satisfactory that to be up to date, one feels that he should adopt them. There are a number of preparations, viz.: aphis punk, tobakine nico-fume and others. The preparations enumerated I can speak of from experience, having used them. For the best results I find the latter the most effective. It is easily applied and cheaper than the others. These preparations can be applied without injury to the bloom, which is not the case where tobacco is burned.

I find tobakine extract very effective in varieties like American Beauty, which are more subject to the attack of the green fly than some others, that this pest can be exterminated and kept in check where used regularly in the following manner and where steam heating is used: Take an ordinary oil can, fill with the liquid, start at the furthest end and drop on the hot pipes as quickly as possible as the fumes are very sickening and you have to beat a hasty retreat. I well remember on a couple of occasions, when necessity required that I undertook to apply in the manner described. My recollection is not a pleasant one as I had the worst case of seasickness ever experienced along with that giddiness which betokened an overdose of tanglefoot but with a little care this can be obviated. This is also a preventive of thrips when used in this way. A weekly application is sufficient to keep clear of both thrips and aphis.

There is also Campbell's sulphur vaporizer on the market that has helped to keep down mildew when firing ceases. It is an English patent and a trifle expensive but very effective and eliminates almost all of the danger of ignition. We have all had our pet schemes of using sulphur. Some of them have been costly, to wit: when the pan was placed over the coal oil stove and the flame set at what was thought just right to form the vapor from the sulphur on the

ILLINOIS CENTRAL RAILROAD'S GARDENERS AND GUESTS ON INSPECTION TOUR.
In the railroad's station park at New Orleans.

pan and just at that minute called away to attend some duty but on returning a couple of minutes later to our chagrin and dismay, found the pan had taken fire and the sulphur formed that deadly gas so fatal to plant life probably that the whole house was ruined in that few minutes' absence. For this reason I am pleased to know that this vaporizer has reduced the danger minimum. We are using eight of them at present with excellent results. I will not treat of the best houses for rose growing as it is well known that the lightest and airiest are suitable for the purpose, or I might say for the growing of any flower for winter forcing. I hope I have not wearied you with the paper and close with the wish that some benefit may result from its preparation.

Diseased Roses.

ED. AMERICAN FLORIST:—

Under a separate cover I am sending you a plant of the Bride rose with diseased roots. Plants of Bridesmaid are similarly affected. What is the cause and remedy? R.
Indiana.

The Bride rose is suffering from an attack of crown gall, a disease similar to one of the same name which occurs upon apple, peach, pear and other plants. The cause is not perfectly understood, but diseased plants must be destroyed, and the same soil not again used for the cultivation of roses. B. T. G.

Smilax and Roses in Carnation Houses.

ED. AMERICAN FLORIST:—

Please state if smilax and asparagus can be grown in a carnation house, also what should be done to keep mildew off roses which I will attempt to grow in the warm end of the same house.
J. F.

In reply to J. F., smilax and asparagus may be grown in a carnation house, but whether at a profit I cannot say, not having grown them at so low a temperature as is considered the maximum night temperature for carnations, namely 50°.

I would not however hesitate to make the trial if I needed smilax and asparagus to sell at retail prices, but if the product is to be disposed of at growers' wholesale prices I would hesitate because I am afraid it would not pay. What a grower needs who sells his smilax and asparagus at wholesale is to get successive crops as quickly as possible, and to do so requires a minimum night temperature of at least 60° with a rise of an additional 10° during the day time.

To keep mildew off roses, dust the plants at frequent intervals with sulphur and air-slacked lime in about equal proportions, thoroughly mixed by being passed through a fine meshed sieve, about the size of mosquito netting, say about every other day until firing is kept up constantly, after which it might be best to mix linseed oil with the lime-sulphur dust until it is of the consistency of paint when it may be applied to the heating pipes—if either steam or hot water is used—but if the heating is done by furnace then great care will have to be exercised not to allow any sulphur to be put on the flues or terra-cotta pipes as it is likely to ignite and serious damage would be done to nearly all the plants in the house. In that case it would be better to keep on with the dusting process.

After firing is kept up there should be less tendency for the roses to mildew, but as a preventive don't hesitate to apply the lime-sulphur dust occasionally, say once or twice a week.

J. F. does not say what varieties of roses he expects to grow nor what the minimum night temperature it is expected will be maintained at the "warm end of the house." Roses, taking them generally, require a night temperature of not less than 55°. That temperature was considered about right in olden times for Bon Silene and Safrano, also Bride and Bridesmaid, but of late years the latter varieties are being grown successfully in a night temperature of 60°. Temperatures are great factors in the successful growing of most plants, especially does this apply when they are being grown for profit.
EDWIN LONSDALE.

Illinois Central Railroad's Gardeners.

The illustration herewith shows those who participated in the recent inspection tour of the station grounds and gardens of the Illinois Central railroad from a view taken in that concern's station park at New Orleans. The trip occupied six days, August 20-26, covering 4,000 miles of railroad and the gardeners in attendance inspected some 200 station grounds. The tour, which was arranged and carried out by Geo. B. Moulder, the Illinois Central's gardener-in-chief, proved very interesting and of much practical advantage to all concerned. Those shown in the picture reading from left to right are: Noah McMahon, gardener, Springfield division, Clinton, Ill.; A. R. Meade, gardener, Chicago division, Chicago; C. H. Tritschler, chief gardener, North Carolina & St. Louis railroad, Nashville, Tenn.; W. A. Keller, gardener, Louisville division, Louisville, Ky.; Patrick Foy, chief gardener, Norfolk & Western railroad, Roanoke, Va.; August Wagner, florist, Illinois Central railroad, Champaign, Ill.; Frank Brocker, gardener, city parks, New Orleans, La.; Valentine Wickler, gardener, Freeport division, Freeport, Ill.; Geo. B. Moulder, chief gardener, Illinois Central railroad, Chicago; John Gipner, chief gardener, Michigan Central railroad, Niles, Mich.;

A BED OF SCARLET JOOST VAN VONDEL TULIPS.

E. A. Richardson, chief gardener, Boston & Albany railroad, Newtonville, Mass.; H. S. Moulder, gardener, Tennessee division, Fulton, Ky.; H. A. Bodi, assistant gardener, Illinois Central railroad, Chicago.

Patrick Foy, chief gardener of the Norfolk & Western railroad, Roanoke, Va., invited those present to make a similar tour over the railroad with which he is connected, including the Jamestown exposition, next year. The formation of a railroad gardeners' association was discussed on the recent trip and it is probable that such an organization will be formed before next year.

Fall Planting of Dutch and Other Bulbs.

HYACINTHS.—For several reasons it is advisable not to delay preparations for the planting of Dutch and other bulbs for spring and summer flowering. Hyacinths are easy of cultivation if soil and other conditions are satisfactory. Before planting hyacinths the ground should be thoroughly dug and well manured; and good drainage being an absolute necessity for success with hyacinths, it should be attended to without fail. If the soil is stiff it will be well to mix some sand in before planting. The bulbs should be planted about 6 inches deep and from 5 to 6½ inches apart. Care should be exercised when planting that all the bulbs are planted at a uniform depth, otherwise irregularity of growth will be the result.

As hyacinths make roots in the fall and because it is of vital importance to preserve these roots, soon after planting or before frost sets in, a covering five or six inches deep of coarse horse manure, or if that is not obtainable, straw or leaves should be placed over the ground to protect the bulbs from freezing and thawing out. If the ground is left bare the frost will heave the bulbs up, by which action alone the roots will be detached from the bulbs; the covering mentioned will prevent that.

While satisfactory results can be had from planting hyacinths in mixed colors it is not to be denied that beds or borders are always much more pleasing in effect if the colors and even varieties are kept distinct and separate, and it is especially desirable to plant in that way if done for any commercial purpose. It is also more effective to have one large bed or a large number in a border all together, than small detached patches here and there. On some places however where there is only space for a limited number and various kinds of bulbs are desired for spring flowering, mixed colors are a necessity because they are of much more interest than a single variety would be, no matter how good in itself.

TULIPS.—Tulips for spring flowering are in some ways easier of cultivation than hyacinths, but like the latter they do best in a somewhat sandy soil, and although moisture is indispensable to their perfection, drainage of the soil should be considered a matter of importance when planting. The soil should be well dug and worked into a loose state and cow manure mixed in. The bulbs should be planted about 4 inches deep and from 5 to 6 inches apart. The ground after planting should be covered with material the same as advised for hyacinths.

LILIES.—Because lilies are more expensive than most other kinds of bulbs they are usually planted with more of a view to permanency than is attached to the planting of other and cheaper kinds. For that reason and because of their habits of growth and appearance they are very often planted in among shrubs or on borders of shrubberies, also among other perennials and as back rows in borders where other things can be planted to hide the lily stems when they are in no way attractive. The foregoing remarks are of course only pertinent when taken in relation to planting of private places, and in commercial places for the ornamentation of the surroundings. On the other hand when the aim is to produce blooms, lilies require somewhat different treatment. They should be planted in well prepared soil, soil that is rich without very much rank manure, although manure will do no harm in any state unless it comes in contact with the bulb. Plant the bulbs deeply, not less than 10 inches deep, and immediately after planting the ground should be well covered, placing first a layer of leaf mold and well rotted manure, and on top of that place any kind of coarse manure, in all to a depth of 8 to 12 inches. When removing the covering in early spring that portion consisting of leaf mold and rotted manure will be found very beneficial if allowed to remain permanently. In choosing a location for lilies favor one where the plants will be just a trifle shaded from the midday sun. And one that affords the greatest shelter from high winds.

In the following list will be found the greater number of the most suitable for outdoor planting: L. auratum, pure white; L. auratum pictum; L. auratum, rubro-vittatum, pure white with crimson band; L. Canadense, yellow with

TULIP VITELLINA.

black spots; L. Canadense rubrum, crimson spotted with black; L. candidum, pure white, very early; L. Chalcidonicum, scarlet; L. Colchicum, yellow; L. concolor, scarlet with black spots; L. longiflorum; L. Krameri, blush pink; L. speciosum rubrum, white, shaded and spotted with crimson rose; L. speciosum album, pure white; L. tigrinum, tiger lily, orange with black spots; L. superbum, orange petals, tipped red and black; L. tigrinum flore-pleno, double flowering tiger lily; L. excelsum, buff spotted with crimson; L. Martagon, dark crimson with black spots; L. lancifolium rubrum, and L. elegans erectum.

A BED OF TULIPS.

White Joost Van Vondel in center, Keizerskroon in outer circle.

NARCISSUS.—Narcissi are exceedingly good for outdoor planting, both for the effect they produce in beds and borders and their availability for cutting from at a time when very few other flowers are available outdoors. They should be planted in sheltered situations in front of shrubberies and in nooks and corners in the grounds or in the garden. Plant the bulbs in October in good soil, well drained. Do not put manure anywhere near the bulbs. Although the narcissi, like all the other bulbs under observation here, are hardy, yet like these also they should have a covering of litter or leaves from the time they are planted until spring. M.

Notes on Aquatic Plants.

The season has been on the whole a record one for aquatic plants. Established plants of the hardy varieties started with their usual vigor and although the season was backward they were unaffected and flowers were in evidence in due season and quite plentiful until past midsummer.

Many florists use them for window decorations very effectively in New York. A few stores have had some choice specimens of hardy varieties but after the end of July the flowers are much smaller. After two comparatively cool summers and a backward spring this season it looked as though we might experience another cool summer, but those who ventured to plant tender nymphæas and victorias have been well rewarded, as present conditions attest and no brighter or cheerier spot exists in the garden than the water-lily pond.

The season has been unusually wet, necessitating much labor in keeping everything clean of weeds, yet many flowering plants have suffered, notably geraniums and foliage plants such as alternanthera, etc., which have been devoid of brightness and in many instances the color effect has been entirely obliterated. This happily has not been the case with water-lilies and other aquatic plants. The flowers have been brighter and the foliage looked clean after the frequent showers and with the heat of July and August the tender nymphæas and victorias have made luxurious growth and no finer effects are to be seen in floral decoration than the sub-tropical planting of the lily-pond or water garden, and in every case this section of the flower garden has received the least amount of labor and attention. True it is necessary to occasionally pick off a few dead leaves, but there is no back breaking, hoeing, weeding, such as is necessary with flower beds and borders. Not that we can dispense with the latter, but I contend that we can not dispense with the former.

I do not want to convey an impression that weeds will not grow in the lily-pond, for I unexpectedly came across an incident that convinced me of this fact. Prospect park, Brooklyn, has long been noted for its lily-ponds and the fine display of flowers, etc., and being within easy reach I was desirous of seeing the water-lilies. Early in the morning I visited the park by the plaza entrance. To my amazement when I arrived there I beheld nothing but sedge and wild grasses, reminding one of a swampy bog instead of choice and dainty water-lilies. On closer observation I found the large fountain basin studded with small boxes that had been planted with nymphæas and nelumbiums—some boxes containing three plants, three different varieties, but all choked by the wild grass until it appeared that it was the intention to grow weeds instead of water-lilies. A crying disgrace to the Borough of Brooklyn!

How it came about I did not inquire, but I could see very plainly that the boxes had been filled with fresh soil, the same containing hosts of seeds which probably germinated before the soil was covered with water and afterward they took full possession and either for lack of funds or other unaccountable reasons the weeds in the boxes were never pulled out. I do not know if this fountain basin is under the same jurisdiction as the ponds in the park, but these were in a different condition and showed plainly they had been cared for but were apparently rather behind or backward for the season, but the plants were clean, healthy and vigorous with some good specimens of the night-blooming varieties. I found in New York several fountain basins that formerly were planted annually with aquatics quite devoid of any plant, which on the whole was better than a pond of weeds.

A BORDER OF HYACINTHS.

As hardy nymphæas will not endure the strong summer sunshine south of Philadelphia the practicability of using the tender nymphæas is again demonstrated by the existing conditions at the present time, and even north and east of Philadelphia where the season for

the hardy varieties continues longer it is most desirable to plant tender nymphæas especially the day-flowering varieties. I would encourage the planting of the day-flowering varieties, for these are to be seen by many persons who might never see the night-blooming unless through some special effort, as the flowers close early in the morning especially on bright days.

The night blooming varieties are exceptionally good for cutting and are invaluable for decoration either for table or otherwise. The flowers should be cut early in the morning the first day of opening as they close early in the day. It is difficult to tell what buds are right for cutting when all are closed. When the flowers are closed they may be packed closely in shipping boxes where shipping is necessary, using wet paper and damp excelsior to keep them from shifting, when they will travel a long distance. The flowers will sometimes wilt in the hot dry atmosphere of a room, but if they are taken and submerged in water a few minutes they will soon regain their former freshness and last for several hours, or where possible, the flowers might be damped by using a fine sprinkler. Little remains at this season of the year but occasional cleaning of the ponds until it is time to secure stock for the following year.

W. TRICKER.

Sweet Peas in England.

The sweet pea season in England shows signs of becoming unduly prolonged. Although ranking very high in the list of popular flowers it is just possible the public may tire of having sweet peas for home decorations nine months out of the 12 and that is the situation growers and florists are trying to force.

One of our leading growers for early work, C. Engellmann, Saffron Walden, opened the season in January by sending blooms to Covent Garden. The flowers were cut from the Christmas flowering strain raised by A. C. Zvolanek, New Jersey, and they sold at remunerative prices. Engellmann, however, had the field to himself for a couple of months. Next season others are sure to send in early consignments, and this will spell low prices, as the early demand can only be a limited one. He has the advantage of competitors still, as he will introduce several new shades next season, having been hybridizing Zvolanek's strain for two years.

At flower shows sweet peas were never more extensively shown and at every show of note since the advent of April they have been in evidence and will continue throughout September, especially at the northern shows of Dundee and Edinburgh. The National Sweet Pea Society in addition to its London show held a provincial show at Ulverston.

Sports have created no end of trouble through growers putting them on the market before they were fixed, and in some trials 90 per cent were rogues, it being difficult to determine which was intended for the variety named on the label. In National Sweet Pea Society circles there is much talk about introducing drastic measures to prevent similar occurrences in the future, but it is difficult to control. When growers get a sport they want it on the market as soon as possible, knowing full well that two or three of their competitors are almost sure to have the same sport and the first on the market makes the money.

Enchantress, a very fine sport from an improvement upon Countess Spencer, created a sensation when flowers were sent to Covent Garden by Stark & Son, Norfolk, in April. It easily made double the price of any other variety, and the wires were kept active by florists telegraphing for larger consignments. It will be very extensively grown next season. It is a bold flower of a pleasing rosy pink shade and a capital variety under glass for early flowering.

Seed growers are satisfied with the present prospects. John S. Echford, son of the late Henry Echford, says the season has been all that could be wished for, and with another week or two of favorable weather an abundant crop will be safely harvested.

BEE.

New York Florists' Club.

There was a meeting of the New York Florists' Club September 9. It was the first meeting of the new season, and was well attended. Routine business disposed of, L. W. Wheeler, chairman of the outing committee, reported progress and promised a full report at the next meeting which should show a satisfactory financial ending.

Patrick O'Mara, for the committee on express conditions, reported that the committee had not taken any further steps, and was awaiting material on which to work further.

The transportation committee reported its action in connection with the trip to Dayton, made a statement of its disbursements and was discharged with the thanks of the club.

Henry H. Barrows, of Whitman, Mass., was elected to membership and A. Zvolanek, Henry Torry and Lester C. Lovett were nominated for membership.

The secretary reported that his communications to the Horticultural Society of California had been returned as "unclaimed."

A motion by L. W. Wheeler at the last meeting that the treasurer's appropriation for emergencies be increased from $5 to $50 was withdrawn by the mover for lack of support.

Committees on the preparation of memorials on the death of Roderick O'Mara and Jas. Weir, Jr., were appointed by the president, with instructions to report at the next meeting.

There was a lengthy discussion on the project of the national flower show, as taken up by the S. A. F. at the Dayton convention. E. V. Hallock who introduced the subject, and pointed out the emergency which confronted the board of directors due to the fact that the society while intending that the show should be a positive thing passed its resolutions with an "if" which precluded the directors from taking early steps in that direction unless they were prepared to do so at their own personal risk in the matter of expenses. As the convention had appointed committees in the matter it was thought that the way was clear to go ahead, but Mr. Hallock earnestly sought the opinion of the club.

The matter of changing the time for the 1908 convention he also discussed, and invited a consensus of opinion of the club in the matter also. Messrs. O'Mara, Lovett, Guttman, Butterfield, Lenker and others spoke on the matter of the change of date, generally in opposition to any change, and finally a motion by John Birnie that August was the proper month to hold the convention was unanimously carried.

It was an exhibition night for herbaceous plants. J. T. Lovett, of Little Silver, N. J., staged 65 varieties of phlox and 75 varieties of other plants, including Veronica longifolia subsessilis and Salvia azurea five varieties of gaiilardias and a dwarf boltonia, 1½ feet in height.

H. Beaulieu showed seedling dahlias, zinnias, and phloxes.

Washington.

AVERAGE TRADE FOR THE SEASON.

The week opened with very warm weather which did not tend to increased trade, though the retailers report an average trade for the season. Though it is hot under glass, a week of clear weather has made a noticeable improvement in stock, both roses and carnations taking hold well. Contrary to expectations, asters are still coming in considerable quantities. There are more dahlias than a week ago but as commercial factors they amount to little.

FLORISTS' CLUB MEETING.

The regular monthly meeting of the Florists' Club was held on the night of September 4, with a good attendance. The prize list for the rose show was the subject of considerable discussion. It is understood that individual prizes will be given by Peter Bisset, Geo. Field, Mr. Clarke of the Botanical gardens and others, particulars of which will be announced later. A committee was appointed to arrange for a banquet and smoker, for the date of next meeting, in honor of the club's bowling team for their good work at the Dayton tournament. A resolution was adopted inviting Prof. Norton of the U. S. Dept. of Agriculture, to address the club at its next meeting on his experiments and discoveries in the hybridization of carnations. An invitation was received from R. Vincent, Jr., & Son, White Marsh, Md., for the club to visit their place on September 19 for the purpose of inspecting their dahlias and, incidentally, to partake of the firm's hospitality. It is probable that quite a number of members will make the trip.

J. A. Shaw, who it appears in addition to his many and varied accomplishments, is a collector of bad debts, sent in through J. R. Freeman, a bill for $10 for collecting on advertisements which appeared in the Washington convention souvenir. As it is understood that Mr. Shaw had already received a commission on every advertisement that went into that publication, and further that he contracted for the New York ads, the justice of his claim is not apparent to the writer and others.

S. E.

BROOKLYN, N. Y.—M. Schulze will build a greenhouse, 19 x 48 feet, on Union street near Eighth avenue at a cost of $5,000.

F. W. HERENDEEN, OF GENEVA, N. Y., WITH HIS AUTOMOBILE AND FRIENDS.

Baltimore.

HEAT AND HUMIDITY AFFECTS STOCK.

We are having the hottest and most uncomfortable weather of the summer, the temperature being high and the humidity great. Fortunately the heavy rains which made the month of August phenomenal have ceased. The rainfall for that month was quite double the normal precipitation in this latitude, while in Washington, 35 miles south of us, the enormous aggregate for the month of 12 inches is reported. Many crops have been injured by the excess of moisture, but the growth of vegetation of all sorts has been very rank, and there has at no time been any browning of foliage and grass such as is usual to the midsummer season. Trade has kept fairly active. There seems to be some improvement in this locality as in others in the summer business and there is not that absolute stagnation which used to be looked upon as natural and to be expected. Perhaps the efforts to have better stock produced for the dull season has been a gain in that purchasers who want good flowers can be supplied. There has been a fair supply of roses, but now the aster crops are about over and the dahlias threaten to overwhelm the market.

NOTES.

Richard Vincent, Jr., & Son, of White Marsh, Md., have sent out widely invitations to members of the trade throughout the eastern territory to inspect the dahlias for which they are famous and the other specialties of their extensive establishment. Arrangements have been made for the through trains to stop at their station and visitors will be met by vehicles and transported to their place.

John Cook, with three of his daughters, is away on a trip to the highlands of North Carolina and will spend a week at Asheville. S. B.

Oceanic, N. J.

The Monmouth County Horticultural Society held its meeting September 7. Mr. Turner's paper, "Fruit Culture Under Glass" was postponed to the next meeting September 21. The final premium list for the chrysanthemum show was ordered printed. Mr. Turner showed some beautiful pears, Pitmaston, averaging 1¼ pounds each, and scoring 98 points. He also showed some Thos. Rivers peaches scoring 95 points. These fruits were grown under glass. B.

OBITUARY.

Mrs. Theodosia B. Shepherd.

Mrs. Theodosia B. Shepherd, well known in connection with California horticulture, died at her home in Ventura, Cal., September 6, after a lingering illness, in her sixty-first year. Mrs. Shepherd, through her Ventura establishment, has traded in a modest way with many of the commercial horticulturists of the United States and the world, supplying a general line of flower seeds and various California products in plants and bulbs and using in turn for her own business something of the products of other countries.

Mrs. Shepherd was a native of Iowa, removing to California in 1873 for her health. With a wonderful interest in flowers and need of outdoor life, she devoted herself to learning about and growing such seeds and plants as were in demand. Mrs. Shepherd's public work and writings have attracted a great deal of attention from amateurs not only in California but over all the country, she probably being the most noted woman in this line of work and she must be credited with having done much to stimulate interest in horticulture.

Following the funeral September 8 the body, after cremation, was interred at Rosedale cemetery, Los Angeles.

George W. Patten.

Geo. W. Patten, aged 53 years, died at his home in Dracut, Mass., September 1. He was well known in the city having been engaged in the florist business here for over 30 years. He is survived by his wife and one son Percy. After the funeral the remains were escorted to the depot and sent to Barton Landing, Vt., for burial.

James Warburton.

James Warburton, the oldest florist of Fall River, Mass., and well known citizen, was found dead in his home on the New Boston road September 4, from asphyxiation. A few days before Mr. Warburton fell and bruised himself. Dr. Richard J. Thompson, who attended him, called at the house, but was not able to get in. Finding all doors closed and locked and gaining no response to his knock, his suspicions were aroused and he forced an entrance into the house by breaking a window. A rush of gas escaped through the opening. In the bedroom the physician saw Warburton's body.

BLUE POPPY is the common name of Meconopsis Wallichii in England.

CHRISTMAS BELLS were not so much in evidence at Dayton as at former conventions.

WE are indebted to Editor Elias A. Long of the Acetylene Journal, Chicago, for the use of the illustrated article, "Influence of Artificial Light on Plants" which appears in this issue.

THE date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires. Please renew subscriptions promptly on expiration to make certain of receiving your copy of each issue.

Toronto Sympathy.

At the regular August meeting of the Toronto Gardeners' and Florists' Association the following resolutions were adopted and forwarded to Mrs. James Hartshorne:

"The officers and members of the Toronto Gardeners' and Florists' Association most sincerely sympathize with you in the great affliction you have suffered by the death of your husband.

'The members of this association feel that they have lost a true and kind friend, one who was always ready to do his part and more in assisting any of his brother craftsmen.

The members desire that you should know of the great esteem and respect in which he was held by them."

E. F. COLLINS, Sec'y.

The Dahlia Society.

On September 5, during the dahlia show held at the Horticultural hall at Boston, a dahlia society was formed. The temporary officers were chosen which consisted of H. T. Burt, of Condon, as chairman, and J. M. Fuld as secretary. A committee of five was appointed to arrange another meeting where details could be arranged and permanent officers elected. Over 25 enthusiastic dahlia growers, who were willing to sign their names toward the membership of this new society, were present at the meeting.

The secretary reports that he has up to date about 75 names on his list and expects 100 names before the society is launched. There seems to be a great interest aroused over the dahlia and no doubt the society will flourish and succeed.

Detroit.

The Florists' Club meeting September 5, while not largely attended, was nevertheless highly interesting. The subject for consideration was the S. A. F. convention at Dayton and the trip thereto. E. A. Scribner gave an exhaustive description of the convention city and its chief industry, the N. C. R. Co. He attended all the sessions of the S. A. F. meeting and was able to review its work with interest to his hearers. Others, in turn, recited their impressions of the week and all were unanimous in declaring it a most successful convention. A resolution highly commending the floricultural work of the N. C. R. Co. was adopted and a vote of thanks was given to the Dayton Florists' Club for the many courtesies extended by its members to our visitors while there. Much dissatisfaction was expressed by those present because of the contemplated change in the date for holding the annual convention from August to the month of November and hopes were entertained that the proposed change will not take place. One more member was added to the club's roll and one application received. The newly elected officers were installed and President Dilger announced that at the next meeting he would outline the season's work for the club and name the appointments on standing committees. J. F. S.

Meetings Next Week.

Boston, Mass.—Gardeners' and Florists' Club of Boston, Horticultural Hall, September 18.

Dayton, O.—Dayton Florists' Club, 112 South Main street, September 17.

SITUATIONS, WANTS, FOR SALE.

One Cent Per Word.

Cash with Adv.

Plant Advs. NOT admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1906 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Situation Wanted—By first-class orchid grower and gardener, fully up-to-date; best of references. Address Key 755, care American Florist.

Situation Wanted—By man 14 years' experience, first-class, all around man where first-class stock is grown; A1 potter and propagator. Small place preferred in Indiana, Illinois or Kentucky. Address Key 778, care American Florist.

Situation Wanted—By first-class florist and landscape gardener, capable of managing a gentleman's estate, public institution or large commercial place; 23 years' experience, Europe and this country; A1 references; good salary expected. Key 774, care American Florist.

Situation Wanted—As foreman by a practical grower of cut flowers and plants, etc., capable of managing a large plant and having the work done in a scientific way; first-class references as to ability, etc.; give particulars. Address
Key 777, care American Florist.

Situation Wanted—Position as manager and bookkeeper of good place; have such a position now; would like a change; understand employing help, the growing of general stock and vegetables also hot water and steam heating; will want a good salary. Address
113 Dutchess Ave., London, Canada.

Situation Wanted—Sales manager (practical nurseryman), desiring to make a change, would consider partnership, commission or salaried proposition; accustomed to handle by correspondence large force of agents; competent to install modern office system in retail nursery agency business. Key 775, care American Florist.

Help Wanted—good rose grower. Address
UNITED STATES CUT FLOWER CO.,
Elmira, N. Y.

Help Wanted—Young man from 16 to 20 years of age, to learn the florist business. Apply to
JOHN L. WYLAND De Haven, Pa.

Help Wanted—A man having some knowledge of growing bedding plants; $50 per month to start.
SHOTWELL & GRAVER, Fargo, N. Dak.

Help Wanted—A first-class carnation grower. Wages $45.00 to $50.00 per month; send references.
HASKELL AV. FLORAL CO., Dallas, Texas.

Help Wanted—Experienced help for rose and carnation section; also general florist's work.
THE GASSER CO., 234 Euclid Ave., Cleveland, O.

Help Wanted—One good nurseryman and good propagator wanted at our nurseries good wages to right man. VAUGHAN'S SEED STORE, Chicago.

Help Wanted—Good, experienced gardener, reliable and sober. Address
MRS. THOS. WILCE,
708 W. Harrison St., Chicago, Ill.

Help Wanted—At once; capable man to take charge of 20,000 feet of glass in carnations; $50.00 per month to start.
J. W. DUNFORD, Clayton, Mo.

Help Wanted—By October 1, an intelligent young man as orchid grower, with 3 or 4 years' experience. None others need apply. Address
F. VARDEN, 26 Summerfield St,
Fall River, Mass.

Help Wanted—At once, good grower of cut flowers and plants; single man preferred; must be well recommended State salary expected, with room and board. JOHN DIECKMANN & CO.,
Wheeling, W. Va.

Help Wanted—Foreman to take charge of wholesale place, 22,000 feet glass. Must be good grower of roses and carnations. Wages $75.00 per month. Apply at Room 326, Sherman House, Chicago, Ill.

Help Wanted—Bright, attractive, experienced lady to take charge of floral store in Kalamazoo, Mich. Must be able to do decorating and first-class funeral designs. Apply by letter with references to LOCK BOX 855, Kalamazoo, Mich.

Help Wanted—An experienced man to work in one of the leading flower stores in Hartford, Conn. Must be a good designer and decorator and know how to wait on the best class of trade. Applicant please state age, married or single, wages expected and also give references Address
Key 776, care American Florist.

Help Wanted—There is a vacancy in our greenhouses for one or two young men who desire to study practical horticulture as pupils under a competent instructor, whose specialties are ferns, mushrooms, choice cut blooms and plants, cucumbers, tomatoes, under glass for profit. Address
Key 779, care American Florist.

Help Wanted—Man for store; must have had wide experience in designing and decorating, accustomed to waiting upon high class trade, and come well recommended. Steady position and good salary to the right person. Give full particulars with application and state salary expected. Address RANDOLPH & MCCLEMENTS,
Highland Ave. and Baum St., Pittsburg, Pa.

For Sale—2,000 feed of good, heavy, 4-inch boiler flues at 8 cents per foot. Address
JOSEPH LABO, Joliet, Ill.

For Sale—Nine greenhouses, dwelling house and barn, 3½ acres of ground. For particulars address
P. O. Box 109, Newtown, Bucks Co., Pa.

For Sale or Rent—Store and five small greenhouses, with or without dwelling, on street car line; only florist in town; cause sickness.
548 119th St., West Pullman, Chicago.

For Sale—Glass, 10 x 12, double strength A. Great bargain for the lot. Address
BRANT & NOE FLORAL CO.,
W. Peterson and N. 48th Aves., Chicago, Ill.

For Sale—5,000 feet of 3½ and 4-inch boiler flues with couplings, 16 to 18 feet long, at 8c and 9c per foot; ells and tees half price; also two special made water jacket boilers, each able to heat 4,000 to 5,000 feet of glass; cheap if sold at once; can ship by rail or water. Address
GEO. VATTER, Marinette, Wis.

For Sale—Worthington duplex steam pump, capacity 30-40 gal. per minute in good condition, $45.00; No. 1 receiver and fittings for pump, good as new $50.00. Dean pump for hand or steam, almost new, $20.00; 6-inch pressure regulator, used two seasons, $50.00; 2½-inch pressure regulator, $18.00. Carnation supports, $15.00 per 1000; $125.00 for 10,000. JAMES W. DUNFORD, Clayton, Mo.

FOR SALE.

At a sacrifice, greenhouse well stocked and long established business of the late J. P. Coen, Lexington, Mo., one of the best paying little businesses in the country, and in perfect condition; no competition within 30 miles. The place consists of 3 greenhouses 85x20, 1 lean-to and cold frames, 1½ acres of ground, an excellent 7-room house, with all modern conveniences, steam heat, electric light, etc., out-houses, good barn, laundry, chicken houses, etc. The entire place is lighted with electric light, heated with self-regulator steam boiler, and city water throughout the grounds and houses. Good wholesale trade as well as retail. Lexington is noted for its colleges and schools; one boys' military academy, two girls' colleges and a number of minor schools, all of which keeps the cut flower business very brisk during the school season. The place can be bought for $6,500, which amount wouldn't pay for the improvements; $2,000 cash, balance to suit. For further information address
ARTHUR NEWELL,
12th & Baltimore Aves., Kansas City, Mo.

GOOD HOT WATER BOILERS

for florists' use, cheap. Address
Box 966, Wilmington, Delaware.

American Florist Co.
324 Dearborn St., CHICAGO.

Kansas City.

THE MARKET.

The smart set is arriving by twos and fours which means prosperity for the florists. The opening of schools and theaters and the closing of summer gardens and parks will serve to the advantage of those in the downtown districts. Conditions of stock denote neither an influx nor scarcity in any class save carnations which are yet short-stemmed and small. American Beauty is improving slightly every day. Bride and Bridesmaid are to be had with little difficulty. Kaiserin is dropping off in quantity. Chatenay, Richmond and Liberty are making some improvement in size and stem. Good late asters are rapidly taking the place of the early varieties which were poor this season. Other outdoor stock that is to be seen are Clematis paniculata, L. auratum, dahlias and gladioli. Some very creditable Lilium Harrisii is to be had. The outlook for trade this fall and winter is exceedingly encouraging. Throughout the western trade territory adjacent to this city comes assurance of big crops. In fact industry, in all branches, displays more snap and sales. Shipments and outputs increase as cooler weather sets a period to the vacation season, and fall activities become more pronounced. Fruit crop reports from points in the Missouri valley indicate the largest yield in years. In fact prosperity is in evidence at every turn. One noticeable feature is the increase in greenhouse area. Additions having been made this summer to nearly every establishment. Stores present evidence of enlargement and redecorating. Growers are making preparations for an increased plant trade. Each year makes a new record in sales in this department. A visit to the growers readily impresses one with the extensive variety of this class of stock. The condition of roses and carnations is very good, the plants are clean and in a remarkably healthy state. Taken altogether there is a general feeling of satisfaction with the increase of the fall trade.

NOTES.

Sam'l Murray will have an exceptionally fine lot of Begonia Gloire de Lorraine. The plants shown by him at our show last fall made a lasting memory for his accomplishments with that truly beautiful plant. He declares this year's plants, which in June were in 2-inch pots and now in 7 and 8-inch pans, with fine heads measuring from 12 to 20 inches, are far ahead of those shown last fall. At our visit we found Mr. Murray himself busy shifting a fine lot which he says are from four to six weeks ahead of those exhibited last year.

One of our leading department stores in a special sale last Saturday advertised 2,200, "healthy, hardy growing palms and ferns." They were a bargain on account of their "natural hardiness." The palms were sold for 25 cents. Ferns were graded in four lots for 25 cents, 48 cents, 75 cents and 98 cents.

Chas. Heite, of the W. L. Rock Flower Co., expresses much satisfaction in the showing the chrysanthemum plants are making. At his place one may see them in perfection. Every conceivable shape, size and color are being grown for the fall trade.

One of our trade who recently visited Denver and several western cities remarked that he had little difficulty in obtaining THE AMERICAN FLORIST no matter where or how remote the establishment.

Weddings are becoming more numerous as the season advances. Several large affairs last week caused a demand for choice stock in lily of the valley, orchids, etc., and kept some of the boys busy.

Miller Carter, of the W. L. Rock Flower Co., returned last week from Colorada and the west. Mr. Rock is spending his vacation fishing in the White river country of Arkansas.

Mr. McNamara, of Mangelsdorf Bros. Co., Atchison, Kans., was in the city recently. He reports an increase of 50 per cent over last year's business.

Miss Daley is making some improvements at her store. Geo. Thomas, formerly with the Kansas City Floral Co, is now in her employ.

Miss Moseley is back from the convention and expresses much satisfaction in the Dayton meeting.

Rhododendrons, azaleas, cyclamen, etc., are to be seen in endless quantities at Kellogg's.

Edw. Ellsworth in company with A. Ebberfield returned from Dayton and the east.

Robt. Tindale, of Independence, is in the market daily with a fine lot of asters.

Raymond Blessing and wife are resting in the southern part of the state.

Arthur Newell is in Texas making purchases of land.

K. C.

West Grove, Pa.

Mark B. McHenry, assistant cashier of West Grove National Bank, has purchased of Benjamin Connell the residence, farm and greenhouses of the latter, lying partly within the borough limits, to the east. The property contains 22 acres, finely located and valuable for building sites. For 20 years the late owner has conducted a flourishing greenhouse business thereon, a number of such houses with storage cellars, etc., being on the premises in addition to a modern residence and other buildings.

Mr. McHenry later sold the residence, greenhouses and two acres of land to Ferd Groce. Mr. Connell will continue to run the greenhouses until April 1, 1907, although possession of the house is given October 1, next. Mr. Connell intends to retire from business.

PITTSFIELD, MASS.—R. Engelman & Son have purchased the Davis place adjoining their property near the Pleasure park and will erect several new greenhouses.

GENESEO, N. Y.—The second annual flower carnival of the Methodist church closed August 31 and was a great success financially as well as in the matter of attendance.

ARAUCARIA EXCELSA.

As usual at this season of the year we are again carrying an immense stock of Araucarias which we offer at very favorable prices. These plants travel safely by freight to reasonable distances at this season of the year. Why not lay in a sufficient supply now to carry your sales through the holidays, saving heavy transportation charges later on.

ARAUCARIA EXCELSA.

5-inch pots, 8 to 10 inches high, 3 tiers	$ .65 each
6-inch pots, 12 to 14 inches high, 3 to 4 tiers	.75 each
6-inch pots, 14 to 16 inches high, 4 tiers	1 00 each
6-inch pots, 16 to 18 inches high, 4 tiers	1.25 each
7-inch pots, 20 to 22 inches high, 5 tiers	1.50 each

ARAUCARIA EXCELSA GLAUCA.

5-inch pots, 8 inches high, 2 tiers	$ .75 each

TRADE BRISK.

Trade conditions improved this week, although there was but little complaint at the business of the week before. The local trade shows a gradual increase while the shipping business assumes very satisfactory proportions. There is a large variety of stock coming into the market at present, much of it good and much that sells at indifferent prices. The increasing humidity of the past few days has left its mark on roses and carnations, but in spite of this, there are sufficient quantities of fine stock to meet all demands. Many houses are daily receiving large consignments of choice roses among which American Beauty stands pre-eminent. The stock is unquestionably fine, most of it being long-stemmed and clean. It moves easily and brings normal figures. Kaiserin, Chatenay, Perle and Golden Gate were plentiful earlier in the week but the supply shortened up considerably with the warm weather. The more popular varieties such as Bride, Bridesmaid and Liberty look very well for the greater part and can be had in any quantities desired at normal prices. Carnations are abundant. They are mostly small in flower with soft centers and altogether somewhat below the standard. Boston Market is not so plentiful as a week ago while the amount of Enchantress to be had has decidedly increased. Gladioli still remain abundant and move slowly. Asters are again arriving in absurdly large quantities and a glut, with slaughtered prices, seems imminent. The quality of the stock shows great improvement but this evidently does not prevent it from becoming a drug. Outdoor stock of all kinds is suffering severely from the drought.

NOTES.

The Foley Mfg. Co. is mailing its excellent souvenir steel tape measure, giving the English system of measurement on one side, and the metric system on the other. This is the souvenir that was advertised in our Convention Number for distribution to those who cut out and sent in the coupons in the advertisement in our columns. Those who failed to do this missed a good thing.

Reports from the neighborhood of Niles Center would indicate that the present drought will seriously injure the carnation crops. The river, which has always proven an old stand-by, is now dried up while all of the shallow wells and many of the deeper ones are practically without a supply.

Poehlmann Bros. are handling one of the finest stocks of roses seen on the market this summer. They have a large selection of fine long-stemmed Bride, Bridesmaid, Liberty, Chatenay, Killarney, Kaiserin and American Beauty.

Bert Budlong has loaned the use of his soil pulverizer to Poehlmann Bros. to serve as a model for the erection of two similar machines at a cost if $1,000. Poehlmann Bros. estimate that it will soon pay for itself.

A. L. Vaughan returned from his Michigan trip last week. He reports crops in the neighborhood of Detroit in fine condition. The firm is now handling daily consignments of an extra fine quality of asters.

F. W. Martin, 280 E. Fortieth street, is rebuilding two of his houses. The remaining houses will be rebuilt next season. Mr. Martin, who is doing quite a business in the potted plant line, reports trade excellent.

A. Lange is exhibiting a number of mammoth yellow chrysanthemums which attract a good deal of attention. He has passed the last two weeks with his family in Nebraska.

E. A. Asmus, of Vaughan's Seed Store, intends locating at Bellingham Bay, Wash., where he expects to engage in the bulb growing business.

P. J. Hauswirth and Geo. Asmus with their wives left for Niagara Falls September 7 to attend the Red Men's annual Powwow.

Henry Weiland, son of M. Weiland, was recently married here, and returned to Denver with his bride September 10.

Miss Tonner of the A. L. Randall Co. is again back at her old stand after a pleasant and successful voyage.

The families of J. A. and A. H. Budlong returned from their summer home at Lake Geneva last week.

Peter Reinberg is back from his hunting trip. He is a good shot and bagged a fine lot of ducks.

J. A. Budlong is cutting a large crop of extra fine long-stemmed American Beauty.

Visitors: E. J. Fancourt, with S. S. Pennock, Philadelphia, Pa.; D. MacRorie, with the W. A. Manda Co., So. Orange, N. J.; Joseph Wagner, Beaver Dam, Wis.; Martin Reukauf, with H. Bayersdorfer & Co., Philadelphia, Pa.; E. Bock, Burlington, Ia.; Wm. Walker, Louisville, Ky.; A. E. Lutey, Houghton, Mich.; C. E. Franke, superintendent of parks, Oklahoma City, Okla.; E. C. Green, College Station, Tex.

St. Louis.

MARKET FIRMER.

The first week in September opened up with a firmer market. School openings, store openings and several prominent funerals helped to swell the increased volume of business. Roses have greatly improved, especially Bride, but the very warm weather has been hard on certain varieties, especially Chatenay, Richmond and American Beauty. Retailers complain about the high price of American Beauty on account of its keeping qualities. It seems now more that ever that the general public has been educated to purchase blooms in hud only. People will not take open roses. Some fine asters are in the market.

NOTES.

By far the most important event of the week was the opening of the new department store of the Grand Leader. It certainly was a great boom to the local florists in general. Almost every prominent florist in the city had orders for this opening. It is safe to assert that never before in the history of the city have so many plants or so many set pieces and loose flowers been sold for any one occasion. Several of the largest designs were from out-of-town parties. The demand for American Beauty was immense and all four wholesale houses had their hands full filling orders. Several thousand asters were disposed of. The sight of so many flowers and plants amidst such costly fabrics was a sight that will long be remembered. Among those who were drawn on very heavily for flowers for this opening were Young & Sons, the Riessen Floral Co., F. C. Weber, Geo. Waldbart, the Townsend Floral Co., Miss Theresa Badaracco, Siegel & Burke, Fred Foster and Ostertag Bros.

The next meeting of the Florists' Club will occur on Thursday. The installation of officers for the coming year will be the feature. It is to be regretted that this city will be without a flower show this fall. Cannot some good orator in the club get up and make a speech on harmony and brotherly love and not allow personalities and jealousies to get the better of individuals and thus promote the welfare of the florists at large?

The Bentzen Floral Co. had a large sale of Boston ferns at their store on Herbert street. They cleaned out at a very handsome profit. Next week Otto will have his hands full with wedding orders.

August Hartman, of Kirkwood, has erected two new houses for carnations and violets. He has started cutting carnations and expects a fine crop of violets.

Ludwig Zimmer has one of the prettiest cut-flower and plant stands at Biddle Market. He has a large trade with the middle class, which is very profitable.

Emil Schloss, of Schloss Bros., of New York, dealers in ribbons, was a visitor here.

J. F. Wilcox, Council Bluffs, Ia., shipped some fine American Beauty to this market.

Heller Bros., of New Castle, Ind., are sending in some first-class Bride roses.

W. F.

Illinois State Florists' Association.

We are advised that at the suggestion of President Ammann of the Illinois State Florists' Association a supplementary premium list is being prepared in which additional prizes are offered in the floricultural section of the Illinois state fair, which we believe will open at Springfield September 28. President Ammann is anxious that the florists of the state make as good display as possible with a view to securing a separate building for floriculture at the state fairs of the future. The supplementary premium list will be in the hands of the trade within a few days and entries should be made without delay.

LOS ANGELES, CAL. — Col. C. M. Heintz, editor of the Rural Californian, dropped dead September 6 of heart disease without any warning of his trouble. He was located in this city for some 25 years and was editor of the Rural Californian during that period.

THE MARKET.

Business is very dull, there being but little more activity than for the last of August. Just at present the hot spell which has been sent us by the weather man is blamed for it. How that poor weather prognosticator has to suffer. There is a great plenty of stock in all lines. Most of it is improving. First cuts of a number of winter rose houses appeared this week and looked promising. There should be but little scarcity of American Beauty or red and pink roses the coming season judging from these initial shipments. Although there was a great loss of carnation plants in the field, yet now that they are nearly all housed there seems enough to fill all the old and also the additional houses, about 10 per cent. having been added to the various carnation plants that supply this market.

NOTES.

Wm. McKissick's first business birthday fell on September 3 and was duly celebrated by him with a nicely arranged display of his large and varied stock. None of the large houses now in the business could have made anything to compare to this showing on their first anniversary, as the flowers were not then in the market, which goes to show the wonderful strides made in the business during the past 10 years. The "good old times" of the commission business can not compare to the opportunities of the present day in this line. There is a positive and ever increasing demand for choice stock of all kinds and the house that can command this has no need of pedigree to place it at once in the front ranks.

Alfred Jones, of S. S. Pennock's, says that a visit among the violet growers shows the plants to be in good shape with every prospect for a good supply for the coming season. This firm has added a new ice box to its basement cold storage which will about double the present capacity.

Chas. Meehan returned from his western trip last week and says that the entire bank deposit was not kept in the Real Estate Trust Co., they having an active account in a nearer financial institution. He does not think the Market Co. will lose anything by the failure except that its funds will be tied up for a time. The affairs of this company are now looking better, the directors are back of a large fund and this with other assets, together with the help of the largest creditors, it is hoped will put the institution on its feet again in a short time.

Wm. Graham has sold his property at Logan and is now moving into the old homestead at the greenhouses.

S. S. Pennock is taking a sea trip to Florida for the benefit of his health.

Pittsburg.

MARKED IMPROVEMENT.

September did not open with the expected rush of business but it is a great improvement over the past few weeks. The shipping trade is getting better as little by little the local outside flowers drop off. Asters have never been finer nor more plentiful, white predominating; 30-inch stems are common with blooms proportionate. Gladioli remain a glut. Roses are equal to the demand. Carnations are still short. Lily of the valley is in fair demand. Dahlias lay around every where; no one will touch them. The prospects are that the chrysanthemum crop will be the best this year.

NOTES.

Joseph Jones is remodeling his place at Liberty street and Fifth avenue. When completed Joe will have a thoroughly up-to-date store.

A. W. Walker, Mr. Bassingler, of the Templin Co. and Robt. Schenk, all of Youngstown, O., called during the week.

Lee Riley is no longer with the Florists' Exchange, having taken a position in his home town.

The last Florists' Club meeting was devoted to outside flowers.

Mrs. Williams is back from her trip down east.

Mrs. Koerbel, of Jeannette, was a caller Friday. J.

Boston.

TRADE GROWING IN VOLUME.

The summer is practically ended and with Labor day the homeward journey for the majority began but not until after Thanksgiving will the last of the exclusive class return from their country residences to which they flock from the seashore resorts. Each day, however, an increase is apparent and reports this week are very promising for a good season later on. There has been an unusual demand for funeral work, in spite of the magnificent weather. American Beauty has been the stand-by of the cut trade. From different sources it is being received in large quantities and is more reasonable and satisfactory than other available roses. Local growers are cutting good crops but the bulk is coming from out-of-town people. Wellesley is the best of the medium-priced roses and very satisfactory, being much preferred over Carnot, Liberty, Killarney, Chatenay and Kaiserin, all of which are showing themselves of only fair quality. It is yet too early to expect very fine carnations but this necessity is badly missed as asters are on the wane and will not last very much longer. Fair Maid and white stock are very plentiful but with very short stems and are not especially desirable. The colored varieties are not worthy of mention. Chrysanthemums are already on the market but are poor specimens of what is expected in another month. Garden stock is still abundant as we have not had any frost to cause injury. Hydrangea blooms, cut, have been very prominent in the week's decorations, creating an excellent display at a moderate price. Lily of the valley and gardenias are favorites with the select trade and orchids are becoming more plentiful. The hot weather has seriously impeded the growth of violets but it will not be long now before this favorite flower has returned.

NOTES.

The Gardeners' and Florists' Club will hold the first meeting of the season at Horticultural hall, September 18 at 8 p. m. Plans are being made to open the coming season auspiciously and it is the intention of the directors that this shall be an especially entertaining and instructive meeting. A number of prominent craftsmen have already promised to describe their travels of the summer and invitations have been sent to others. Besides these interesting talks there will be a discussion of F. E. Palmer's paper, read before the Dayton convention on "The Ideal Gardener and His Work." It is hoped that the coming season will enlarge the membership to 400 as it is now 330 and already quite a number of applications are registered. The September meeting is usually well attended and this should be the most enjoyable of all.

Houghton & Clark are having the interior of their store remodeled and they plan to have one of the most attractive stores of the city. Extensive alterations are now being made and the interior is painted in white and green the most desirable combination of colors for a flower store. They have had excellent success with their new summer store at Magnolia and next year will be prepared to commence the season on a larger scale.

Thos. F. Galvin furnished elaborate decorations last week for the Williams-Jackson wedding. Both the home and the church were plentifully decorated with plants and cut flowers. At King's chapel the interior of the church was never more dignified nor beautiful. Hydrangeas, gladioli, Lilium lancifolium, asters and roses furnished the different combinations.

The annual auction of stalls of the Park Street Market was held September 8. The receipts rank with the greatest ever received and many new firms purchased stalls which will all go to make that famous market busier than ever although it has seemed at times that the limit had been reached.

Welch Bros. have had a corner on lily of the valley and are disposing of tremendous quantities to dealers all over New England. They are also handling a fine selection of American Beauty which is selling unusually well. B.

Orange, N. J.

The monthly floral display of the New Jersey Floricultural Society contained orchid exhibits of Cattleya chrysotoxa and Cycnoches chlorochilon and C. Peruviana from Lager & Hurrill, receiving 93 points, and Cattleya Harrisaniae and Oncidium varicosum from Wm. Barr, A. W. Bodwell, gardener, securing 83 points in the competition for the society's prizes. Joseph A. Manda also sent plants for exhibition. Besides these, were the usual array of plants and flowers from the neighboring estates. The judges for the evening were A. W. Caparn, Thos. Jones and Joseph A. Manda. Alexander Wallace addresed the society upon civic horticultural improvements, describing those at Dayton so recently viewed by S. A. F. delegates and incidently praising what he had seen during the day in this city and urged a representation from this society at the international exhibition at Chicago in 1908. Two new members were placed in nomination. Details for the fall exhibition, decided upon at the last meeting, were approved and a special dahlia night provided for the October meeting. Suitable resolutions upon the death of Henry Graves, the orchid collector, were passed. J. B. D.

IMPROVEMENT CONTINUES.

In the main the improvement noted last week continues, and there are plenty of signs that business will be good from now on. Commission men speak very hopefully of the situation and think that it is safe to predict a good business for the season now opening. Rose growers are probably more interested in the market than any other specialists, for the reason that the demand for good roses is not being met. Trash is handed out everywhere and really good stock is very conspicuous. Arrivals are quite heavy, but the new crop does not assert itself much, consequently sales are commonly made at prices above quoted figures. American Beauty is plentiful in all grades but the highest, and move very well. Specials are very scarce, but such as arrive do not bring prices in proportion to their scarcity, showing that the market can not be influenced. Bride and Bridesmaid move fairly well, the former continuing short in supply. Kaiserin Augusta Victoria sells easily, and comes in grand condition as a rule. Carnot is also taken very freely. The demand for carnations is increasing, but the offerings are poor in quality, as might be expected for the time of year. Still each week shows some improvement in arrivals, and by October fine blooms will be available. Of the stock coming in Enchantress is perhaps a leader in both flower and stem. Mrs. Lawson is commonly offered but is short and commands only medium prices. Lord and Queen are among the staple offerings which are remunerative. Lilies are in good demand and at times exceed maximum quotations. Lily of the valley is stronger, and occasionally approaching the point of scarcity. Asters are more than plentiful, reaching on some days the glut stage. Good branching kinds, however, move quickly, and at good prices. Orchids are reaching fall values, and are not particularly plentiful. Cattleya labiata is coming in and will soon assert itself as a fall variety. Dahlias are common everywhere, but no fine varieties are to be seen yet. Early chrysanthemums have made their appearance, and appear to sell. Outside products are prolific, and just where they go to is a problem, as retailer's windows are set mainly with plants.

NOTES.

To encourage the planting of trees in the public streets in the borough of the Bronx, the north side board of trade is offering substantial prizes to school pupils in the higher grades for the largest number of trees planted by any one pupil. The first prize is $50 for the largest number of trees planted above 100. The second prize is $25 for the largest number of trees planted above 50; the third prize is $15 for the largest number of trees planted above 40. A fourth prize, $10, is for the largest number of trees planted above 25; and there are 20 $5 prizes for the largest number of trees planted above 15. All trees must be planted upon streets which are graded to the established city grade upon a permit from the park commissioner, Geo. M. Walgrove. The competition closes November 1, and to prove that the trees have been actually planted competing pupils must present signed statements, countersigned by the owner or planter of the tree. This is a proceeding worthy of emulation in the other boroughs, and in fact in all cities which are bare of trees.

The arrangements made for a chrysanthemum show are more than disappointing to local growers. Many novelties usually reserved for exploitation are in their entirety, being kept back for the Chicago show. One novelty, which was expected would be shown in New York, will now only appear in a small way, but as an aspirant for honors will be seen at its best in Chicago. This is a white seedling of chrysanthemum Wm. Duckham which Chas. H. Totty, of Madison, N. J., will introduce. Mr. Totty knows what he is about, and says that this will be the most notable of his offerings for the season.

Carl S. Christianson, formerly of 67 E. Tenth street, was buried on Tuesday. He was a well known member of the trade and well liked for his many good qualities. He was a Norwegian, and started in this city with Gabrielson at Thirteenth and Broadway many years ago. Subsequently he was with Geo. Hauft, finally setting up for himself and conducting a business at 67 E. Tenth street until he sold his interest to Wernz & Koehne quite recently. He was an old-timer in an old time district.

John Nicol, of Jersey City, one of the old-time florists of this section, will sell his six greenhouses and equipment at auction September 19. John P. Cleary will be the auctioneer. Mr. Nicol has been living in Canada for some time in poor health, and will probably reside there permanently in the future.

Alex. J. Guttman was celebrating the anniversary of his Twenty-eighth street opening on Monday, and the cigar boxes went around freely all day. After the club meeting on Monday evening, he entertained several of his friends to a feast of reason and a flow of soul.

Philip F. Kessler must be having an enjoyable time in Europe. His thoughts are of home at times, judging from the number of postal cards received by his large circle of friends every mail. At last reports he was in Nuremburg, Bavaria.

John N. May, of Summit, N. J., was seen in the city last week, the first time for a long while. He was looking much improved in health.

Chas. Thorley supplied several very handsome pieces for the funeral of Herman Oelrichs last week.

Wm. Starke is stocking his greenhouse and store with plants for the opening of the season.

Wm. N. Reed, of Reed & Keller, and Mrs. Reed returned last week from an extended trip through Europe.

Louis Schmutz, of Flatbush, is back from his trip to Europe.

Buffalo.

Weather the past week has been very cool. Labor day passed off quietly with no extra trade. The gardeners and florists made a very creditable showing in the parade with dark trousers, white shirts and caps and smilax across the shirts. They also had a float of palms, etc. Roses show marked improvement. Asters are smaller and carnations are getting better in quality.

NOTES.

John Rosenkrautz, father-in-law of Joseph Striet, who is foreman for S. A. Anderson, died at the residence of Mr. Streit last Tuesday. He had been engaged in greenhouse work for several years.

S. A. Anderson has a fine lot of Boston ferns at present that are selling well.

W. A. Adams and wife were in Dansville, N. Y., last week.

Visitors: James Wheeler and wife, Brookline, Mass., were the guests of Chas. Sandiford; S. T. Green, of H. Bayersdorfer, Philadelphia, Pa.

BISON.

GLOVERSVILLE, N. Y.—Fred Wilson and wife, claiming to be from Detroit, Mich., have opened up a flower store at 34 North Main street. We are advised that this is the same party that opened a store in Scranton, Pa., last year.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

LEONARD H. VAUGHAN is in Nebraska inspecting seed crops.

WALTER MOTT is now with H. H. Berger & Co., of New York.

CONRAD APPEL has issued his annual report on grass and clover seeds.

VILMORIN-ANDRIEUX & Co.'s preliminary wholesale seed list has come to hand.

THE death of Mrs. Theodosia B. Shepherd is recorded in our obituary column.

THE onion set crop at Chicago is estimated at a slight increase over that of last year.

HJALMAR HARTMANN has arrived in New York from Copenhagen, for a tour through the states.

VISITED CHICAGO: Chr. Hansen, representing A. Hansen, of Copenhagen, Denmark; S. B. Dicks, London, Eng.

CINCINNATI, O.—J. Chas. McCullough and family returned September 12 from a 10 days' sojourn in California.

PHLOX DRUMMONDII, says a close observer, is one of the hardiest annuals, blooming long after most others have been cut down by frost.

CHICAGO.—Rain fell September 12, the first good rain in many parts of Cook county since May. Some onion sets were caught in the storm.

DENVER, COL.—About October 1 the wholesale seed department of the Barteldes Seed Co. will be carried on in the Barteldes building, corner of Sixteenth and Wynkoop streets.

WE are in receipt of the annual report of the twenty-fourth annual convention of the American Seed Trade Association, held at Toledo, O., June 26-28, containing the usual papers, reports, etc.

STEAMERS arriving in New York last week from Italian ports unloaded about 40,000 crates of onions, nearly all of a large yellow variety resembling Prizetaker. These onions are usually sold at auction and bought up by commission houses.

UNION, N. J.—The purchase of the Yellow Pine Co.'s property by the American Warehouse and Trading Co., which is the eastern branch of the Albert Dickinson Co., of Chicago, will mean another large industry on the busy Hudson river shore front and will furnish employment for a large number of hands.

ALFALFA seed crops in the eastern section of Kansas, where thousands of acres were sown this year, have paid farmers from $40 to $60 per acre. The alfalfa hay and seed crops harvested by a farmer near Sabetha, Kans., brought him an average of $66.20 per acre. Most farmers have from 10 to 50 acres in alfalfa. Clover seed crops are bringing farmers an average of $50 per acre.—K. C.

Braslan Seed Growers Co.

WHOLESALE SEED GROWERS.

SAN JOSE, CALIFORNIA.

Dickinson Leaves Chicago Board of Trade.

Albert Dickinson, president of the well known Albert Dickinson Co., posted his board of trade membership for transfer September 11, which is said to practically mean the passing of this seed house from the board of trade. The firm has not been actively represented on the Chicago exchange since March 1, last, when the present commission rule which provides for trading charges double those which prevailed before that date went into effect. The Dickinson Co. complained when the higher rates were being agitated that the installing of them and the placing of all traders on a brokerage basis would militate against progress in its business. The withdrawal of the firm it is said will result in the transferring of much seed business to other market points, probably to Duluth and Minneapolis, where the firm has made important connections.

The Late Mrs. Theodosia B. Shepherd.
See obituary.

Convention From Seedman's Standpoint.

Geo. C. Watson before the Florists' Club of Philadelphia, September 4, 1906.

Many a man has dug a cavity for the other fellow and fallen into the hole himself. Your committee on subjects last month assigned one to a seedsman whose duty it would be to report on the convention. Unfortunately for the committee there were no Philadelphia seedsmen at the convention big enough for this job. J. Otto Thilow of Dreer's had intended to go, and had promised to make an address, but his plans had to be changed at the last minute. So you see the cavity! Somebody had to fill it! The rest of the committee insisted on my jumping in, and that must be my excuse for attempting, even in a remote way, to fill up this hole. I approach the subject with a meekness exceeding the meekness of Moses and am very sorry we do not have the unhackneyed and original views of Mr. Thilow instead of the overworked and well known notions of yours truly.

To my mind the first and most important feature of a convention to a seedsman is the opportunity it affords him of meeting his customers. It must be remembered that the seedsmen, and in using that term I mean it in the broadest sense, is the very opposite of a specialist. To be a seedsman in the proper sense, one must have a working knowledge of horticulture, floriculture, agriculture, and arboriculture; because the seedsman is an auxiliary to all these different branches of the art of gardening. You will observe that I dignify the art of gardening by embracing under it the culinary, the ornamental, the farm, and the forest. London did so, and no more illustrious example could be followed. To be a gardener in the true sense of that term one must have a working knowledge of all these four great subdivisions of the art, and as the seedsman is the auxiliary and helper in the same field, it follows that he also must be equally well posted so as to fulfill his proper functions with ease and dexterity. Therefore the seedsman, as I said before, is the very opposite of a specialist. He is all embracing. But that is the strongest reason why he should be present at a convention of specialists like that of the Society of American Florists.

There he comes in personal contact with his customers gaining valuable knowledge from their experience with various specialties in which he has a direct pecuniary interest. He is able also to get a line on what is lacking and can lay his plans for future progress thus becoming not only an auxiliary but a pioneer in the onward march of the art of gardening. I have made it a point to attend as many of these conventions as I could during the past 20 years and I have never regretted having done so. In fact, I consider it impossible to become thoroughly posted in the profession of a seedsman without taking in as many as possible of these and other conventions bearing on any phase or branch of the art of gardening.

The second and less important phase of this subject from the seedsman's standpoint is the actual and immediate business that can be transacted. From my own experience and from what I have heard of that of others, the immediate business returns are not adequate in proportion to the expense and moreover unless a good exhibit is put up they will be almost nil. If one goes to a convention for purely business reasons rather than for the purpose of keeping posted a good exhibit is indispensable. Quite a number of our most wide awake houses keep regularly making such displays, year in and year out, and they must find it pays them either directly

or indirectly, else they would not keep it up.

At the same time there can be no gainsaying the fact that a great many of our prominent seed houses do not attend. Whether it be indifference, lack of time, or what, I do not know; but I feel sure many of them need stirring up on this very subject. I can remember well how surprised I was in Buffalo in 1901, when not a single one of the local seedsmen took advantage of the grand chance of making an exhibit at the minimum of cost. I was ashamed of them. And this apathy prevails today. The seed trade wants shaking up on this point. Imagine what a grand show Burpee could make with sweet peas for instance, or Maule with dahlias or Thorburn or Henderson with a general collection of their specialties. I hope to see full advantage taken by such firms in the exhibition of 1907.

In conclusion I may say that for extent, excellence, and variety the Dayton exhibition compared very favorably with those of recent years. There was at least one local seedsman who put up an exhibit and the Livingston Seed Co. of the neighboring city of Columbus had a very interesting display of tomatoes, the subject that has made the name of Livingston famous, besides some good new hybrids of Begonia semperflorens.

Glen Cove, N. Y.

The Nassau County Horticultural Society held its first annual clambake on the afternoon of September 6, followed by a banquet at Karatonyi's hotel. About 80 members and their friends were present, and when the sports commenced at 2 o'clock in the afternoon there were a large number of members ready to take part. Some preferred the bathing, while bowling, billiards, etc., were the attractions of the others. The clambake was an excellent one and every member pronounced the event the finest social gathering ever held by them. After the clambake at the beach the members and friends adjourned to the hotel, where a banquet was served and speeches were made by several of the officers and others.

JAMESTOWN, N. Y.—The capacity of the Lake View Rose Gardens is to be largely increased. The foundations for 45 new houses, each 20 x 200 feet, are being made ready, giving the plant a total capacity under glass of nearly 1,250,000 square feet, and making it the largest in the United States. The new additions will occupy 3½ acres.

Delphiniums.

The tall delphiniums are grand at present, but for a continuous summer display in a smaller place or in front part of a border, our choice would be for the dwarfer, humbler Chinese kinds. They flower continuously throughout the summer months. New stems spring up from the root and crop after crop of flowers continue to open. We may cut them or let them alone to fade, it makes no perceptible difference to these plants, they are always in good shape. I like the light blue of the Bella Donna type, though for variety some of the darker shades and a few whites should also be included in a bed. The D. Simense varieties do not give us the great, tall, pyramidal flower spikes like D. Formosum, D. exaltatum, D. hybridum, etc., but they amply make up for it in quantity of small loose spikes, produced in succession. The plants are seldom entirely without flowers at any time from June until fall, new stems forming constantly until frost stops growth.

When clumps get too large and crowded the plants should be divided and replanted. Pieces with three to four eyes make good fine flowering plants in a very short time. Such plantations may be left alone for three or four years before they need much attention again, other than a yearly top-dressing, and regular hoeing and cleaning.

Seedlings will flower well the first year when not started too late in the season, but usually one cannot depend on reproducing the best colors in plants raised from seed, so the inferior ones have to be weeded out.

Varieties which it is desirable to propagate should have a little extra attention. The plants may be divided in spring, or if they remain in their old places, take a few of the first growths, when about two inches long, insert in sand on a shaded greenhouse bench and they will root in a few weeks.

After that they may be planted in boxes or if convenient, in their permanent location in the open ground, taking the precaution, however, to water and shade the young plants for a few days until well established. J. B. K.

Late Flowering Aquilegias.

Perhaps at first glance it would seem out of season to say anything about aquilegias when we are past midsummer because the majority of these elegant and useful plants are spring or summer bloomers, but I want to call attention to a few of the species, which are still in flower, and most likely will not stop blooming before the end of September, although they began to send up their first flower stems as early as May or June. These late blooming species are all of the long spurred type, like A. Canademis, the bright red sepals of which are tipped with green and marked yellow, the inner petals yellow, and the deep red spurs slightly knobbed at the extremities. The flower stems branch out freely, bearing loose panicles of drooping flowers in profusion. It is dwarfer than any of the following, growing to a height of less than two feet generally.

A. chrysantha has very long, slender, dainty spurs, which bend or arch out above the drooping golden yellow flowers. The sepals spread out horizontally, thereby giving the appearance of a much larger flower than it really is. Under generous cultivation this is a continuous bloomer when old flower stems are removed now and then, and it is surely one of our best and handsomest border plants. But close planting of this species should be avoided. When crowded in any way, we can not expect the plants to bloom both early and late, but in good soil with a fair amount of sunlight they bloom continuously, the fall frosts finding some of the flower stems with undeveloped buds. It is a free and robust grower, often attaining a height of over four feet. There are also a number of hybrids of paler and darker tints, also pure white, but I have not seen any of these to bloom so persistently as the parent plant, though some show an inclination to flower later than others.

A. Formosa has bright red sepals with pea green tips and a yellowish cup, and long straight spurs of the same bright red. The stems grow three to four feet high and are profusely branched from the ground up to the tip, a grand, showy plant and a prolific bloomer early and late.

A. Skirmerii, with long, tapering, vivid red spurs, the sepals also red washed, suffused and tipped with green, the limb greenish yellow and red. The flowers are drooping or nodding, borne on an upright branching stem two to three feet high. The panicles are more compact than those of the preceding, owing to the straight upright growth of the branchlets. In an open situation this charming species will always be the last of the aquilegias to open its lovely flowers in June. It begins late, but lasts longer than the others in fall.

I know of no blue species which will annually continue to bloom until past midsummer, though occasionally we had a batch of young, vigorous seedlings make flower stems and flower in autumn, but such happenings must be considered accidental. Two or three of the chrysantha hybrids are running into the purple tints and we may yet be able to produce in time a good late flowering purple or blue. J. B. K.

WOONSOCKET, R. I.—Mrs. James A. Staples has removed her cut flower business from Staples' drug store to the old stand of Miss Cutler in E. R. Darling's store. The business required more room than the former quarters allowed.

FAIRPORT, N. Y.—The second annual flower carnival of the Floral Society opened in the Methodist church here August 31 and continued through the afternoon and evening. There was a very fine display of gladioli, asters, dahlias and many other annual flowers, together with a splendid showing of decorative plants.

MELROSE, MASS.—Many people from this and surrounding towns attended the twenty-third annual exhibition given by the Horticultural and Improvement Society at the city hall September 3. The affair was one of the most successful ever given under the auspices of the society. Prizes were awarded for the best shrub, garden, flower, fruit and vegetable exhibits.

HIBISCUS SYRIACUS MEEHANII

WE now offer to the trade our new hardy variegated leaf Hibiscus Syriacus Meehanii. This plant attracted much attention when exhibited at the American Nurserymen's Convention at West Baden, Ind., and American Florists' Exhibition at Asheville, N. C. Foliage beautifully variegated; never sun-scalds or reverts to the green; flowers single, very large, satiny lavender; blooms during four months; prices on application. Orders booked now.

Louisville.

TRADE FAIR.

The previous week may be considered a fair one, there having been quite a quantity of funeral work, which was about all that was doing. We have been having very pleasant weather the past 10 days, and the relief was certainly very welcome. Carnation planting is about completed in this section. There are very few lots that are looking as they should, owing to the enormous number of plants that have suffered from stem-rot. Many growers lost from 25 to 40 per cent of their stock. Fortunately some have a surplus to draw on. Roses are in good supply, the quality being satisfactory and the demand very good. Carnations are in fair supply, but the demand is a little slow as yet. Lilies are obtainable in fair quantities, and find some demand. The supply of asters in white and purple is somewhat short. The demand has been very good, and the quality satisfactory. Dahlias are to be had in medium quantities of good quality. The demand so far has been a little slow. A few Shasta daisies were on the market, but the demand for them has about exhausted itself. Green goods are in fair supply.

NOTES.

The regular monthly meeting of the Kentucky Society of Florists was held Tuesday night at August R. Baumer's store, with a fair attendance. About the only thing done was to decide on giving the annual dinner September 11. It is hoped the fall meetings will be larger in attendance.

The bowling club will hold its first prize bowling meet September 18. The "expert" delegates to Dayton will, no doubt, continue the good work.

F. L. S.

Cleveland, O.

GOOD STOCK EAGERLY SOUGHT.

Business the past week has been above the average for this time of the year, everything of good quality being snapped up at sight. Roses are beginning to improve, but Kaiserin still holds the lead. The new crop of carnations is now coming in, but is still short-stemmed. Asters are in full blast and can be had in any quantity. Gladioli are also plentiful.

NOTES.

Carnation plants are as usual very scarce; most growers are having their troubles getting enough to fill their houses.

The new plant of the F. R. Williams Co. is nearing completion and will be an up-to-date place in every respect.

The bedding in front of A. Graham & Son's place is very attractive and is greatly admired by the passersby.

F. R. Williams and family are enjoying a trip up the lakes.

G. B.

NEWBURYPORT, MASS.—A flower and plant exhibition was given at the high school here in July, under the auspices of the City Improvement Society. Its purpose was to start a revival that might restore the beauty of rich gardens here that have been somewhat neglected of late. It is said that this is the first show if its kind in half a century and recalls a famous show given in 1833.

STREETCAR STRIKE AFFECTS TRADE.

After 11 days of general distress in this much troubled city, owing to an ill-advised walkout of union labor employes of the streetcar system and the cessation of transportation, there was general joy September 6 because the employes have yielded to popular disapprobation of their action and commenced running their cars, thereby causing florists and all other tradespeople to smile once more. During these days of enforced pedestrianism stores generally have been shy of customers not owning automobiles, and the flower depots have been no exception, business stagnation being the degree of dullness announced by florists and growers. I haven't heard, however, that any wedding dates were interfered with or postponed, and several swell hymeneal functions are notable as bits of business leaven that saved the dull period for the trade from absolute sluggishness. One of these weddings occurred over the bay in Oakland and the other in this city. The scene of the over-the-bay affair was in the First Congregational church, the largest meeting house on the Pacific coast, and was witnessed by the entire congregation. For 24 hours before the marriage J. Seulberger, of Oakland, and a big staff of expert assistants had possession of the church, and he must have made it very beautiful, for the Oakland paper says: "It was the most brilliant wedding of the year. The ceremony took place under a bower of orange blossoms, interwoven with Spanish roses and fragrant lilies, and the large auditorium of the big church was a veritable bower of the ever-popular combination of pink and green." The other wedding of the week was that of Miss Ethyl Hager, the belle of the town, with Miss Helen de Young, the Chronicle proprietor's daughter, as her maid of honor. Sievers & Boland did their best in setting off the scene of the event florally. It was a high affair, that is to say, the bride is only one half inch under six feet high, while the groom is six feet six, and the priest who read the service is six feet four.

During the week a Pasadena grower has come to the front claiming he has out-Burbanked Burbank. His name is J. L. von Hoffman, and his production is a jet black rose. His price per bush is $25,000, an amount he namer on recently receiving a letter of inquiry from J. Pierpont Morgan's private secretary.

JESSE WHITE.

Toronto.

BUSINESS EXCEPTIONALLY GOOD.

Business in the downtown stores is exceptionally good which is due no doubt to the large influx of visitors although there is also a large amount of funeral work and a fair number of weddings. Roses are now plentiful enough to fill orders and the quality is good for the season. American Beauty, Killarney, Richmond, Bride and Bridesmaid, are all in fairly good crop. Carnations are becoming more plentiful and chrysanthemums are promised in a few days. Asters with most growers are over for the season, but the last few days have proved good for dahlias.

Bouvardia from Grobba and Wandrey's, of Mimico, is a splendid addition to the few varieties of stock at present.

The demand for field grown carnations has been exceedingly good and most growers are sold out.

B. C. Crowhurst, of Humber Bay, is sending in some very large Grand Duke Alexis dahlias.

The Mitchell Nursery Co., Mr. Skinner foreman, is cutting new roses and carnations.

H. G. D.

Canadian National Exhibition.

The Canadian national exhibition has closed its doors, having had the largest attendance on record. The display of plants in the horticultural building was a very creditable one, including some highly colored crotons, orchids, begonias and stove plants. The most keenly contested prize in the plant section was that for the most tastefully arranged group on space not exceeding 200 square feet, which was won by Thos. Manton. Among the most successful prize winners were the Exhibition park, Thos. Manton, the Steele Briggs Seed Co., Allan gardens, Wm. Jay & Son, Government house, Sir Henry Pellatt, Reservoir park, J. B. Stevens and others. In the cut flower section the prizes were well distributed excepting in the made up work, in which J. H. Dunlop took all the first prizes, six in all, namely, for Bride's bouquet, wreath, gates ajar, presentation basket, center piece and most original and best funeral design. In carnations Mr. Dunlop took both first prizes, and in roses the North Toronto Floral Co. two firsts and Mr. Dunlop one. The judges were E. Mepstead, Ottawa, Ont., and Geo. Robinson, Montreal, Quebec.

Montreal Horticultural Society.

The annual exhibition of the Montreal Horticultural Society was held in the new Royal Scots armory September 5 and 6. President R. Wilson Smith officially opened the exhibition in a brief and well-timed speech. He referred to the fact that he had been in the old land and had seen their horticultural products, but Montreal did not in any respect suffer by comparison.

Among the prize winners were: F. C. Smith, gardener to Sir William Van Horne; W. J. Wilshire, gardener to R. B. Angus; John Dunbar, gardener to Sir Montague Allan; George Trussell, gardener to Mrs. J. H. R. Molson, and R. Jack & Son, of Chateauguay. The judges in the plant classes were Joseph Bennett and D. Wright, and J. Doyle and Alf. Wilshire in classes for professional cut blooms.

OUR PASTIMES.

Outing of the Buffalo Florists.

The event last week was the florists' outing which took place at Fort Erie grove. About 150 were in attendance and all had an enjoyable time. At the dinner President Neubeck had the seat of honor and after all had satisfied themselves with the good things, a few remarks were made by Wm. Scott and a pleasant talk by Wm. F. Kasting. The following is the list of games and winners:

Hundred-yard race: Longley, 1st; Baumgartner, 2d; E. Walters, 3d.

Ladies' race: Miss Schlager, 1st; Ruby Mark, 2d; Miss Sattler, 3d.

Boys' race: R. Klokow, 1st; Griffin, 2d; Bixon, 3d.

Hop, step and jump: D. Scott, 37 feet; W. H. Grever, 36 feet, 11 inches; Baumgartner, 34 feet; J. Langley, 33 feet.

Hop race: Baumgartner, 1st; Langley, 2d; Walters, 3d.

Three-legged race: Walther and Grever, 1st; Kramer and Ray, 2d; Longley and Zimmerman, 3d.

Half mile run: Longley, 1st; Baumgartner, 2d; Zimmerman, 3d; Walther, 4th.

The ball game was a good one. Such has-beens as Anderson and Neubeck took part, but the younger element struck them out at will. All things being favorable Wm. Scott, Wm. Legg and Conley Forbach will enter the game again next year, when another man than Kasting will umpire.

The sage of Corfu has an option on the figure eight and is thinking of buying it. The only wish expressed was that the outing be held earlier next year.

MABELLE, New Pink Carnation for 1907.

Color—A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson Unlike most pinks, the brightest sun does not injure the color. Size—3 to 4 inches in diameter when established. Odor—Pleasing, but not strong. Stems—Invariably strong, but always graceful, ranging from 12 to 30 inches during the season. Habit, etc.—A very quick, active grower, making specimen plants in a short time, even from late cuttings. On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start. Productiveness—Prodigious is the best word we know of to use here. It is the most incessant bloomer, early and late, we have ever grown. Stock limited. Delivery January 5 to 10 and later. Price, $12.00 per 100, $100.00 per 1000.

WATCH US GROW.

Araucaria Excelsa

The Best of All Decorative Plants Nature Produces

OUR SPECIALTY.

Every man in business and life to be successful must adopt one thing as his specialty, and that specialty, whatever he select, of whatever nature it may be, he must guard, study and push to such an extent that it not only benefits himself, but he must conduct it so that everyone who seeks his aid, service or his article, which he advertises or practices, will share a slice of his activity and prosperity. I made the importation and cultivation of Araucarias as a special study in my life. The figures below will show my success in business: In the first year I commenced with an importation of 250. In the eleventh year now, 1906, my importations have grown up to 6,000 (come and see it), and on account of the Araucaria growing yearly more in favor by the plant consuming people all over the country, as a much admired decorative plant for the parlor, bed, dining and sitting room, stores, hotels, lawns and porches the outlook will be for an importation at least of 8,000 to 10,000 in spring of 1907. To secure this vast amount for 1907 I am now on the ocean, per steamer New Amsterdam, leaving Hoboken Aug. 15, striking for Belgium, making contract for next year, 1907. I also shall at the same time bring over with me a large lot of choice Azalea Indica and Palms, etc., for Christmas and Easter flowering. No money will be spared in obtaining for my customers the cream of the Belgium greenhouses only.

Please note lowest prices now going on for August and September:

20 to 24 in. high, 6-in. pots 5 to 6 trs., 4 yr. old.. 1.25
36 to 50 in. specimen, 7-in pots 6 yr. old, $2.50 to 3.00

Araucaria Compacta Robusta, have 1000 of them, never were so nice as this year. Plants are as broad as long from 12 to 20 in. in height, 3 to 4 perfect tiers, 20 to 30 in. wide across from one tip of tiers to the other, 3, 4 and 5 years old, 6 to 7-in. pots $1.25, $1.50, $1.75, $2.00, up to $3.00 each.

Araucaria Excelsa Glauca, are perfect jewels in shape and size; their beautiful green-blue tiers make them of such a striking appearance that everybody seeing them must fall in love with them on sight, and cannot help it. Plants, 6 to 7 in. pots, 3, 4 and 5 perfect tiers, 15 to 25 in. in height, from 15 to 30 in. across, $1.25, $1.50, $1.75, $2.00 to $2.50 each.

Please bear in mind these mentioned varieties are the cream of Belgium importations. We have thousands of them: can meet all demands.

Kentia Forsteriana, 6-in. pots, 35 to 40 in. high, 5 to 6 leaves, 4 years old, $1.25 to $1.50; 30 to 35 in. high, 4 years old, 6 in. pots, $1.00; 5½-in. pots, 25 to 30 in. high, 3 years old, 75c; 4-in. pots, made up with three plants, 18 to 20 in. high, 25 to 30c. **Belmoreana,** 6 in. pots, 4 years old, 5 to 6 leaves, bushy, 30 to 35 in. high, $1.25; 5½ to 6 in. pots, 3 years old, 5 to 6 leaves, 75c to $1.00 each. Above are the sizes entered in the custom house. **Kentia Forsteriana,** 7-in. pots, made up plants, on elarge in center, three smaller sizes, about 22 to 24 in. high, price $2.00 each.

Nephrolepis Barrowsii, 6 in., large, ready for 7-8 in. 50c; 4-in., large, 25c.

Nephrolepis Scottii, 6-in. pots, large, ready for 7-8 in., 50c; 5½-in., 40c; 5 in., 35c; 4-in., 20c to 25c.

Boston Ferns, 4-in., 20c to 25c: have them by the 1000.

Asparagus Plumosus Nanus, 3-in , 6c: 4-in., 10c.

Chinese Primroses, in 4 in pots, ready to shift into 5-in. pots, will bloom for Christmas, $10 00 per 100.

Cocos Weddelliana, 15c.

Areca Lutescens, made up plants, 4-inch pots, 5c.

Ficus Elastica, Belgian importation, 6-in. pots, 50c each.

Ferns. A fine assortment of Ferns for dishes large, bushy, out of 2½-inch pots, $5.00 per 100 3-inch, 7c each.

All goods must travel at purchaser's risk. Cash with order, please.

OUR LITTLE PETS.

By Aschmann, in Philadelphia, I bought
An Araucaria, a pet for our little girl—
Now we have two pets, the pride of our thought,
The little girl so sweet a head full of curls.
And the Araucaria with their everlasting green—
A more joyful home you never have seen.

GODFREY ASCHMANN, Importer and Wholesale Grower of Pot Plants
1012 Ontario St., PHILADELPHIA, PA.

No "Baiting" Advertising Rates.

WE have received several requests lately to insert trial advertisements free of charge "as other trade papers offer."

We wish to state that

THE AMERICAN FLORIST

has nothing to offer free of charge or at cut rates. We have no privileged customers.

We give advertisers full and overflowing value, and that is all any honest advertiser needs.

Advertisers are paying double for so-called cheap advertising in useless correspondence.

THE AMERICAN FLORIST

readers are buyers who pay their bills.

American Florist Company

Montreal.

TRADE FAIR.

Trade last week was fairly good although not quite up to the usual standard yet, but stores assume a livelier appearance. One can see that something is doing within. The supply of cut flowers is quite adequate to fill the demand except in carnations which are scarce. In outdoor cut flowers asters hold first place. Some very fine American Beauty roses are sent from the west.

NOTES.

At the last monthly meeting of the Gardeners' and Florists' Club here A. C. Wilshire, the first member returning from the convention of the Canadian Horticultural Association, in Guelph, Ont., told of his experiences during the trip and convention. He said that the delegates were well received by the local florists and gardeners of Guelph and the authorities of the Agricultural college, in whose buildings the meetings were held, but that the best treat of the whole trip was the visit to the Dale estate, Brampton, where the delegation spent a day.

E. Hayward, just returned from a trip to the old country, told of all he saw at the Kew Gardens and many another park and private estate. He also visited several horticultural shows, and drawing comparisons he said Canada need not be ashamed of her product.

H. Brown is seriously ill with heart trouble. LUCK.

Providence, R. I.

EARLY FALL TRADE.

In former years the advent of July marked the beginning of dull business which did not pick up until heavy frost in October. But in recent years we notice a change for the better inasmuch as the months of July and August are uniformly good, due mainly to the good margin on design work and a regular call for this class of business during the summer months. In fact the months of September and October might well be classed as the year's dullest term, not even the advent of chrysanthemums evening up the quiet business of the early fall. Our local season has been pretty much along the regular lines of the past, nothing new or unusual happening. Carnations are just starting in after an absence of two months. The ever reliable Semple asters are now in full run, giving ample opportunity to make elegant flat bouquets at a good margin of profit. Roses are abundant and full of promise.

Most all flower stores made a practice of Friday afternoon closing during the past two months, and at least one of them has arranged to carry the plan through September, an excellent idea and well appreciated by the help. Early closing was first tried some six or seven years ago and was dubiously considered, but each succeedng season has shown the wisdom of it, until now practically all florists here recognize its benefits. M. M.

PHILADELPHIA, PA.—Geo. L. Grand will erect a greenhouse 18 x 27 feet at a cost of $400 on Crispin street near Rhawn.

Utica, N. Y.

BUSINESS INCREASING.

Vacation time is coming to an end and business is increasing with the return of the people to the city. Most of the florists have their carnations housed and some are sending to market very good blooms for the first crop. The season being favorable carnation plants are unusually strong and free from disease, with the promise of large quantities of good blooms for the coming season. Among the rose growers the bushes look fine, sending up a great many good, red shoots which will soon begin to pay for their summer care.

NOTES.

The meeting of the Florists' Club was held August 30 at Ilion, being entertained by Theo. Schesh and wife. A camp fire and beefsteak supper was a feature that proved both novel and successful. At midnight the members were still around the fire telling tales and trying to finish up the refreshments.

Frank Baker and family have returned after spending a very pleasant two weeks at Port Leyden. The rest and fresh air have been of great benefit to them.

Henry G. Martin and wife have returned after spending a few weeks in cities around Lake Erie, stopping also at Columbus and Newark, Ohio.

J. C. Spencer and family are at Otsego Lake, Cooperstown, N. Y., for a 10-days' outing. BUD.

PITTSBURG, PA.—Linemen of the Duquesne Light Co. were prevented from placing poles on Baum street adjoining the conservatories of Randolph & McClements August 27. Twelve employes were on hand early in the morning and held a hose to turn water on the linemen if they attempted to place the poles. When the linemen saw the men would prevent them in their work they left for Homewood. Mr. Randolph had ordered his men to prevent the placing of the pole on account of having recently put down a new sidewalk.

AMERICAN FLORIST CO.:—
I wish to express my appreciation of THE AMERICAN FLORIST as a trade paper. My sales have far exceeded my most sanguine expectations and of our immense stock only a few thousand remain and they are moving rapidly. We find that nearly every state in the Union has its consignments, with Canada also getting into the procession, many orders being repeated.

THE LOW PRICE HEATING PLANTS

The Chicago House Wrecking Co. is in position to offer you an interesting proposition for furnishing you with a heating plant at a saving of at least 30%. Send us a sketch of your houses with preferred location of the boiler, the points of compass and the desired night temperature for zero weather, and we will gladly submit you an exact detail quotation of all material required to install the plant. We have ***heaters*** and ***boilers*** of every kind, both new and rebuilt. We have always on hand a large number of rebuilt boilers suitable for greenhouse heating. Our stock embraces ***fire box boilers, horizontal tubular boilers, Kroeschell boilers, cast iron sectional boilers, Erie City economizers*** and other types

We can save you considerable money on ***pipe, valves*** and ***fittings;*** also on ***doors, glass, sash*** and everything needed in the construction of your buildings.

Ask for our Special Catalogue No. 47.

Florists' Forcing Bulbs and Roots.

Copyright 1906 by the American Florist Company.

II.—THE TULIP.

Of Holland grown bulbs, annually forced by florists, tulips, without question must be considered of greatest importance commercially. Not only are they made to produce enormous quantities of most desirable cut stock throughout the greater part of winter and early spring, but they are also gladly welcomed as spring flowers and largely enter into the pot plant trade of the enterprising florist. Not all of the numerous varieties, single and double, early and late, are equally good for forcing. A comparatively few sorts only lend themselves willingly to a process that compels a yield of perfect blooms long before their natural season of flowering. It is in the selection of suitable varieties for either early or late forcing where the inexperienced grower is most likely to err. There are a few among the single early varieties that might easily be brought into bloom for the holiday trade in early winter, such as Proserpine, Kaiserkroon and the Duc van Thol varieties. Neither of these, forced out as early as that, would yield a product of an especially desirable or profitable grade. But after the middle of January nearly all of the single early tulips, such as Crimson King, La Reine, Proserpine, Yellow Prince, Kaiserkroon and Rembrandt, may successfully be forced; as also a few of the doubles, such as Salvator Rosa and Yellow Tournesol. Still later in the season, for Easter and the spring trade, not only those just named, but also such sorts as Vermilion Brilliant, Cottage Maid, Scarlet Tournesol, Murillo, Couleur Cardinal and the three Pottebakkers, may be forced with greatest ease and in almost half the time required in earlier attempts. Any one of these sorts and most all of the dwarf growing double varieties, as also Parrot tulips, are good for pots, if slowly brought into bloom for the plant-trade in early spring.

All bulbous plants must be abundantly provided with active roots before they can be forced with entire success. Tulips furnish no exception to this rule. A period of about 8 weeks from the time of planting is required for the formation of roots, and those intended for early forcing should therefore be planted as soon as the bulbs can be obtained in the fall. The common practice of planting them in boxes, about 3 inches deep, and of a convenient size for handling, can hardly be improved upon, whether they are grown extensively or in small quantities. Any good soil, not necessarily very rich, will do for tulips. The bulbs, in planting, are simply pressed into the surface of the soil, leaving the upper tapering half free above ground. They are set quite close with a little bare space between bulbs, so that a box 15x24 inches would easily hold 100 bulbs. After being planted, the boxes are stood side by side on the even floor of a trench made for the purpose, on a piece of well drained garden land, or open field. Now they are thoroughly watered, allowed to dry off a little and then covered to a depth of from 4 to 6 inches, with the fresh soil thrown aside in making the shallow trench. This covering will be all sufficient for the earlier lots, but those intended for later work should receive an additional covering of hay or litter when winter sets in, to prevent a solid freezing up of the top soil, which would render the bringing in of the boxes an irksome task. In from seven to eight weeks the bulbs will be sufficiently rooted for immediate forcing and may then be brought in at any time, when wanted. Those not wanted until late may remain in the ground until a few weeks before their flowers are wanted. While it will take about four weeks of steady forcing in early winter to bring tulips into bloom, the grower need not figure on more than 15 or 18 days in the latter part of winter or early spring.

In transferring the rooted bulbs from their outdoor quarters to the greenhouses, they should be nicely freed of their top covering and carefully guarded against a possible breaking off of the wax-like, tender top growth. A dark and cool place for a day or two will properly prepare the stock for real forcing. The finest flowers from well-rooted

tulip bulbs are obtained under a course of rapid forcing in a house with a moist atmosphere and a steadily held temperature of 65° or 70°. A warm bottom for the boxes is rather a detriment than a help in the case of tulips, and should be avoided. A heavy shading or complete boxing in, for the first half of the forcing period imparts depth and purity to the color of the flowers, and length to their stems, but should be gradually lessened, and entirely removed a few days before the flowers are fully developed. Some varieties, as, for instance, Crimson King, Pottebakker and Rembrandt, finish up splendidly in the same house and temperature, while most of the best commercial sorts require for a perfect finish a sort of hardening off at the close of their course, thereby gaining in substance as well as coloring. Yellow Prince, La Reine and Murillo being examples. Any amount of water is required by tulips, when under actual forcing. E.

THE CARNATION.

Carnation Comment.

FALL WATERING.

The conditions of weather, soil or form of houses may so differ in different localities that it would be presumption to attempt to lay down arbitrary rules for watering. This year we started to lift from the field and plant our houses, under what seemed favorable conditions. The weather was reasonably cool; the plants neither too dry nor too wet. But just as we were well under way the mercury began to climb and kept at it until well above 90°, where it staid for over a week. We gave our houses a good shading of yellow clay and proceeded to make the best of the situation. Now, with a rather light soil, as ours is, and the houses so hot that the pipes felt much the same when touched as if filled with steam, some of the old rules which have been laid down for watering after planting had to be abandoned. The "individual plant," the "light spray" and "mist" theories would not work. We had to water freely and thoroughly.

By this I do not mean to say that we turned every bed into a mud hole, but it was necessary to keep them well wet down both as a means of keeping down to some extent the excessively high and overhead temperature and of keeping the roots moist and cool. Just as soon as we felt the danger was over we began to withhold water and get the plants straightened up. Under such conditions the carnation will stand for only a short time a large amount of water, providing the beds have good drainage. It is also a certainty that if you are watering freely, you must also crowd on all the air possible, but this must not include doors that create strong drafts.

Now that cool nights are at hand and considerable time will elapse before heat will be turned on in the carnation houses, if the weather is dark and dull, but little water will be necessary. On the other hand, if after a cloudy spell the sun shines and the wind blows and there is drying out weather, the grower must be on his guard, for it is another hour of danger. Some of the plants may get too dry before it is realized. always in the forenoon.

I lay it down as a fixed rule that the watering of carnations should be done

SPECIALIST.

Early Versus Late Carnation Planting.

I notice in THE AMERICA FLORIST of September 8, on page 307, under the heading of "Carnation Comment" an article advocating carnations for summer flowers. The writer says that good carnations always sell, which of course is true to a certain extent. But what I have said before, and still claim, is that it pays better to get a good early start by planting early even if one has to sacrifice a number of blooms in the spring or early summer.

In order to get the best results from carnations, financially and otherwise, one must have them in full crop not later than November 1 and keep them so continually until about June 1. If one cannot make carnation growing profitable that way it is safe to say one cannot do so using other methods.

The carnation is like a human being in a way. Just so much can be gotten out of a plant and no more. It is a mistake to suppose one can get as good and early a crop of carnations by planting late. A carnation plant cannot be in full crop from early fall and last into July and August. It is a case of choosing whether one wants the main crop early or late, and I believe every wholesale grower will agree with me that it pays better to get the main crop early and in midseason.

I must admit that it is easier to plant late and get the main crop in the spring when nature will assist greatly in the culture, whereas to bring them in and keep them in bloom during the fall and winter requires more skill and careful handling, but the state of one's bank account will convince one that early planting is the more profitable method of the two and more fully up to the standard of our twentieth century. J.

Diseased Carnation Plants.

ED. AMERICAN FLORIST:—

All summer, while the plants were in the field, here and there a plant would begin to die, one branch at the time, just withered up while the balance of the plant appeared to be healthy. Then another branch would be affected in the same way, and another, until the whole plant was dried up. The stems were the last to die. All varieties were affected alike. The plants are now in the houses and some 10 or 12 have gone off the same way and not one from stem rot. Some light upon the subject will be greatly appreciated.

C. A. M.

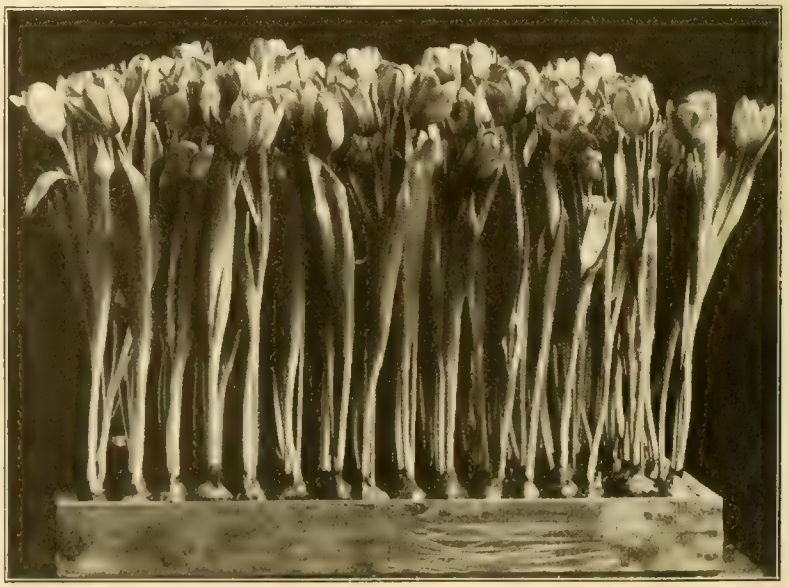
From the description "C. A. M." gives of his carnations it is evident that they have dry stem rot. It attacks the plants just as described and is incurable. The best thing to do is to pull up the plant carefully just as soon as it shows sign of same and burn it up, dig up and throw away the soil with which the affected plants have been in direct contact and apply air-slaked lime freely. It is quite safe to plant another plant in its place, but do not think the diseased plant can be doctored up by cutting off the diseased part, as it will be of no avail and will only tend to spread the disease. Ordinary stem rot generally attacks the plants just within the surface of the soil and makes short work of the plant, whereas the dry stem rot attacks branch after branch, but the result is invariably the same. J.

THE ROSE.

Seasonable Notes.

Now that the difference between the day and night temperature is so great; the effect is easily noted on the indoor plants, and about the only way to equalize the temperature, is to do a little light firing.

American Beauty is perhaps the first to show the effects of a sudden change of temperature, often bringing on black



A FLAT OF FORCED YELLOW PRINCE TULIPS.

spot, and the teas are sure to take mildew if there is a difference of from 25° to 35° between the day and night temperature as is often the case in the early fall.

Light firing, to be effective (if steam is used for heating), does not mean starting the fire in the boiler and banking it off at 10 or 11 o'clock, p. m., leaving it to smolder. If this method of firing is adopted, in all probability the pipes will be stone cold about 4 a. m. This being about the coolest time in the morning, the condensation is greater, and it is this sudden condensing of the atmosphere in the house leaving the moisture, ice cold, to settle on the foliage, that does the damage. Nothing in fact is more injurious than to have this happen several mornings in succession. If a night fireman is employed, now is the time to put him in charge of the heating arrangement as the steam or hot water must be kept in circulation, if used at all. One pipe is usually sufficient on mild nights where the temperature outside is from 50° to 55°, at the same time allowing plenty of air. I find that a temperature of 62° to 65° with steam circulating and the sashes lifted about six inches at night seems to agree with the plants. By reducing the night temperature gradually as the weather grows colder, we soon have our plants in the proper condition to stand the normal temperature they are to be run at through the winter. If the houses are put in charge of a night man now, there should be no difficulty in keeping the plants clean from now on; otherwise a range of rose houses may have their entire contents checked, causing a far greater loss, perhaps, than a night man's wages would amount to in months.

Speaking of night firemen, how often we see a range of houses with that neglected, skinny look to the plants, due, as much as to any other cause, to a cheap night man. It seems that some growers do not look to the great importance of an even temperature and they think there is economy in paying small wages to an incompetent man. This is a great mistake as the fireman must necessarily be intelligent and one we find that is caring for the plant intelligently is worthy of his hire, and is worth as much as the journeyman grower.

Do not expect the newly employed fireman to be a mind reader but take him around and give him time to become familiar with the valve and pipe system. Explain carefully the working of the boiler or boiler pumps, etc., and stay with him until you are sure he thoroughly understands the working of every thing in his line of duty. Remember the product of the whole establishment is left to the mercy of the night force, and one must not take any chances.

The reason I treat the subject at some length is to forcibly impress the grower with the great importance of being equipped properly for the maintenance of an even temperature at night.

The trade writers report the appearance of the new crop in many sections, but this need not be the signal for all of us to let them come into bloom of their own free will. Let only the better grades of plants come into bloom now, as there is considerable outside stock on the market and it is a good policy to build up our plants all we can, while we can do it easily. Disbudding at this time must be done with great care and the object should be to even up the size of the plants, taking all the buds from the smaller plants and allowing only a few to come on the strongest. This course will eventually result in shaping the plants so they will be able to produce a fair number of buds daily, instead of a crop which may come in at a time when prices are at their lowest.

When disbudding the plants now that have attained a fair size it is best to cut down farther on the stem to encourage a sturdier growth. Do not attempt much pruning yet, as this acts directly on the roots. It will be noticed that the plants will not require as much water, particularly after disbudding or heavy cutting as they seem to while making new growth. Still they should never be allowed to become dry at any stage, and if it has been found necessary to use artificial heat when the pipes are under the raised benches, make sure that the water reaches all parts of the soil.

E.

A POT OF FORCED ROSE LUISANTE TULIPS.

Spanish Irises.

The Spanish iris in England is becoming a very important item in the cut flower trade and since growers have been successful in forcing them in large quantities they are becoming increasingly popular, and are now seen on our markets in a cut state from the middle of March until the outdoor grown stock comes in July. This year market growers are ordering the bulbs in large quantities for forcing, larger than they have ever done before, and if the increase of quantities forced continues, as it is doing, a very decided advance in price of bulbs may be expected in the near future. In fact the prices already have an upward tendency and taken as an average all sorts are 25 per cent dearer than last year, and some of the forcing sorts still higher, particularly that fine early yellow variety, Cajanus, which is this year selling at 20 shillings per 1,000 as against 12 shillings per 1,000 last year.

The art of forcing Spanish iris successfully is a very difficult branch of cultivation and beginners generally make a failure the first year or two, but growers are more and more understanding the details of cultivation for forcing, and each year a larger number are growing them successfully. Spanish iris may now be classed as a regular forcing article. There are many reasons of failure which growers usually take two or three years to find out. Probably the greatest cause is that the bulbs intended for forcing are not selected large enough. It should be understood at the outset that a first-sized Spanish iris will not force to perfection. When I say first-sized I mean just the size growers have been for years in the habit of receiving for planting outside and also seedsmen for retailing in shop windows. To force at all one size larger than these bulbs must be used, that is a selected bulb of the very largest and best matured quality. In fact if it is possible bulbs must be obtained one size larger than ordinary first-sized quality.

Another very great fault is that bulbs are not delivered and boxed up early enough. They should never be later than September or early in October, so that

they will have as long a time as possible to make a strong root hold. I have seen iris received from Holland, boxed up during November, which the grower attempted to get in bloom during April, with the certain result that they all came blind. Spanish iris is not like the tulip or even narcissus, but has to rely nearly wholly upon what support it gets from the soil in which it is growing for the development of the plant and bloom. The bloom is not already formed in the bulb when it is received in a dry state as is the case in tulips and hyacinths and in a lesser degree in narcissi. Iris requires a much longer period to develop its root action and also requires a much larger root action than do any bulbs which form their blooms in full the year before as in the case of tulips and hyacinths.

Another thing is that many growers do not put the bulbs in sufficiently deep boxes. Eight inches is none too deep, and the soil should be of a good, rich, mellow character, but without any trace of rank or fresh animal manure in its composition. Some of the most successful cultivators assert it is absolutely necessary that the soil containing the bulbs should never have the direct force of winter frost on it in the slightest degree; they therefore cover the boxes while standing outside with some three to six inches of stable manure plentifully mixed with the stable bedding material in the way of straw or wood chips. This covering not only prevents injury from frost but also serves as a mulch and considerably stimulates the growth in the way of a top dressing of manure. After the boxes are brought inside the houses the forcing should be very slight, gradually increasing, but at no time should they be hard forced, otherwise a very large, if not total, percentage of blind growths will be the result.

The houses used for forcing Spanish iris should be very light and airy and plenty of ventilation given. A grower to be successful must not be afraid to waste an amount of heat through the ventilators. Top lights only must be used. Iris cannot stand drafts although they cannot have too much light and air. The lack of these two essentials causes growths to be weak and spindly with not sufficient strength to support their own weight, and if iris is successfully forced it will stand its own weight as stiff and straight as those grown outside in the open field, whilst too strong heat invariably causes the blooms to come blind. But probably the greatest and most important item of all is to give them plenty of time in which to grow and make a very strong and numerous root hold in plenty of good, mellow, suitable soil before being subjected to any heat whatever.

Then again there is the question of varieties; some growers have the idea that any sort will do for forcing, but this is no more so than it is with tulips, in fact hardly so much as most tulips; even the May flowering sorts, will force a little, whereas some sorts of iris will absolutely refuse to grow at all under forcing treatment. A glance down a leading Dutch bulb catalogue of irises is in most cases a very good guide as to what sorts will force. All the forcing varieties are rapidly advancing in price and in most cases are double the cost of any other sorts, owing to the demand and consequent exhaustion of the stock.

Of course there are other details in cultivation adopted by some growers which may considerably differ from the above, as most growers in nearly all branches of horticulture adopt methods of their own which they find by experience are best suited to their particular circumstances and locality. For instance one of our largest and most successful growers of iris, who grows each year close upon 1,000,000 under glass, uses the following method: He has a large amount of ground covered with skeleton frame houses, that is just wooden posts for support of top-lights, etc. These skeletons are about 4½ feet high at the eaves and 7½ feet high at the ridges and are simply frameworks ready for lifting on top lights when required.

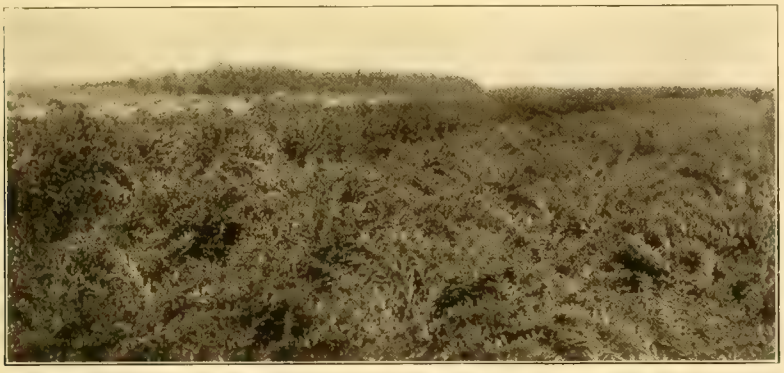
The piping for heating purposes is also hanging on brackets on the supports about two feet from the ground and no partitions between the houses are required. Only glass lights are used on the outsides of the whole block, so that a very large expanse of air is contained under glass without any confinement. The iris is planted in the ground of these houses as soon as received from Holland in a well prepared soil and is allowed to grow and make a large root growth and are fully exposed to outside atmosphere, under, of course, precisely the same conditions as if growing in the open field. As soon as the plants have made good growth and according to what time they are required to bloom the lights are put over and the heat gradually turned on. No finer blooms, nor earlier, ever come into any English market than from this grower. The structures are carefully and well made so that when the lights are on there is no fear whatever of draft.

The following are varieties used almost exclusively in English nurseries for forcing for market work: Alexander von Humboldt, a fine tall growing light blue with blooms of good substance; Belle Chinoise, a good growing sort of medium height and soft yellow color; Blanche Superba, a good forcer, but too short growing for many florists, although very stiff and strong in the stalk, it is the shortest in growth, nearly pure white in color; Blanche Fleure, a white or mauve shaded lilac; British Queen, the finest and grandest forcing pure white, a magnificent large bloom of fine substance, with plenty of last when cut, and a very tall, strong and straight grower; Cajanus, the finest deep golden yellow, a very strong grower, very good and early forcer, a very decided color and used in preference to any other yellow; Chrysolora, another good yellow, but much lighter in color than Cajanus, more of a light sulphur yellow; Darling and Formosa, two dark blues, the former being the best of the two; Gold Cup or Thunderbolt, is the only bronze of any use, a good bronze and yellow sort and an exceptionally strong grower, probably the largest bloom of any and the strongest of any sort in growth, but

ENTRANCE TO VAUGHAN'S NURSERIES, WESTERN SPRINGS, ILL.

bronze is not a color much wanted by the general public; Louise, is a fine porcelain and yellow, the only good forcing sort of its color. As a general rule it is always best to keep the bulbs of the sorts grown to good decided colors, blue, yellow and white only.

ENGLISH CORRESPONDENT.



LIGUSTRUM REGELIANUM AT VAUGHAN'S NURSERIES, WESTERN SPRINGS, ILL.

Lake Geneva Gardeners'

VISIT TO VAUGHAN'S NURSERIES.

The Lake Geneva Gardeners' and Foremen's Association visited Vaughan's Nurseries and Greenhouses, Western Springs, Ill., August 15, and found the outing both pleasant and instructive. Superintendent Wilson and Horace Cheeseman met the party at the station, whence they were driven to the nurseries, about a mile away, where Carl Cropp and Nursery Foreman Stockman joined them. Here luncheon was served in the reception room of Mr. Stockman's residence, shown in one of the illustrations herewith. In the table decorations the new gladiolus, Mrs. Francis King, was employed extensively and was much admired by the visitors.

The nurseries are situated in the open prairie with an ideal soil for the production of stock with fibrous roots and laid out on the block system except around the residence, which is arranged as a show and trial ground representing the various prominent features of landscape work. Here each new introduction must prove its merits without protection of any kind before it is put upon the market.

A large block of Regel's privet looked well, its glossy leaves, stocky growth and hardy character especially commending it. Here also was noted the new Chinese dwarf privet Ligustrum Chinensis, apparently satisfied with its surroundings. This beautiful little shrub rarely exceeds two feet in height and can be substituted for boxwood, which it resembles very much. We noted a large block devoted to hybrid perpetual and other roses, including the Baby Rambler. A large block of Hydrangea paniculata grandiflora was about to burst into bloom.

Special attention is given the propagation and development of the best native shrubs, viburnums, dogwoods, etc. The Carolina poplar and other trees grown in large quantities prove that the soil at Western Springs suits them. The general nursery stock includes in addition to the foregoing everything that is needed in this section of the country in the way of reliable hardy trees, shrubs, vines, etc., including about five acres of the best varieties of peonies.

The perennial phlox is one of the firm's specialties, about four acres being devoted to its propagation and culture. The best varieties only are propagated and some of them originated here. Hardy perennials of all kinds are propagated in immense quantities and grown in pots for convenience in shipping. Cannas and dahlias are grown extensively and represent the cream of existing varieties.

At the greenhouses we found the various sections well filled with thrifty stock of all kinds and sizes. Palms, ferns, araucarias, fancy caladiums and Begonia Gloire de Lorraine were noted in extensive assortment and best possible condition. Chrysanthemums for exhibition purposes had the appearance of prize-winners. Every department showed scrupulous cleanliness and care in growing.

This little notice was prepared at the suggestion of our association and is but an outline of the great work of selection and growing which is going on at this establishment.

JOHN TIPLADY, Pres.

Impressions of Oregon.

To an eastern man Oregon appears big and undeveloped, a land of great resources and almost unlimited possibilities. Over 50 years ago the pioneers settled in the Willamette valley. They and their descendants are still there. The soil is fertile, the climate salubrious and the scenery sublime. Hemmed in by the everlasting hills and cut off from the rest of the world except for a single line of railroad, with bountiful harvests of grain, fruit and hops the native Oregonian has been content to "let well enough alone." This and the blind policy of the only railroad system in the state in not extending its lines or reducing its rates and thereby inviting immigration have kept Oregon in the background for 25 years or more. The Lewis & Clark exposition of 1905, the San Francisco disaster and the expansion policy of several progressive railroads are beginning to awaken up the dormant energies of the sleeping natives, while the influx of eastern push and energy is acting like a leaven which in a short time will permeate the whole state.

From the majestic Columbia river on the north to the state line on the south, a distance of nearly 300 miles, there is only a single line of railroad crossing the state, the O. R. & N., which hugs the south bank of the great river and terminates at Portland. The S. P., a part of the same system, runs from Portland south, up the valley of the Willamette and on to San Francisco. These two lines, with a few short feeders, constitute the railroad system of the state. The roadbed of these roads for the most part cannot be surpassed, but the rolling stock is old and inefficient. Every fall there is a car famine and merchants annually lose thousands of dollars by not having cars to move their products.

The great central and southern portion of this great state are practically undeveloped. A few daring spirits have penetrated the most fertile valleys and a few small towns, the nucleus of cities to come, are established. Some of these interior merchants have to haul their goods by wagon 200 miles from the nearest railroad station.

There are still 10,000,000 acres of government land in the state of Oregon subject to homestead entry, classed as agricultural, timber, stone and desert tracts, but every foot of it rich in natural resources. Such is Oregon as I view it. A land of wonderful possibilities, of almost limitless resources, of sublime scenery, of mild and healthgiving climate, an almost unexplored paradise. It is a land that only needs

THE LAKE GENEVA GARDENERS AT VAUGHAN'S NURSERIES.

development; a rich harvest field awaiting the harvester.

PORTLAND THE BEAUTIFUL.

Portland, the gateway to this great state, reminds one of the older cities of the east, such as Buffalo was 20 years ago. It is situated on both sides of the Willamette river about eight miles from its junction with the Columbia. Ocean steamers from all parts of the world are daily seen at its docks and the volume of its shipping trade is rapidly multiplying.

The city is surrounded by hills from a few hundred to 1,400 feet in height. On these the wealthy have magnificent homes, while hundreds of the middle class camp out on the heights during the summer months. Thousands of the humble poor also have their homes, each surrounded by fruit trees upon these sightly heights. The population of the city is variously estimated at 150,000 to 180,000, while 15,000 or 20,000 not included in these totals live in the surrounding suburbs. There is an immense building boom on in the business district. Old wooden shacks are being replaced by steel and brick structures of the latest style.

This is appropriately called the Rose city. The beautiful queen of flowers is blooming on every lawn. Where the lawns are restricted in size, roses are planted in the boulevards. They are seen everywhere and thousands of flowers are seen in every block, even at this season of the year. In May and June the sight must be grand beyond comparison. But this surfeit of roses renders other flowers scarce. In fact, other flowers are not needed where the rose blooms perpetually. Many of the lawns have fine ornamental shrubs, but they are grown for their beautiful foliage rather than their flowers.

But though vegetation grows most luxuriantly and flowers bloom in the open all the year, there appears to be a good cut flower trade here. There are four first-class stores in the city and 15 or 20 greenhouse establishments in the outskirts and suburbs. Of these I will write at some future time. The rainy season is just commencing and this with the cool nights renders night firing a necessity, especially where roses are grown.

DRUMMER.

HYDRANGEA PANICULATA GRANDIFLORA AT VAUGHAN'S NURSERIES, WESTERN SPRINGS, ILL.

Outing of Two Washington Florists.

ADOLPHUS AND WM. F. GUDE IN THE WEST.

We left Washington, D. C., writes Wm. F. Gude, August 11 and arrived in Denver, Col., early in the morning of August 14. The writer naturally fell in with that genial, wholesouled president of the Park Floral Co., J. A. Valentine. While in Mr. Valentine's place of business we were shown some dahlias, the like of which we had never seen before on either this side or the other of the Atlantic. We were naturally interested to know where these dahlias grew, and a few minutes afterwards we were in an automobile being taken through a most interesting section of the city, and five miles northwest through some of the most fertile fields that it has been ever our pleasure to behold.

A MODEL DAHLIA FARM.

In a short while we were on the grounds of W. W. Wilmore, a former resident of Laurel, Md. Here the beauty and perfection of all the flowers that Mr. Wilmore cultivates are simply unexcelled, but particularly so his dahlia industry, which from our observation seemed to be perfection itself. The following are varieties particularly worthy of mention:

Bonton, he considers the best dark red, and Lyndhurst an excellent red or scarlet. In white, Snow and Glorie de Lyon are both good. Mr. Wilmore considers Kreimhilde a most desirable pink. Cactus and the old deep pink A. D. Livoni are still general favorites, but he predicts that both of these will have to take a back seat when Mme. von Dael is fairly before the public. This he considers the grandest thing yet sent out in pink, but the stock has been too scarce for it to become generally known. It should have a slight shade in this climate to bring the flowers to perfection. Queen of Yellow and Miss Dodd are both good yellows. Twentieth Century has proven to be a valuable and striking variety for florists' use, but it is about the only single that is much in demand here. Mrs. Winters is a magnificent white for the garden, but wilts easily and on that account is not a valuable florists' flower.

Two other new varieties were mentioned which Mr. Wilmore confidently predicts have come to stay. Navajo, a very dark red of decorative form, too dark for florists' purposes but just right for others; and Umatilla, a red with very long stem and fine flowers. A green freak noticed is named Verdiflora, and is as perfectly a formed green flower as we have ever beheld in any color.

It might be well to state that these beautifully fertile acres were a barren waste before Mr. Wilmore took hold of them, but by the introduction and perfect control of the irrigation system he has converted them into a model, commercial, floral and fruit farm. For the flavor of those juicy apples, dished out to us in the form of a liquid, was as pleasing to the taste as was the fruit beautiful to the eye. In all, the home

CAROLINA POPLARS AT VAUGHAN'S NURSERIES, WESTERN SPRINGS, ILL.

of Mr. Wilmore with his sturdy family, his welcome, wholesouled greeting, his kind hospitality and his heartfelt "come again," make one feel proud to be a florist, and that such men as W. W. Wilmore are in the business to grow flowers to such perfection as we saw them here.

Leaving Mr. Wilmore's place laden with arms full of his choice flowers, we stopped at the Union depot to leave them in our cars. The members of our party were all eastern people and they declared that they had never seen such specimens.

IMPRESSIONS OF DENVER AND THE WEST.

We next drove through the principal streets of the city, where we were shown lawns and window boxes to perfection, then to the Park Floral greenhouses where everything that we saw was up-to-date and in fine condition; then through the extensive city park's system, with its zoological park, boulevards, lakes and drives, second to none in point of beauty and artistic arrangement.

Having always been in favor of our national convention reaching out, I feel now more than ever that one of the best moves the Society of American Florists could make would be to hold a convention in Denver, Col., in the near future.

In the midst of the Rocky mountains we were again impressed by the clear color and wonderful beauty of the columbine, which grows wild in great profusion on the mountain tops, also the forget-me-nots with their vivid blue, growing in the highest altitudes, far above the timber line. At Colorado Springs and Manitou, we also noticed that the western people put forth more effort in producing beautiful lawns and gardens than do our eastern people.

SAN FRANCISCO, CAL.—Earthquakes are reported to have been felt within a radius of 200 miles of this city, continuing the feeling of anxiety.

STERLING, ILL.—J. A. Swartley, proprietor of the Sterling greenhouses, has let the contract for the erection of an addition to the plant. The new house when completed, will cost over $2,000 and will be a modern structure in every way. It is to be 46 x 200 feet, and will be devoted to carnations.

WITH THE GROWERS

The Chatogue Greenhouses, Mobile, Ala.

The value of the horticultural industry to Mobile has been greatly increased during the past year. There are nine florists' establishments in the city and outskirts, regularly engaged in the raising of flowers and plants for the market and about half their product is exported to other cities.

THE CHATOGUE GREENHOUSES, MOBILE, ALA.

The nine establishments are the Chatogue Greenhouses, Col. F. P. Davis proprietor, on Spring Hill avenue, at Summerville; C. Ravier & Sons, 250 George street; H. P. Loding, 911 Palmetto, Street; Miss Maria Minge, north Lafayette street; Mrs. Margaret Goodbrad, 982 Dauphin street; Mrs. M. T. Greene, 68 North Lafayette street; Alex. Duplan, 930 Elmira street; L. Thublin, whose establishment is at 515 Marine street, and the Catholic industrial school for boys on North Lafayette street, where both vegetables and flowers are grown for sale locally.

The largest greenhouses in the neighborhood and, in fact, in the south, are the Chatogue Greenhouses. About three years ago when Col. Davis disposed of his cotton compress, and warehouse property and interests, he acquired the historic estate of the late Judge Bragg, on Spring Hill avenue and adjoining properties, which gave him about 80 acres of diversified lands within three miles of the customhouse, and on car, electric, and water lines. Three-mile creek runs through this property, and bottom soil particularly adapted to the growing of roses is found in abundance.

He erected a small block of modern greenhouses, intending to engage in the business of growing cut flowers on a small scale and in a quiet way. From the start there was such demand for the product of his plant that he has been compelled to gradually increase the area of glass until today nearly two acres are covered with the most modern structures, and heated with up-to-date machinery.

One of the most stubborn obstacles to be overcome has been the inability to secure expert labor that could apply knowledge acquired in colder climates to the conditions met here, so that Col. Davis has had to largely direct the work himself. Within the past year he has secured the services of W. M. Bailey, an experienced florist, who received his early training in England, and for a number of years after coming to America had the management of the establishment of the late Mr. Plant, which was located at Macon, Ga. Here he had unlimited means at his disposal with which to apply his knowledge to southern climatic conditions. The local plant is now well equipped to compete with Chicago, which place has heretofore almost exclusively supplied the high class retailers of the south with cut flowers during the winter season.

All of the houses are of iron frame, with seasoned cypress and cedar roof bars, and covered with butted glass. Most of the beds, or benches are constructed of cement.

The main crops grown are roses, carnations and chrysanthemums. All flowers forced out of season are grown to a limited extent, but the three named are grown mostly for shipping. At present 15,000 roses of various kinds are growing on the benches, Bride, Bridemaid, Golden Gate, Ivory, Kaiserin, Killarney, Perle, Richmond and Mme. Brabant. A specialty is being made of Richmond and Killarney. The Chatogue Greenhouses had much of the credit for making a national reputation for the Richmond.

Ten thousand carnations have already been planted in the big house just completed. This house alone covers an area of 7,000 feet. Only a few of the best varieties of carnations are grown, such as Prosperity, Lady Bountiful, Pink and Red Lawson, Enchantress, Moonlight, and the new Christmas Red Cardinal.

Col. Davis is the recognized authority on chrysanthemums in the far south, and a specialty is made of this flower. Of the many varieties tested during the past 20 years, he has culled the list down to about a dozen kinds, mostly white and yellow.

Two houses will be devoted this winter to sweet peas for Christmas, and one to lilies for Easter. A large house has been added to the plant this summer for growing exclusively ferns and foliage plants for the local trade. One house will be devoted to flowering plants in pots. A specialty is made of lily of the valley to order for weddings.

Thermostats are being installed in all

of the houses, and these will operate an electric alarm in the sleeping apartments of the foreman, so that he will be appraised of the slightest change in the temperature.

Heretofore the product of the plant has been sold exclusively at wholesale, but it is announced that the greenhouses will be in future open to the public, and the flowers sold direct.

CANNA KING HUMBERT AT MT. GREENWOOD CEMETERY, CHICAGO.

Expert judges say it is the best canna to date.

A. N. Pierson, Cromwell, Conn.

One of the most extensive greenhouse establishments in the entire country is that of A. N. Pierson, of Cromwell, Conn. He has between 56 and 60 houses under nearly 600,000 feet of glass. Two hundred hands are employed all the time and at certain seasons additional help is employed.

To heat the greenhouses and other buildings requires a battery of 11 boilers, two of them being of 80 horsepower and nine of 125 each or more. Into the furnaces 6,000 tons of coal are shoveled annually. This coal is a mixture of one-fifth bituminous coal and the balance anthracite of the size known as buckwheat. Incidentally it might be mentioned that Mr. Pierson's water bill is $1,600 per annum. A herd of 100 cows is kept for fertilizing purposes, the output of milk paying for the herd.

Mr. Pierson declares he has no specialty, but intends to produce everything the retailer is likely to need. Perhaps lily of the valley is grown as extensively as any other crop. From 2,000 to 5,000 pips are set out every day in the year except Sundays. These pips, which are raised on the place, are kept in cold storage at a temperature of 27° until they are brought out to be slowly thawed for planting. Mr. Pierson estimates that he cuts about 2,000,000 lily of the valley blooms annually. Orchids also are a notable factor in this establishment.

In the rose houses Richmond is now being extensively grown, six houses being devoted to this variety. American Beauty, Bride, Bridesmaid, Ivory and the other leading sorts are hardly less prominent.

Mr. Pierson's greenhouses are in two groups a quarter of a mile apart. In what he calls the north greenhouses are the carnations. Sixteen sorts are being cultivated, Mrs. Lawson and its varieties being most extensively grown. Several greenhouses are devoted to gardenias. Ferns and asparagus of the varieties in demand also are given considerable area.

Mr. Pierson was born near Lund, a city in Sweden, 56 years ago and worked in greenhouses there until 18 years old. He came to this country in 1868 and to Portland, Me., in 1871. The next year he hired Chas. O. Post, of Cromwell, Conn., and built one greenhouse about 50 feet long. A year or two later he married Miss Allison of Middletown and occupied an unpretentious house near his greenhouses. Each year has seen the building of one or more greenhouses, one just finished this year being 60 by 408 feet, and the limit seems as far off as ever.

Mr. Post, his original workman, is still in his employ and is likely to be as long as he works for anyone. Four children have been born to Mr. and Mrs. Pierson, one dying in infancy, one, Representative Frank Pierson, dying last year, and two are living, Wallace Pierson, who is associated in business with his father, and a daughter, the youngest of the family.

Charles Zeller & Sons, Flatbush, N. Y.

A visit to the two establishments in Flatbush of Chas. Zeller & Son discloses the preparations made to meet a demand for miscellaneous stock during the approaching holiday season. As formerly, fruited orange trees will be a specialty. There is a greenhouse full of this stock, the plants running from one to three years old. A nice block of young orange stock is coming along outside, close bushy plants all from cuttings made last February. The evident richness of the soil in the nursery grounds would surprise those who could realize the length of time the grounds have been continuously used for growing stock.

"Here is a piece of ground," said Alfred Zeller, pointing to about an acre planted closely with oranges, hydrangeas, dracæna indivisa and other plants, "which has been used continually for over 30 years, and you would not think stock would grow as well as it does. We feed it well and thus keep it in first-class condition. We put on it well-rotted manure in the proportion of 40 loads to the acre. This spring we found the soil to be a little heavy, so worked into it about 20 team loads of sand. Later, before planting, we applied about half a ton of sheep manure, and a quarter ton of bone meal. We think better soil now could hardly be found."

Another specialty here is Kentia Belmoreana, grown from seed. There is one very fine house full of plants in commercial sizes, all originating in this way. It was stated that there is quite an advantage in cost in favor of home grown stock, compared with the imported, and the appearance of the plants in this house would warrant the assertion that there is also an advantage in quality. Some houses of Boston and Scottii ferns are in excellent shape, the plants being well grown, with a good proportion of them reaching to specimen sizes.

Some houses of chrysanthemums look very well. Maude Dean, Minerva, Minnie Bailey, Pink Appleton and Timothy Eaton are the principal varieties planted. One small house is devoted to cattleyas and has yielded a very satisfactory return during the season. This house later will be used for other stock, and the orchids suspended from the rafters of different houses. There is a

ESTABLISHMENT OF CHAS. ZELLER & SONS, FLATBUSH, N. Y.

Showing house of home grown Kentia Belmoreana

house of cyclamens in excellent shape, and a large quantity of plants outside in frames waiting to be housed. Other things seen coming along are poinsettias, primulas, Pandanus Veitchii, very fine in color, dracænas, caladiums, Japanese peppers, Asparagus Sprengeri, A. plumosus, camellias and begonias. In the field is about half an acre of geraniums growing along for stock plants, the varieties S. A. Nutt, Doyle and Barney predominating.

Pittsburg.

MARKET STEADIER.

Fall trade is beginning to settle down and instead of a spasmodic market it is getting more regular daily. Receipts of carnations are increasing. Quality is also better. Most of our carnation growers will be cutting in a week or two. Roses are better, especially Bride and Killarney. Some nice Chatenay are to be seen. Asters are as good as ever and many more coming in. Lilies are plentiful. Quite a demand for them in pots was felt owing to the 40-hours' devotion. Lily of the valley is plentiful, also candytuft and feverfew. The gladiolus market took a flop at the end of the week, many cleaning up. The chrysanthemum season was ushered in by J. B. Murdoch & Co., showing a few large yellow blooms.

NOTES.

Mrs. E. A. Williams had the anniversary decorations at McCreerey's. The decoration was novel inasmuch as no merchandise was advertised or merits exploited. The whole color scheme was in green, ferns being mostly used, with just enough red dahlias to give the right effect. The counters were all of white asters and yellow dahlias. Mr. Sheaf lost no time getting the decorations ready.

The horse show at Sewickley was pretty well divided between Mrs. E. A. Williams and J. K. Hutchison. The latter had a floral battleship as a centerpiece for the reception dinner given by the club in honor of the naval officers. The piece was beautifully executed and much commented on by the society editors, although they did describe the large asters used as chrysanthemums.

A disease struck a good many local growers' Lawsons, all of which had to be thrown out and new ones secured. Chas. Hoffman and J. L. Wyland were the heaviest losers.

The Pittsburg Florists' Exchange seems to have a corner on the large white aster market. They are also handling some nice Killarney roses.

The Pittsburg Cut Flower Co. reports good sale of gladiolus America during the week.

A. W. Smith is receiving quantities of outside flowers from his Ohio farm.

Visitors: Mrs. Vesey, of Ft. Wayne, Ind., stopped in town Saturday on her way home. John Maxwell, of Greensburg, and G. L. Huscroft, of Steubenville, O., were also visitors. J.

Newport, R. I.

SEASON BETTER THAN EXPECTED.

Now that the Newport season is over, the florists consider business has been as good as last year, although many expected a poor season owing to the great amount of rain in June, and July. August and the beginning of September made up for it. Everybody was rushed with decorations, etc., especially horseshow week.

On September 13 the city was visited by a severe electrical storm, starting at 2 o'clock in the morning. Considerable damage was done by lightning and downpour of rain. The most damage was done at the stable of T. M. Davis, which was struck by lightning and burned to the ground. Mr. Johnson, one of the gardeners, woke up first, while the stable was in flames, he hastened to awake the coachman, etc., who saved the horses and carriages, the help losing everything. Near by two haystacks were burned to the ground belonging to Joe Kenney, a farmer. In the city parks a flag pole was struck by lightning and splintered into a thousand pieces. Many trees and shrubs suffered more or less. In the farming district many barns and houses were struck. The telephone service was out of commission. No glass was damaged, as only rain fell, but in enormous quantity. The storm was over about 5 o'clock a. m. Outdoor flowers and vegetables suffered a great deal. No such storm has been seen here for many years.

Seedsmen are displaying a large variety of dahlia flowers, taking orders for bulbs for spring delivery. They are also unpacking bulbs and filling orders already received.

Stewart Ritchie is beginning to cut carnations out of his new house.

Oscar Schultz is erecting a large storehouse for bay trees, etc.

L.

Wreath for McKinley Monument Unveiling.

The beautiful wreath of laurel, cycas leaves and dark purple asters shown in our illustration, was the offering of the Columbus Florists' Club as a tribute to the memory of our late president at the unveiling of the McKinley memorial monument by Mrs. Nicholas Longworth. The ceremony took place at Columbus, O., September 14. The committee from the club in charge of the matter were: Albert Knopf, Guy H. Woodrow and M. B. Faxon.

McKINLEY MEMORIAL WREATH.
The Columbus Florists' Club's contribution.

Columbus, O.

The unveiling of the McKinley monument caused quite a stir in society last week. Among the out-of-town guests were Nicholas Longworth and wife, and Miss Ida McKinley Day, niece of the late president. A number of receptions were held, and luncheons and dinners given in their honor which created a great demand for red carnations and

American Beauty roses. The Columbus Florists' Club sent a handsome wreath to the committee having charge of the unveiling. The wreath was highly appreciated by the committee and given a prominent place at the speaker's stand.

The Livingstone Seed Co. made a display at the Ohio state fair among which the Boston ferns, a variety of semperflorens begonias, "their own introduction," and Baby Rambler roses were especially worthy of mention. This firm has an unusual demand for fancy evergreens, of which they have a fair collection.

The Fifth Avenue Floral Co. has finished the planting of its carnations after being interrupted very often by the rush in funeral work. Mr. Woodrow reports business as being double that of last year.

J. R. Hellenthal has his new carnation house planted with Enchantress and Ethel Ward, which are in prime condition. The house is up-to-date in every respect. CARL.

Baltimore.

JUBILEE'S EFFECT ON TRADE.

We have had great crowds of visitors and wonderful outdoor gatherings of strangers and our own people during the past week, the occasion being a jubilee celebration in honor of the restoration and rehabilitation of the city after the devastating fire of 1904. Military and civic parades, processions of firemen, including many who came to our assistance in the attempt to fight the great conflagration, and a great concourse of heterogeneous elements to close a week of noise and enthusiasm. As yet it is a mooted question whether business was helped or hindered; certain lines, such as hotels and restaurants, had more to do than they could attend to, but in other branches there is wide complaint that the usual routine of business was rudely interrupted, although there were a large number of retail merchants in town from contributory territory who combined work and play. In the cut flower business some of the street merchants did a good business, but many of the regulars deserted to give their time, energies and vocal powers to the distribution of badges, medals, canes, hats and souvenirs of various sorts, which yesterday were not and today spring up more suddenly and more abundantly than grain sprouting in the field. Florists say there was little acceleration to sales, though naturally some flowers were employed, the bouquets carried in some of the processions being wondrous in size and makeup. The weather has been simply perfect, a warm sun tempered by delightful breezes, with cool and invigorating nights. So far as heard from night firing has not begun with any of the rose growers, and roses, both indoors and out, of good quality and poor, are overabundant. Dahlias come in deluges and carnations are abundant.

The Fernery, 1421 N. Charles street, has made arrangements to grow much of its own material and has leased the greenhouses of Mrs. McRoberts at Govanstown.

Among the improvements not heretofore noted is a greenhouse, 16x100 feet, of Philip B. Welsh, at Glyndon, for carnations. S. B.

Syracuse, N. Y.

The state fair, which closed Saturday, attracted 150,000 visitors. P. R. Quinlan & Co., in the floral exhibit, took 27 out of 32 first prizes in the professional class, four seconds and one third. Among their exhibits were funeral pieces, bouquets, dahlias and ferns. The floral exhibit was in charge of David Campbell, superintendent of the Syracuse parks. The exhibit of flower beds on the grounds was a feature of the fair, the plants having been grown in the state fair greenhouses and put in place by Supt. Henry A. Smith. Arthur Cowee of Berlin, N. Y., had a large show of gladioli and took several prizes.

The park commission recently created by the legislature is planning for a system of public parks in this city. Geo. E. Kessler, of Kansas City, Mo., has been engaged to formulate plans. James W. Pennock is president of the commission.

During the state fair and Ka-noo-no carnival a large number of dinners were given which proved to be profitable to the florists. Fall weddings have started and there is the usual amount of funeral work.

The Wheadons did a large business during the week, the bulk of it having been dinner party decorations.

There has been one light frost this month, but not heavy enough to harm any of the stock outdoors.

Roses are coming in fairly well, American Beauty showing a good length of stem.

Henry Morris has returned from a vacation at Cranberry lake. A. J. B.

Cleveland.

THE MARKET.

The intense heat of the past week had a tendency to weaken the market a trifle, it being one of the hottest spells this season and having a bad effect on the keeping qualities of all kinds of stock. Asters are on the decline, it being impossible to obtain good stock. Carnations and roses are quite plentiful; quantities can be had to fill all orders. Dahlias have put in an appearance, but do not keep after being cut when the weather is so hot.

NOTES.

The bowling alleys at the club are being refinished and will be in fine shape for next week.

Herman Hart has completed his new houses and now has everything up in fine shape.

The stork has visited Geo. Smith. It's a handsome baby girl.

Smith & Fetters had a very large wedding the past week.

Visitors: F. J. Stehle, Lorain, O.; T. G. Yale, Wellington, O.

OHIO.

The Gasser Co. will open a wholesale cut flower house October 1 in the Osborn block. They have secured a very commodious store at this point, which is known locally as the "new center," and as the store fronts on both Prospect avenue and Huron road, it gives it plenty of light and is of ready access. This firm is fitting up both the first floor and basement as shipping and stock rooms. This move was made necessary by the ever increasing business of the company's wholesale branch which has entirely outgrown the limited quarters alloted to it at the retail store on Euclid avenue. Each business will be run independently of the other, and the retail store will be charged with all the stock it gets.

Louisville.

TRADE QUIET.

Business the previous week was generally conceded as being somewhat quiet, with the possible exception of one or two days. There is not, however, much of an over-supply in anything, especially asters, in which white and purple have become very short. The nights have been very cool, and stock is beginning to show quality. There is nothing short about the quality of roses, the supply also being good. The demand has been satisfactory. Carnations are improving both in quality and supply, and find a fair demand. Asters are nearly through locally, though a few of fair quality are yet to be had. The demand is somewhat slow. Lilies are seen occasionally, and have some demand. Cosmos can be had in small quantities, but the blooms are as yet a little small. Dahlias have found a good demand, and can be had in small quantities of satisfactory quality. Green goods can be had in adequate quantities.

The annual dinner of the Kentucky Society of Florists was given Tuesday, and a large number participated. Vice-president Baumer made an ideal toastmaster. President Rasmussen's topic was "Our Society," and pointed out what little time it takes to attend our monthly meetings. J. E. Marret had for his subject "Ladies." Nuf sed. Jacob Schulz spoke of the illumination of Far Hills and touched a little on the short attendance at the majority of our meetings. He urged members to overlook little things that received a majority vote, contrary to their ideas. Secretary Fred L. Schulz spoke of the S. A. F. Louis Kirch gave a talk on "Bowling." The affair was a very pleasant one. Make it a habit.

Visitors: G. S. Brush, representing the J. B. Owens Pottery Co., Zanesville, O.; S. Freund, representing Hummel & Downing Co., Milwaukee; a representative of Schloss Bros., ribbon dealers of New York, and Mr. Burdell, of the Burdell Floral Co., Bowling Green, Ky.

F. L. S.

San Francisco.

TRADE SATISFACTORY.

The first week after the street railway strike and resumption of trolley transportation service trade on the whole is again up to the point of satisfaction. Roses and carnations are reported very scarce and prices have gone up considerably. Lilium album and L. rubrum are not quite so plentiful and find a ready sale. In the show windows I see quite a few cold storage Lilium longiflorum.

Within the week a few more flower stores have opened and one of the finest is that of the Sievers Floral Co., the original John H. Sievers. The location is at 1660 California street, near Van Ness avenue. Also, three streets south from California, at 1345-47 Sutter street, near Van Ness avenue, Pelicano

& Rossi have opened a second flower store with very fine show windows.

Mr. Boland has withdrawn from the old firm of Sievers & Boland and leased two stores at 45-47 Geary street. He is converting them into one store and says it will be the scene of the prettiest flower store in the city. He purposes opening this first downtown store in the burned district the first of next month.

A new flower store opening the past week was on Sutter street, near Fillmore, conducted by Messrs. Stein & Levin, who for years before the earthquake were chief decorator and salesmen, respectively, in the service of the American Florist stand on Polk street.

The Art Floral Co. is enlarging its store on Van Ness avenue and fitting it up very tastefully.

JESSE WHITE.

Denver.

TRADE EXCELLENT.

The flower business has been far ahead of anything we have ever had here during July, August and September. General reports indicate that it was 50 per cent better than the best previous record. The weather is now getting a little cooler and all are looking forward to a good business this fall.

A. C. Sinram has opened up a new store at 1555 Arapahoe street. He has a very attractive establishment and is situated opposite the postoffice. We wish him every success.

E. E. Petersen's new house is planted with the newer carnations, which are looking well.

The Park Floral Co. has its varied and extensive lines in unusually fine condition.

The Alpha Floral Co. expects to move into its new quarters about October 15.

The Colfax Avenue Floral Co. is in good shape for the fall business.

Mrs. Mauff's establishment is well stocked with good material.

N. A. Benson's carnations are in fine condition.

PLATTE.

Davenport, Ia.

TRADE EXCELLENT.

Trade has picked up wonderfully in the past week with plenty of flowers to fill all orders. Roses are fine and carnations are getting better every day, some really good ones now finding their way to the market. Chrysanthemums are in fine shape. In fact everything is looking better now than it did this time last year.

TRI-CITY FLORISTS' CLUB MEETING.

The Tri-City Florists' Club held its regular monthly meeting September 15 with Henry Gaethje, of South Rock Island. "The Forcing of Bulbs" was the topic for consideration and as nearly every member of the society was present an excellent discussion resulted. As it is a subject every florist is more or less interested in, the discussion brought out some excellent suggestions and experiences, especially in the forcing of Lilium Harrisii and L. longiflorum. One new name was submitted for membership. After the meeting refreshments were served and the members enjoyed a social hour. The next meeting will be with Julius Staack, of Moline. As Mr. Staack has just completed a new range of houses of the most modern design, the members are all anxious to inspect them.

The state convention of the Society of Iowa Florists will be held in Dubuque, Ia., October 17.

John Temple, president of the Florists' Club, and Theo. Ewoldt, expect to attend. Mr. Ewoldt is vice-president and Mr. Temple ex-president of the Iowa State Association.

NOTES.

John Temple, who has just returned from the Iowa State Fair, held at Des Moines, reports that the floral display was finer and on a larger scale than ever before. He claims that the amateur display was the best he ever saw and in some respects outclassed those of the professionals.

The Bills Floral Co. has completed the remodeling of its store and has now one of the finest retail stores in this part of the country.

Henry Gaethje has just installed the vacuum system of heating and expects to save one-third his fuel bill this winter.

T. E.

Kansas City.

THE MARKET.

Market conditions for last week, with but few exceptions, have remained unchanged. Generally outdoor stock, including asters and dahlias, is badly in need of rain. Delightfully cool weather has prevailed this week, which to a certain extent has served to stimulate trade. Most every shop has nice future orders booked for weddings, parties, etc. Quite a number of large orders have been executed the past week for department store openings. These made use of large numbers of palms and cut flowers which were given away as souvenirs. With the usual run of funeral work we find the majority of the stores rather busy. The supply of asters is shortening somewhat. Dahlias are scarce. Gladioli may be obtained, but in limited quantities. Carnations are showing the good effects of the cool days. American Beauty is yet scarce and poor. Bride and Bridesmaid roses are increasing in size and length of stem. Smilax, asparagus and all green goods are scarce as usual in this market. All are looking forward with much interest to chrysanthemum time. A visit to many of the growers assures us of a splendid lot for the fall trade. Compared with last year the crop is far ahead in quantity and quality.

NOTES.

The regular monthly meeting of the Missouri Valley Horticultural Society last Saturday was with M. E. Chandler at the Elmhurst Nursery, Argentine, Kans. An interesting address, "The Larger Aspect of Horticulture" was delivered by Prof. Howard Dean, Park College. Papers of interest were read by Mrs. G. E. Rose, Rosedale, Kans., and Prof. E. A. Popno, Manhattan, Kans. A fine dinner was provided and the day was much enjoyed by all.

The People's Floral Co. held its annual opening September 15. Many visitors were entertained. The windows of the store were made very attractive with the use of a large quantity of asters and greens. At the greenhouses was shown a criditable assortment of foliage plants.

Ed. Ellsworth is busy directing the work of remodeling the store. Ed. has the reputation of being very tasty in store arrangements and we are watching with interest the improvements being made.

J. R. Pendroy, of Bartlesville, I. T., was in the city last week making purchases for a new flower shop to be known as the New Novelty Flower Shop which is soon to be established in that city.

Frank Meinhardt, who opened a well-appointed flower store in Leavenworth, Kans., last Thursday, expresses much satisfaction in the volume of business transacted the first few days.

Sam'l Murray reports a good outlook for fall trade, Miss Hayden of that firm having recently succeeded in capturing some nice wedding orders.

Wm. Bridgeland is again busy having spent a very enjoyable visit with home folks in York state.

Mr. King of the Butte Floral Co., Butte, Mont., stopped in the city a few days.

D. Frendenthal contemplates a trip to New Orleans next month.

Miss Ella Newman, of Kansas City, Kans., has sold her place.

K. C.

PORTLAND, ME.—The Portland Sunday Times of September 2 gave an appreciative account of Albert Dirwanger and his business.

ALBANY, N. Y.—The board of contract and supply at its last meeting awarded the contract for tulip bulbs to be planted in Washington park to Henry A. Dreer, Inc., Philadelphia, for $486.90.

—R. D.

OBITUARY.

Michael King.

Following an illness of several months' duration, Michael King, for many years a well known florist of Louisville, Ky., died September 9, aged 71 years. Mr. King was the father of John King, who for several years conducted the Commercial college at Louisville, and is survived by a son, Patrick King, and a daughter, Miss Mary King.

Otto Froebel.

Otto Froebel, the well known horticulturist of Zurich, Switzerland, died August 28, age 62 years.

The Hieland Heather.

Some like the red rose, some the white,
And some the shil-pit lily;
The dahlia and forget-me-not
May please young maidens silly;
But Scotland's hills can boast a flow'r
Worth a' their flow'rs thegither;
Nae sickly hothouse plant, I trow,
But hardy Hieland heather.

When Rome, great mistress of the world,
Sent o'er her conq'ring champions,
Auld Scotland ga'e her lug a claw,
Then off an' o'er the Grampians.
Syne yellochs out in Norlan' wrath,
Come gather, lads, come gather;
Imperial Rome shall rue the day
She first smelt Hieland heather.

FROM this date forward be prepared for frosts injurious to tender stock in the open ground.

BENJ. HAMMOND in addition to his other work and effort for the public good has that of president of the Fishkill board of education in hand just now.

SECRETARY BENJAMIN HAMMOND of the American Rose Society is sending his numerous friends a neat advertisement of that association in the form of a celluloid book mark showing a cluster of colored roses.

CHRYSANTHEMUM IVORY, says an expert grower of that variety, does best in light soil with plenty of feeding.

M. L.—No. 1 is a caladium. The names of the other plants can not be supplied in the absence of foliage and flowers.

THE E. G. HILL Co. offer a prize of $15 for best 25 blooms of Chrysanthemum Mary Mann, and $10 for best 15 blooms of any introduction of 1906.

THE Austrian emperor will sell at auction 1,700 orchids of rare beauty and value at his palace at Schonbrunn, near Vienna, on October 1. The imperial collection now numbers more than 20,000 plants, and the greenhouses are so crowded that it is necessary to make a clearance.

Greenhouse Glass.

IMPORT DUTY AS IT AFFECTS FLORISTS.

At the Dayton convention President Kasting's address brought out matters which led to a discussion on the high cost of greenhouse glass, and that the tariff thereon had a marked effect in keeping up the very high cost.

How many millions of square feet of glass there are used by the florists of the United States I am unable to say, but all men who have greenhouses or cold frame plants, are greatly interested in the cost of this important commodity.

In the discussion which ensued at the time it was stated that if there was to be anything done in the modification of the present tax on glass, some action must be taken, otherwise nothing would be ever accomplished.

The matter, after debate, was referred to a committee of which the writer is a member, and to give a correct status of the present rate on glass, application was made to the commissioner of commerce and labor.

Prior to the Spanish war, so-called, the rate on glass used by the greenhouse men was as follows:

"On all sizes not exceeding 10x15 inches square, the import duty was 1 cent per pound; on sizes above 10x15 inches square, and not exceeding 16x24 inches square, 1¼ cents per pound; above 16x24 inches square and not exceeding 24x30 inches square, 1¾ cents per pound."

It will be noted that the tariff is not placed upon the square foot nor is it an ad valorem rate. The valuation is placed on the net weight of glass in boxes, which is 50 feet or as near as may be, and glass will approximate 50 to 80 pounds net in a box, according to thickness. Such was the rate in existence in 1896.

In 1897 the tariff was changed and it is under this tariff that the glass now used in the United States is protected. The paragraph which governs that duty is as follows:

"Glass not exceeding 10x15 inches square at 1⅜ cents per pound, above that and not exceeding 16x24 inches square at 1⅞ cents per pound, and not exceeding 24 x 30 inches square at 2⅜ cents per pound."

Provided, that the duties shall be according to the actual weight of the glass, the reader will see at a glance the substantial increase in the cost of each box of glass, which this protection gives over and above 1896 and previous. In 1896 the quantity imported of the cylinder, crown and common window glass was valued at $54,189,854.13 and for 1905 it was $17,933,028.50.

The question before the greenhouse men of the country is, whether it is worth while to make an effort to procure a lower duty on glass, and bring before the proper authorities the sense that the time is ripe when the high rates of the present duties should be modified for the general good.

This matter, of course, affects not only greenhouse people, but every builder and sash maker in the land.

It was suggested at the Dayton convention that the florists of the United States should make known their interest in the matter by direct statement. The committee to whom this matter was referred would be glad to hear of the public expression, looking toward a proper presentation of the matter in such shape that it will command the attention of the proper congressional committees.

BENJAMIN HAMMOND.
Fishkill-on-Hudson, N. Y.

American Carnation Society.

CARNATION REGISTERED.

"Pocahontas" a cross between a light red seedling and Gov. Roosevelt, strong upright grower, free flowering and produces flowers of very large size with good calyx and a long strong stem. Color a bright shade of crimson, has been submitted by Baur & Smith, Indianapolis, Ind.

Circulation in Buyers' Brains

IS the kind enjoyed by the American Florist. Its actual paid circulation we believe, is the largest in its class. The contents are of real present value and are preserved for future reference. Advertisers who realize this establish permanent business with the best trade in the United States and Canada.

SPLENDID OPPORTUNITY.

Fine, Modern Greenhouse Plant For Sale.

Owing to illness, the proprietor of a first-class greenhouse establishment of about 15,000 feet of glass in an Ohio town of about 12,000 people, is compelled to sell. The plant is well stocked for a general line of retail trade. The stock is in fine condition and there is plenty of everything on hand at present, such as roses and carnations, and the chrysanthemums will be heard from shortly. The business has been established some 14 years and the local trade is of the very best character, supplemented by a large business in surrounding towns. The place is heated by steam. Terms easy. Address **Key 781, care American Florist.**

Please mention the American Florist when writing.

OUR PASTIMES.

At Philadelphia.

A number of the associate members of the Florists' Club amongst whom are some of the best bowlers in the city, challenged the team that represented the club at the late convention to a game, thinking that from the average of the team in that famous tournament they would have no trouble to win. The Dayton boys accepted and as the following scores show, had no trouble in holding their own. The match was bowled at the club alleys, Monday, September 10, the Dayton team winning with 78 pins.

Milwaukee Florists' Club Picnic.

The Milwaukee Florists' Club held its second annual picnic on the grounds of the C. C. Pollworth Co., in Wauwatosa September 16. Over 50 florists and their families, a total of 200, attended and all enjoyed themselves very much. The entertainment committee, consisting of Herman Hunkel and Wm. Zimmerman, had arranged for several racing events with the following results:

Men's race—C. Dallwig's prizes: A. Peterson, 1st; C. Dettmann, 2d.

Ladies' race—Holton & Hunkel Co.'s prizes: Miss Kennedy, 1st; Miss Hunkel, 2d.

Girls' race—W. A. Kennedy's prizes: Miss Kennedy, 1st; Miss Husslein, 2d.

Girls' race (under 12 years)—F. Pollworth's prizes: G. Baumgarten, 1st; Hilda Menger, 2d.

Boys' race—Hunkel's Seed Store prizes: J. Klokner, 1st; A. Menger, 2d.

Three-legged race—Holton & Hunkel Co.'s prizes: Kuhl and G. Manke, 1st; Welke and W. Manke, 2d.

Sack race—Chas. Menger's prizes: A. Rice, 1st; H. Welke, 2d.

Hurdle race—Holton & Hunkel Co.'s prizes: G. Rusch, 1st; W. Kuhl, 2d.

Potato race — C. C. Pollworth's prize: Mrs. Wolf, 1st; Miss Hunkel, 2d.

Peanut race—Nic Zweifel's prizes: Miss Patzwald, 1st.

Tug of war—Prize donated by John G. Heitman: The team captained by A. Klokner easily defeated the team captained by F. Kaiser, although the latter team was by far the heaviest. H.

Nebraska State Horticultural Society.

The exhibition of the Nebraska State Horticultural Society at the state fair, Lincoln, September 1-7, was one of the most successful the society has ever held. The fruit display was grand in quality and great in quantity. Grapes were particularly good, some 35 varieties of seedlings being shown, a number of them of superb quality. The society distributed 50 barrels of apples and several hundred baskets of grapes to the multitude on fruit day. The space in the floral section was filled to the utmost capacity with good collections of clean, healthy, well-grown stock and the competition was very close. A list of the awards follows:

Best floral design.—C. H. Green, Fremont, first; S. E. Greer, Lincoln, second; Brewster & Williams, Grand Island, third; Dole Floral Co., Beatrice, fourth.

Best floral wreath.—Brewster & Williams, first; C. H. Green, second; Dole Floral Co., third.

Best bouquet.—S. E. Greer, first; Dole Floral Co., second; Brewster & Williams, third.

Basket cut flowers.—Brewster & Williams, first; C. H. Green, second; S. E. Greer, third.

Best collection cut roses. — C. H. Green, first; S. E. Greer, second; Dole Floral Co., third.

Best collection cut carnations.—Brewster & Williams, first; S. E. Greer, second; Dole Floral Co., third.

KILL YOUR SCALE.

If you want to KILL scale on your plants ABSOLUTELY there is only one preparation—

WILSON'S PLANT OIL.

Take a can of this preparation, dilute to four times its bulk with water, and wash or spray your palms, ferns, aspidistras, smilax or any plants subject to bugs or vermin and **your plants will be clean. No alkali. Nothing deleterious. Dries at once.**

READ WHAT OTHERS SAY OF IT.

RUTHERFORD, N. J., June 28, 1906.

We have thoroughly tried your Plant Oil with very striking results. We may say this is the first insecticide we have tried on our palms that will remove the scale with the first application. We would like to say this is one of the few things that the florists cannot afford to be without, especially those who are growing palms and decorative plants. After one application of your oil the plants take on an entirely new appearance. We would be pleased to have prospective buyers visit our nurseries and inspect the palms on which we have used your oil

BOBBINK & ATKINS.

NEW YORK BOTANICAL GARDEN, Bronx Park, New York City, September 5, 1906.

MR. ANDREW WILSON:—Having used your insecticide here, I can testify to its efficiency in destroying scale and other insects infesting plants.

Yours very truly, GEO. A. SKENE.

WRITE FOR CIRCULAR.

ANDREW WILSON, Summit, N. J.

TRADE SUFFERS BY WEATHER.

The market opened with firm prices and good stock early last week and business continued excellent for three days. Then came a warm day followed by others of a similar character, which did much to ruin stock and break the run of trade. Shipping orders fell off considerably and the local trade dwindled away to insignificance. There had been large quantities of excellent material on the market up to that time, but the change of weather brought a shortage in some lines. American Beauty which had been plentiful became quite scarce and there is but little of any note now obtainable. Enchantress carnations also shortened with no substitutes to take their place, as Boston Market, Mrs. Patten, Lawson and other varieties were not in abundance. Most of the carnation stock was of indifferent quality and brought normal prices. The roses showed most plainly the effect of the warm weather; Bride, Bridesmaid, Kaiserin, Chatenay, Richmond and Liberty arrived about half open and had to be sold quickly. There are some exceptions to this, however, as several houses are receiving fairly good stock. Asters continue plentiful, selling at indifferent prices.

NOTES.

Bids for the excavating and filling in of the new portion of Humboldt park were declared too high by the west park board and all bids were rejected. The lowest bid was 42 cents per cubic yard. The board authorized the president to sign a contract for the work at 35 cents per cubic yard without advertising for new bids.

The Florists' Club held its monthly meeting September 13. It was poorly attended, there being just a quorum present. W. K. Wood occupied the chair in the absence of President Hauswirth. No business of importance was transacted.

The E. F. Winterson Co. is building a glass partition the length of the store which will be used for displaying various kinds of florists' supplies. It will serve to keep dust from the goods and add to their attractiveness.

Peter Reinberg reports an unprecedented demand for his new Marshall Field rose. The stock is arriving in fine shape and it keeps his large force hustling to fill all orders promptly.

Bassett & Washburn are cutting heavily of a fine rose crop. They are handling some splendid American Beauty, which sells exceptionally well, owing to the present scarcity.

The Illinois State Florists' Association is doing some vigorous "plugging" among wholesalers with a view to making the state fair a record-breaking event.

Lubliner & Trinz are displaying two funeral wreaths, each in a glass show case, in front of their store which attracts considerable attention.

Miss Sterret of the Chicago Rose Co. has resigned her position with that company and is now keeping books for Geo. Reinberg.

J. J. Curran has severed his connections with Brant & Noe and will start in business on his own account.

Clifford Prunner of E. F. Winterson's who has been confined to his bed the past week with typhoid fever is reported improved.

E. E. Pieser, who has been touring Canada, returned home September 10. He reports a fine trip.

Phil Hauswirth and Geo. Asmus returned from the Powwow of the Red Men last week.

Scheiden & Shoos opened their new stand in the Flower Growers' Market September 17.

Chas. Morton, 3626 Cottage Grove avenue, returned last week from a trip to Europe.

The Selfridge orchid collection is attracting much attention at Lincoln park.

John Degnan is among us once more, having located with E. F. Winterson.

Benthey's aster, where true, has given growers much satisfaction this year.

J. B. Deamud has returned from a fortnight's trip through the east.

A. Hildred, 3030 Indiana avenue, is reported seriously ill.

F. W. Timme returned from Europe last week.

Visitors: Arthur Petersen, Escanaba, Mich.

Illinois State Florists' Association.

To the members of the associations and all florists throughout the state:

It devolves upon us to make a creditable floral display at the coming state fair, September 28 to October 6. The society has been called upon to assist in promoting floricultural exhibits. A committee has taken up the work with the superintendent of this department at the fair, and we now call on each and every florist throughout this great state to assist in the good work.

Remember, it is to all our interests to advance floriculture, and we know of no better way to interest the public than by liberal displays. If you have nothing to enter for competition, send for exhibition—anything to help this movement along. Remember, this will be a starter on the road in the right direction.

Parties intending to exhibit should notify Robert O'Dwyer, Supt. of State Fair Floriculture, Desplaines and Monroe streets, Chicago, not later than September 24, so that he may arrange the space to the best possible advantage.

Be sure and come yourself and spend at least one day. This committee will be pleased to meet you there.

Committee: J. F. Ammann, Edwardsville, Ill.; Albert T. Hey, Springfield, Ill.

St. Louis.

MARKET FIRMER.

The market the past week was somewhat firmer, the extreme warm weather, however, having a bad effect on the quality of the stock. Carnations are still coming in with very short stems and badly spotted. A few good Enchantress may be seen. American Beauty roses and fancy asters are in demand. Warm weather has also a bad effect on fancy ferns, one shipment of 8,000 from the east having arrived all burned up and worthless. There has been a big demand for American Beauty roses and asters for openings all the present week.

F. H. Foster is out with his new powder, a cure for chronic catarrh. Last Sunday Fred visited the wholesale houses and distributed his powder freely during the incoming of a large shipment of Kasting's asters from Buffalo, N. Y. There was a sudden epidemic of sneezing; everyone attributed it to the asters which they vowed had been doctored.

The St. Louis Florists' Club met last Thursday, 22 members being present. The installation of officers and the balloting for new members occupied the time of the club. Fred Alves and Oscar Huettemann were elected as members.

The Ayers Floral Co. is painting and refitting its store. Mrs. Ayers reports trade as first-class. She is ably assisted by Will Adels and L. A. Gieger, formerly with Grimm & Gorley.

Ostertag Bros. had the opening Monday of Werner Bros. They used a very large assortment of decorative plants and over 1,000 American Beauty roses.

Park Commissioner Aull will superintend the unveiling of the equestrian statue of St. Louis in Forest park.

Geo. H. Angermueller filled last week and this two of the largest American Beauty orders of the season.

E. Gullett & Sons, of Lincoln, Ill., are sending in some fine Bride roses to H. G. Berning.

It is probable that cosmos will be the fashionable flower at the veiled prophets' ball.

F. H. Weber is repainting and refitting his store and greenhouse. W. F.

Milwaukee.

TRADE IMPROVING.

Trade the past week has been somewhat better than a year ago, however, there is now plenty of good stock in the market and with the steady improvement of carnations we can expect to see extra fine stock within a very short time. Asters are running down to the tail end of the crop and will be through altogether within two weeks. Plenty of green stock of all kinds is in the market.

Louis E. Herzberg, for a long time employed by Milwaukee florists and now foreman for J. B. Heiss, Dayton, O., and Ida Gerlach, daughter of F. Aug. Gerlach, florist of Mitchell park, were married on the evening of September 17. After a short honeymoon the couple will go to Dayton, O.

H.

MARION, IND.—Gunnar Teilmann has returned from his trip abroad. Arriving in London from Copenhagen with lumbago and a sprained back he was unable to see anything of England. He was confined to his hotel during his two days' stay and only recovered in time to take the train for Southampton where he took returned passage for this country. Mr. Teilmann reports the balance of his journey as very enjoyable to himself and his children.

BUSINESS PICKING UP.

As September progresses the demand for flowers takes several steps forward. Old familiar faces, customers of months ago, are seen in the stores and the sales in all lines are picking up considerably. There is plenty to supply the demand, however, all lines being full. American Beauty roses are quite plentiful and one of the first questions asked when one answers the numerous phone calls that come to the retailers daily is "How about Beauties?" "Send you two dozen dandies for a five spot," and from that down to $1.50 per dozen for 24-inch stems are current prices. Some very nice flowers with 3-foot stems were seen at a stand in Chestnut street last Saturday, offered at $1.50 per dozen. Other roses are showing better form, but this only applies to about 20 per cent. of them, the rest very short stemmed. Mildew is also appearing. Killarney and Richmond are coming in plentifully and promise to be strong factors in the market the coming season. Asters are still plentiful, but much of the stock reaches the market in bad condition from careless packing. Dahlias are now in first class shape. There is a good variety of colors and the quality of the flowers is all that can be desired. Prices range from $1 to $2 per 100. Many of the stores have commenced to stock up with plants, the Boston fern and its very sportive family being seen in all the windows. The newer sorts with fancy fronds all seem to have the fault of the Pierson in that they do not make shapely plants. The growers say, however, that later on when they have attained their growth they will overcome this objection.

NOTES.

John McIntire, who is well up in the wholesale and retail branches of the business, having had considerable experience in both lines, will open a commission house October 1 at the Philadelphia Wholesale Market, 1227 Filbert street. John is a hustler and his consignors will never have to find the fault that their stock did not get a chance to be seen by the trade likely to use it. Success to him.

The Robt. Craig Co. is very busy with its Ficus pandurata. This firm says it can not keep up with the orders for established plants in 6 to 8-inch pots at from $3 to $5 each. A lot of branched plants in larger sizes for the holiday trade will bring great money. A splendid lot of crotons, make-up plants, are also seen here.

Stewart McLean, son of Geo. McLean, of Youngstown, O., has succeeded Paul Klingspoon at the Rosary, Horace Dumont's new store. Mr. McLean has a youthful aggressiveness that should keep him to the fore and is in the right spot to make his talents count.

Ed. Reid was first in with Chrysanthemums, a good large yellow. Chas. Edgar is now one of the Reid staff and looks very familiar in his old position.

S. S. Pennock is back from a sea trip to Florida for his health. He seems much benefited.

Godfrey Aschmann was in Paris September 4.

K.

Boston.

MARKET VERY QUIET.

Anxiety and discouragement have been the lot of salesmen both in and out of the market the past week. The commission salesmen who are mostly stationed in the markets have been the hardest hit, and it is their opinion that the quietest week in years for flower tradesmen is the one just experienced Not that there was no stock to sell, but, on the contrary, there was a deluge of untold varieties of flowers for which there was absolutely no demand. Countless numbers of asters overwhelmed other stock, chiefly carnations and roses. The stage has been reached where goods are sold by the box regardless of the quantity contained. The beautiful weather now being enjoyed is in a large way responsible for the market conditions. It has been fair right along and unusually warm, more seasonable in July than September. Carnations, especially Fair Maid, are going to waste by the thousand. They for the most part are good flowers with very short stems and of but little use except for funeral work. Very few really good blooms are as yet on the market. The rose market is also too abundantly supplied; selling for hitherto unheard of prices, the only possible way to dispose of them. Almost entirely of new stock, they are generally small and very weak. There promises to be an ample supply this winter of the favorite Killarney, also of Richmond. Several large growers recognized the worth of a regular supply of these roses which were badly needed last season. American Beauty, Wellesley and Kaiserin continue to serve as the most satisfactory roses at the present, the first two varieties are exceptionally good for the early season. Bride and Bridesmaid are rapidly advancing to their usual prominence, but the general quality is inferior and valuable for funeral work only. Liberty, Chatenay and Carnot are also plentiful. A few good sweet peas are yet on the market, but for this class of flowers, lily of the valley and gardenias receive the preference. Lilium Philippinensis is eagerly sought, the limited supply going out fast. The quality of these lilies is excellent, causing considerable favorable comment for its growers.

NOTES.

A familiar face has returned to active business circles in the person of James Delay, one of the best known florists of Boston a generation ago. Of late years he has not been engaged in the flower business, but the name has been kept before the public by his enterprising sons. A very good site for the exclusive trade has been secured, the store being on the corner of Boylston and Dartmouth streets. It is being remodelled to suite the prospective tenant. Mr. Delay has the best wishes of the trade in his latest venture.

Wm. E. Doyle suffered some damage from water on account of a fire which broke out in the building which he occupies at 306 Boyleston street. The blaze, the cause of which is not known, was in a tailoring establishment on the second and third floors. The loss to all parties amounted to about $1,000.

On exhibition at Horticultural hall, September 15, was an excellent display of the products of children's gardens. Various cities were represented by the public schools and the success with which this innovation has met deserves the commendation of horticulturists in general.

The Henry M. Robinson Co. announce the arrival of the first shipment of new smilax. Their local trade is quiet but they are unusually busy shipping to customers all over the eastern states. Mr. Robinson is at present on a business trip through New England.

All possible haste is being used in adapting the building at 224 Devonshire street for an ideal wholesale cut flower establishment which, when completed, will be occupied by the old firm of Welch Bros. It is expected to be ready for the new tenants October 1.

The first violets of the season were brought to market September 15 by J. Dolan, of Brookline. Considering the early season for these favorite flowers, they were very good and, as is usual, for the first cut, were gobbled up quickly.

Thos. Heskey, formerly gardener to Lieut. Gov. Draper, has leased the estate of Norcross & Stratton, at North Grafton. He will make a specialty of growing carnations which will be shipped to the Music Hall Market.

J. Jansky, the wire frame manufacturer, who is located at the Music Hall Market, has increased his force by securing two more men. He is now the largest exclusive dealer in florists' frames in the city.

Anderson & Williams, rose growers of Waltham, have secured that able salesman, J. S. Manter, who will in the future handle their stock.

E. E. Fletcher, the popular salesman of the Music Hall Market, has returned from his vacation spent in the wilds of New Hampshire.

B.

Lenox, Mass.

The regular meeting of the Lenox Horticultural Society was held September 15, President S. Carlquist in the chair. Letters were received and read from the following firms, offering premiums for the chrysanthemum show: Howard & Morrow, Pittsfield, Mass.; Julius Roehrs Co., Rutherford, N. J.; C. H. Totty, Madison, N. J.; the Bay State Nurseries, North Abington, Mass.; and J. H. Harris. Votes of thanks were passed for the above. Mrs. Edith R. Wharton was unanimously elected a life member of the society and D. Hothersall an annual member. Everything promises finely for a successful chrysanthemum exhibition, as the chrysanthemums in this section are looking particularly good.

The annual chrysanthemum exhibition will be held in the town hall October 24 and 25.

G. F.

DAYTON, O.—The Montgomery County Horticultural Society met at the home of Walter Beck, September 5, with 125 members present and President Alpaugh in the chair. Harry Altick gave an interesting report on ornamental plants. Much attention was also given to a discussion of the San Jose scale.

New York.

For a few days the market has been unsettled. The improvement noted for the first half of last week was somewhat shortened by bad business during the second half of the week. Recovery has not been very pronounced, still it may be said that business for the first half of the current week is on the whole satisfactory. Good stock in all lines cleans out well and favorably, and this fact makes a striking comparison with the avalanche of inferior stock which at all times confronts legitimate trade in this market. Growers within a radius of 30 miles, having products to cut, throw their stocks into the New York market without regard to quality, and, naturally the commission men have their work cut out to make returns. The amount of "trash" spread upon the counters of wholesale establishments at times seems to shock visitors from other market sections. Roses are steadily improving in quality and selections from the best of arrivals bring prices exceeding the quotations for ordinary stock. While roses continue scarce, and, although not bringing fancy prices on this account, wholesalers are able to use their holdings as a lever to force along the sales of the more plentiful pinks. American Beauty is not quite so plentiful as during last week, and quoted prices are firm. Lily of the valley is a good thing this week, and approaches the point of scarcity. Such stock as is arriving cleans out well and quickly. Asters were at the glut point last week, and Monday of this week saw arrivals not materially shortened. There was a little relief on Tuesday, but with the held-over stock a sacrifice was pretty general. Lilies sell well and are to be had in good summer quality. There is a good demand for the better sorts of carnations coming in. In the best grades qualities are much improved and both stems and flowers are noticeably better. Chrysanthemums and violets have both made an appearance, but nobody wanted them and they were sold for window displays, as are most things antedating a recognized season. Dahlias are freely offered, and clean out at some price or other as far as ordinary grades are concerned. Some of the better and more showy varieties are beginning to come in, and sorts like Century, in its different colorings, Bruton and others recognized as good cutting varieties, bring fair values. Cosmos is coming in well and seems to sell equally well.

NOTES.

Space has been accorded at the New York botanical gardens for the temporary storage and nursing of a number of plants, Abrus precatorius nobilis, which Prof. Joseph Nowack, Baron de Fridland, of Vienna, has brought here prior to their establishment in certain sections in weather bureaus. The professor declares that by means of these plants he is able to forecast atmospheric disturbances early and for a wider area than the regular government weather bureaus. The plants were collected in Mexico and Cuba.

The wholesale store of John Seligman & Co. has been newly painted and decorated, and a convenient and much needed office has been built near the entrance. Joseph J. Levy, a member of the firm, was married September 9 to Miss Woolrich, a lady well known in the wholesale trade, and left for a trip to Niagara Falls and other cities by the lakes.

Alvin Coon, of Rhinebeck, N. Y., was in town last week. He says the reports as to the prevalence of black rot in the violet district are very much exaggerated. The trouble is confined to a few establishments. Many of the growers, however, are troubled with gall fly, and this pest has done considerable damage to otherwise healthy stock.

Lecakes & Co. are receiving early shipments of wild simlax, and green galax. Geo. K. Kardeamonos, a member of the firm, is wearing smiles these days, in anticipation of the arrival in New York this week of his wife, after a separation of 14 years.

L. Allen, lately with James McManus, wholesaler on Twenty-eighth street, has started a business for himself in part of the quarters occupied by James Hart, at 103 West Twenty-eighth street.

The dahlia show and autumn exhibition of the American Institute will be held at the institute, 19-21 W. Forty-fourth street, September 25-27. Entries already made insure a good show.

The retail stores are dressing their windows to harmonize with the season. Oak branches are in demand, and groups of green plants are now enlivened with vari-colored crotons.

The windows of Traendly & Schenck are looking quite handsome just now, filled with fine plants of Adiantum Farleyense, which they are receiving from a grower in the south.

Gunther Bros., the Twenty-ninth street wholesalers, are receiving daily supplies of the finer sorts of dahlias from Herbert & Son, Atco, N. J.

Anton Schultheis, of College Point, L. I., is sending in to Joseph S. Fenrich, daily, some exceptionally fine lily of the valley and cattleyas.

Leventry the Florist, is the name appearing on the window of a new florist's store opened at 134 W. Twenty-third street.

Rowehl & Granz, of Hicksville, L. I., are sending in some large shipments of tritomas to J. K. Allen and A. J. Guttman.

Chrysanthemums have made their appearance, a white variety being seen at the store of J. K. Allen last week.

The first violets of the season arrived last week, a small shipment being received by Alex. J. Guttman.

The auction sales have commenced for the season, but the attendance has been exceedingly light.

Philip F. Kessler arrived in New York on Wednesday on S. S. Barbarossa.

Visitor: J. B. Deamud, Chicago.

COBLESKILL, N. Y.—Lewis S. Holmes has purchased the greenhouses of A. Goldring.

BUFFALO, N. Y.—Bids were opened by the park department September 5 for the superstructure of a propagating house to be built at Humboldt park, to be 80 feet long, with two 100-foot wings. The Lord & Burnham Co., of Irvington-on-the-Hudson, was the lowest bidder, offering to do the work for $8,215.

Washington.

BUSINESS RAPIDLY IMPROVING.

Business conditions are improving. Cabinet officers, members of the diplomatic corps and others who stand high in social life are returning from the various summer resorts to their city homes and in another month it is expected that trade will strike a lively pace. The quality of stock continues to improve, very fair Bridesmaid, Golden Gate, Killarney and other good commercial roses being on the market. Carnations are also showing all that can be expected of them at this season. Both roses and carnations will, however, be kept in the background while the dahlias and a rather unexpected rush of late asters are coming in. Dahlias, as a rule, are of poor quality, but being sold at low prices, displace better stocks.

NOTES.

A mild sensation has been created among dealers and growers by a stock of yellow chrysanthemums that are being handled by Geo. H. Cooke. They are of the variety Monrovia and the blooms are four and five inches in diameter. It has been seldom, if ever, that such fine blooms have been seen in this market so early in the season.

Alex. B. Garden has about completed the rebuilding of three carnation houses. This in addition to similar work done last year gives him a finely equipped range for growing cut flowers. This year, as in the past, he is growing a large amount of bulbous stock.

J. R. Freeman is pushing his new carnation houses to completion and when finished they will be almost indestructible. What won't burn or rot is pretty safe in this neck of woods, as earthquakes and cyclones seldom pass our way.

The American Rose Co. is sending in good stocks in cut lilies. This company has established quite a reputation as growers of lilies, both for cut and pot stock, and its Easter displays have come to be features of that season.

Geo. Field has been sending in a stock of the Thos. Field rose which Z. D. Blackistone says is the best summer rose on the market. Mr. Field having taken up Killarney is also showing a good stock of it.

F. H. Kramer is showing an abundance of good roses, noteworthy among them being Queen Beatrice. S. E.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

STANDARD varieties of musk melon seed will be short.

J. E. NORTHRUP is recovering from a recent surgical operation.

IMPORTED forcing radish will be high in price and the germination poor.

WESTERN sweet corn promises very well—a good crop of excellent quality.

VISITED CHICAGO: C. M. Massie, Minneapolis, Minn.; R. W. Pommer, of D. I. Bushnell & Co., St. Louis, Mo.

CHAS. D. BOYLES, of the Albert Dickinson Co., has posted his Chicago Board of Trade membership for transfer.

MANY seedsmen are doing considerable worrying about the lithographers' strike, some of the principal firms in that line refusing business.

ONION SETS are firm, with the Louisville prices advanced somewhat. The Nebraska acreage was considerably over that of last year, with an average crop.

SEEDSMEN of the United States imported seeds to the value of $5,388,043 during the fiscal year ending June 30, 1906, as compared with $3,457,619 in 1905.

CUCUMBER seed, based on this year's crop, should bring a high price. Prices, however, will depend chiefly on how the large holders of carried over seed let go of their supply.

ALEX. HENDERSON, of Vaughan's Seed Store, Chicago, will leave with his family early next week, probably September 24, for Scotland, where they will spend a few weeks' vacation.

PARIS, September 5.—Owing to the protracted drought and great heat we have experienced this year crops are very disappointing, many plants being severely wilted. Young plants for next year are suffering seriously and the growers are quite discouraged.

COLUMBUS, O.—F. G. Johnson, who has been connected with the Livingston Seed Co. for many years, has resigned his position as secretary and treasurer owing to failing health. It is pleasing to note, however, from late reports that he is improving and with proper rest and care will be entirely well again in a short time. Josiah Livingston has been chosen to fill the office of secretary and treasurer.—CARL.

5,400 ACRES OF GARDEN SEEDS IN CULTIVATION.

Braslan Seed Growers Co.

WHOLESALE SEED GROWERS.

SAN JOSE, CALIFORNIA

THE JEROME B. RICE SEED CO., Cambridge, N. Y., has issued its annual onion crop report. We note that the acreage is 18,194 as compared with 17,230 last year, with a yield of 272 bushels per acre, as compared with 250 in 1905. Iowa produced the heaviest yield per acre, Minnesota and New Jersey following in the order named. The states producing the greatest quantity of onions in the order named are Ohio, Indiana and New York.

Chas. S. Burge.

We present herewith the portrait of Chas. S. Burge, vice-president of the American Seed Trade Association. Mr. Burge was born at Maumee, O., in 1868, and located in Toledo in 1882. In 1884 he entered the employ of S. W. Flower in the seed business, of which concern he has had the active management since 1892. The house of S. W. Flower & Co., was established in 1868 and since its inception has been among the most progressive in the country. The members of the firm are Stevens W. Flower and Mr. Burge, but the former takes no active part in the business of the concern. Mr. Burge is also vice-president of the Dayton Dollar Savings Bank & Trust Co., president of the Standard Paper Box & Printing Co., and director of the Toledo Produce Exchange, of which he has been a member since 1888.

Chas. S. Burge.
Vice President American Seed Trade Association.

American Seed Trade Association.

Color Scale.—Burnet Landreth, J. C. Vaughan, W. Atlee Burpee.

Stock Catalogues.

Of the many signs of improvement in the nursery and seed trades, few are more self-evident than those to be noted in the catalogues issued by both branches. We can remember the time when price lists were issued about once in three years, and were then literally "lists;" that is, merely the names and prices of goods stocked, with few or no descriptions or cultural details, and without any attempt whatever at embellishment by printer or binder.

Then came the first crude attempts at illustration with rough woodcuts, followed by rapid improvement in style and get up, with a deplorable deterioration in manner; as all the leading firms vied with each other in gaudy flowers and fruits of impossible size and colors, swedes and mangolds of which about three would fill a cart, and other similar lying absurdities of which the authors would not now probably care to be reminded. One great cause of advance has been the wonderful improvements in photography and process work, of which full advantage has been taken by our up-to-date houses, with the result that many of the best lists issued are really objects of art. Illustrations now do really illustrate, and are, as a rule, not only admirable artistically, but convey accurate and honest impressions of the article shown. Growers do not naturally choose their worst specimens as illustrations, but there is a gratifying absence of the gross exaggeration (to put it mildly) so common twenty years ago. With all this praiseworthy improvement, there is still room for criticism in some directions. While the more important firms spare no expense or trouble to make their catalogues a credit to, and a recommendation of their establishments, too many of those in a smaller way are content to rub along with what is known as a "stock catalogue."

As seed, bulb and tree seasons come round, the printer who goes in for horticultural work prepares (with the aid of some out of work gardener or other expert?) a list complete, with exception of title page, which is left to be filled with name and address of the purchaser. This is sold to those members of the trade who lack the time and ability to prepare their own, or to whom the expense of a catalogue of their own is prohibitive. The saving in first cost of both time and money is, of course, considerable, but whether the system is economincal in the long run is quite another matter. A stock list compiled by an outsider is a cold, colorless thing, which really appeals to no one. Its cultural directions must, even when fairly correct, be very vague and general; otherwise they could not apply even approximately to north, south, east, and west of the country alike; and they are also wanting in that personal note which is the motive power of written instructions. A few lines which are the result of your own experience and knowledge of local conditions, added to the ordinary technical information, will influence your customer more than a page of compilation.

Much to the same effect might be said of the difference between a picture from a photo of your taking, or of some of your best plants, fruits, or flowers, and that of the block which has done duty so long that familiarity has bred contempt. Some plead want of time or literary ability for the work. The first excuse merely shows lack of appreciation of its real importance, other-

wise time would be found or made for it. As to the second, though we admire what we have so long called "Queen's English," we are still of opinion that literary style is not everything. Given practical knowledge and a love of the subject (and no man is fit for our business without the latter), the writer may impart his information in such a way as to benefit the reader and his own trade, without any pretensions to artistic style. We have in mind one catalogue, the phraseology of which follows no conventional rules, and at times raises a smile; but the reader is never in doubt as to the meaning, and the practical knowledge and sound sense shown attract the reader and lead to business.

Our advice to beginners and those in a small way is to aim at having a catalogue of your own as soon as possible, and if you cannot run to a fat volume, make it small, but as good in paper, printing, and contents as you can. Don't crib from your neighbor matter which he has probably cribbed from some one else, and which is stale and trite, but let your catalogue be a personal communication between you and your customer, actual or prospective. It is well also to remember that a good catalogue, like Rome, was never built in a day, nor yet in one year. Try as you will, your first edition (not to mention later ones) will contain errors and omissions by the dozen, and there is only one way by which it is possible to approach perfection. This method is to keep a copy, interleaved with blank sheets, always in the desk before you, in which you can note additions, alterations, and improvements from day to day as they crop up. If jotted down as they occur these are ready for inclusion at the annual revision, otherwise a large proportion is forgotten and lost. Treated in this way, a catalogue evolves towards perfection; and though this can never be reached, still it is something not to be ashamed of, and will prove a far more effective factor in bringing grist to the mill than the best "stock" article which was ever placed on the market.—Horticultural Advertiser.

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester N. Y., Sec'y. Thirty-second annual convention, Detroit, Mich., June, 1907.

"I am going to plant a hickory tree
And then, when I'm a man,
My boys and girls will come and eat
Just all the nuts they can."

THE value of nursery stock reported by the growers and dealers of the United States during the fiscal year ending June 30, 1906, was $1,600,683 as compared with $1,512,066 in 1905.

IN summarizing a recent test of sprays for the San Jose scale at the West Virginia experiment station it is stated that of the four spraying materials used Target Brand Scale Destroyer and Kil-o-Scale gave the best results, being practically identical.

American Association of Nurserymen.

President Harrison has appointed committees of American Association of Nurserymen to serve during his term of office as follows:

Committee on transportation.—W. C. Reed, Vincennes, Ind.; Jas. McHutchison, New York; J. C. Miller, Rome, Ga.; Howard Davis, Baltimore, Md.; E. S. Welch, Shenandoah, Ia.

Committee on tariff.—J. C. Hale, Winchester, Tenn.; E. Runyon, Elizabeth, N. J.; Wm. H. Moon, Morrisville, Pa.; J. H. Skinner, Topeka, Kans.; Fred Green, Perry, O.

Committee on legislation.—R. C. Berckmans, Augusta, Ga.; Wm. Pitkin, Rochester, N. Y.; Hon. N. W. Hale, Knoxville, Tenn.; Peter Youngers, Geneva, Neb.; W. T. Hood, Richmond, Va.; Prof. John Craig, Ithaca, N. Y.; J. W. Hill, Des Moines, Ia.

Committee on uniform inspection.—R. C. Berckmans, Peter Youngers, Prof John Craig.

Committee on programme.—Judge Eugene Stark, Louisiana, Mo.; Chas. J. Brown, Rochester, N. Y.; Herbert Chase, Huntsville, Ala.

Committee on publicity.—J. M. Irvine, St. Joseph, Mo.; John C. Chase, Derby, N. H.; H. D. Simpson, Vincennes, Ind.

Committee on exhibits.—Thos. Meehan, Dreshertown, Pa.; H. P. Kelsey, Boston, Mass.; E. P. Bernardin, Parsons, Kans.; J. Woodward Manning, Reading, Pa.; Henry Chase, Huntsville, Ala.

National Council on Horticulture.—Chas. J. Maloy, Rochester, N. Y.; Chas. T. Smith, Concord, Ga.

Committee on arrangements.—Chas. A. Ilgenfritz, Monroe, Mich.; Chas. Greening, Monroe, Mich.; Geo. S. Josselyn, Fredonia, N. Y.; Nelson Bogue, Batavia, N. Y.; John Morey, Dansville, N. Y.

Committee on editing report.—J. Horace McFarland, Harrisburg, Pa.; O. G. Chase, Geneva, N. Y.; Geo. C. Seager, Rochester, N. Y.

BELFAST, ME.—Willis E. Hamilton has begun building a rose house, 32 x 62 feet.

Los Angeles, Cal.

H. C. Rising and G. S. Dunscomb, of this city and Hollywood, respectively, have purchased the Ocean Park Nurseries of E. J. Vawter and will make considerable improvement in the business. The place has undergone a general cleaning up and much of the stock has been already overhauled. Mr. Rising has been an active florist and nurseryman in this city for several years and is a pusher. All those who are acquainted with the members of the new concern predict that they will do a prosperous business.

Edw. H. Rust, located for several years at 440 S. Broadway, has moved out to Eleventh and Flower streets where he has secured a long time lease on a quarter of a block. This will give him more commodious quarters. He is stocking up from his large assortment of plants in South Pasadena.

The Redondo Floral Co., which sold all its real estate to the Pacific Electric R. R. Co., has given up the idea of selling its store and is again stocking up. A. F. Borden remains as superintendent.

Several new nurseries are being started here. The latest is that of Geo. Ely at 1518 W. Thirty-ninth street. Mr. Ely was formerly gardener to Stephen Dorsey.

Chas. W. Reimers, formerly of Louisville, Ky., is in the city considering the prospects of locating here.

LOS ANGELES, CAL.—S. R. Lundy, formerly of Pueblo, Col., later with Frank Pelicano & Co., San Francisco, until the earthquake, has taken a position as head designer with J. W. Wolfskill, this city, Miss Seibert, who has held the position for years, retiring to start a business of her own in Fresno, Cal. Mr. Lundy has been with the B. C. Morris Floral Co., Salt Lake City, since the earthquake.

PHONE 312 **JAMES KING NURSERY, Elmhurst, Ill.**

HIBISCUS SYRIACUS MEEHANII
WE now offer to the trade our new hardy variegated leaf Hibiscus Syriacus Meehanii. This plant attracted much attention when exhibited at the American Nurserymen's Convention at West Baden, Ind., and American Florists' Exhibition at Asheville, N. C. Foliage beautifully variegated; never sun-scalds or reverts to the green; flowers single, very large, satiny lavender; blooms during four months; prices on application. Orders booked now.
P. J. BERCKMANS CO., Inc., Fruitland Nurseries AUGUSTA, GA.

St. Paul.

TRADE FAIR.

Stock was very plentiful up to the middle of last week when a spell of dark, cold weather cut down the stock supply, especially roses. Stock had been improving in fine shape up to this time, but it is poorer now than for some time past. Business has kept up well, funeral work aiding a great deal. Outdoor stock has been hurt a little by rains but is still good. Asters and lilies are as good as any seen in former years and have sold well. Gladioli and salvia suffered most. Local growers of roses have planted Richmond extensively in preference to Liberty, but have not discarded the latter by any means. The only objection to Richmond heard is its inclination to a weak neck. Kate Moulton and Killarney are seen to some extent also, though the former looks the better by long odds. Most carnations were planted late this year on account of the warm weather and are looking better than those which were planted early.

NOTES.

The supply house drummers have been numerous lately. Among them were Martin Reukauf, C. S. Ford, J. J. Karins, Wm. Dykes, G. J. Schneider and Mr. Hummel of Hummel & Downing, Milwaukee. B. Eschner and wife, who have been making a trip on the great lakes, were also callers.

L. L. May & Co.'s houses are well filled up with good looking stock. Their roses are the best seen here. L. Anderson has this place looking better than ever.

The St. Paul Floral Co.'s new rose-houses are the most modern in this city. The plants are looking very well considering the lateness of the planting.

Holm & Olson are building a bulb house or cellar, partly of stone and partly of wood with sawdust for filling.

Christ Bussjaeger's new rose houses look well. They are planted partly with old and partly with young plants.

E. F. Lemke is erecting a bulb cellar at his Snelling avenue place.

O.

ESCANABA, MICH.—There was a severe hail and wind storm here September 12, doing much damage to glass and stock outdoors.

REDONDO, CAL.—Mrs. A. F. Borden, wife of the manager of the Redondo Floral Co., died August 30 and was buried in Los Angeles September 2.

NORTHAMPTON, MASS.—The Home Culture club has bought of Chas. W. Loomis his extensive greenhouses and will in the future manage them as part of its plant.

LOWELL, MASS.—The new greenhouse of Swanson & Dillgren is rapidly nearing completion. The building is 30 x 200 feet. It will be heated by a 35 H. P. boiler. This house is to be devoted entirely to the raising of carnations and violets.

WHITMAN MASS.—M. L. Belcher, of South Weymouth, has purchased of Robert Moir the store that he has conducted for so many years in the Jenkins building, and he will take possession at once. Mr. Belcher has extensive greenhouses at South Weymouth.

MABELLE, New Pink Carnation for 1907.

Color—A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson. Unlike most pinks, the brightest sun does not injure the color. Size—3 to 4 inches in diameter when established. Odor—Pleasing, but not strong. Stems—Invariably strong, but always graceful, ranging from 12 to 30 inches during the season. Habit, etc.—A very quick, active grower, making specimen plants in a short time, even from late cuttings. On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start. Productiveness—Prodigious is the best word we know of to use here. It is the most incessant bloomer, early and late, we have ever grown. Stock limited. Delivery January 5 to 10 and later. Price, $12.00 per 100, $100.00 per 1000.

WATCH US GROW.

Araucaria Excelsa

The Best of All Decorative Plants Nature Produces

OUR SPECIALTY.

Every man in business and life to be successful must adopt one thing as his specialty, and that specialty, whatever he select, of whatever nature it may be, he must guard, study and push to such an extent that it not only benefits himself, but he must conduct it so that everyone who seeks his aid, service or his article, which he advertises or practices, will share a slice of his activity and prosperity. I made the importation and cultivation of Araucarias as a special study in my life. The figures below will show my success in business: In the first year I commenced with an importation of 250. In the eleventh year now, 1906, my importations have grown up to 6,000 (come and see it), and on account of the Araucaria growing yearly more in favor by the plant consuming people all over the country, as a much admired decorative plant for the parlor, bed, dining and sitting room, stores, hotels, lawns and porches, the outlook will be for an importation at least of 8,000 to 10,000 in spring of 1907. To secure this vast amount for 1907, I am now on the ocean, per steamer New Amsterdam, leaving Hoboken Aug. 15, striking for Belgium, making contract for next year, 1907. I also shall at the same time bring over with me a large lot of choice Azalea Indica and Palms, etc., for Christmas and Easter flowering. No money will be spared in obtaining for my customers the cream of the Belgium greenhouses only.

Please note lowest prices now going on for August and September:

Araucaria Excelsa,

12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old, $ .50
12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old. .60
16 to 18 in. high, 5½ to 6 in. pots, 3 to 4 trs., 3 yr. old ..... .75
18 to 20 in. high, 6-in. pots, 5 to 6 trs., 4 yr. old.. 1.00
20 to 24 in. high, 6-in. pots 5 to 6 trs., 4 yr. old.. 1.25
36 to 50 in. specimen, 7-in. pots, 6 yr. old, $2.50 to 3.00

Araucaria Compacta Robusta, have 1000 of them, never were so nice as this year. Plants are as broad as long, from 12 to 20 in. in height, 3 to 4 perfect tiers, 20 to 30 in. wide across from one tip of tiers to the other, 3, 4 and 5 years old, 6 to 7-in. pots, $1.25, $1.50, $1.75, $2.00, up to $3.00 each.

Araucaria Excelsa Glauca, are perfect jewels in shape and size: their beautiful green-blue tiers make them of such a striking appearance that everybody seeing them must fall in love with them on sight, and cannot help it. Plants, 6 to 7 in. pots, 3, 4 and 5 perfect tiers, 15 to 25 in. in height, from 15 to 30 in. across, $1.25, $1.50, $1.75, $2.00 to $2 50 each.

Please bear in mind these mentioned varieties are the cream of Belgium importations. We have thousands of them: can meet all demands.

Kentia Forsteriana, 6-in. pots, 35 to 40 in. high, 5 to 6 leaves, 4 years old, $1.25 to $1.50; 30 to 35 in. high, 4 years old, 6 in. pots, $1.00; 5½-in. pots, 25 to 30 in. high, 3 years old, 75c; 4-in. pots, made up with three plants, 18 to 20 in. high, 25 to 30c. **Belmoreana,** 6 in. pots, 4 years old, 5 to 6 leaves, bushy, 30 to 35 in. high, $1.25; 5½ to 6 in. pots, 3 years old, 5 to 6 leaves, 75c to $1.00 each. Above are the sizes entered in the custom house. **Kentia Forsteriana,** 7-in. pots, made up plants, on elarge in center, three smaller sizes, about 22 to 24 in. high, price $2.00 each.

Nephrolepis Barrowsii, 6-in., large, ready for 7-8 in. 50c; 4-in., large, 25c.

Nephrolepis Scottii, 6-in. pots, large, ready for 7-8 in., 50c; 5½-in., 40c; 5 in., 35c; 4-in., 20c to 25c.

Boston Ferns, 4-in., 20c to 25c; have them by the 1000.

Asparagus Plumosus Nanus, 3-in., 6c; 4-in., 10c.

Chinese Primroses, in 4-in pots, ready to shift into 5-in. pots, will bloom for Christmas, $10 00 per 100.

Cocos Weddelliana, 15c.

Areca Lutescens, made up plants, 4-inch pots, 5c.

Ficus Elastica, Belgian importation, 6-in. pots, 50c each.

Ferns. A fine assortment of Ferns for dishes large, bushy, out of 2½-inch pots, $5.00 per 100 3-inch, 7c each.

All goods must travel at purchaser's risk. Cash with order, please.

GODFREY ASCHMANN, Importer and Wholesale Grower of Pot Plants 1012 Ontario St., PHILADELPHIA, PA.

OUR LITTLE PETS.

By Aschmann, in Philadelphia.

I bought
An Araucaria, a pet for our little girl—
Now we have two pets, the pride of our thought,
The little girl so sweet a head full of curls,
And the Araucaria with their everlasting green—
A more joyful home you never have seen.

Wire supports, model extension carnation supports, galvanized wire rose stakes, tying wires, single and dbl. pot hangers. Igoe Bros., 63 Metropolitan Ave., Brooklyn, N. Y.

BOOKS FOR FLORISTS.

The time is coming along when these are needed and opportunity at hand for reading them. Every one of the following should be in your library.

Send prices quoted and we send the books.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

GREENHOUSE CONSTRUCTION (Taft).—It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. $1.50.

THE PRINCIPLES OF FRUIT GROWING (Bailey).—The entire subject of fruit culture is treated very thoroughly in this illustrated volume of 516 pages. It is a book that no up-to-date fruit grower can afford to be without. $1.25.

CELERY CULTURE (Vaughan).—The important subject of celery culture is thoroughly covered in this illustrated pamphlet of 59 pages. The florist raising young plants of celery and those who grow the plants to maturity will alike find it valuable. 50 cents.

GINSENG (Kains).—At the present time, when so much interest is taken in ginseng, it will be interesting to peruse this volume, which tells all about the plant in a way that all may understand. The 144 pages are freely illustrated. 50 cents.

SUCCESS IN MARKET GARDENING (Rawson).—Written by one of the most prominent and successful market gardeners in the country, and who has the large t glasshouses for forcing vegetables for market in America. Outdoor and indoor crops are treated. Illustrated, $1.00.

MUSHROOMS: HOW TO GROW THEM (Falconer).—The only American book on the subject, 29 illustrations. Written by a practical mushroom grower, who tells the whole story so tersely and plainly that a child can understand it. This book has increased mushroom growing in this country three fold in three years. $1.50.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. $1.25.

THE AMERICAN CARNATION (C. W. Ward).—A complete treatment of all the most modern methods of cultivating this most important flower. Illustrated. $3.50.

HOW TO MAKE MONEY GROWING VIOLETS (Saltford).—This is by a practical grower who has made a success of the business. No grower of violets can afford to be without it. 25 cents.

HEDGES, WINDBREAKS, ETC. (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. $4.00.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. $2.50.

THE GOLDFISH (Mulertt).—A number of florists find goldfish an attractive and paying addition to their business. The best advice is given in every department of the subject, including construction and care of the parlor aquarium, in this volume of 160 pages, handsomely illustrated. $2.00.

LANDSCAPE GARDENING (Maynard).—The development of landscape art within the past few years compels the wide awake florist to keep posted on this branch of the business. The many suggestions of this book will be found helpful every business day. It contains 338 pages, 165 illustrations. $1.50.

ASPARAGUS (Hexamer).—A practical treatise on the planting, cultivation, harvesting and preserving of asparagus, with notes on its history and botany. This book is mainly devoted to the culinary kind of asparagus, but there is also some reference to the ornamental species. 50 cents.

CABBAGES, CAULIFLOWER AND ALLIED VEGETABLES (Allen).—The requirements of the important vegetables of the cabbage tribe are given here very fully. The book also contains interesting chapters on seed raising, insects, pests and fungus diseases common to these plants. 50 cents.

LANDSCAPE GARDENING (Waugh).—This is a very useful little book on the art of landscape gardening. It will be found exceptionally valuable to amateurs, as it covers in detail the numerous problems that come to the owners of small gardens. It is freely illustrated and the pictures have been chosen with a view to informing the reader rather than decorating the book. 50 cents.

Florists' Forcing Bulbs and Roots.

Copyright 1906 by the American Florist Company.

III—LILIUM LONGIFLORUM.

The ever increasing demand for lilies throughout the spring, more especially at Easter, has brought Lilium longiflorum to the fore, and, although its cultivation year after year is steadily gaining in extent, growers in late seasons have barely been able to fully meet this demand. In some points its culture differs from that of Lilium Harrisii, though both are natives of Japan and closely allied. In comparing ultimate results it is usually found that they claim an equal share in the estimation of the grower.

The bulbs should be planted as soon as they can be obtained, which is hardly ever before the end of September. Five-inch pots for the small sized bulbs and 6-inch for the larger are used. There is nothing gained by starting this lily in small pots with a shift into larger ones later on. The less disturbance there is to soil and roots, the brighter will be the growth and the taller the flower stalk. A somewhat heavy soil, liberally enriched with thoroughly decomposed manure, gives the best results. The bulb should be placed deep enough in the ground to bring its top below the rim of the pot and just even with the surface of the soil after this has received a good watering. A frame outdoors is the proper place for the pots. A layer of several inches of sand, earth or coal ashes directly over the pots will maintain an even degree of moisture and also aid in shielding the bulbs from frost. By closing down the sashes at times of severe freezing and applying an additional covering of leaves or hay, the bulbs may be safely carried through until the middle or end of December, when they should be taken out and housed. By that time they should be well rooted and just showing the beginning of a sturdy topgrowth. If this is the case, little trouble will be experienced in working them up into fine stock for Easter.

But it is just at this juncture that the inexperienced lily grower is very apt to make his first and greatest mistakes, one of which is over-watering; the soil in the pots being as yet but partially filled with the roots. The other is too high a temperature in starting. A house heated to 48° or 50° is warm enough for the lilies for several weeks after being brought in from the frames. After that a gradual rise in temperature up to about 58° at night will bring the lilies to a point when a division into several lots becomes necessary.

An equal growth and uniform headway in forcing must not be expected. In any number, large or small, all treated alike, some will be found to be far ahead, others quite backward in their growth. A sorting out and placing each lot, according to development, by itself will simplify matters and enable the grower to so modify his treatment in forcing the various grades, as to bring them all into bloom at the same time, if such has been the object from the start. From the time the buds show until the flowers open it usually takes six weeks. If in a temperature of 58° or 60° the plants show well defined flower buds just above the foliage by the first week in March, this temperature will bring them out in good time for Easter. Those not as far advanced will need more heat to bring them into line with the earlier plants.

Then there will always be some greatly ahead of the rest, and here again an opportunity for making a serious blunder is offered. Should the grower in an attempt to hold back these too forward lilies, remove them out of a high temperature into cool quarters, in all likelihood this check in their growth would make them squatty, stunted plants, perhaps cause them to stand still entirely, their buds never developing into perfect, open flowers. Any interruption of rapid development in lilies by a sudden lowering of temperature causes harm. Retarding, if such becomes necessary, must not be attempted before the perfectly formed buds have turned from green to a yellowish white. Then the plants may be removed to a cool

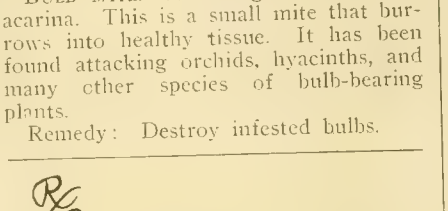
and even dark place and will there slowly expand their flowers and remain in fine shape for several weeks.

When lilies are making a rapid growth they require water in unstinted measure as also a good syringing once or twice daily. Their value as finished plants is enhanced by feeding with liquid manure from the time the buds are well above the foliage until they begin to unfold. Insects are a great source of trouble to the grower who is unable to maintain an even temperature for his lilies. Regular fumigation will keep away green fly. One should never wait until it makes its appearance, but fumigate regularly, if but in mild doses, from the very start. When the little buds are just visible as a small cluster away down in the upper foliage, tobacco water must be resorted to in driving aphis from its favorite foraging ground, since fumes will not reach them there. It is well to keep a sharp lookout at that time for the hidden colonies of green fly. E.

Primula Obconica Poisoning.

We are indebted to J. Truman Wolcott for the prescription reproduced herewith, which has given him immediate relief from the irritating effects of primula obconica poisoning. Mr. Wolcott hopes it may prove similarly beneficial to others of our readers who have been poisoned in handling this plant. Dr. Albert E. Carrier is responsible for the perscription.

This prescription can be filled at any drug store.



Primula Obconica Poisoning Prescription.

Greenhouse Insects.

Paper by Tennyson D. Jarvis, Ontario Agricultural college, Guelph, Canada, read at the ninth annual convention of the Canadian Horticultural Association, August 30, 1906.

SLUGS.—These are not insects, but belong to the group of animals known as mollusca, soft bodied creatures frequently covered with a shell. They attack many species of greenhouse plants, lettuce, violets, etc.

Remedies: They prefer moist situations, hence drainage, where practicable; trapping with cabbage leaves, sweetened bran, etc.; clear weak lime water sprinkled over the plants and on the soil.

SOW-BUGS.—These are 14-legged animals belonging to the class of animals known as crustacea. They feed largely upon decaying vegetation and sometimes attack growing plants, lettuce, etc.

Remedies: Slice juicy potatoes and sprinkle them with Paris green and leave them in places frequented by the bugs.

MILLIPEDES, sometimes known as "thousand legs," and "false wireworms." —They have two pairs of legs to each segment of the body and belong to the class of animals known as myriapoda. They are very common in greenhouses and some species attack the roots of growing plants, violets, etc.

Remedy: Trapping with poisoned vegetable is about the only remedy.

RED SPIDERS.—These are very small creatures belonging to the order of arachnida, known as acarina-mites. They are so small that it requires very careful examination to see them on the plants. The affected leaves usually curl downward and sometimes lose their color. They are found on many plants in the greenhouse, chrysanthemums, carnations, etc.

Remedies: Flowers of sulphur mixed with water at the rate of an ounce to a gallon and sprayed over infested plants. For the application of this spray a force pump with spraying nozzle is a necessity. On plants that are liable to injury by use of the sulphur, such as violets, no other remedy is used by florists generally than frequent syringing or spraying with water or with a weak soap solution.

BULB MITE.—It belongs to the order acarina. This is a small mite that burrows into healthy tissue. It has been found attacking orchids, hyacinths, and many other species of bulb-bearing plants.

Remedy: Destroy infested bulbs.

SPRINGTAILS.—These are mostly of microscopic size and unfamiliar to any but the careful observer. Their most distinctive character is the possession of a forked spring by means of which they leap long distances when disturbed. They live for the most part on decaying matter and are very abundant in damp places in greenhouses. In the Ontario Agricultural college greenhouse they have been found in large numbers feeding on primula seedlings just as they appear above ground.

Remedy: Sprinkle soil with lime water.

AMERICAN COCKROACH.—These are large flat bodied insects, measuring from an inch and a quarter to an inch and three-quarters in length. They are night feeders and hide in crevices during the day. The species has been very destructive at the Ontario Agricultural college, feeding on tomato seedlings.

Remedies: Trapping with sweetened bran sprinkled with paris green; powdered borax sprinkled around the affected plants.

CRICKET-LIKE GRASSHOPPERS. — These are large wingless insects and resemble crickets in form. They are very common in mushroom beds.

Remedy: They may be easily destroyed by hand.

THRIPS.—These insects are very small with long slender bodies and four poorly developed wings. When disturbed they thrust the body into the air as if they meant to sting. They are extremely lively and leap as well as fly. They are very common on melons, cucumbers, tomatoes, etc.

Remedies: Tobacco smoke; fumigating with potassium cyanide.

TARNISHED PLANT BUG.—The mature bug is about one-fifth of an inch long and varies in color from dull dark brown to a greenish or yellowish brown. The head is yellowish with three narrow, reddish stripes. The thorax has a yellow margin and several yellowish lines running lengthwise. This species is common on the college chrysanthemums outdoors. They suck the juices from the leaves and buds and thus destroy the flowers.

Remedies: Spray with kerosene emulsion.

FOUR-LINED LEAF-BUG. — This is a bright yellow bug, about one-quarter of an inch long, with the head, forepart of the thorax and the entire underside of the body of a shining orange-red. There are four black stripes extending over the prothorax and a greater part of the wing covers. This bug is often found on chrysanthemums outdoors.

Remedy: Spray with kerosene emulsion.

The family coccidae includes the mealy-bugs and scale-insects of bark-lice. This family belongs to the order hemiptera, all the forms having sucking mouth parts. They differ, however, very greatly from all the other families of the order and, in fact, from all other insects. They appear upon our plants either as minute soft-bodied insects clothed with a white cottony substance, or as flat scale-like objects of various forms and colors. Among the coccidae are found many of the most serious pests of the florist, certain scale insects and mealy bugs being found in every conservatory and forcing house. Among the most prominent members of this family with which the florist has to contend are the following:

MEALY BUGS.—Mealy bugs (Dactylopius) are the most common and noxious of greenhouse pests. They are too well known to require any lengthy description here, every florist being familiar with the waxy white secretions in which these insects envelop themselves while at work upon the plants. In these white, irregular secretions are found pale, flesh-colored, soft-bodied insects, about one-eighth of an inch in length. Two species are commonly found, viz., Dactylopius longispinus and Dactylopius destructor. The former is distinguished from the latter by the long, waxy thread-like processes on the caudal end of the body. A great many greenhouse plants are attacked by this pest, especially such plants as croton, coleus, begonia, oleander, and asparagus.

Remedies: Mealy-bugs thrive in close, hot, dry air and like to conceal themselves in corners, or in thick tangled masses of foliage. These conditions should be avoided and where the plants can be reached, the insect can be washed off them by means of a powerful spray. Kerosene emulsion, when it can be brought in contact with the insect, is also very effective. It is best applied by means of a stiff hand brush.

ORTHEZIA.—Several members of this genus are frequently found in greenhouses, but they are not nearly as common nor as noxious as are the mealy-bugs. They are readily distinguished from other insects by the body being covered with thin plates of pure white wax of an exceedingly fine texture,

which overlap and form a beautiful symmetrical design. These insects are found upon crotons and coleus and may be controlled by spraying with kerosene emulsion or whale oil soap.

LECANIUM.—The species of this genus are found everywhere. They occur upon all kinds of plants both under glass and in the open air. They are known to gardeners as soft scales or brown scales. The lecaniums are naked scale insects, the scale being the body of the insect. They are generally more or less hemispherical in shape and are usually dark brown in color. They are among the largest and most conspicuous of our common scale insects. The eggs are found beneath the body of the female. Lecanium hemisphæricum is the species commonly found in greenhouses upon oleanders, palms, and other tropical plants. It is best controlled by spraying with whale oil soap or by removing the scales with a stiff hand brush.

Besides the foregoing, scale insects belonging to the genera aspidiotus, chionaspis and mytilaspis are frequently found in the greenhouse upon palms, ferns, and other plants. Those belonging to the genus aspidiotus are flat and round with an inner central nipple. The commoner forms of the genus Chionaspis are pyriform in shape and have a white scaly appearance. The forms of the genus mytilaspis resemble those of chionaspis in shape, but are more elongated and of a dark brown color. All these forms can be killed by the use of kerosene emulsion and similar remedies. Using hydrocyanic gas is one of the most effective means of treating them.

Aphides are commonly known under the name of plant lice or green fly. They are small, pear-shaped, soft-bodied insects, either winged or wingless. They multiply very rapidly and often appear in great numbers and suck the juices from the leaves, causing them to wither up and the plant to die. Most aphides are of a green color, but some forms, such as the chrysanthemum aphis, are black in color. The best way of destroying them is by means of tobacco smoke. This should be applied as soon as the aphides appear, as, if they are allowed to reach full size, they are hard to destroy. As a preventive, greenhouses should be fumigated once or twice a week if insects are found troublesome. Kerosene emulsion and whale oil soap are also quite effective.

WHITE FLIES.—Closely related to the aphides are the aleyrodes or white flies, as they are generally called, which sometimes appear in large numbers in the greenhouse and do considerable injury. They are very small incests, having a wing expanse of about one-eighth of an inch. Both sexes are winged. The wings are white, sometimes spotted; the body is pink or yellowish, with more or less black spots. Both the wings and body are covered with a fine white powder. This pest is found on the underside of the leaves of many greenhouse plants, but is especially destructive on tomatoes, melon, cucumbers and hibiscus.

Remedies: Many remedies have been tried for this pest. Fumigating with tobacco is not an effective remedy. Hydrocyanic gas has been found to be effective, but requires to be used with caution, as, if used too strong or left in the house too long, it will seriously injure the plants. Good results have been obtained by using 1 ounce of cyanide to every 400 cubic feet of space and keeping the house closed nine minutes. Spraying the under surfaces of the leaves with common laundry soap and water (one pound dissolved in eight gallons) has also been found to be a cheap and effective remedy.

LILIUM LONGIFLORUM MULTIFLORUM.

GREENHOUSE LEAF-TYER (Phlyctaenia ferrugalis).—They are slender leaf-eating caterpillars; when full grown about three-quarters of an inch in length, and of a semi-translucent green, with a dark green dorsal stripe, on each side of which is a sub-dorsal white band. The adult is a small brownish moth. From the time they hatch until full grown, the caterpillars live in tents made by drawing down the leaflets of the leaves. The cocoons are spun between the leaves. They feed on the parenchyma of the underside of the leaf. They have been found in Ontario on roses, violets, and chrysanthemums. This pest has been reported by Dr. Fletcher in greenhouses in Toronto and Hamilton, and by Dr. Bethune in greenhouses in London.

GREENHOUSE LEAF-ROLLER (Cacœcia parallela).—The caterpillar is about an inch long, tapering slightly to each end. It is a dull green, overlaid lightly with a velvety black of a slightly darker shade on the dorsum. The head is round, slightly depressed in front, of a yellowish brown color. The piliferous

tubercles are white and conspicuous. It feeds on the leaves of roses and draws the leaflets together by means of threads of silk.

Remedies: Owing to their habits the caterpillars are difficult to reach with insecticides. Hand picking is the only effective remedy.

ANTS.—The damage done by these insects is chiefly mechanical. The soil in pots is often disturbed and the water passes through the pots by means of the ant runs, instead of going through the whole of the soil and moistening it.

FUMIGATION.

Hydrocyanic gas being now quite extensively used by florists across the line for the destruction of the whitefly, it might not be out of place here to say a word or so as to the method of application, especially as some Canadian florists are now adopting this remedy for combating the pest. Before fumigating it is necessary to determine the amount of space contained in the house in order that the operator may have some idea as to the amount of chemicals to use. Hydrocyanic gas, if used too strong or left in the house too long, will seriously injure the plants. It is therefore very important that extreme caution be observed in its use. From a number of experiments conducted at this college it was impossible to determine the quantity of cyanide required for best results, as the various samples used varied so much in strength and purity. From tests carefully made at the New Hampshire station with cyanide of potassium of best quality the best proportion of cyanide, sulphuric acid, and water seemed to be one ounce cyanide of potassium, two ounces commercial sulphuric acid, and four ounces water. In the experiments at New Hampshire one ounce of cyanide to 400 cubic feet of space was used, and the house kept closed nine minutes. This gave good results without injuring the plants.

To make the gas use an earthen jar (never metal) large enough to contain all the liquid without slopping over. A gallon jar is a convenient size. Pour the water into the jar, add the acid slowly, then weigh the cyanide and place it in a paper bag. See that the ventilators are closed and all the doors firmly fastened except the one used by the operator. It is necessary to take this precaution as the hydrocyanic gas might prove fatal to any person entering the house by mistake. When all is ready approach the jar with the paper bag containing the cyanide, fill the lungs with air, hold your breath, drop the cyanide, bag and all, and leave the house at once. Lock the door and note the time. After the number of minutes required to kill the white-fly (nine minutes) are passed open the doors and give the gas plenty of time to escape before you enter. It cannot be kept too firmly in mind that hydrocyanic gas is very poisonous, and the house should not be entered during the treatment.

HUDSON, MICH.—John Allwood, who bought out the establishment of Philip Thomas here over a year ago, has enjoyed an excellent trade the past season and looks forward to increased business during the season now opening. He is well prepared to meet it with good stock in all lines.

A New Orleans Garden.

The Lawrence Fabacher private estate, on beautiful upper St. Charles avenue, is one of the finest and largest in New Orleans. It comprises one city square of ground measuring 300x350 feet. One of the main features of the modern garden architecture, employed at this place, is the beautiful carpet and foliage bedding. A fine carpet bed is located in the center of the spacious lawn. The pedestal, three feet high, is crowned by a Cocos australis surrounded with several varieties of crotons. Six rosettes slope down from the pedestal. In the center of each rosette is an Agave Americana variegata, the fields being made of Alternanthera amœna aurea and the intersections between the six rosettes of alternanthera. Boussingaultia crossed and bordered each one from the top of the pedestal. Alternanthera amœna aurea was used for the entire outer borders of the bed, which had a diameter of about 20 feet.

Lawrence Fabacher.

A New Orleans patron of horticulture.

A New Orleans Garden.

The German hop.

The croton bed is 12x25 feet, banked high against a huge oak at the upper front corner of the garden. About 150 plants of various sizes, in 15 varieties, are used to make up this very attractive group. Palms, dracænas and hardy ferns, kept during winter in the conservatory, are arranged in different groups under the shady oak trees, which are studded over the immense lawn. Mr. Fabacher can pride himself in having the only German hop vine in the city growing on his estate. The plant was brought by him from the fatherland two years ago and, as the illustration shows, thrives and blossoms wonderfully in our southern clime. Encouraged by the first trial, Mr. Fabacher had all along on one side of the place between the sidewalk and the street the same kind of vines planted, which in a short time will form a beautiful bower 350 feet long. Besides this novelty is a large high bed of irregular shape planted with southern pine brought from Mr. Fabacher's private forest in Covington, La. The first planted young trees are doing splendidly and after the entire bed is full grown it will add greatly to the picturesqueness of the entire place.

The beautiful residence is surrounded with mixed groups of azaleas and Camellia indica, and large hanging baskets and boxes planted with nephrolepis of several varieties and Asparagus Sprengeri adorn the balcony and steps from spring until winter. The conservatory is strictly modern, of Louisiana cypress build, with propagating and other conveniences attached. Hot water heating is used. A fine collection of rare foliage and flowering plants and vines adorn this really fine structure. The casino, built in colonial style, is used as a bungalow or summer resting place and gymnasium.

Lawrence Fabacher is one of the greatest promoters and lovers of everything appertaining to horticulture in New Orleans. Possessed with great wealth, his favorite pleasure is the constant beautifying of his elegant home and he spends the money lavishly in doing so. Mr. Fabacher is regarded as one of the foremost business men in the city. He is not only president of the Jackson Brewing Co., the largest of its kind in Louisiana, but holds many other high and honorable positions in the commercial world of the south.

Henry Kraak, the young and intelligent gardener to Mr. Fabacher, comes from Halle, Westphalia, Germany. He learned the trade in the fatherland and afterward acquired a great deal of knowledge in all branches of horticulture, especially in landscape gardening during his extended travels through Germany, Switzerland, Italy and France. Mr. Kraak came to America in 1903 and made New Orleans his permanent home about two years ago. He has had charge of Mr. Fabacher's place since February 1, 1905, and

A NEW ORLEANS GARDEN.
Lawrence Fabacher's residence.

during that time has made considerable improvements on it. Some of the best and original pieces of garden architecture in the city can be seen at this private place. Mr. Kraak is vice-president of the German Gardeners' Club, an enthusiastic member of the New Orleans Horticultural Society, and several fraternal organizations.

CRESCENT.

Water Bugs in the Benches.

ED. AMERICAN FLORIST:—

What is the best way to rid carnation benches of water bugs which are under the mulching in such large numbers as to be damaging the plants alarmingly? Paris Green and sugar, also a popular roach food have had little effect.

Ohio. J. H.

The best remedy for water bugs is fumigation with hydrocyanic-acid gas. Use one fluid ounce of commercial sulphuric acid, diluted with two fluid ounces of water, and one ounce of high-grade (98 per cent) cyanide of potassium for every 100 cubic feet of space. All windows and ventilators must be closed, and all doors locked except the one by which the operator is to make his exit. All fires should also be put out. Dropping the required amount of cyanide of potassium into a porcelain dish in which has already been placed the water and sulphuric acid, the operator runs into the open air closing instantly the open door. Care must be exercised as this gas is extremely poisonous.

New Seedling Montbretias in England.

Nothing among novelties in hardy flowers has created more interest in 1905 and 1906 than the new seedling montbretias raised by G. Davison, of Westwick Gardens, Norwich, and R. Wallace & Co., nurserymen, Colchester, England, are the fortunate introducers, having made arrangements to that effect with Mr. Davison. They have been on view at all leading English shows this autumn. Last year Prometheus and one or two more were shown and this year the list of approved varieties is augmented and I have specially noted 10 varieties which I will briefly describe. These hybrids are so distinct from the old type as almost to justify recognition as an entirely new race with erectly held flowers three to four inches across and stems three to four feet high, embracing many new shades of color. Some of the varieties have received the Royal Horticultural Society's award of merit, first class certificates of the Royal Caledonian Horticultural Society and Shrewsbury Horticultural Society.

Prometheus may be considered the prince of the collection and the finest montbretia yet raised. It is remarkably vigorous and free flowering. The large brilliant flowers, 3½ inches across, are of a rich orange color, flushed and stained with crimson at the center and the spikes are graceful and freely-branched.

Ernest Davison is a vigorous and sturdy growing plant with upright freely-branched spikes of deep orange flowers, flushed red externally and suffused carmine on the inner petals around the large golden center.

Geo. Davison is a variety possessing great merit. The three to four-foot stems bear lovely pale orange-yellow flowers and it is one of the earliest to flower.

Westwick is robust, elegant and free-flowering, with rich orange-scarlet flowers zoned with rich crimson around the clear buff yellow center, a few flame-like jets of color appear at the throat and petals are reflex as in Lilium Martagon.

Hereward is very distinct and late flowering; the pale orange flowers are borne on tall erect stems and like Westwick, the petals are reflex.

King Edward is a sturdy bushy plant three to four feet high, with freely-branched stems bearing spikes of rich golden yellow flowers marked with 6 to 8 chocolate colored spots at the throat. It is a very distinct and pleasing flower.

Anglia has pale yellow flowers and the tips of the petals are suffused internally with reddish tints, quite a unique and telling flower.

Lady Hamilton throws up erect stems, thickly set with yellow flowers. A ray of rosy orange suffuses the center of the flower when it opens, the general color changing to apricot as the flower gets older.

St. Botolph is the largest of all yellow flowered montbretias; it is very robust and free-flowering. Externally

it is of a ruddy orange hue and internally, clear yellow.

Lord Nelson is the deepest color of all and very distinct. It has very dark purple stems which branch in such a manner as to form a fan-shaped inflorescence. The flowers are of a deep orange-scarlet, crimsoned externally and with a yellow eye. BEE.

A NEW ORLEANS GARDEN.
Showing a bed of crotons.

Gardening in Northampton, Mass.

Geo. W. Cable, of Northampton, Mass., is famous as an author, but among his neighbors he is best known as an expert gardener. For years Mr. Cable has preached gardening—preached it while he practiced it. He urged his neighbors to plant and, urging them, set the example for them.

His reward has come to him in the daily delight of witnessing the transformation of the yards of the village into real gardens, presided over by men and women possessed of the real gardening spirit. Mr. Cable was the first person, probably, to introduce and put into successful operation the neighborhood garden club idea, which, more recently, has taken hold elsewhere with most pleasing results. It was matured to meet a real need. Each club consists of 10 neighboring families, and, in order to promote rivalry and maintain the interest, contests are held annually between the different clubs. The whole thing is the direct result of Mr. Cable's labors, covering a period of eight years, to increase the cultivation of flowers.

The excellent results of this movement are evident on every hand. Northampton has become a town of flowers, vines and shrubs, and, by the same token, a cleanly town. Its streets and walks are clean and back yards as well as front yards require no inspection at the hands of sanitary officers.

Andrew Carnegie was interested in the movement and contributed $8,500 to the people of Northampton for the erection of a permanent propagating house. Here plants are grown on to transplanting size and distributed to the members of the clubs at the actual cost of production.

Some persons, perhaps, will look upon such a movement as purely aesthetic. They are, as has been shown by the Northampton experiment, entirely wrong. Not only is the community saved much money by the co-operation of the townsmen in keeping the place clean, for gardening begets cleanliness, but it is actually true that by nothing more substantial in the way of improvements than the mere planting of flowers, real estate values in Northampton have very materially increased.

The central club, or governing club of the town, known as the House Culture club, owns its own experiment grounds, and, in addition to conducting the propagating house, supplied by Mr. Carnegie, distributes the prizes that also are due to Mr. Carnegie's generosity. These prizes are substantial and worth striving for, but, in value, they are small compared to the practical value of the gardening conducted as a result of the movement.

In winter the interest in gardening is kept alive by a series of lectures on such practical topics as pruning, fertilizing and soil composition, given by the garden expert of Smith college.

A Decorated Wagon.

A decorated wagon entered by Fred A. Danker, Albany, N. Y., in a German festival recently held in his home city, is shown in the accompanying illustration. The flowers used were, white hydrangeas, gladioli, and pink and white asters tied with ribbons to match. The horses' heads are adorned with plumes of fairy flowers. The float was the subject of favorable comment on the part of all who saw it. The view shown was taken in Washington park. R. D.

WITH THE GROWERS

Dailledouze Bros., Flatbush, N. Y.

The range of carnation houses of Dailledouze Bros., at Flatbush, Brooklyn, N. Y., is, as usual at this season, of great interest to carnation enthusiasts. In several of the houses crops have been in cut for two or three weeks, and the quality of the flowers is not to be excelled by any reaching the New York market. Enchantress is looking very fine, and has lost none of its prestige here as a good, free-growing and remunerative variety; consequently it is accorded a good share of benching area. Prosperity, too, is as prominent in the benches this year as ever, and is in excellent condition. Mrs. Thos. W. Lawson is largely benched, but a visitor's attention is very apt to be riveted upon a new pink seedling from Lawson which is liberally benched this season, it being decided to disseminate it for next season. It is a beautiful pink contrasting strongly with the parent as being many shades lighter. It is perfect in form, has all the growing characteristics of the Lawson, exceeding it perhaps in productiveness and perfect flowering habit, not a bursted flower

A NEW ORLEANS GARDEN.
The casino

having yet been noticed. It should prove an easy winner in the commercial ranks. Crimson Glow, the variety sent out last season, is in fine shape and dominates other deep colored varieties.

Cutting from the benches commenced as early as July 1. The fine calyx, stem and excellent color of this variety makes a question as to its adoption, for the supply of red carnations rather superfluous. Victory seems to be the variety favored here for crimson, and the stock, in good crop at present, speaks volumes for it. Queen and Lieut. Peary seem to be the favorite whites and are very largely grown. Eldorado, a fine yellow, is grown to some extent for the demand for this color. In variegated carnations Mrs. Patten appears to be the selection. Four or five seedlings of great promise are largely benched this season, and closely watched, with a view to dissemination if they come up to the rather hard standard set for them at this establishment.

A range of houses is set aside for chrysanthemums and one or two of the earlier varieties planted are already coloring up. Marquis de Montmort is the most advanced and the cut will start at once. Polly Rose, Glory of the Pacific and Ivory are in grand shape and well set in flower.

ESTABLISHMENT OF DAILLEDOUZE BROS., FLATBUSH, N. Y.
House of Prosperity carnations.

BARABOO, WIS.—Mrs. Wm. Peck, wife of the florist of the same name, died here Tuesday night.

DETROIT, MICH.—J. F. Sullivan was suddenly called to Avondale, Pa., by the death of his mother, September 22.

ALBANY, N. Y.—The Albany Steam Trap Co., well known to greenhousemen, is building a new 4-story 40 x 80 foot structure at 317-319 North Pearl street, which will be the future home of the company. The new building will afford 14,000 square feet of floor space and will be fully equipped in every detail.

Pittsburg.

STOCK SCARCE AND MOVING QUICKLY.

A scarcity along all lines was the noticeable feature during the week. Asters were very scarce and gladioli almost dropped out of sight. Carnations are coming in more plentifully but the scarcity in other stock makes them move quickly. Chrysanthemums are not a staple yet. Cosmos has made its appearance. Roses are good but not so plentiful. American Beauty being the most abundant and moving nicely.

T. P. McCormick is again with the Florists' Exchange. Miss Evans of the same place has been away sick for 10 days.

Miss McKinley, after a long siege of illness, is back again at Randolph & McClements.

Walter Jolliff, with J. B. Murdoch, is on his vacation. J.

Buffalo.

BUSINESS SLOW.

Good weather until Saturday which gave us a heavy rain followed by colder weather has made stock of uncertain quality. Asters are about over and carnations are not plentiful. American Beauty is good and sells well. Weddings and funerals are about all that keeps trade up at present.

NOTES.

R. E. Boettger, the aster man of Eggertsville, celebrated his twenty-fifth wedding anniversary September 22, when a number of his florist friends were his guests together with many others.

Prof. Cowell's goose plant (aristolochia) draws considerable attention.

Visitor: A. K. Rogers, Readville, Mass. BISON.

Baltimore.

TRADE HEAVIER.

We are having a perhaps natural and to-be-expected contrast to the wet summer in a dry fall with unusually high temperature, reaching one day this week the midsummer extreme of 90°. The humidity, which has been, for months, the cause of much discomfort, continues, with an occasional day of perfect loveliness. Trade begins to improve, and as absentees begin to return from the seashore, the mountains and trans-Atlantic resorts there is the expected improvement in demand for plants and cut flowers. Roses are improving in quality, and great numbers are sent in. Asters are practically over. Gladioli are in excess of requirements, and dahlias so far do not measure up to the usual standard, though doubtless from now on they will improve.

NOTES.

There have been some good Harrisii lilies in the market from the Halliday Bros.

DECORATED WAGON, BY F. A. DANKER, ALBANY, N. Y.

The new building of the Florists' Exchange, at the corner of Franklin and St. Paul streets has made good progress, some of the rafters for the roof being in place. In style of architecture the structure is somewhat unusual and the manner of construction seems to be of the most substantial character. The building will be an ornament to the section where it is located, and admirably adapted to the uses of the Exchange, which will be enabled to do a much larger business than ever before and, at the same time, with greater ease and convenience to employes and patrons. The first floor and basement will be used for the business of the house while the second floor will afford a fine room for meetings, lectures, etc. The walls of the building are so constructed that other stories may be added, if found desirable.

AT THE TIPTON GREENHOUSES, TIPTON, IA.

R. VINCENT, JR., & SON'S DAHLIA SHOW.

The dahlia show of Richard Vincent, Jr., & Son, of White Marsh, Md., on Wednesday, proved a great success. The weather was fine, though extremely warm, and the attendance was large. Besides the Baltimore and local contingent there were many visitors from the trade in Boston, New York, Philadelphia, Washington and other places and all were more than pleased at the extent, variety and beauty of the display. Mr. Vincent, the head of the firm, met his visitors in Baltimore and accompanied them on the train to his railway station whence they were transported to the nursery in numerous farm wagons. In the big packing shed, an account of which with engravings appeared several months ago in THE AMERICAN FLORIST, there was a table running through the center, on which was spread an abundant and tempting array of edibles, and down the center of the table were enormous bunches of dahlias of every size and shape and hue. Along the walls were rows of boxes also containing great bouquets of the same flower in interminable variety. After a hearty luncheon some speech-making was naturally indulged in. Mr. Vincent welcomed his visitors and told of the pleasure experienced by him in meeting so many followers of the florists' profession. He spoke feelingly of the illness of his son, who had largely arranged for the show, but who was disappointed at not being present, though happily now convalescing. Short addresses were made in response by Patrick O'Mara, of New York, Peter Bissett and Wm. Gude, of Washington, Edwin Lonsdale, of Philadelphia, J. J. Perry, Chester L. Seybold, of Baltimore, and others; while on behalf of the lady visitors some remarks very complimentary to Mrs. Vincent were made by Miss Mildred J. Campbell and Mrs. Mack Richmond, of Baltimore. After dinner the entire company was driven over the farm and given an opportunity to inspect the growing crops, including a field of 40 acres in dahlias, the greenhouses which cover nearly four acres of ground, and acre after acre of land in vegetable plants. The farm now includes some 225 acres. Upon returning to the houses the guests were treated to generous supplies of ice cream and each visitor on leaving was given a big bunch of dahlias. At night the show was thrown open to the public and the neighbors for miles around came in to see the display. The following is a partial list of those present:

ESTABLISHMENT OF DAILLEDOUZE BROS., FLATBUSH, N. Y.

Seedling of Pink Lawson about to be disseminated.

St. Louis.

TRADE IMPROVING.

The market is improving. The weather which has been very warm all week has cooled off and from now on we can expect a much more satisfactory state of things. The first week in October will usher in the annual fall festivities. The Veiled Prophets' ball, the parade of the Million club, and later the horse show, will undoubtedly cause an increase in the demand for all kinds of flowers. Asters are about over, a few stray ones here and there appearing. Tuberoses are a little more plentiful. American Beauty continues to arrive and is eagerly sought, being sold almost before it is taken out of the boxes. Carnations are improving, Enchantress especially. Stock is coming in in increased quantities and very much improved in quality. From all accounts chrysanthemums will be plentiful and of finer varieties than ever. Cool nights here helped Richmond, Chatenay and Killarney roses, of which there are quite a few coming in.

NOTES.

G. T. Waldbart, Jr., was married last Thursday, at 5:30 p. m., to Miss Emma Hojle. George is now taking a vacation and he and his bride are stopping at the Planter's. Congratulations are in order.

F. J. Foster has his handsome show windows always filled with choice flowers. The Misses Anna Bernhardt and Linnie Van Antwerp are his two able assistants.

Ostertag Bros. are very busy this week with store openings. At one of the stores they had a floral ladder 15 feet high of white and purple asters.

Henry Brown has left A. Jablonsky. He has been foreman there for the past three years. He had charge of the plant at Central, Mo.

Henry Emmons, of Belleville, Ill., has just completed a carnation house, 36x 150 feet. This gentleman has a very large local trade.

Ellison Floral Co. has several large orders booked. They had the cut flower decorations at Nugent's dry goods store.

Miss May Mann is at her West End flower store again. She had a very enjoyable time at her home in Maine.

Alex. Siegel is preparing for the fall campaign. Alex. is always figuring on a bargain sale.

C. Young & Sons Co. had the decorations at Boyd's opening.

H. G. Berning is receiving some extra fine fancy dahlias.

Chas. Kuehn is receiving some extra fancy roses.

The Riessen Floral Co. was very busy last week.

Visitors: A. C. Brown, Springfield, Ill.; E. W. Guy, Belleville, Ill.; Henry Emmons, Belleville, Ill.

W. F.

Edw. L. Loyet, who not only conducts a florist's business but also breeds fancy gold fish, is making extensive improvements at his establishment at 918 North Kingshighway. In the first place he is having his entire place newly decorated. Besides this he is figuring on building a handsome 15-foot conservatory adjoining his store, which will make it one of the finest floral establishments west of the Mississippi river. Mr. Loyet has just received word from his representative in Tokio, Japan, that 1,500 of the finest gold fish are about to be shipped. These fish are valued at from $2 to $25 each. Mr. Loyet is putting three new ponds in his place and will be in the market to sell to florists gold fish in lots of from 100 to 10,000.

Mr. Loyet reports business as being very fine. He has already booked several large wedding orders. To meet the growing demands of his business he will shortly erect three new greenhouses, each 35 x 100 feet. One house will be devoted to Boston ferns and the other two for growing flowering plants.

Kansas City.

THE MARKET.

During the past week trade has assumed much activity. The cool weather of the last few weeks has slightly shut off production, but what stock reaches the market shows great improvement. The demand for choice stock is much better. In strongest demand are American Beauty roses. Bridesmaid is making color nicely. Bride roses are more plentiful and of good quality. Chatenay, Richmond and Golden Gate still lack in size of bloom, but a continuation of the cool weather will improve them. Carnations are becoming more plentiful, Enchantress being the best. White and pink sorts from the field are plentiful but of poor quality. Asters which were abundant last week are now much sought for, only a few small ones being available. Dahlias are not so plentiful as last season, due in some sections to a lack of rain. Some fine late ones however, are expected to be in next week and on until frost. Chrysanthemums have not made an appearance yet, but are expected soon in large quantities.

NOTES.

One of our retail show windows was made very attractive last week with large vases of tritoma. Chiffon bows and streamers in keeping with the color of the flowers was arranged with brilliant effect.

A. F. Barbee says trade the past spring and summer shows an increase of 50 per cent over last year. Mr. Barbee has the advantage of the best location in the city for cemetery trade.

W. E. Day, formerly with the Rock Flower Co., who was so successful in the Florists' Club bowling tournament last fall, paid us a visit recently.

F. C. Heinz, of Leavenworth, Kans., was a visitor last week. He expects to begin cutting chrysanthemums within a week.

Several large shipments of bulbs passed through the custom house recently. Most of them for local growers.

A new store of W. J. Barnes on the south side is the latest addition. We wish the new venture much success.

Edw. Ellsworth purchased quite a lot of Pompeiian stoneware which he is showing at the store.

Edw. Bunyas drove to Blue Springs last week with a fine lot of funeral work.

A visit to Miss Peterson's store found all the clerks busy with funeral work.

A. Elberfield has discontinued his Owl drug store stand on Main street.

W. L. Rock has returned from a two-weeks' fishing trip in Arkansas.

Arthur Newell left September 16 on a trip to Texas points.

M. E. Chandler says late dahlias will be good.

K. C.

Louisville.

BUSINESS CONSIDERABLY IMPROVED.

Business the previous week picked up considerably and some very good orders were received. We have had several warm days and plenty of rain; the nights are cool. Openings have commenced, and no doubt there will be some good orders on this account. Roses are very good in quality and supply, and the demand has been unusually good. Carnations sell well and have improved considerably in quality and supply. The supply of asters is becoming short, and the demand is also decreasing. Lilies have had a slow demand. Other stock can be had in satisfactory quantities of good quality, and moves well. Green goods are in satisfactory supply.

NOTES.

The bowling club had a prize match Tuesday night at New Albany, Ind. The members were invited to take supper with Anders Rasmussen, which was very much appreciated. No one can deny this, not event August R. Baumer, who was very late owing to rehearsing his new melodrama entitled, "Lost in New Albany in Broad Day-Light," of which he is the author. The members had the pleasure of viewing the first scene, the most conspicuous part of which is an engine house, showing where the villain lost himself. Mr. Baumer is to be congratulated on his good work. Ross Walker landed the first prize, being closely followed by Joseph Wettle.

There have been some very good windows the past week, it having been state fair week. Next week we will have the horse show.

The regular monthly meeting of the Kentucky Society of Florists will be held the evening of October 2.

Fred L. Schulz will open a wholesale cut flower house at 310 Sixth street, October 1.

Mrs. C. B. Thompson has been displaying grass growing novelties.

Jacob Schulz has been displaying some fine orchids.

F. L. S.

OBITUARY.

Paul R. Pierson.

Paul R. Pierson, father of F. R., P. M. and Lincoln Pierson, all well known throughout the horticultural world, died at his home, Tarrytown, N. Y., September 25, of pneumonia, 78 years old. Besides the three sons named above, Mr. Pierson leaves a widow and three daughters.

MELROSE, MASS.—C. Casey has built up a very successful business here, knowing just how to cater to the best trade of the city.

OUR Philadelphia correspondent reports a scarcity of 7-inch and 10-inch kentias in his section.

REPLYING to several correspondents we wish to state that examining committees and revised judging scales of the Chrysanthemum Society of America will be found on this page. The annual convention and exhibition will be held in connection with the great annual flower show of the Horticultural Society of Chicago at the Coliseum, November 6-12.

Hardy Cut Ferns Scarce.

Robt. Groves, the hardy cut fern man of Adams, Mass., says his business is somewhat ahead of last year at this time. He predicts a short crop of fern this year. The fronds are smaller and the prolonged dry weather has killed 50 per cent of the plants on the dry hills.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

Central Park Nursery, Topeka, Kans., submits for registration the following cannas:

Sunburst, a seedling of Souvenir de Antoine Crozy. Identical in foliage and habit with its parent. Bloom differs in that there is no yellow edging but large yellow blotches on the under side. The flower is large, bright crimson in color, and truss is rigidly upright.

Topeka, a seedling of Chas. Henderson. Foliage very heavy and glaucous, habit extremely sturdy, compact and robust. Bloom larger than Henderson, color rich crimson with distinct bright yellow shading along the lower edge of staminodia.

WM. J. STEWART, Sec'y.

The Glass Market.

As the building interests in the eastern territory are now buying more freely of hand-made window glass and thereby curtailing the available supplies in the hands of manufacturers and jobbers, prices are being firmly held on the basis of previous figures, says the New York Commercial. It is not expected that operations will be resumed in most of the hand-made glass factories until the middle of next month, and further advances in prices are likely to be made within the near future. Leading jobbers are now holding their prices at discounts of 90 and 90 and 10 per cent on all single, and from 90 to 90 and 20 per cent on all double sizes.

The American Window Glass Co., which controls the entire output of machine-made glass, still refuses to make any concessions and a strong undertone prevails in all the consuming sections of the east and central west. It is reported in the Pittsburg district that the largest manufacturers of hand-made window glass will make another attempt this winter to market their output through the medium of a general sales agency and also to limit their production materially.

Chrysanthemum Society of America.

EXAMINING COMMITTEES.

President Duckham has announced the committees to examine seedlings and sports on dates as follows: October 6, 13, 20, 27 and November 3, 10, 17 and 24, 1906. Exhibits to receive attention from the committees must in all cases be prepaid to destination and the entry fee of $2 should be forwarded to the secretary not later than Tuesday of the week preceding examination, or may accompany the blooms. Special attention is called to the rule requiring that sports to receive a certificate must pass three committees.

New York, Eugene Dailledouze, chairman, 55 and 57 West Twenty-sixth street, New York, Thos. W. Head and Wm. Turner.

Philadelphia, Pa., A. B. Cartledge, chairman, 1514 Chestnut street, John Westcott and Wm. K. Harris.

Boston, Mass., E. A. Wood, chairman, Wm. Nicholson and James Wheeler. Ship flowers to Boston Flower Market, care of John Walsh.

Cincinnati, O., R. Witterstaetter, chairman, James Allen and Wm. Jackson. Ship flowers to Jabez Elliott Flower Market, care of janitor.

Chicago, J. S. Wilson, chairman, J. B. Deamud and Geo. Wienhoeber. Ship flowers care of J. B. Deamud, 51 Wabash avenue.

SITUATIONS, WANTS, FOR SALE.

One Cent Per Word.

Cash with Adv.

Plant Advs. NOT admitted under this head,

Every paid subscriber to the AMERICAN FLORIST for the year 1906 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Situation Wanted—As fireman: experience and reference. Address JOHN WATTS, Newtown, Pa.

Situation Wanted—By a good all-around grower, capable of managing a large plant. Address Key 785, care American Florist.

Situation Wanted—By first-class orchid grower and gardener, fully up-to-date; best of references. Address Key 788, care American Florist.

Situation Wanted—Experienced man in general indoor and outdoor work is open to engagement in public or private garden; best of references. Address JOHN FABIAN, 2158 W. Kinzie St., Chicago.

Situation Wanted—First-class decorator, designer and store man; has 12 years' experience; is capable, honest and willing. Address S. W. ATLEE, 3333 32nd Ave. So., Minneapolis, Minn.

Situation Wanted—By experienced florist; grower of fine roses, carnations and 'mums; general all-around decorating and design work; good wages expected. Address W. FLORIST, 47 Broadway, Detroit, Mich.

Situation Wanted—As an assistant to a florist; Englishman, age 32, single; six years in Canada; experience inside and out; northeastern states preferred; sober and industrious. Address Key 787, care American Florist.

Situation Wanted—As foreman, by a practical grower of roses, carnations, 'mums and general stock; capable of managing a large plant; good wages expected; references O. K. Address Key 782, care American Florist.

Situation Wanted—Sales manager (practical nurseryman), desiring to make a change, would consider partnership, commission or salaried proposition; accustomed to handle by correspondence large force of agents; competent to install modern office system in retail nursery agency business. Key 775, care American Florist.

Help Wanted—One day and one night fireman; wages $12.00 per week. Address WM. DITTMANN, New Castle, Ind.

Help Wanted—A good man for roses and chrysanthemums. Inquire EMIL BUETTNER, Park Ridge, Ill.

Help Wanted—Young lady of good appearance and address in flower store. Key 789, care American Florist.

Help Wanted—Young man from 16 to 20 years of age, to learn the florist business. Apply to JOHN L. WYLAND De Haven, Pa.

Help Wanted—A first-class carnation grower. Wages $45.00 to $50.00 per month; send references. HASKELL AV FLORAL CO., Dallas, Texas.

Help Wanted—Experienced help for rose and carnation section; also general florist's work. THE GASSER CO., 234 Euclid Ave., Cleveland, O.

Help Wanted—One good nurseryman and good propagator wanted at our nurseries; good wages to right man. VAUGHAN'S SEED STORE, Chicago.

Help Wanted—At once; capable man to take charge of 20,000 feet of glass in carnations; $50.00 per month to start. J. W. DUNFORD, Clayton, Mo.

Help Wanted—A good grower for cut flowers and plants, one to take charge. Address, stating wages and references. Key 783, care American Florist.

Help Wanted—First-class salesman; must be fine designer and possess good habits; good salary to right party. Address Key 784, care American Florist.

Help Wanted—A good rose grower of steady habits. Wages $15.00 per week. Permanent position for the right party. Address Key 790, care American Florist.

Help Wanted—Thoroughly competent man for growing general greenhouse stock. Address, stating experience, references and wages desired. IOWA SEED COMPANY, Des Moines, Ia.

Help Wanted—Man to run four small greenhouses; will pay $3.50 per week, with board, room, washing and everything found; good home for the right man. Key 786, care American Florist.

Help Wanted—Sober, capable, energetic man for small greenhouse vegetables, etc., on private place. State full particulars references, age, wages, etc. Address BOX 43, Mt. Airy, O.

Help Wanted—First-class decorator and store man; only one who is thorough in all details of high-class decorating need apply. Good salary to right man. Address Key 791, care American Florist.

Help Wanted—An expert orchid grower. Must be practical and thoroughly experienced. No amateur or experimenter need apply. Address LOUIS BURK, Girard Ave. and Third St., Philadelphia, Pa.

For Sale—2 000 feet of good, heavy, 4-inch boiler flues at 8 cents per foot. Address JOSEPH LABO, Joliet, Ill.

For Sale—Nine greenhouses, dwelling house and barn, 3½ acres of ground. For particulars address P. O. Box 109, Newtown, Bucks Co., Pa.

For Sale—All the glass 10x12 double strength A, on five houses, each 20 ft. by 115 ft., for $500 as it stands. Will include sash bars and doors. BRANT & NOE FLORAL CO., W. Peterson and N. 48th Aves., Chicago.

For Sale—Worthington duplex steam pump, capacity 30-40 gal. per minute in good condition, $45.00; No. 1 receiver and fittings for pump, good as new $50.00. Dean pump for hand or steam, almost new, $20.00; 6-inch pressure regulator, used two seasons, $50.00; 2½-inch pressure regulator, $18.00. Carnation supports $15.00 per 1000; $125.00 for 10,000. JAMES W. DUNFORD, Clayton, Mo.

THE GOOD & REESE CO., Largest Rose Growers in the World, **Springfield, O.**

Welch Bros., Boston, Mass.

No more interesting event has occurred for many years than the re-establishment of the well-known firm of Welch Bros. The necessity of procuring larger and more modern facilities for the wholesale handling of flowers has for some years occupied the whole thought of this firm already established in convenient and commodious quarters. It is of especial interest to growers and retailers throughout New England, Canada and the provinces with which sections this firm transacts most of its business. For 10 years the headquarters of this concern has been at 15 Province street, but on October 1 they will open at their new and spacious store at 226 Devonshire street, centrally located on Winthrop square.

P. Welch, who is one of the best known tradesmen in this section, was the originator and founder of the celebrated firm which began business on a miniature scale October 10, 1877, at the corner of Tremont and West streets. One room was sufficiently large at the time for the amount of business commanded, but with the unceasing attention and energy shown to all details it was but a short while before the first forward step was taken. A street floor was secured at 165 Tremont street and business was transacted on a larger scale, Mr. Welch having admitted to membership in the firm his two brothers, David and Edward. The combined efforts of these three brothers, who worked with tireless devotion, never letting their personal ambitions to interfere with the interest of the firm, early resulted in developing a lucrative business. In 1892 the store at 2 Beacon street was secured, for after four years' occupancy the former quarters were too congested.

Still another forward step was ventured and in a short while the Province street building was leased and in the minds of the proprietors this location would serve for all time. Ample space was at hand and departments were laid out to facilitate the details of the enormous business which had by this time developed. This site was conveniently located and of easy access adjacent to that well known hostelry, the Parker house, and within a stone's throw of the Boston city hall. Two entrances, one on Province street and the other on Chapman place, were of great advantage, as at times wagons had to wait their turn at loading and unloading.

At first it was intended to confine the business to cut flowers alone, but the necessity of providing their customers with a full line of florists' stock, they became engaged in the dry and hardy supply branch, which now has grown to mammoth proportions. The new store on Winthrop square is admirably located, being equally distant from both the north union and south union stations, and in the immediate vicinity of all express offices.

For years the handling of a grower's flowers has been the object of the deepest thought of the firm and no expense has been spared or no detail has been neglected in making this establishment ideal throughout. Every facility known to be of advantage has been installed and complete harmony is the aim of the house. The paramount idea is to return to the growers as much for their stock as is reasonable to ask, the basis always being "the market price." For the caring of a surplus stock a suitable storage room must be ready for immediate use. For this purpose a mammoth cold storage system has been installed for the protection of stock remaining unsold. This room occupies over 1,500 square feet and in comparison is more space than the whole establishment occupied at Province street. The power for furnishing the cold air will be supplied by a dynamo located in the basement of the building and so thoroughly have all the details of this innovation been studied that this advanced idea will mark an epoch in the flower business. The total floor space to be occupied is 15,000 square feet, making ample room for customers to inspect and purchase stock.

Established for almost a third of a century, this enterprising and always growing firm, whose motto from the beginning has been "Strict and prompt attention to business, civility to customers and financial promptness," will continue under the proprietors' personal direction. Although the flower trade has changed wonderfully since their advent into business they have always kept well in advance of the modern ideas. The commission man was not at first in existence, but times have changed so that today he is the recognized medium standing between the grower and retailer, and among the firms of the country no other is better known than that of Welch Bros'. City Hall Market. B.

Beverly, Mass.

Nursery trade bids fair for this autumn along the north shore, there being several new places to be planted. Some of the work has already been given out.

H. C. Frick's new place is just about completed and is one of the prettiest on the north shore.

Sam'l Scott, the gardener who laid out the grounds and did the planting at "Swiftmoor" and who has been absent from there for three years, returned to Mrs. E. C. Swift last May and has laid out some new gardens. He is doing a great deal of planting this fall. "Swiftmoor" is famous for its rhododendrons.

BUSINESS GOOD.

Trade conditions showed an astonishing improvement the past week with large quantities of stock daily arriving and disappearing to the tune of good prices and cool weather. The entire aspect of the market has changed; the stores are filled with buyers and clerks are busy with shipping orders of all kinds, packing and unpacking and shouting orders to the waiting bookkeeper. The scene is one of rejuvenated business, life and action,—in striking contrast to the extreme sluggishness that has characterized business all summer. Cool weather found this city early in the week with an excess of supplies and few orders, either local or shipping, but under its benefitting influence, stock of all kinds shortened up, prices became firm and a model condition generally prevailed. American Beauty has held the center of the stage for some time. Any quantity of exceptionally fine material is to be had at normal prices. No single house seems to have the better of its neighbor so far as quality and amount of sales are concerned. Liberty, Chatenay, Bride and Bridesmaid, and all other standard roses are at a premium, the supply being very limited. Most of the stock is fairly good with the exception of Bridesmaid. There has been a dearth of good Bridesmaid this season and the condition has not altered now. Outdoor carnations also, are disappointing, as the flowers are small, soft and in no condition to ship. Heavy rains are responsible for this. The supply of asters has shortened considerably, and, while the quality is not of the best, some good sales are made. Everything considered, however, the market shows excellent promise and wholesalers are looking forward to a good week.

NOTES.

The executive committee of the Horticultural Society of Chicago held a prolonged meeting September 24, at which much routine work was done in connection with the forthcoming show, which is to be held at the Coliseum November 6-12, in connection with the annual convention of the Chrysanthemum Society of America. A meeting of all who are interested in the show will be held at the Union restaurant, Monday evening at 7 o'clock, when some important announcements will be made. All horticulturists and florists are invited.

P. J. Hauswirth furnished the decorations for the Fairbanks banquet at the Auditorium last week. There were seven tables including that of the speakers, all of which held a vase of carnations, ferns and Richmond roses for each plate. Each table was adorned with two large vases of asters and gladioli with the exception of the speakers' table which had seven center pieces made with these flowers.

The E. F. Winterson Co. is making several important changes in the arrangement of its store. The office has been removed to the opposite side of the room and the wire department has taken its place. Ed. Winterson now has his desk where the fern table formerly stood. John Degnan has charge of the office.

The reconstruction germ seems to have been turned loose in the Flower Growers' Market. Vaughan & Sperry are contemplating the erection of a partition to separate their office from the stock room, while John Sinner, thinking of cold days to come, has decided to do likewise.

E. C. Amling is considering the advisability of changing the arrangement of his store, but owing to the peculiar lay-out of his rooms, finds it a difficult problem. He desires to use the front entrance for transporting stock to and from the street without interfering with the office.

Fine American Beauty seems quite plentiful in the market this week. J. A. Budlong, Poehlmann Bros., Bassett & Washburn, Peter Reinberg, and Scheiden & Shoos are all handling exceptionally good stocks and it would be hard to say which has the best.

Reports from Niles Center indicate that the surrounding country is again a victim of the weather. This time, however, it is excessive rains that have practically ruined outdoor stock. Carnation crops in particular have suffered.

A considerable delegation will attend the Springfield meeting of the Illinois State Florists' Association October 4, leaving this city Wednesday night, October 3, on the Alton railroad at 11:43. The fare for the round trip is $4.

A. L. Randall returned from his Michigan fruit farm September 28. The company is receiving a large quantity of florists' supplies which Miss Tonner purchased on her recent trip to Europe.

The marriage of Otto Goerisch, of A. L. Randall's, to Miss Lillian Giggel is announced for October 10. The ceremony will be performed in the home of the bride.

The E. F. Winterson Co. is receiving daily shipments of violets from eastern growers. The firm handled 2700 of these flowers during the past week.

Sinner Bros. are handling a fine stock of Bride and Bridesmaid roses this week. As good Bridesmaid is scarce, they are having a fine run on them.

John S. Seele, of Benton Harbor, Mich., spent a few days in the city last week. He has purchased a range of greenhouses at St. Joseph.

The Geo. Wittbold Co. is building a cement storage house at the Edgebrook establishment for the preservation of stock during the winter.

Hugo Schroeter, of Detroit, Mich., spent several days in the city last week purchasing stock for a new flower store in Detroit.

C. W. McKellar says the orchid market shows a decided improvement. He is handling a large and fine stock of cattleyas.

Benj. Hammond, the well known insecticide man of Fishkill-on-Hudson, N. Y., expects to pay us a visit next week.

Miss Wolf, of the J. A. Budlong Co., left the city several days ago for a two week's trip to Colorado.

The Chicago Rose Co. is cutting heavily of choice Killarney. It is good clean stock and sells readily.

Jacob Russler, near Mt. Olivet, is reported in financial difficulties.

Visitors: Thos. Chapman, Denver, Col., returning from the east; Albert T. Hay, Springfield; B. Juerjens, Peoria; Mr. Howard, of Howard & Smith, Los Angeles, Cal., returning from Europe; Mr. Eggling, of the Eggling Floral Co., St. Louis, Mo.; Hugo Schroeter, Detroit, Mich.

Illinois State Florists' Association.

There will be a meeting of the executive committee of the Illinois State Florists' Association October 4 at 2 p. m., in the Doze building at the state fair grounds, to discuss matters of interest to the society. All florists are cordially invited to attend.

MILWAUKEE, WIS.—John Laberos, a Greek, was arrested here recently on complaint of Frank Ganros, his employer, who alleges that the former embezzled money belonging to the firm.

DUBUQUE, IA.—The second annual flower show of the local humane society opened September 13 in Temple hall, and hundreds availed themselves of the opportunity to view the exhibit. The show, however, was not a financial success.

TIPTON, IA.—The Rev. J. K. Shiffer, of the Tipton Greenhouses, has added a large house to his establishment owing to the increase of business. The houses are all planted and some fine roses are being cut. The carnations are in fine shape. A wholesale as well as retail business will be carried on hereafter. Thos. W. Patterson is the efficient grower in charge.

TRADE FAIR.

There has been quite a move in American Beauty, the demand keeping the market bare the past week. Prices have stiffened in consequence, the medium sizes, for which there has been the greater call, being the most affected. Prices range from $1 to $3 per dozen. Other varieties sell fairly well, $6 being about high for special teas. Carnations are improving rapidly and some very nice flowers are seen in white and Prosperity, $2 being about high for the specials. Dahlias are still in first place for quantity, all growers apparently working overtime in harvesting their crops. The quality is fine. Here is a pointer for them. Let all local growers get together and decide on about 15 of their best varieties and have these in such quantities that their trade can depend on them for a supply. The market list now comprises innumerable kinds, many of which, when orders are taken for the next day in the stores, cannot then be duplicated, as they are not to be found in that day's shipments. Many of the flowers are cut long-stemmed, a great surplus of buds and foliage making them very bulky. Much of this has at times to be cut away to show the flower to advantage. Such flowers do not keep nearly as well, the soft foliage buds wilting easily, thus detracting instead of adding to the effect. Herman Zimmer, of Collingswood, N. J., who grows dahlias in quantity, says he always breaks out the first flower, the two or three surrounding buds giving him much better results when they come in.

THE MARKET COMPANY.

At a meeting of the stockholders of the Philadelphia Wholesale Market Co., held in Horticultural hall, September 25, it was unanimously resolved to liquidate and go out of business, Saturday, September 29 will be the last day that flowers will be received on commission. The market building will be occupied by its present tenants and stockholders until July 1, 1907, at which time the lease terminates. It is thought that the assets of the company will be quite sufficient to repay the capitals advanced by the stockholders, one-third of this to be paid at once, another third in a short time and the balance when the concern is finally wound up.

Chas. Meehan enters the firm of the S. S. Pennock, Meehan Co. October 1, taking nearly all the consignees of the market company with him. It is said that the present stockholders and tenants of the market may hold together at the end of the lease of the present building, and continue to do business together either there or in another central location.

NOTES.

W. K. Harris is making a great hit with his "lucky clover." Noticing one of his varieties of shamrock that carried a great proportion of its leaves in the much desired cluster of four to a stem, he propagated and worked up quite a stock and they are now selling like American Beauty roses at Christmas time. Score one more for William K.

Thos. M. Fitzgerald, Beaver, Pa., was doing this city the past week. Wm. C. Harry, of the Sign of the Rose Flower Shop, who worked for Mr. Fitzgerald in Beaver, piloted him around. Mr. Fitzgerald was much pleased with the retail stores and the great facilities of the wholesale commission houses and dealers in florists' supplies.

John McIntire, who was to open his wholesale cut flower business at the market, thought he would not have room enough and has rented the premises at 1601 Ranstead street, right in the heart of the city, close to the depots and express offices. He expects to open October 1.

The Robt. Craig Co. will be right in it with their gardenias for the next month or two. Two houses planted out on tables left over from last season are thickly set with buds. The plants are blooming nicely now and the flowers find a ready sale for the early fall weddings.

H. Bayersdorfer & Co. are pushing forward the work on their new Arch street store and factory and hope soon to be able to occupy a part of it. They say they were never so busy at this season of the year before.

Look out for kentias. Almost all of the palm growers in this city are sold out of the 7-inch to 10-inch pot sizes in finished plants. There is plenty coming on but stock for immediate use is not in sight hereabouts.

Paul Klingspoon, late of the Rosery Flower Shop, is now with Wm. McKissick, where he will work up the city store trade.

The first single violets were seen at S. S. Pennock's September 20. They were nice flowers for the season.

K.

Boston.

SLIGHT IMPROVEMENT IN TRADE.

There has been a slight improvement in the general trade the past week. The weather is altogether too pleasant for the wealthy to leave their country places for the city. The extreme drought of the past three weeks has been relieved by two heavy falls of rain. Frost has yet to be seen; however, outdoor stock is becoming less prominent and the demand for indoor stock is growing rapidly. Roses, carnations, violets, and lily of the valley are the chief factors in the cut-flower market, with the supply unlimited. Asters are of inferior grade. American Beauty roses are plentiful and in general they are very satisfactory to the purchasers. For extra fine roses with the usual lengthy stems there is as yet no demand. Very few good carnations are seen. A good supply of remarkably fine violets, considering the earliness of the season and the very unfavorable weather for the successful growing of these flowers, has attracted great attention and numerous worthy comments.

NOTES.

Wm. Sim has entered the market with his annual large supply of Princess of Wales violets. Although the weather has been contrary to that for ideal cultivating of this flower this able producer has succeeded in turning a crop several weeks in advance of the usual violet season, and what is more remarkable the blooms are excellent.

Sidney Hoffman has on hand at his greenhouses at Mt. Auburn a large stock of Begonia Gloire de Lorraine now ready for the market, being much in advance of the usual season. The plants are excellent specimens in 8 inch pans, with good foliage and abundantly supplied with blooms.

J. W. Newman & Sons have secured the store at 24 Tremont street, within a block of their present location. They expect to be established by October 1. The interior is being modeled with great taste and when completed will be one of the best examples of a retail flower store.

Henry Penn, the successful young florist of Bromfield street, purchased at an auction the other day a pair of magnificent chestnut horses. They have been in use at the fire-fighting exhibition at Wonderland park all summer. The price paid for the steeds was $600.

Wm. Nicholson is expected home from his European trip this week, arriving on the S. S. Ivernia of the Cunard line. From reports received he is greatly improved in health and has enjoyed his journey immensely.

Welch Bros. have added to their large list of consignors W. J. Dana, of Wellesley Hills. The stock grown at this establishment consists of roses, carnations and string smilax, of which a specialty is made.

The J. A. Budlong & Sons Co. are now cutting an excellent grade of Mme. Chatenay roses, among the most popular on the market. Their output this season is expected to be a record breaker.

At the Tremont street store of the Thos. F. Galvin Co. may be seen an excellent window display of selected orchids, a feast to the eyes of lovers of rarities.

B.

Massachusetts Horticultural Society.

At the chrysanthemum show of the Massachusetts Horticultural Society to be held at Horticultural hall, Boston, November 2-4, special prizes will be offered for the best decorated dinner table, laid for six covers, for the second and third days of the exhibition (Saturday and Sunday); three prizes, first, $75 and a silver gilt medal; second, $50 and a silver medal; third $35 and a bronze medal.

The judges are to be three ladies appointed by the committee on prizes and exhibitions. Tables will be furnished by the society, but all table supplies must be provided by the exhibitors. Entries must be made at least one week previous to the opening of the exhibition.

WEST NEWTON, MASS.—Wm. Folsom has had plans drawn for a greenhouse on Webster street.

DUNKIRK, N. Y.—Jacob Van Akkeren is rebuilding his old greenhouses and making some additions, which when completed, will make the place an up-to-date one and for its size one of the best appointed in the city. The changes will give Mr. Van Akkeren 5,000 feet of glass, with office, boiler room and work room, and he considers the place quite large enough to handle his share of the retail trade.

COOL WEATHER HELPS TRADE.

The cool weather starting in at the first of the week has had a beneficial effect on the market. Tuesday saw light shipments all around, and a readjustment of values which gave some tone to the general buying. Roses have improved somewhat in quality, but the general run of arrivals is still poor. In the short grades the quality is particularly poor, small heads with strong stems or large heads with weak stems preponderating, of no use for anything but made-up work. Richmond is particularly noticeable in this respect, and Bridesmaid closely follows. In pink roses Killarney brings prices two points above maximum in the fancy and special grades, but No. 1 and lower are hard to move at any price. Bride roses continue scarce and the quality of most arrivals is very much off. American Beauty sells well, particularly in the smaller grades. Top grades are not very plentiful, although this fact does not seem to enhance their value very much. Carnations are becoming more plentiful, and fairly long stemmed stock is appearing. Arrivals meet a pretty good demand and cleaning up is quite easy. White varieties, however, are rather sparse in supply. Everybody has dahlias in almost countless varieties. The finer sorts seem to bring good prices, and when the coarser cannot be used for specific purposes the ash barrel is well supplied. Lily of the valley sells well and some really fine stock is arriving. Lilies hold their own at quoted prices. Cosmos is taken pretty freely, although prices do not run much higher than five cents a bunch. Asters are nearing the end, and late arrivals are naturally more sought for. Another week will probably see their finish. Chrysanthemums are becoming general arrivals, and sell well, yellow varieties being most in demand. Gladioli are about finished. A few of the very late kinds are still to be had, but are not very attractive.

The Market, September 26. — The market has improved somewhat today on account of light arrivals.

NOTES.

H. J. Hoffmeir last week furnished a handsome wreath for Col. Sir Howard Vincent, which the colonel placed on General Grant's tomb in the name of King Edward. The colonel is commander of the English regiment sending a shooting team here, and which is now being entertained by the Seventh regiment. Mr. Hoffmeir also furnished the decorations for the large banquet given the visitor on Tuesday.

John P. Scherer, the dealer in florists' supplies of Union Hill, N. J., has just purchased 500 acres of land in Mester county, from which he will get his supplies of laurel, hemlock, oak, and maple branches, Christmas trees, and ferns. He has already a crew of pickers on the place, and is showing some splendid stock.

Chas. Millang has leased the store at 45 West Twenty-ninth street, opposite his present location, and will operate it as an annex. In a few days it will be filled with a heavy consignment of box trees, and other evergreens, as well as a variety of plants from local sources.

The private collection of orchids of G. L. Montgomery of Staten Island, who died recently, is to be sold at auction at Elliott's, October 2. Mr. Montgomery was well known as an orchid enthusiast, and his collection is one of the best in the country.

James Hart says that L. Allen, who claimed to have established himself in the wholesale business at 103 W. Twenty-eighth street, Mr. Hart's quarters, was there only by courtesy until he could locate elsewhere.

Chas. Smith, of Woodside, has completed a large new greenhouse on his newly acquired Bound Brook property, and is planting it with carnations.

John Scott, of Flatbush, is planning to build three more greenhouses this fall, and to extend the greenhouses recently acquired from J. H. Kemper.

W. C. Duncan, formerly of Astoria, has taken over the Courtney place at Sparkill, and is operating it.

Alex J. Guttman is receiving some fine American Beauty roses from the Summit greenhouses.

The store of Joseph Leikens, Thirty-third street, near Fifth avenue, has been reopened.

Visitor: John H. O'Reilly, of Thos. F. Galvin's, Boston, Mass.

Washington.

HOT WEATHER RETARDS BUSINESS.

Business continues to improve, though on account of very warm weather it is not what should be expected at this time. There is an improvement in the quality of stock, but that too, has been retarded by weather conditions. Young rose stock is in good condition. Carnations, on the other hand are backward and it is evident that the excessively wet weather of August caused much damage in the fields. Both single and double violets, from local growers, have appeared, and considering the weather, they are very fair. Dahlias are now on the market in abundance and of better quality than last week's offerings. Water lilies are also to be seen in considerable quantities.

NOTES.

C. Ponnet has recently returned from his European trip. He was accompanied by Mrs. Ponnet and most of their time was spent in France and Belgium. They were most favorably impressed with horticultural conditions in both countries. In addition to the thriving commercial features, they were charmed by the fine displays of roses and other flowers, seen in private gardens. Both Mr. and Mrs. Ponnet being natives of France, revisiting the scenes of their youth was not the least of the pleasures of their trip.

The Washington Florists' Co. have completed another large addition to their already extensive range. Both the Richmond and Killarney roses are now being grown on this place. In this connection it may be stated that Richmond is, as has been predicted, displacing Liberty and other red roses. Furthermore, it looks as though Killarney will soon be crowding Bridesmaid.

Grillbortzer Bros., who this year have gone into rose growing, are showing fine stock of Bride, Bridesmaid, Golden Gate, Richmond and Killarney. The last named, in particular, is with them making fine growth. In addition to their large stock of roses they are keeping well up in carnations and chrysanthemums. Their grower, Oscar H. Frommett, evidently understands his business.

Z. D. Blackistone has just received a large consignment of palms, ferns and foliage plants and has opened the season with a palm sale. He was of the number who accepted the hospitality of the R. Vincent, Jr., & Son, of White Marsh, Md., and speaks highly of their dahlias.

During the summer nearly all the retailers have been renovating, painting, etc., and begin the season with their stores in spick and span condition.

Theo. Deidrich is on time with his fine violets. Mr. Deidrich does not attempt to grow everything but all he does grow is good.

The Pierce Bros. have this year established quite a reputation with the fine quality of their dahlias.

S. E.

MERIDEN, CONN.—R. W. Barrow is building a new greenhouse under about 25,000 feet of glass. This will be the largest greenhouse in the city and one of the largest in the state.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

BEAN prices are expected to make a new low record price this fall.

SEED CORN, both sweet and field, seems to be maturing under almost ideal conditions.

J. E. NORTHRUP is slowly mending from his recent surgical operation. He should be out of the hospital in a couple of weeks.

ONION SETS at Chicago are now quoted at from $1 to $1.10 for reds and yellows at first hands in car lots; whites scarce; market scarcely fixed.

MRS. E. V. HALLOCH, of Queens, N. Y., who has been visiting friends in Chicago and vicinity since the Dayton convention, returned to the east September 24.

IN the list of committees of the American Seed Trade Association, printed in last week's issue, the names of Carl Cropp and W. Atlee Burpee should be added to the committee on seed adulteration.

ALFRED EMERICH, representing Vilmorin-Andrieux & Co., Paris, France, arrived in New York early last week on his usual business trip through the United States and Canada. His New York address will be care of H. Frank Darrow, 26 Barclay street.

Tulip Prices.

Reports from Holland show that there has been an extraordinay rise in prices since the commencement of the season. We therefore strongly advise caution in making quotations, as it is now impossible to procure stock of the leading sorts at ordinary figures, so that all quotations should be marked, "as far as unsold," or subject to fluctuation of the market. We hope that this rise may be taken as a sign that commercial horticulture is about to partake of the improvement in trade which is making itself felt in other industries.—Horticultural Advertiser, published in England.

Erfurt Seed Crops.

Although reports have been coming from all sides about great heat and drought, says a correspondent of the Horticultural Trade Journal, September 12, 1906, we have had moist and cool weather all the time, so that the ground lost earlier in the season has not been made up.

5,400 ACRES OF GARDEN SEEDS IN CULTIVATION.

Braslan Seed Growers Co.

WHOLESALE SEED GROWERS.

SAN JOSE, CALIFORNIA.

Peas, especially wrinkled ones, will want a good deal of picking, and some disease has appeared among the lettuces. Mangels are also unsatisfactory, but onions, leeks, cabbages, swedes, etc., are good, and carrots very good. Beans are much behind, but look all right up to date.

As regards flower seeds, the situation has not altered much relatively. Our hopes for a warm August were not fulfilled, and so the later flowering annuals have to be marked with a note of interrogation. It is too late for sweet peas to recover, for if they fail to set at the right time they won't do it afterwards. Asters are thin in places, but a warm autumn will help the crop considerably. We have now had a few sunny days so that our hopes rise with the thermometer.

Among Boston Seedsmen.

One of the most important happenings of the week concerning the trade was the opening of the H. E. Fiske Seed Company's store, which occurred September 19, 1906. The company occupies 12 and 13 Faneuil hall square, directly opposite Faneuil hall and formerly occupied for many years by the W. W. Rawson Co. The location is one of the best in the city, being situated in the heart of the business section and controlling an extensive trade. The building has been entirely remodeled, all the latest improvements being installed throughout. The light and air are especially good. The offices are located on the balcony of the ground floor and command an excellent view of the entire floor space. The fixtures are modern and up-to-date and were made and installed under the personal supervision of Mr. Fiske. They represent much time and thought on his part. Heller's mice-proof seed cases are used throughout, also patent double swivel seed and bulb bins. The seed boxes, containing packages of seeds for the retail trade, are the most practical and simple in the city. The show windows are also worthy of mention, presenting a beautiful sight when the electric lights are turned on in the evening. On the opening day the store resembled an extensive flower garden, several large floral gifts being sent to Mr. Fiske, showing his popularity in the trade as well as with the public. Although this firm is entirely new, Mr. Fiske has been connected with the trade since boyhood. He spent 17 years with W. W. Rawson & Co., acting in the capacity of manager for 12 years. The bulb catalogue of the firm is now ready for delivery and is quite attractive.

O. H. Dodds, of the Thos. Emerson Co. is making his annual trip through the provinces, booking all early spring orders. Stephen W. Smith of the same firm is spending a two weeks' vacation in Maine and writes us he is "making good" in the line of hunting and fishing.

The R. & J. Farquhar Co. showed some fine L. Philippensis lilies in their store the past week.

The Schlegel Fottler Co. have a very fine dahlia exhibition in their show window.

The fall trade shows a tendency to be backward, yet many of the houses report an increase in early orders over former years.

Owing to the continual dry weather the fall trade in grass seeds has fallen off considerably.

The employes of the Schlegel Fottler Co. have arranged to play a ball game with the employes of Joseph Breck & Sons to take place September 29 for the championship of the trade league, the honors now being in the possession of the former. The outcome of the game is looked forward to with great interest, as considerable rivalry exists between the two teams. F.

The New English Corruption Act.

The following, from the Horticultural Advertiser of September 12, is interesting reading for seedsmen doing a private garden trade:

One or two correspondents have been asking what will be the position of nurserymen and seedsmen under the new act for "the better prevention of corruption," which is now practically passed, and will probably come into force next January.

The principal clause with which we are concerned runs as follows:

"If any person corruptly gives or agrees to give or offers any gift or consideration to any agent as an inducement or reward for doing or forbearing to do, or for having after the passing of this act done or forborne, to do, any act in relation to his principal's affairs or business, or for showing or forbearing to show favor or disfavor to any person in relation to his principal's affairs or business; or"

* * * * * * *

The penalties are imprisonment with or without hard labor up to two years, or a fine up to £500.

It will be observed that the stringency of the bill, as first drafted by the late Chief Justice Fry, has been left unmodified as regards the penalties, but on the other hand the whole character and effect of the act has been radically changed by the insertion of the one word "corruptly." Under the act, as first drafted, any nurseryman or seedsman giving to a gardener or bailiff even the most trifling tip or present, would have been liable to all the pains and penalties enumerated in it. The situation is, however, entirely altered by the inclusion of this one important word, which will render it incumbent upon the prosecution to show not only that the gift or consideration was offered or taken, but also that it was given "corruptly." This, we take it, would involve the proving that the gift was given with the object of inducing the receiver to do something prejudicial to his employer's interests.

In our opinion this new law will not affect the majority of the trade in any way, but will practically leave things pretty much where they are. The ordinary gardener's discount given by almost every firm in the country, and sanctioned by nearly a century of usage, is not a bribe in any sense of the term, and we do not think any judge or jury would so regard it. It is merely an annual present intended to promote a pleasant feeling between the parties, and to induce the gardener to make the very best he possibly can of the goods supplied, in order to promote the reputation and consequently increase the business of the seller.

This opinion does not, however, cover the whole ground, as it is notorious that certain firms, which are a standing discredit to our trade, entirely disregard the general custom of the trade, and practically buy their business; the discount given being simply a question of how much it takes to induce a gardener to leave his old source of supply and trade with them.

Now, it is a well known fact that the margin of profit in almost all sections of our business is a very small

one, and that the discount usually given is fully as much as can be honestly afforded; and, to put it plainly, when larger sums are given it can only be by charging higher prices, and consequently robbing the employer to bribe his servant. This may sound somewhat brutally frank, but it is a plain statement of fact, which cannot be controverted.

We have not yet had the advantage of a reliable legal opinion upon the proposed act, but there is very little doubt in our own mind the "10 to 25 percenters" will shortly find themselves in a very precarious position, and that the first case of this kind which comes into court will be held to be "corrupt" within the meaning and intention of the act, and heavy fine or imprisonment follow. Our sympathy will certainly not be with the offenders, and we should be only too pleased to see a few of these gentry with their hair cropped at his majesty's expense, and a check thus put to a growing evil which threatens to make it difficult for an honest firm to do business in many quarters.

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester N. Y., Sec'y.
Thirty-second annual convention, Detroit, Mich., June, 1907.

THE executive committee of the American Civic Association has decided upon October 24-26 as the dates on which will be held the annual convention which is to meet in Milwaukee, Wis., this year.

OGDEN, UTAH.—After the union depot grounds have heen graded, landscape gardeners and engineers will be employed to lay out the walks, flower beds and plant shrubbery. The lawn will be seeded this fall.

ROCHESTER, N. Y.—Ellwanger & Barry were awarded 72 first prizes for their fruit exhibit at the New York state fair held in Syracuse. They also received 50 other prizes, making a grand total of 122 for the season of 1906.

American Pomological Society.

The Kansas City meeting of this great national society was one of the most notable of its history. It was held in the heart of the rapidly-developing middle west, and was attended by a representative gathering of noted pomologists from all parts of the country. It follows that an interesting and valuable report is the result. This report was distributed to all members in good standing by Secretary John Craig, of Ithaca, N. Y., early in September. It is available to all who become members of the organization. It is made up of three principal divisions. First, a record of the papers presented and discussions which followed during the three days' sessions. Second, a valuable chapter giving the horticultural history of six of the states of the southwest—absolutely new historical data. Third, the reports of the standing committees of the society, including one on inspection of apples; one on score-card judging; and the exceedingly comprehensive report of the general fruit committee which authoritatively depicts the condition of the fruit industry in all its phases in every state in the union as well as the newer dependencies and the provinces of Canada. Membership in this national society is open to amateur and professional fruit growers alike. The president is L. A. Goodman, Kansas City, Mo.; treasurer, L. R. Taft, Agricultural College, Mich.; secretary, John Craig, Ithaca, N. Y.

York, Neb.

The Harrison Nursery Co. has recently enlarged its plant by purchasing over 100 acres of land. This firm reports a large business in spite of a remarkably hot and dry summer.

C. S. Harrison's Select Nursery is meeting with a heavy demand for peories and perennials. Mr. Harrison has made arrangements with Frank Brown, of Paynesville, Minn., for a branch nursery to supply the demand arising in that state. Mr. Brown has planted several thousand peonies besides ornamental shrubs and evergreens. The Norway poplar is reported as doing well at the Select Nursery, spring cuttings having made remarkable growth in spite of the light rainfall of the season.

The Niobe weeping willow, an introduction of Prof. Hansen, is being grown at the experiment station here. It is the pendulous form of the Russian golden willow. It is very hardy and will make a fine lining for streams and ponds. C. S. H.

Kansas City.

Frank Oliver, a fruit grower near Moscow, Mo., died of heart disease September 16.

Great quantities of peaches in the vicinity of Kansas City have decayed on the ground. The owners say that on account of the very low market price it does not pay to pick them.

At the recent meeting of the Ozark Fruit Growers' Association, arrangements were made to ship a train-load of Ben Davis apples to Scotland. According to plans the shipment is scheduled to leave New York for Glasgow September 28. The cars are to be loaded in Arkansas and southern Missouri towns by individual growers. The chief object is to test the export market with the old Ben Davis. K. C.

MEMPHIS, TENN.—Mrs. Lizzie Gibson has filed suit for $5,000 damages against the Memphis Floral Co. and Clarence P. Hune. She claims that while in the company's place of business a water pipe fell from the ceiling and struck her husband on the head, causing injuries from which he died a short time later.

MABELLE, New Pink Carnation for 1907.

Color—A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson Unlike most pinks, the brightest sun does not injure the color. Size—3 to 4 inches in diameter when established. Odor—Pleasing, but not strong. Stems—Invariably strong, but always graceful, ranging from 12 to 30 inches during the season. Habit, etc.—A very quick, active grower, making specimen plants in a short time, even from late cuttings. On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start. Productiveness—Prodigious is the best word we know of to use here. It is the most incessant bloomer, early and late, we have ever grown. Stock limited. Delivery January 5 to 10 and later. Price, $12.00 per 100, $100.00 per 1000.

Araucaria Excelsa

The Best of All Decorative Plants Nature Produces

OUR SPECIALTY.

Every man in business and life to be successful must adopt one thing as his specialty, and that specialty, whatever be select, of whatever nature it may be, he must guard, study and push to such an extent that it not only benefits himself, but he must conduct it so that everyone who seeks his aid, service or his article, which he advertises or practices, will share a slice of his activity and prosperity. I made the importation and cultivation of Araucarias as a special study in my life. The figures below will show my success in business: In the first year I commenced with an importation of 250. In the eleventh year now, 1906, my importations have grown up to 6,000 (come and see it), and on account of the Araucaria growing yearly more in favor by the plant consuming people all over the country, as a much admired decorative plant for the parlor, bed, dining and sitting room, stores, hotels, lawns and porches the outlook will be for an importation at least of 8,000 to 10,000 in spring of 1907. To secure this vast amount for 1907 I am now on the ocean, per steamer New Amsterdam, leaving Hoboken Aug. 15, striking for Belgium, making contract for next year, 1907. I also shall at the same time bring over with me a large lot of choice Azalea Indica and Palms, etc., for Christmas and Easter flowering. No money will be spared in obtaining for my customers the cream of the Belgium greenhouses only.

Please note lowest prices now going on for August and September:

Araucaria Excelsa.

12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old.$ .50
12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old. .60
16 to 18 in. high, 5½ to 6 in. pots, 3 to 4 trs., 3 yr. old ..... .75
18 to 20 in. high, 6-in. pots, 5 to 6 trs., 4 yr. old.. 1.00
20 to 24 in. high, 6-in. pots 5 to 6 trs., 4 yr. old.. 1,25
36 to 50 in. specimen, 7-in pots, 6 yr. old, $2.50 to 3.00

Araucaria Compacta Robusta, have 1000 of them, never were so nice as this year. Plants are as broad as long from 12 to 20 in. in height, 3 to 4 perfect tiers, 20 to 30 in. wide across from one tip of tiers to the other, 3, 4 and 5 years old, 6 to 7-in. pots $1.25, $1.50, $1.75, $2.00, up to $3.00 each.

Araucaria Excelsa Glauca, are perfect jewels in shape and size; their beautiful green-blue tiers make them of such a striking appearance that everybody seeing them must fall in love with them on sight, and cannot help it. Plants, 6 to 7 in. pots, 3, 4 and 5 perfect tiers, 15 to 25 in. in height, from 15 to 30 in. across, $1.25 $1.50, $1.75, $2.00 to $2 50 each.

Please bear in mind these mentioned varieties are the cream of Belgium importations. We have thousands of them: can meet all demands.

Kentia Forsteriana, 6-in. pots, 35 to 40 in. high, 5 to 6 leaves, 4 years old, $1.25 to $1.50; 30 to 35 in. high, 4 years old, 6 in. pots, $1.00; 5½-in. pots, 25 to 30 in. high, 3 years old, 75c; 4-in. pots, made up with three plants, 18 to 20 in. high, 25 to 30c. **Belmoreana,** 6 in. pots, 4 years old, 5 to 6 leaves, bushy, 30 to 35 in. high, $1.25; 5½ to 6 in. pots, 3 years old, 5 to 6 leaves, 75c to $1.00 each. Above are the sizes entered in the custom house. **Kentia Forsteriana,** 7-in. pots, made up plants, on elarge in center, three smaller sizes, about 22 to 24 in. high, price $2.00 each.

OUR LITTLE PETS.

By Aschmann, in Philadelphia, I bought
An Araucaria, a pet for our little girl—
Now we have two pets, the pride of our thought,
The little girl so sweet a head full of curls,
And the Araucaria with their everlasting green—
A more joyful home you never have seen.

Nephrolepis Barrowsii, 6-in., large, ready for 7-8 in, 50c; 4-in., large, 25c.

THE MARKET.

Trade the past week has been all that can be expected at this time of the year, with the weather as hot as it has been. Stock of good quality is cleaned up every day, but the quantity of short-stemmed carnations, that are coming in at this time, is hard to move, as it is good for nothing but funeral work. This means that the street fakir cleans up the left-overs. The quality of roses is on the incline, and with a little cool weather, which must soon come, will be larger and in good demand.

NOTES.

James Eadie will, in a short time, move from his present location in the Lenox building, on Erie street, to a much finer store in the same building on the Euclid avenue side, directly opposite the J. M. Gasser Co.

Henry Robinson, one of Akron's wealthiest business men, died the past week and the demand for good flowers was keenly felt in this city.

On September 17 the Florists' Club was entertained by H. A. Hart. A pleasant evening was enjoyed at cards.

C. B. Wilhelmy, the west side florist, is sporting a fine new touring car.

Simon Anderson is sending in some fine carnations from new plants.

OHIO.

Madison, N. J.

The Morris County Gardeners' and Florists' Society held its regular meeting September 12, the first since last June when the society adjourned for the summer. There were 26 members present. The monthly exhibit was not large but was nevertheless excellent. J. Heeremans showed onions Ailsa Craig and Magnum Bonum, and a grand lot they were in size and finish, especially the Ailsa Craig. Mr. Heeremans was awarded a cultural certificate. He also had four varieties of Hohenzollern asters, all fine, and was accorded honorable mention for the same. E. Reagan had several vases of Thompson's Celosia magnifica in variety and Dahlia Mrs. Theodore Roosevelt, both of which received honorable mention. Flower show preparations took up considerable time. Two new members were elected. Alex. J. Guttman gave a vivid description of the Dayton convention. President Heeremans will tell of his trip abroad at the next meeting. E. R.

Albany, N. Y.

With the advent of autumn business is rapidly improving and the local florists have become quite busy.

A notable funeral the past week was that of Col. William E. Fitch, a member of the G. A. R. and a prominent Mason. H. G. Eyres had orders for six pieces for his funeral. Among them was a large standing wreath of American Beauty roses. Cyrus Temple, Nobles of the Mystic Shrine, contributed a handsome wreath of Bride roses. Post L. O. Morris, G. A. R., of which the deceased had been a member, sent a large wreath of Bridesmaid roses and asters. Before being sent to the house the pieces were for a short time on exhibition in Eyres' show window and attracted favorable comment. R. D.

Tacoma, Wash.

Business in this city continues good, with a fine outlook for the coming season. Good cut flowers are very scarce, especially roses and carnations. All the florists have calls every day for more than the supply. Lateness of all the carnations coming into bloom is responsible, but prospects are good for a large supply, as the new glass going up will add a large cut later.

A. A. Hinze has put on the last row of glass and has a splendid place. He handles cut flowers, plants, bulbs and shrubs. The scarcity of labor delayed construction work generally.

We are to have another new store opened soon. Mr. Felix of Seattle is making his arrangements to join the local ranks with a retail cut flower store.

The Tacoma Floral Co. has material on the ground and is to erect a new house, 20x100 feet, this season.

Mrs. M. E. Hayden has moved her cut flower store to the opposite side of Pacific avenue. TACOMA.

Bloomington, Ill.

The Phoenix Nursery Co., of which Fred H. Rowe is manager, opened a down town retail store here September 18. The formal opening was from 3:30 in the afternoon until 10 o'clock and was a brilliant affair. Both windows were tastefully decorated, one displaying celestial peppers, and the other an assortment of seasonable cut flowers. Not only does the elegance of the store attract the passerby but, a spacious and convenient workroom in the rear shows that the concern means to get the business. It will handle not only cut flowers and plants, but also bulbs, shrubs and florists' supplies. Mr. Rowe until recently has been connected with the Chicago Carnation Co.'s retail store at Joliet.

Utica, N. Y.

The social event of the season was a reception given by Geo. Benedict and wife at their home in Yorkville, September 19, from 3 to 7 p. m., in honor of the twenty-fifth anniversary of their going into business. One hundred and twenty-five invitations were issued, of which about 115 called during the afternoon and wished them many more years of success. Mr. Benedict gave each lady an armful of roses. All left with the opinion that the Benedict reception was the most enjoyable of the many social gatherings of the florists during the past year. BUD.

Denver.

Business continues very good and the growers expect to have chrysanthemums in the market September 28. We usually have frost here during the week of this date and this will increase the business about 50 per cent. Carnations are coming in nicely and we are also getting a few very good violets.

Ben Boldt has assigned his lease and sold his property to J. W. Braidwood, of Colorado Springs, who took possession September 22. Mr. Boldt and family are to spend the winter in Germany.

PLATTE.

NEWS NOTES.

DENVER, COL.—The Montrose Orchard Co. has been incoporated with a capital of $50,000 by Perlina S. Davis, Benj. B. Avery and J. H. Smith.

GREENFIELD, IND.—Jacob Forest is busily engaged finishing the new addition to his greenhouses on S. Meek street.

ORANGEBURG, N. Y.—Eight thousand people attended the sixty-third annual fair of the Rockland County Agricultural and Horticultural Association September 3.

TACOMA, WASH.—Louis Tschunko is erecting three greenhouses on the acre tract at South Fiftieth street and Pacific avenue. The buildings will be 20 x 100 feet and cost $1,500.

TOLEDO, O.—The Schoen Floral Co. has been incorporated with a capital of $10,000 by Frank J. Schoen, James C. Griblin, Albert Joseph, John S. Schoen and William G. Vollmeyer.

SALEM, ORE.—F. M. McElfresh, superintendent of the large Wallace orchard near this city, committed suicide September 8 by shooting himself in the head with a shotgun. Temporary insanity is the only possible explanation of his act.

TOPEKA, KANS.—The Shawnee County Horticultural Society held its regular meeting September 6 at the home of J. F. Cecil. An excellent dinner was served under the trees of the beautiful grove. T. E. Armstrong gave a practical talk on "Picking, Packing and Sorting Apples."

SAULT STE. MARIE, MICH.—Wm. E. F. Weber has just completed one house 16x125 and another 10x50 feet. He reports business as exceptionally good. Otto H. Weber, for the past five years with Wm. E. F. Weber, has purchased the Egerton estate, of Sault Ste. Marie, Ont.

NASHUA, N. H.—Hundreds of people have been daily visiting the grounds of Henry F. Mears on Mulberry street. So notable is this collection of plants that visitors have come from as far as Lynn, Mass., to inspect it. The many varieties of coleus attract the greatest attention, but a well-displayed aspidistra does not lack for admirers.

WOLCOTTVILLE, IND. — The Indiana Horticultural Society held a very successful meeting at the home of G. D. Galy of this place. A commodious tent was secured in which the principal exercises took place. Visitors were in attendance from all sections of the state and as well from some of the neighboring states.

COLUMBIA, S. C.—D. C. Noble is building three new greenhouses, each 21x151 feet. Two of these houses he has already planted to carnations, having on the benches 6,165 plants. The heating plant will be just north of the buildings, steam heat being contemplated for the new houses. The six other houses are heated by the hot water system. Mr. Noble has done all the plumbing for the new buildings himself and is also doing much of the carpenter work.

PALMS, FERNS and DECORATIVE PLANTS

We Offer Good Value. Saving in Express and Freight west of Ohio.

ARAUCARIA EXCELSA.

(Norfolk Island Pine.)

BOOKS FOR FLORISTS.

The time is coming along when these are needed and opportunity at hand for reading them. Every one of the following should be in your library.

Send prices quoted and we send the books.

FUMIGATION METHODS (Johnson).—A practical treatise on cheap and effective means of destroying insect pests. Handsomely bound and profusely illustrated. 250 pages. $1.00.

GREENHOUSE CONSTRUCTION (Taft).—It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. $1.50.

THE GOLDFISH (Mulertt).—A number of florists find goldfish an attractive and paying addition to their business. The best advice is given in every department of the subject, including construction and care of the parlor aquarium, in this volume of 160 pages, handsomely illustrated. $2.00.

Florists' Forcing Bulbs and Roots.

Copyright 1906 by the American Florist Company.

IV—LILIUM SPECIOSUM.

Among the latest arrivals in bulbs are Lilium speciosum, L. auratum, L. tigrinum, L. excelsum, L. Brownii and several other sorts, justly considered the choicest of the genus. They are, next to our native species, also the hardiest of garden lilies, deservedly popular and widely cultivated. As such they thrive best and produce the finest flowers in well drained, generously enriched and deeply dug ground and in a somewhat sheltered part of the garden. In making new plantations it is advisable to have the work completed before severe weather sets in, the bulbs to go into the ground as soon as ever they can be obtained, which is usually quite late in the fall. The depth at which the bulbs are planted should be from five to seven inches below the level of the soil. The ground, after planting and every succeeding winter, should be covered with a heavy layer of manure or rough stable litter, this to be removed or dug under every spring. In rainless seasons these lilies must be copiously watered from the time the buds have formed until the flowers are ready to cut. Staking and tying is also necessary.

Lilium speciosum (or Lilium lancifolium) ranks foremost among lilies especially suited for pot culture and forcing. Its three varieties, album, rubrum or roseum and Melpomene or punctatum are handled in large numbers by commercial florists every year, some growers having made the culture of these lilies a very profitable special feature. The season of flowering, hastened by forcing or retarded and prolonged by the aid of cold storage, covers the entire period from the time the last longiflorum lilies are marketed in the spring until the first Harrisii lilies are offered in the fall.

LILIUM SPECIOSUM FROM RETARDED BULBS.

While the bulbs of Lilium auratum, a species also largely grown in pots, may to some advantage be potted up as soon as received in the fall, nothing at all is gained by starting Lilium speciosum much earlier than February. The bulbs, however, must be kept until then in a cool and tolerably moist place, where they will neither dry out nor be excited into a premature top growth. This is rather hard to do in or about any ordinarily appointed greenhouse establishment, and the bulbs, therefore, had better be placed in well regulated cold storage rooms until it is time to plant them. The right temperature for Lilium speciosum when in cold storage is 33°. If it becomes difficult to steadily hold this point, it is better and safer to run the temperature a trifle lower than higher. The grower whose place is not fully equipped in this particular phase of modern floriculture or whose facilities for the retarding of lily bulbs are unreliable, will invariably do better by procuring cold-storage bulbs from trustworthy dealers at a time and in such quantity as best suits his particular line of trade.

The bulbs may be started any time from the middle of February until the end of April. In potting, a rich, heavy soil and comparatively large pots should be used and the bulbs can be set high enough so as to leave the upper half uncovered by soil. A very cool and well-ventilated greenhouse is a good place in which to start these lilies. Later on when they are making some headway, and when the warmer days of spring are drawing near, a spacious, deep frame outdoors will be best for them. The crop of flowers in every instance will be finer when produced under open air conditions, insects will be less troublesome and the care of the plants an easy matter. E.

We are indebted to the Garden for the accompanying illustration.—ED.

Attractive Commercial Places.

It is unhappily true that a great many of our commercial establishments are not at all attractive. As a matter of fact, their appearance would tend to drive away business rather than draw it. Much can be done to make the grounds and surroundings of the average greenhouse establishment attractive at very small expense and it is an investment that pays for itself many times over. We are always pleased to find a well kept commercial place in which some desire is shown to please the public and improve the surroundings generally.

The illustrations herewith show one of the neatly kept houses of I. L. Pillsbury, of Galesburg, Ill., and an exterior view of his establishment, where he compelled attention to his place and business in the past season by highly meritorious bedding and planting. The proprietor of every greenhouse establishment in the country will find it to his benefit to spend a little time and money in this way, not only in summer bedding but also in a spring display of outdoor bulbous and other early flowering stock.

AURORA, ILL.—J. M. Smely has been away for several weeks.

A National Canna Growers' Association.

We wish that every grower of and dealer in cannas would consider the above question carefully and express either through THE AMERICAN FLORIST or to the writer personally by letter, his own candid opinion upon it.

If such an association could be formed, and include in its membership the thousands of small florists all over the country, who handle from a few dozen to a few hundred cannas each year, and awaken an interest in each to take hold and help circulate literature regarding the beauties of the canna, for growing in small home gardens as well as for planting in parks and public gardens, and keep up a general campaign of education, especially by donation to city parks, of some of the most showy of the newer varieties (not necessarily of anyone's high priced novelties, but something new in the community that would attract attention) there could, by united action, be such an interest worked up for cannas that the demand would be doubled in less than three years.

We see no reason why such an association could not be mutually helpful to every one in the trade, but expect that some few would be jealous for fear that they would not be recognized as the great and only canna growers. Let the association have a nominal fee of one dollar per year, and reach out for members, not only among florists and dealers, but among amateur growers and gardeners everywhere.

There are hundreds, yes, thousands, of growers who could be induced to become members of such a society that would not think of joining the S. A. F. with its much higher membership fee. Many of them, however, after being brought in closer contact with other growers in such an association, would no doubt in a few years become deeply interested in floriculture generally and would probably become members of the S. A. F.

There is a great chance to do educational work along floricultural lines and no one should try to discourage any movement along such lines, even though they be in the nature of kindergarten work. Let us take hold and reach out for the general public and educate it up to a better understanding of the beauties of our work in floriculture.

In regard to registration, we have never considered that there was any implied recommendation, or acknowledged merits, attributed to such varieties as are offered for registration by the S. A. F., only the notice that a certain name has been given to a certain variety and the brief description given it, is simply a help to identify it in the future if it should come into general cultivation.

We believe that the present system of registration is the only one that can be carried out without friction by any society. It is certain that no committee can pass on the merits of flowers as fragile as those of the canna in a satisfactory manner without seeing several plants of each variety growing and watching their growth for several weeks. This would mean a vast amount of work for the committee, provided there were several hundred new applicants for favorable mention. Then if the members of the committee should live in widely separated parts of the country and each have to be supplied with samples, it would mean quite an expense to the originator.

The question of certifying varieties for merits, however, should be another question altogether. The Conard & Jones Co. some months ago registered a new pink canna under the name of Venus, when this name was given a variety in 1900 of a yellowish white color, so there are now two distinct varieties on the market by that name. Persons naming and registering new kinds should be very careful not to repeat names of varieties already in commerce.

Another thing that should be condemned is the changing, even in a minor way, the name of a plant after once given, for it only makes much confusion. We saw on the fair grounds at Dayton a bed of cannas labeled "Imperial Gardener Hoppe," this should have been Hofgartner Hoppe; the two names mean the same, but there is

I. L. PILLSBURY'S PLANT HOUSE, GALESBURG, ILL.

no excuse for trying to change the one for the other, as it but adds to confusion and places the same kind on the market under two different names.

L. H. READ.

WOULD CHANGE THE TITLE.

A national canna association would be all right. I would, however, cut out the "growers," even though everyone who has cannas growing in his garden is a canna grower. As we understand the meaning of the term grower, it is applied to those who grow in quantity to sell at wholesale to dealers. The title as I have ventured to suggest is shorter and gives the association a wider field to operate, and open to everyone who grows and admires the cannas. It rests with the growers who handle cannas in quantity to take the initiative in forming such a society, while others, if the advantages of joining such an association were properly and enthusiastically placed before them, might fall into line for the good of the cause. Very little that is worth while can be done without enthusiasm. Wonders have been accomplished by judicious and well directed enthusiasm.

I do not know that the rose and the chrysanthemum have been made more popular by the organization of their respective societies, but I believe American horticulture in general has been the gainer, and the carnation and peony societies have certainly drawn the public closer to their respective patron flowers through the work of and publicity given by each society. The rose and the chrysanthemum were already popular before either of their respective societies were established..

The chrysanthemum society has done good in another direction other than creating a demand for its patron flower. No society was needed for that purpose because it comes in such vast quantities in the fall and early winter that it is self-assertive and needs no booming—but the society has done and is doing good work by its system of the weekly committee meetings in the leading cities during the chrysanthemum season, passing upon novelties. By the system adopted numerous varieties not up to the standard have been kept off the market. The $2 entrance fee has no doubt made the owner of a possible certificate winner more critical of his own productions.

None of the other societies is working along the same lines, but the canna association could be managed in a similar way. Let each of those canna enthusiasts who believes he has a superior variety send it to a public park to be agreed upon in each of the larger cities, and appoint a local committee which knows something about cannas, to visit the plantations three or four times during the growing season, the first visit to be a week or so after they are first planted, with later inspections about the middle of July, August and September. These dates need not be arbitrary, but are here given only as a guide to formulate some good working plan for the benefit of the canna.

The registration of names is a different proposition. That is an idea formulated originally by the Chrysanthemum Society of America for the purpose of avoiding as far as possible the duplication of names. but let all who think they have a good seedling canna that they are not afraid to have competent committees examine in different cities, send them along for that purpose. This would be a most interesting test and have a tendency to disseminate canna education that would benefit all growers of cannas whether for the love of them for their own sake or for sale.

The more I think of the plan herewith proposed, the better I like it, for the owner of a superior variety need not send more than two plants of his novelty to each city agreed upon. One would hardly be a fair test, and should it prove to be a superior variety, the exhibitor would have no trouble in disposing of the stock at the end of the season, to some local firm possibly. It would not be advisable to send varieties for trial until the year before enough stock was on hand to warrant its dissemination, as it is not good business to create a demand for an article that cannot be supplied.

EDWIN LONSDALE.

Smugglers Use Funeral Wreath.

The smugglers of Paris have many ingenious methods of swindling the customs employes in passing contraband alcohol into the city, according to a correspondent of the Scientific American, this article being heavily taxed. Among others we find the following:

"During a period of over six months the customs employes at the various barriers at Paris saw two men regularly pass before their offices, carrying a very fine funeral wreath. Naturally, they never asked them to pay dues on such an article as that, and never suspected for a moment that it contained 40 liters of pure alcohol. The smugglers took every precaution against discovery, avoiding, for instance, passing through the same barrier twice running. However, the trick was eventually discovered by an officer who insisted on examining the wreath, and found that it contained a tin interior filled, of course, with the valuable spirits."

CHRYSANTHEMUMS

Notes on Varieties.

Monrovia, as an early variety, has outdone itself this year, and on our place the first flowers were cut about August 20, the regular crop coming in about 15 days later and regular daily shipments commencing about September 9. August chrysanthemums are certainly novel and of course there was not much call for them that early, but it shows what can be done if occasion requires, as C. H. Totty puts it.

I. L. PILLSBURY'S GROUNDS, GALESBURG, ILL.

However, I do not agree with Mr. Totty, that there is no demand for the flowers before cold weather sets in, as there has been an increased demand for early chrysanthemums ever since we commenced making regular shipments, and we have had about as hot a September as we ever had. I do not think that the commission man who has handled my cut, has thought it adding to his woes to sell from 10 to 20 dozen per week at $4 per dozen straight and not having nearly enough to go around. The only woe has been that he did not have enough of them, and it has required considerable holding back, writing and telegraphing, to fill all orders and nearly all were sold on advance calls, very few having been obtainable in the open market.

Our regret is that we do not have a good white or pink chrysanthemum to cut from early in September, to go with the yellow Monrovia, but we hope it will soon be forthcoming. I, for one, expect to have some to cut another season. We have got some nice varieties now that with a little extra manipulation can be flowered early. As it has taken many growers five or six years to find out what can be done with Monrovia as an extra early variety, perhaps another season will see other varieties come to the front. Of course there is a danger of getting Monrovia too early. August chrysanthemums as a rule do not go, nor pay to grow.

October Frost, one of Nathan Smith & Son's novelties of last year, is ap-

parently the first early white of size. It is a nice grower and an easy propagator. I understand that one grower cut it about a week ago, but I did not see, nor hear of what size it was, but it is apparently a good variety, one that will pay and warrant another trial. It is far ahead of the English variety, Moneymaker, which was supposed to be such an extra early variety and which several growers (the writer being one) imported last spring. It may be early in England, but here it is only now showing color. Clementine Touset is another comparatively early variety and is holding up its reputation of last year. It has been planted largely and will pay well for its space. Its leaves being rather small, it can stand close planting and it promises here to be one of the best paying varieties. It is also a nice clean, straight grower, and needs but little tying. It is also showing color now.

In pink, Smith's Rosiere looks good and is also showing color now. It looks like a good addition to our few early pinks and will be in several days ahead of Pacific and Lady Harriet. It seems that our American seedlings are the best after all, especially for earliness. Merstham Yellow is also living up to its reputation of last year as being of little worth, not even as a second early is it of value. It is already on the list of "has beens" and will be dropped entirely by those who gave this wonderful variety a second trial. There are a couple more of Nathan Smith & Son's novelties of last year that are looking very promising, but as they are late, or only second early, they need not be mentioned as yet.

Of other varieties looking good, but coming in rather late, are Major Bonnaffon, Appleton, Enguehard, Alice Byron and Viviand Morel. They are all "money makers" in their season when growing right and are all hard to beat in their color and season. Adelia is too easily mildewed and is such a crooked grower that Alice Byron is much better to handle and every bit as good. As for its mate, Majestic, which won such honors at the St. Louis fair, it is too soft to handle and ship. Altogether there are but very few really good varieties of the later years' disseminations that will do much better or make more money for the average florist than some of those old stand-bys; it is with new chrysanthemums as with new carnations, there comes occasionally a good one, that one will have to get, and of course, to get them, one will have to buy several others which are of no value. T.

Cultural Reminders.

Now that the days are getting shorter and the nights colder, chrysanthemum leaves should not be syringed except on very bright days. Keep the plants rather on the dry side, but see that the beds are watered thoroughly at least once a week so that the buds may have a chance to swell. Give liquid manure two or three times a week for a week or two, but both that and syringing should be discontinued as soon as the buds show color. Keep them tied up and the shoots and suckers picked off. Above all keep the houses free from aphis and other insect pests. The little white fly, of which there has been so much written lately, infested one of my houses. I first tried tobacco fumigation, using a good handful of cayenne pepper with the powder. This stunned the flies so that they lay as if dead all night, but in the morning they were as much alive as ever. I then syringed the plants with a strong solution of nicotine, but this had the same result as the other treatment. I finally concluded to try hydrocyanic-acid gas. This was neither as expensive nor as dangerous as many have supposed. My house is about 16x100 feet in size, with open walls, a rose house and a carnation house being on either side. Closing the doors and ventilators of the three houses, I procured three quarts of commercial sulphuric acid, divided this into six one-gallon jars and poured into each a little over a pint of water. I then had three jars on each side of the infested house. Using 2½ ounces of cyanide of potassium to each jar, myself and a helper dropped it into the fluid and left the house at once. I remained away an hour. Few of the flies appeared again. Of course there were the eggs of the flies and I expect I will have to repeat the operation once or twice. The cyanide only cost $1.50 and the acid 50 cents. It does not pay to have a house of chrysanthemums spoiled for ten times that amount.

T.

PALMS AND FERNS.

Seasonable Notes.

With the advent of October, cool nights are the rule, and some artificial heat becomes necessary in the palm houses at least, just enough to circulate the air and to keep the foliage from getting too much water soaked by the heavy condensation during the night. In the fern houses it may not be needed quite so early in the season, for most of the ferns in popular use as trade varieties are cool-house species, and some of them, like Cyrtomium falcatum, Aspidium tsussimense, Lastrea chrysoloba and some others, are about half hardy, and consequently are likely to be injured rather than benefited by too much heat.

Young palms in general are more tender than large specimens of the same species, and it thus becomes necessary to favor the young stock in the matter of fire heat somewhat earlier in the season than those of more mature growth.

Cocos Weddelliana in a small state is rather sensitive to cold, and especially so if it becomes too wet at the root at the same time, and as this very useful palm is a little tricky in habit at times, it pays best to give it some extra attention; for a batch of cocos with the "yellows" is a discouraging sight to any plant grower.

To be fairly well shaded, kept rather warm, and not over-watered, seems to be the most favorable conditions under which to grow cocos, but even then they keep us guessing sometimes. And I remember a certain plantsman saying some years ago that the best and thriftiest lot of cocos he ever had were grown in a house that sometimes went down below 40° in cold weather, so the matter does not seem to be entirely cleared up yet.

Young arecas also feel the effect of cold nights very soon, and are quite liable to get a check to their root action from such conditions, and even the larger plants of this species will soon stop growing when kept too cool, and in such a house will remain dormant until about April.

The kentias seem to enjoy a moderately cool temperature at night, and if the house in which established plants of this favorite sort are growing should go down close to 50° it will not harm them, and the growth they make under these conditions will be shorter, hardier and more symmetrical than that produced in a temperature of 60°.

It is quite possible, however, that the number of kentias grown under cool conditions, may be somewhat less than usual during the coming season for an active demand for small and medium sizes has created some shortages, and such a state of affairs may cause some growers to turn on a little extra steam in the hope of patching up their short lines before the fall season of 1907. Arecas have also been more in demand this season, but this apparent demand may be more owing to a short supply than to a greatly increased call, and a shortage of this species may be more readily repaired than some others, from the fact that areca seed usually gives a high percentage of germination.

A FRENCH TABLE DECORATION.—Le Jardin.

An early autumn trade among the palms allows no excuse to the grower for late potting, the crowded condition of the houses frequently preventing one from doing much potting until October 15 or thereabouts, but with the early opening of business this season an opportunity for refilling space is offered that should promptly be taken advantage of, for latanias will continue to grow for the next two months and kentias for still longer.

The dark and rainy weather prevailing in the past August, and to some extent in July also, prevented the regular use of the hose in syringing, and it is always unfortunate to be compelled to suspend syringing for several days at a time, for at such times insects are very likely to get a fresh start, and sometimes get almost beyond control for the time being. The month of August being the usual period for the production of the second brood of some of the scale insects, and also for mealy bug.

Such a condition has been remarked to the writer by several growers during the present season, and there is little doubt but that the lack of syringing during that period has much to do with the apparently sudden outbreak of insects on the palms, the new crop of these pests not having been noticed until they had finished their migrations on the foliage, and settled down to build a little home of their own, so to speak.

Shading is but little needed on the palm houses after this date, though a thin covering on the southern or western exposure of the houses will do no harm, and will serve to retain a more attractive color in the foliage of palms that are much pot-bound. On the fern houses in which Boston ferns, Scottii, elegantissima, Whitmanii, Barrowsii, and any others of that type are grown, no shading will now be needed, and the same rule will apply to the house in which small ferns for ferneries are grown, plenty of sun and air being among the essentials for these plants at this season, and this means free ventilation at night as well as during the day, until such times as frost threatens.

There are still many ferns of the nephrolepis family that are grown in benches during the summer and potted up in the fall, and these newly potted plants will take rather more attention than those that have been grown in pots throughout the season, as the latter are so filled up with roots that their greatest requirement is an abundance of water, while those just lifted from the bench may need a temporary shading and some care in watering until the roots take hold anew.

A correspondent recently mentioned in THE AMERICAN FLORIST the fact that the early plants of the various sports from the Boston fern, as seen around Philadelphia, are not very shapely, and suggests that possibly these plants may assume better form later in the season. This idea is doubtless correct, for during the hot weather the nephrolepis leaves will lengthen out too much and are fewer in number, but as the season cools off the growth is of a more even character, and another thing to be taken into consideration is the fact that the compound leaves of some of these improved forms of Nephrolepis exaltata take longer in which to reach their full development than the plain-leaved Boston fern.

Small ferns that have been grown in outdoor frames will soon be in need of safer shelter, and while they may be protected from a few degrees of frost by covering with sashes, yet it will be unwise to delay their removal much longer, for these little pots are somewhat of a nuisance to move in a hurry. Cibotium Schiedei is being more grown and appreciated from year to year, and does well under much the same conditions as pot-grown Boston ferns, but cannot be grown as cheaply as the latter.

It is best not to water this fern over head very much at any time and especially so during the winter, and as the fronds increase in length the plants should be raised up above the bench on pots or pedestals, in order to keep these long and drooping fronds in good condition.

W. H. TAPLIN.

WASHINGTON, D. C.—J. Louis Loose is erecting a modern greenhouse at 1709 Fourteenth street.

DENISON, TEX.—A flower show will will be held here under the auspices of the Civic Improvement League, November 8-10. The catalogue is now ready and copies may be had on application to T. W. Larkin, Denison, Tex.

A CHRYSANTHEMUM WREATH.
By Mrs. M. A. Hansen of Galveston, Tex.

THE RETAIL TRADE

A Funeral Wreath.

The wreath illustrated has for its foundation fresh sago palm leaves. This is covered with Russian violets, over which large yellow chrysanthemums are arranged with fern leaves. The wreath is trimmed with lavender tulle and ribbon of the same shade, making the effect very attractive. The wreath stands about thirty-two inches high.

A French Table Decoration.

The table illustrated herewith was set for eighteen covers and is an example of the use of small porcelain figures in connection with flowers and foliage. Five porcelain figures were used. The center was a pedestal supporting a vase and surrounded by four figures representing the seasons and was, naturally, the largest. At the ends were porcelain candelabra used to carry sprays of flowers, and between the center and ends, placed diagonally, one at one side, the other at the opposite side, were two groups of dancing women.

The flowers and foliage were arranged very delicately and gracefully. In the center vase were superb sprays of odontog blossoms and nodding oncidiums with delicate fronds of adiantums. Arranged at the base of the pedestal were yellow and mauve cattleyas, odontog blossoms, cymbidiums, and pink lilies.

The candelabra were treated in a similar manner, and a simple spray of oncidium arched gracefully over each of the groups of dancers.—Le Jardin.

THE ROSE.

Early Feeding.

It will be found that in most cases, towards October 1, that the young rose stock, particularly the plants on the raised benches, will require a little feeding of some kind. At this time the roots on the plants that were benched the latter part of June or the first week in July should be very near the surface of the soil, and of course this means one must stop cultivation.

As a rule when we stop cultivating, the soil soon becomes baked in spots which makes it absolutely impossible to water evenly. If this should be the case, a very light top dressing of sheep manure or some thoroughly rotted stable manure mixed with soil (equal parts of each) scattered lightly over the beds will keep the soil in fine shape to take the water and also furnishing sufficient feeding at this time. If the plants seem to require stronger feeding, the quality can be increased by adding bone flour to the soil and manure, say about one-quarter of a peck of bone flour to each bushel of the top-dressing, mixing well before applying. This makes a top-dressing with considerable body to it, and I prefer it to using the manure alone.

If it is applied properly the surface of the soil is in about the same condition as it would be after cultivating. About one-fourth of an inch of the mulching will be sufficient, care being taken to fill the cracks at the sides of the benches and to leave the surface level.

The plants in the solid beds do better if fed with liquid manures instead of mulching at this season. As they take less water and the roots seem to go downward rather than towards the surface, cultivating can be kept up longer and by applying a weaker solution of liquid manure later better results will be obtained. Of course there may be exceptional instances where a solid bed has been filled with very light loam, over very open drainage with bottom heat. It may be necessary to mulch in this case, as the treatment would be practically the same as applied to raised benches. It is almost impossible to go by a set of rules in growing roses; what would perhaps be the best treatment for one grower's plants would not do at all for the grower a mile away if the soils were different, and I only attempt to suggest what I consider practical treatment under normal conditions.

The grower must use his own judgment regarding the time to apply the treatment as prescribed above. Plants that require feeding show different symptoms under varied conditions and cultural methods. They may show it by producing undersized flowers; again if they are very much starved the foliage will become leathery, and of a pale yellowish green color. Streaked foliage usually denotes over-watering or diseased roots, and if they are grafted plants, the manetti may be decayed at the heart, or the splice may have loosened up. Very often if the soil has been kept entirely too dry, the plants will have a droopy look the foliage showing but little substance. Dry bottom soil will cause the same appearance.

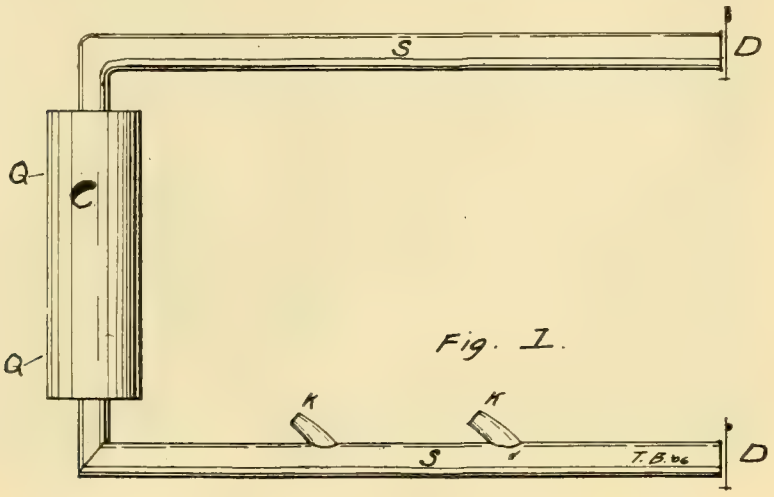
If the plants are in good color but the growth ripens quickly with stunted stems, and the hard wood near the points takes on a purple or rusty color, this is usually a sign that they require feeding and more water daily, although the feeding should not begin until they respond to the increased waterings which should occur within a week or ten days.

To be on the safe side the grower should make a careful survey of the houses and observe the plants closely and if in doubt as to just what they require in the way of feeding, I should suggest selecting a dozen or so plants of each variety in one or more of the houses and applying a light mulch on one lot of plants, a weak solution of liquid manure on another lot, and so on. The fact of the matter is one must experiment in a small way to be able to determine the best results obtainable with the grade of soil we have to handle. Notes should be kept stating the dates and the proportion of each mulch, also the amount of manure or chemicals used in mixing the liquids. Then if we find that within a week or 10 days the plants show a marked improvement under a certain treatment, we are learning something, and in this way only can we learn what is best for the plants under our personal care.

The plants should be kept neatly tied from now on. It is best to tie the plants before mulching, thus avoiding many damaged canes or bruised buds. Do not draw the growth in too close to the stakes, but pull in the growth so it will stand upright and loose enough for the free circulation of air through the plants. When tieing flower shoots, tie them just below where they are to be cut; this saves retieing, and makes the operation of cutting the flowers much easier and quicker.

Look out for Killarney and Richmond. Once they are well started they will require plenty of water, much more than Bride or Bridesmaid in the same grade of soil, and they do not seem to take kindly to the dryer treatment at any time during the season. As a warning do not neglect the roses for the chrysanthemums. If growing both prepare to treat both well, neglecting neither.

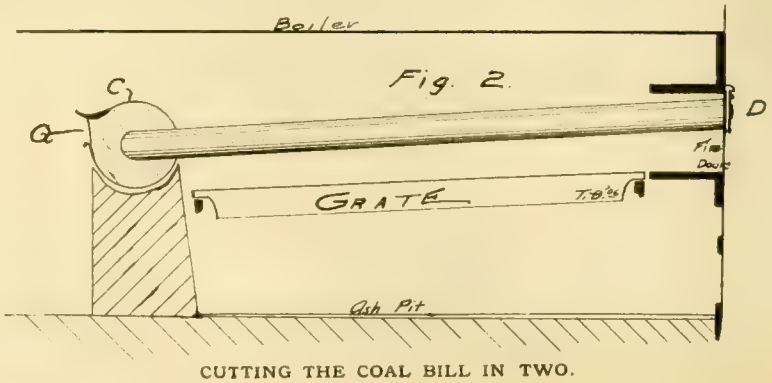
E.



CUTTING THE COAL BILL IN TWO.

Cutting the Coal Bill in Two.

Hitherto the saving which may be made by improved methods of firing boilers, has not much interested either the makers of boilers, or the users of them. Profits in nearly all industries have been sufficiently large to satisfy the vast majority of men. But coal has gradually advanced, as the demand has increased, until there is a restlessness noticeable among coal consumers, and a query arising in the minds of many, as to whether something may not be done to relieve them of their



CUTTING THE COAL BILL IN TWO.

burdens in the form of expensive fuel.

Fortunately, something may be done to help the consumer of soft coal. Two methods are available. The first is to substitute slack for lump coal as fuel. The substitution is not difficult if due care is taken in the firing.

First, as to learning to fire with slack, the grate must be well cleaned, and a fire started with shavings, or cobs, or small scraps of wood. On this is spread a thin layer of slack coal mixed with shavings, or planer chips, or broken-up cobs. When this is ignited, more of the mixture is added.

This mixture is composed of slack and shavings, or chips, half and half, bulk. Cobs, of course, may be used, care being taken never to smother a cob fire, as it will explode with a bang and a great puff of whitish smoke. This explosion is due to the sudden ignition of gases which the cobs throw off when heating and burning without a plentiful supply of air.

As I have written, the art of burning slack coal is reduced to simplicity by giving slack coal plenty of air, by mixing the slack with quick burning substances, such as chips or cobs, and by firing often and spreading evenly and thin. High stacks, which assure a great draft, will allow slack coal to be burned without using a mixture. Yet this kind of a fire requires skill to keep the coal from sliding into the ash pit before fully consumed.

If a substantial crust can be built up with the mixture, an experienced fireman can use straight slack without waste of any into the ash pit. As soon as the crust begins to be perforated by vents, it is time to charge the whole surface with an evenly spread layer of coal. Practice is the best teacher; but some give up before becoming proficient. Most of the troubles which assail beginners in the use of slack coal, is due to a too liberal charging. By using more chips than coal, by firing often and spreading thin, the art is to be mastered.

Now as to this second scheme to cut down expenses. Some may not wish to burn slack coal; and yet like to cut down bills; and some who burn slack coal, may wish to further decrease cost of firing a boiler. Two methods are here explained in detail such as will enable any competent man to apply them to ordinary boilers.

The first method in the economical burning of any kind of bituminous coal, and especially of slack, is designed particularly for the consuming of gases, and the abatement of the smoke nuisance by a more thorough combustion of the coal. Figure 1 shows this attachment, looking at it from above. The chamber C is placed just in rear of the grate; the tubes, S-S, parallel the fire; the inlets D-D penetrate the head of the boiler. The branches K-K are intended to send a supply of warm fresh air over the fire about where the air, which comes up under the grate and in through the doors, is exhausted of its oxygen.

As is well established in practice, black smoke can be practically eliminated by being burned, if fresh air can be conducted to the rear of the fire. Black smoke is unconsumed coal; black smoke can be burned; therefore, unburned, it is a waste and a dead loss to the proprietor of the boiler.

Figure 2 shows this attachment from a side view. It will be noticed that the air enters at D, is conducted to K-K, and also to the chamber C from which it escapes along the side Q-Q. Being couducted, as will be seen, above the grate, beside the fire, the air becomes heated, and when it plays over the surface of the fire (from K-K), or escapes to burn the heavy gases at Q-Q, it is hot, and what is also important, it is heated at no additional expense to

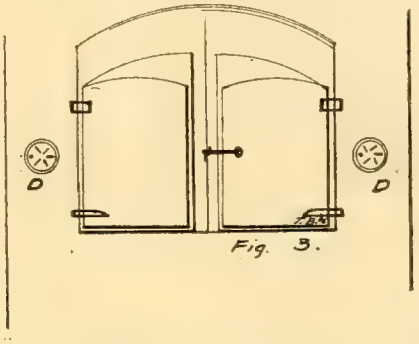


Fig. 3.

Cutting the Coal Bill in Two.

the fire. That is to say, the air is heated by the radiations of the fire; and, being heated, its oxygen unites more readily and more thoroughly with the carbon of the coal.

Figure 3 shows the inlets to the tubes, at D-D. These inlets are provided with outside dampers, by which the air may be controlled at pleasure. Looking at figure 3, it will occur to many that all boilers cannot have the tubes S-S terminate as shown at D-D. Figure 3 shows them within brick walls. These tubes S-S may be metallic tubes, or passages left in the brick. Where a boiler's fire is enclosed in iron, these tubes may be located inside, where their life is apt to be short; or they may hug the outside, being encased to help them retain the radiated heat of the boiler as much as possible. The short outlets, K-K, may be abolished altogether, if one is satisfied with getting the air to the rear of the fire, at Q-Q.

It will be observed that the air is further heated in the chamber C before it mingles with the fire and heavy fumes, because all of the fire smoke passes

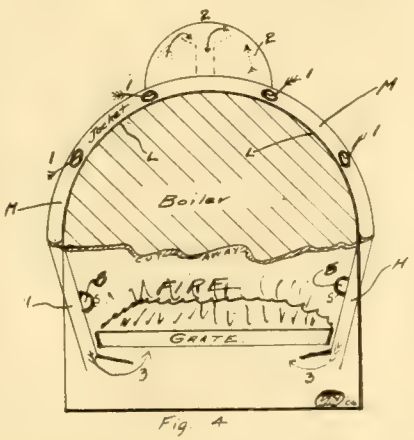

Fig. 4

Cutting the Coal Bill in Two.

over the chamber on its way to the stack. The tubes S-S may overlap each other within the chamber, receiving thus more of the heat of the fire, and, accordingly, giving off hotter air.

The second method to save coal, is more extensive, and somewhat more revolutionary. It aims not alone at supplying the fire with hot air, over and at the rear, but it is so comprehensive in scope that it provides that nothing but hot air shall be supplied to the fire, above, behind, and underneath. Furthermore, it contemplates utilizing the radiating heat of the boiler, which otherwise would be a total loss.

All the heat that escapes from a boiler is costly waste. Some manufacturers enclose their boilers as well as they can, and announce that but little heat is radiated and lost. A better way is to burn this heated air which envelops the boiler, by providing a jacket for the boiler to retain the air temporarily, until it is lead to the fire. A system of pipes conducts the heated air from under this jacket to below the grate. The suction of the stack much more than overcomes the friction caused by drawing the hot air downward from the top of the boiler to vents beneath and beside the fire.

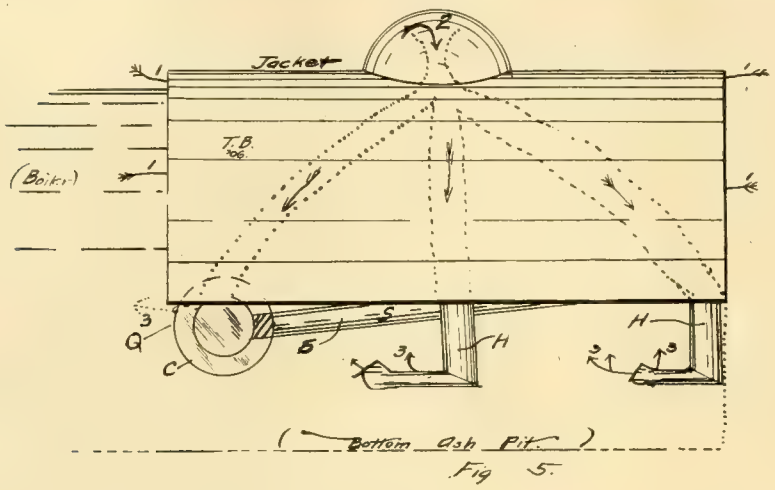
This system can be understood by a careful examination of figures 4, 5 and 6. In figure 4, the upper part of the boiler is seen, the lower part being cut away to show the fire. The customary air inlets in the doors being closed, the air, here protrayed in the form of arrows, enters the jacket at the holes 1-1-1-1, is thoroughly warmed, and ascends to the dome, seen at 2. There it descends the funnel-shaped pipe, and is conducted by pipes, H-H, in the jacket, down to the space beneath the grate, where it is seen escaping to the fire, 3-3.

Figure 5 is a side view of this contrivance, with the attachment shown in figures 1-2-3 working together. The air enters the jacket at 1-1-1-1, continues to the dome at 2, descends through the tubes shown by dotted lines in jacket, to their outlets at 3-3-3. The tubes H-H debouch under the grate; the tube to the left empties in the chamber C, provided that the arms S-S (see figure 1) are not used.

Comparison with figure 6 will make figures 4 and 5 clear. Figure 6 shows a large brick-enclosed boiler, with the brick cut away to expose the tubing. The jacket is also cut away so that the tubes, in dead black, which conduct the hot air from the dome to the grate, and to the chamber at C, may be exposed. These tubes descend on both sides of the boiler; and more than one may be located to the side. The dome may be run the whole length of the boiler, if wanted to be so constructed. Around the face of the boiler, in figure 6, may be seen the air inlets to the jacket, fitted with controlling dampers. The regular inlets in the fire and ash doors, are also provided, for when the fire is first made, and until it is burning briskly, and the stack emptying rapidly, the air is admitted in the customary way. Notice in the figure 6, that the tube X to Y is under the jacket; from Y to Z, below the grate, it proceeds through the wall. It may be exposed to direct contact with the fire a part of this dis-

tance, but it is then liable to deterioration from the great heat to which it will be subjected. The tube leading to C is cut off to show how C looks in cross section.

If one will stop to think that air must be raised to a certain temperature before it will unite with coal and produce fire; and that beyond cost of installing this system, no further cost is necessary to supply the fire with hot air, it becomes apparent that a great and continual saving can be effected by this means. THALEON BLAKE.



CUTTING THE COAL BILL IN TWO.

Boston.

STOCK SCARCE.

But for the small number of growers seen in the markets and a correspondingly small supply of stock, a casual observer would think that the flower business was at its height. Throughout the city there has been a vast increase in all branches of the trade and the salesmen instead of looking for customers as was and has been the case for two months, are now on the hunt for goods to sell. Prices have advanced rapidly owing both to decided improvement in qualities and the lively trading. The first real frost has appeared and the results are that the outdoor garden flowers are rapidly passing off for the season. Gladioli, asters, etc., are still seen in small quantities and sell quickly. There has been a noticeable improvement in the various varieties of roses. Carnations have shown a marked improvement. The supply is still below the demand. Violets at the end of the week swamped the market as there is yet but a limited call. Single violets have been predominant so far, but double ones have appeared. Gardenies are enjoying a remarkable period of popularity.

NOTES.

A remarkable accident of great interest to animal lovers, was that which happened to the splendid horse owned by J. Newman & Sons, whose team is among the first few of the city. On the afternoon of September 23 while standing at the baggage room of the North station the horse took fright suddenly and as quickly departed. In his flight he made for the Charles river and coming to the shore wall without hesitating he dived. However the wagon became fastened on shore and it was with difficulty that the horse was freed from his perilous position in the air. Bystanders cut the binding straps and he dropped into the water, immediately swimming out of sight. At different times the following two days he was seen, but not in a position to be captured. Tuesday, however, he neared the shore in the bay and after severely struggling with the officers of the police boat, he was towed to land. With the exception of a ravenous appetite and an evident desire to rest, no serious effects were noticed. The horse is now one of the curios of the city, having swam and floated steadily for over 50 hours.

The Co-Operative Flower Growers' Association of Boston transacted business on October 1 at their new market in the Music Hall building. This market is on the floor above their old quarters and has been renovated and arranged so that it is now the ideal marketing place of Boston. The most impressive feature is the well-defined and complete system of lighting which has been installed and for the lack of which the local markets have always been noted. The stalls are arranged to suit the convenience of all who frequent the market and with an excellent storage vault there is nothing missing that would in any way improve the intelligent handling of quantities of first class flowers.

Thomas Pegler, for a number of years city salesman for O. L. Dorr, is now acting in the same capacity for Samuel Goddard, of South Framingham. As Mr. Goddard is ranked with the premier carnation growers, having an extensive and model establishment, Mr. Pegler will be well fitted to display an excellent stock and there is no doubt but that he will meet with success in his new line.

At the ultra-fashionable wedding September 29, at Cohasset, of Miss M. C. Bigelow and Dr. J. L. Bremer, the extensive and elaborate decorations were by Thos. F. Galvin. For green drapings southern smilax was used to great advantage and with the addition of a fine display of palms a superb effect was produced. White asters and Easter lilies were displayed in profusion.

O. L. Dorr, of Sharon, formerly one of the most extensive violet growers in this section, has given up this branch and will devote his whole establishment to the growing of market produce.

Thos. Roland, of Nahant, is first in the market with colored chrysanthemums. At present he is displaying the first of a large crop of fancy pink blooms.

The Willow Hill Greenhouses have forced the season somewhat and are now in the market with a crop of fine Bouvardia Humboldtii.

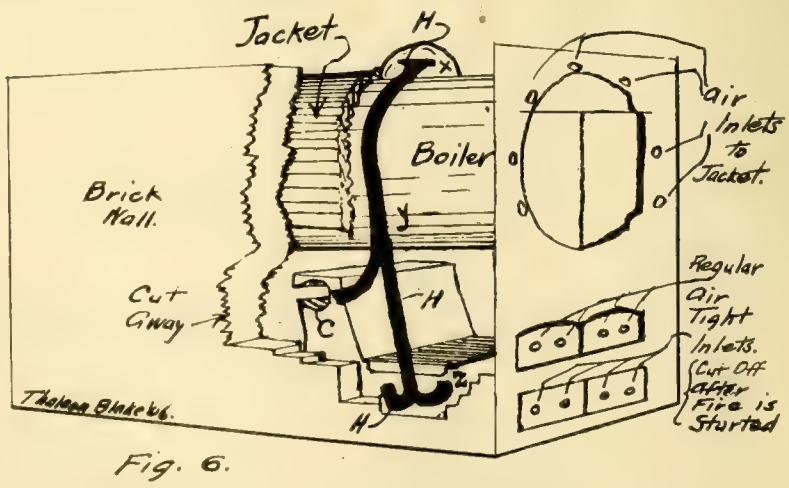
Arthur W. Merritt, formerly with J. H. Small & Sons, of New York, has been secured by Sydney Hoffman.

B.

St. Louis.

TRADE GREATLY IMPROVES.

The market has greatly improved, being reported very strong on Tuesday. The weather which had been very warm all week has now, owing to heavy rains, become cooler and from now on we can expect a more satisfactory condition in trade prices. Richmond is showing up better and there is in fact a better demand for Richmond, Chatenay and Killarney. These roses have been on the wane all summer owing to their bad keeping qualities. American Beauty is in great demand and although the supply has greatly increased they are readily



CUTTING THE COAL BILL IN TWO.

disposed of at good prices. Carnations are very scarce and good ones are cleaned out at satisfactory prices if the stems have any length. A few yellow chrysanthemums are seen. Violets have made their first appearance but are short-stemmed and have very small flowers. Asparagus Sprengeri and A. plumosus are selling well.

NOTES.

Geo. Ostertag, superintendent of Forest park, has been very busy cleaning up the park in the vicinity of the world's fair grounds in preparation of the unveiling next Thursday of the statue of St. Louis at the base of Art hill which was formerly the site of the cascades at the world's fair.

The city has purchased for $40,000 a tract of land in the north end for a breathing place and park. This park will be laid out under the supervision of Park Commissioner Aull and Superintendent Geo. Ostertag. It will be called O'Brien park.

W. J. & M. S. Vesey, Fort Wayne, Ind., are shipping some extra fine American Beauty and Maman Cochet to this market.

Andrew Meyer, Sr., has gone to Springfield, Ill., for the state fair to serve as judge in the horticultural department.

H. G. Berning was first in the market with California violets. He is at present at the Sedalia, acting as judge.

The Bentzen Floral Co, had their wagon very handsomely decorated at the vehicle parade here Monday.

Miller & Albers have leased H. L. Kerth's greenhouses. They expect a good crop of carnations.

All the wholesale houses had large orders for American Beauty for the Veiled Prophets' ball.

C. Young & Sons Co. furnished the decorations at the Veiled Prophets' ball on Tuesday evening.

F. J. Foster has a large wedding on hand where lily of the valley will be extensively used.

J. F. Wilcox is shipping some fine Bride and Bridesmaid to Geo. H. Angermueller.

Heller Bros., of Newcastle, Ind., are shipping some fine roses to this market.

C. A. Kuehn was first in the market with yellow chrysanthemums.

Ostertag Bros. had the floral opening at the American restaurant.

Chas. Ford, with A. Hermann of New York, was a visitor here. W. F.

Washington.

Business conditions continue to improve. Several weddings that call for elaborate decorations are announced for this week and the counter men report increased sales. The return of the president and family to the white house is an event which always stirs the social life of the capital and the doings of society have a powerful influence on our business. There is considerable movement in roses and carnations, though the latter are not coming in large numbers, but the dahlia is in the limelight. The Florists' Club will hold an exhibition of them on the afternoon and evening of October 2. Virginia violets continue to come in and cool weather, which now seems to have set in will soon improve the quality.

NOTES.

A fire at the range of D. I. Saunders a few nights ago, caused damage to the amount of $600, with no insurance. The fire started in the sheds and had reached the greenhouses when the firemen arrived and extinguished it. Mr. Saunders has been particularly unfortunate of late, as not long ago water, directed toward his range by city improvements, caused him no little inconvenience and damage. As an honest and hardworking member of the craft, he has the sympathy of all.

The renomination of Col. Butler Ames of the Fifth Massachusetts district, for congress, is gratifying news to his many friends in this city. As a friend and patron of horticulture, as of all honest labor, he is looked upon as a real representative of the people.

Fred. Michell came to town last week, bringing that broad and cheerful smile with him. It is surmised that he carried away a large bunch of orders. He overlooked the writer in his distribution of fine cutlery, but a lawn mower, next spring, will be just as good.

F. H. Kramer is said to have gone on an extensive tour through Arizona, California and Mexico. It is further stated that Mr. Kramer is one of a party that has mining interests in the southwest and that the object of their visit is to examine these properties.

Very few chrysanthemums have as yet appeared. Geo. H. Cooke is still holding the banner with his fine yellow blooms, which it is generally understood come from the E. G. Hill range, Richmond, Ind.

The Washington Florists' Co. will open their new store at Fourteenth and R streets, N. W., about December 1. They are building a large greenhouse in connection with the store.

The Gude Bros. Co., from present indications will have a tremendous cut of chrysanthemums. They are also keeping up their reputation for roses and carnations. S. E.

Baltimore.

MARKET FAIRLY ACTIVE.

The closing week of September was one of great warmth and humidity, but there is promise now of cooler weather and needed rain. Trade has been fairly active, the demand for funerals of some well-known citizens causing an active market early in the week. The supplies of all kinds of flowers are equal to the demand, and of field stock there is an excess. Several new consignors are sending their products this fall to the Florists' Exchange.

In the matter of advertising their wares the florists of this city seem strangely behind those of the trade in other communities. The use of the columns of the daily papers seems almost never resorted to, except perhaps rarely at the Christmas and Easter seasons. Indeed it seems that but one store here keeps a running advertisement in any of the local papers. In addition to this there is one cemetery company which announces regularly that plants and cut flowers may be had from the conservatory which it maintains in the grounds. In an era where almost every commodity is being pushed through the medium of publicity in the daily newspapers it is a matter worthy of inquiry as to why the flower trade does not resort more largely to this medium of extending business.

Albert Fiedler has bought the property, 902 South Charles street, where he has for several years carried on a steadily growing and successful business, and greatly improved it. He has largely rebuilt the house, putting in a new front with showy plate glass windows, installed electric lighting, and painted and freshened the whole premises, which now give an up-to-date appearance quite worthy of their energetic and resourceful owner. Mr. Fiedler is one of the most pushing and energetic young men in the trade.

Lehr Bros. have sold their store at 733 W. Baltimore street to W. Guerth, who will continue the florists' business in all its retail branches, the Lehrs confining themselves to the growing of flowers, carnations and chrysanthemums mainly, at their place in Anne Arundel county. S. B.

Louisville.

BUSINESS VERY GOOD.

Business the past week has been very good, and about the only stock that was hard to get was in carnations, which were certainly very scarce. Roses, with the exception of American Beauty, were very plentiful, however, some were very poor. The demand was exceptionally good. Carnations have had a heavy demand, and it is hoped the supply will soon increase. Lily of the valley has had a fair demand, the quality being good. Lilies have some demand, but the price is too high to carry much of a stock. Asters are scarcely seen, the demand having also greatly decreased. Dahlias of very good quality can be had in great quantities and find a fair demand. Green goods are in satisfactory supply. Other stock can be had in adequate quantities, and has some demand.

NOTES.

The regular meeting of the bowling club will be held Tuesday night, October 9.

The weather has turned very cool, and frost is expected at almost any time.

Manz & Neuner have been making a big display of dahlias.

The plantsmen's busy time is on once more. F. L. S.

OBITUARY.

Albert Wyckoff.

Albert Wyckoff, vice-president of the Albaugh Nursery Co., and well known in Cincinnati horticultural circles, met sudden death September 25 while on a train enroute to the east. The cause of his demise is not known. Mr. Wyckoff was 60 years of age, had served through the civil war and had escaped twice from Andersonville prison. He was at one time postmaster of Jacksonville, Ill.

FRANKLIN, MASS.—Kelley Bros., are adding a greenhouse, 22x70 feet to their plant.

THE question of Christmas greens is now a live one with the wholesale dealers. Reports so far are too indefinite to draw conclusions from.

A SECRET conference of window glass manufacturers is being held in Pittsburg for the purpose, it is said, of devising plans to abolish the jobber and form a selling pool.

SENDERS of photographs should always send their names and addresses with the pictures. The correspondent who sent in photo of a field of asters would oblige by sending his name and address.

Correction.

In our last issue we referred to D. C. Noble whose correct address is Columbia City, Ind., instead of Columbia, S. C., as given.

The Gulf Coast Storm.

The gulf coast has been again visited by a very disastrous storm and many of the florists have suffered heavily. Mobile, Ala., and Pensacola, Fla., have been the chief losers. At the Chatogue Greenhouses the loss was about $12,000. The big new house shown in the foreground of the illustration in our issue of September 22, page 397, is flat on the ground. Ten thousand chrysanthemums and 10,000 carnations in this house are a total loss. All the rose houses were badly damaged, but will be in shape before cold weather.

Miss Maria Minge will lose heavily by damage to her fern houses, which were exposed to the full force of the wind.

At the Industrial Gardens, where old construction prevailed, the greenhouses are a total wreck.

Alex. Duplan's house was entirely destroyed.

The estimated loss in Mobile county is 150 lives and about $1,500,000.

The Chicago Flower Show.

There was a very enthusiastic meeting of those interested in the flower show at the Union restaurant meeting Monday evening. All branches of the trade, incluuding the large cut flower growers, were well represented. Many useful suggestions were made for the guidance of the working committees, among the speakers being James Keeley, of the Chicago Tribune; Benj. Hammond, of Fishkill-on-Hudson, N. Y., and C. S. Ford, of Philadelphia.

Mr. Keeley surprised many of those present by stating that in his boyhood days he was connected with the business and that it was part of his work to market the product at Covent Garden, London. When he recalls those days it is small wonder that he has a warm spot in his heart for the trade. The unity of purpose among those interested and their determination to make the coming show the best ever held now point conclusively to an exhibition of which the Horticultural Society and the Chrysanthemum Society of America may well feel proud and it remains with the exhibitors to get their material ready in good time. The local committees will do the rest.

In this connection we may state that the special prize list of the latter society has been issued and we understand that it will be incorporated in the revised premium list of the Horticultural Society, which is now in the hands of the printer. Copies of this revised premium list may be had on application to Willis N. Rudd, secretary, First National Bank building, Chicago, as per advertisement in this issue. Exhibitors should remember that this is a 6-day show, commencing Tuesday, November 6, and ending Sunday night, November 11.

A very encouraging letter from Chas. L. Hutchinson was read and the design for the local society's medal, which is now in a fair way to become a substantial reality, was shown at the meeting and generally approved. It is expected the medals will be ready for distribution next month.

American Carnation Society.

CARNATIONS REGISTERED.

Welcome, a pink sport of Mrs. T. W. Lawson, the color of a Bridesmaid rose, identical with its parents excepting in color and calyx which seldom bursts. Color and habit permanently fixed, now in its fourth year. Submitted by Dailedouze Bros., Flatbush, N. Y. This variety is registered provisionally and subject to the approval of the judges at the show in Toronto, Ont., next January.

By F. Dorner & Sons Co., Lafayette, Ind.: Red Chief.—An even clear shade of scarlet, very early and exceptionally free.

Bonnie Maid.—Edged white and shaded to a pink center.

Winona.—A clear medium pink.

ALBERT M. HERR, Sec'y.

Chrysanthemum Society of America.

EXAMINING COMMITTEES.

President Duckham has announced the committees to examine seedlings and sports on dates as follows: October 6, 13, 20, 27 and November 3, 10, 17 and 24, 1906. Exhibits to receive attention from the committees must in all cases be prepaid to destination and the entry fee of $2 should be forwarded to the secretary not later than Tuesday of the week preceding examination, or may accompany the blooms. Special attention is called to the rule requiring that sports to receive a certificate must pass three committees.

New York, Eugene Dailledouze, chairman, 55 and 57 West Twenty-sixth street, New York, Thos. W. Head and Wm. Turner.

Philadelphia, Pa., A. B. Cartledge, chairman, 1514 Chestnut street, John Westcott and Wm. K. Harris.

Boston, Mass., E. A. Wood, chairman, Wm. Nicholson and James Wheeler. Ship flowers to Boston Flower Market, care of John Walsh.

Cincinnati, O., R. Witterstaetter, chairman, James Allen and Wm. Jackson. Ship flowers to Jabez Elliott Flower Market, care of janitor.

Chicago, J. S. Wilson, chairman, J. B. Deamud and Geo. Wienhoeber. Ship flowers care of J. B. Deamud, 51 Wabash avenue.

TRADE EXCELLENT.

Trade conditions still maintain a high average of excellence, with stock a trifle short, prices firm and a daily influx of orders both local and shipping. This is accredited mostly to the weather, which has been cool and dark, with a tendency to shorten stock and elevate prices. Large, substantial orders were filled last week which caused an interchange of business. The retailers, however, are complaining bitterly. They cannot purchase good carnations for anything like reasonable figures and count themselves fortunate at that if they can obtain any of this stock that is really good. There is a dearth of good carnations, most of the material being short-trimmed, extremely soft, and under ordinary circumstances would be relegated to the dump heap. The old reliable substitute, the aster, is also in very bad condition. The white varieties are dirty, short-stemmed and at best but poor specimens. Roses, while fairly plentiful, are not over-abundant and bring stiff prices. American Beauty is not so plentiful as last week although no increase in price was noted. Liberty, Chatenay, Bride and Bridesmaid are in sufficient supply to cover all orders, bringing good figures. The stock, as a whole, is a decided improvement over that of preceding weeks, particularly Bridesmaid. Chrysanthemums are again becoming the center of interest. Some of the earlier varieties drift in and they are eagerly snatched up by the better class of retailers. In the course of a few days, several large houses will open the chrysanthemum season with heavy cuts of Monrovia and Bergman. Extensive preparations are being made for a season of keen competition and some fine blooms are expected.

NOTES.

Benj. Hammond, the well-known insecticide man of Fishkill-on-Hudson, has been calling on his numerous friends in the trade here. He had not visited Chicago since the world's fair and found the place so greatly changed that he lost himself in the city, although, as he stated, in his early days, when the impressions received are hard to obliterate, he was a resident of this state. He declared himself simply amazed when he reviewed the Rose Hill, Poehlmannville, Western Springs and Hinsdale establishments and allowed that there was some ground for pride in the enterprise of our citizens.

The Foley Mfg. Co., on account of its rapidly extending business, has been forced to acquire over three acres of land on Western avenue and Twenty-sixth street for an entirely new plant. This property comprises 47 city lots in an excellent location for this business and to provide for future development some adjoining property has been advantageously leased for a long term. This should hold the "baby" for a while, but we all know he is hard to hold.

Bassett & Washburn expect to open the chrysanthemum season with some heavy cuts this week. They have about 50,000 of the white and yellow varieties, mostly grown to single stems, Monrovia and Bergman predominating. The firm is also bringing in a fine lot of roses and reports a booming business. Michael Rocklin, formerly of Fisher & Rocklin, Kalamazoo, Mich., is now in their employ.

Poehlmann Bros. rejoiced last Tuesday in the receipt of a telegram from August Poehlmann, who is attending the Springfield state fair, saying that the company had been awarded 10 first prizes on roses and seven firsts on carnations.

The next regular meeting of the Florists' Club will be held October 11. This meeting will be quite important, as flower show and other business, including the election of officers, will come up for consideration.

Edw. Amerpohl of the Janesville Floral Co. spent several days in the city last week. He booked a large number of orders for his new fern, the Amerpohlii.

Kennicott Bros. handled an exceptionally large quantity of carnations last week. Their shipping tickets October 1, showed 10,000 carnations received and sold.

Wietor Bros. are cutting some fine Monrovia chrysanthemums this week. The familiar yellow flowers attract much attention and sell rapidly.

The trade visitors at the state fair early this week included H. W. Buckbee, Aug. Poehlmann, E. F. Winterson and Fritzy Bahr.

Catherine Zender, one of Peter Reinberg's many nieces, was one of the prize winners at the Riverview park baby show.

Peter C. Reinberg is cutting heavily of his new Marshall Field rose. The stock is exceptionally fine and sells readily.

Joseph Smely, of Aurora, Ill., passed through this city on his way to Cleveland, where he will visit his mother.

August Martial, of New York, has opened a first-class flower shop at Sixty-third street and Ashland avenue.

A. I. Simmons, captain of the seventh infantry, I. N. G., has been appointed to the staff of the governor.

Weiland & Risch are cutting fine Killarney in quantity. About 5,000 constitutes their daily supply.

L. Coatsworth left the city September 28 for Romney, Ont., where his family is now rusticating.

Prof. Hasselbring is again in the city, having returned from a visit to his old home in Flint, Mich.

Miss Wolf, of the J. A. Budlong Co., has returned from her Colorado vacation.

Webb Randall left the city October 4 to spend a fortnight at West Baden.

Vaughan & Sperry disposed of a single lot of 5,000 carnations last week.

Ed. Winterson made a short business trip to Springfield last week.

John Thorpe has been very much under the weather of late.

Visitors: Geo. F. Crabb, of Crabb & Hunter, Grand Rapids, Mich.; Benj. Hammond, Fishkill-on-Hudson, N. Y.; Mrs. J. E. Rennison and daughter, Sioux City, Ia.; W. S. Hizer, Rockford; Edward Amerpohl, Janesville, Wis.; W. N. Campbell, of Vaughan's Seed Store, New York.

MITCHELL, S. D.—The 1906 corn palace was opened September 23, and everything was in its favor. The Kilties band is the main musical attraction. Inside the palace are exhibits of plants, flowers and bulbs, and fruit and nursery stock outside. The Newburys report that trade was never better than at present, and that the general prosperity is reflected in the way people are buying flowers, plants, shrubs and trees.

BUSINESS INCREASING.

The volume of trade is getting perceptibly larger and there is a fair demand for outdoor flowers and all the medium grades of stock. Dahlias still lead and are seen in all the windows. They have never been better than this season. One dollar to $1.50 per 100 is the price for all the medium grades, while as much as $4 is asked for some of the fancies. Carnations are improving and the extra grades are much in demand. The first selection has moved up to $3 per 100. Violets are now to be seen daily and are very good for the season. Roses are much better, some very fair Bridesmaid, Killarney and Richmond now coming in. Six dollars is about high. American Beauty roses are scarce, that is there is quite a shortage from the local growers, the stock in the commission houses coming mostly from those who supply the New York market. Three dollars per dozen is high. Lily of the valley appears to keep moving. The best is from the local growers, who seem to be able to hold their own or keep a trifle ahead of their out-of-town competitors. Three dollars and $4 appears to be the fixed price.

CLUB MEETING.

The October meeting of the Florists' Club was very well attended. The topic for discussion was the convention of 1907, and many were the expressions of just what should be done to make it the greatest event in the history of the society. The matter of the bedding and outside ornamentation of grounds was kept to the front, and this feature will receive much consideration. The next meeting will also be given up to convention matters when it is expected the ways and means committees will be appointed and other matters of importance settled.

Election of officers resulted as follows: S. S. Pennock, president; Frederick Hohman, vice-president; Edwin Lonsdale, secretary, and J. W. Goldflesh, treasurer.

An exhibit of the new white Hydrangea arborescens grandiflora alba was made by the E. G. Hill Co., Richmond, Ind. The flowers carried well and created much favorable comment, it being a very distinct variety.

NOTES.

Two important events affecting the welfare of the craft of this city have taken place this month. Last week the stockholders of the Wholesale Flower Market agreed to go into liquidation. This removes a one time promising institution as a factor in the business. It required the combined efforts of nearly all the growers and other prominent interests in the business to start the project and now after a three years' trial it has succumbed to the inevitable.

The other happening is the failure of the Florists' Protective Association of the wholesale commission men, which, like many another good thing, has died young. This scheme which aimed to protect its members from loss by a system of reports regarding its customers, died at birth, as, at a special meeting called by the president just as the plan was to become operative, this important personage resigned. Many meetings were held the past summer and much interest was shown by all the commission men, who thought they had solved a difficult problem, that of prompt collections. The difficulty was over the date or arbitrary time set, after which all who had not paid up should be returned delinquent. The twentieth of the month following purchases was to be final pay day. Messrs. Pennock and Meehan, of the new firm, thought finally that this, in justice to some customers, could not be carried out strictly to the letter and so they decided to withdraw from the association, which action we believe has resulted in the disruption of the association.

S. S. Pennock.
President Florists' Club of Philadelphia.

The S. S. Pennock-Meehan Co.'s announcement sent out October 1 is a very neat and artistic booklet. This describes the consolidation, the reasons for it and the advantages to be derived from the union of the two houses. Illustrations are also shown of the offices and various parts of the building, both outside and in. The working organization now consists of 36 persons, 34 employes and the members of the firm. Fifteen telephones, eight Bell and seven Keystone, worked through their own private exchange, gives the concern unequalled facilities for communication with its growers and customers. All the above, together with the facilities of the enlarged building, certainly entitle this firm to a place very near the extreme front in their line.

Our remarks about the kentia situation in and about this city in the last issue, while in the main true, were not correct as to the stock of H. A. Dreer, at Riverton. That firm being always in touch with the palm market foresaw the conditions and laid in a very large stock of these favorite palms and while they have had and supplied the demand from all over the country, they still have a fine stock in all sizes with which to fill belated orders. Their importation of some 60,000 azaleas are now arriving and will keep a large force packing orders for some time. The stock is unusually fine.

The Leo Niessen Co. is much pleased with its fall trade. It is getting in some of the finest cattleyas ever seen in this market. Single violets are selling well with the company; doubles are expected next week. Work on the new building is progressing and the firm expects to move in about six weeks.

Chas. E. Meehan and his assistants moved from the market September 29, taking with him the consignors, all of whom will now send to the new company.

Ed. Reid is getting in some good early yellow chrysanthemums. K.

Parkersburg, W. Va.

J. W. Dudley & Sons are moving into their new place of business, corner of Fifth and Juliana streets. They have announced that they will not have a grand opening in their new place until the chrysanthemum season is on. At the opening, they expect to make the most elaborate floral show they have ever given in Parkersburg. The new floral store is a credit to this progressive and lively town. It represents an investment of $20,000.

The chrysanthemums of this firm are looking fine and 20,000 blooms will be cut this season. The carnations are also in good shape, 18,000 plants having been benched. The list of varieties includes Enchantress, Boston Market, Lawson, Estelle, Wolcott, Mrs. M. A. Patten and Flamingo. In roses he has some 12,000 plants, Ivory, Golden Gate, Chatenay, Kaiserin and Richmond being grown. Flowering plants are also grown for the trade. The entire plant includes 80,000 feet of glass. Ernest Hiehle, son of the late G. A. Hiehle, is the grower

TRADE ACTIVE.

The cool weather experienced within a few days has had a beneficial effect on the flower market. Outside produce has been very largely cut out, much of it altogether, and inside products have been accorded a position not attained for many weeks. Almost everything grown indoors for the market at this season shows an improvement. Roses are rather light in quantity, the latter condition being sufficiently pronounced to send prices up a notch or two. American Beauty, which for some weeks has been held at minimum prices, have run up as high as 40 cents in the special grades and supplies are low at this point. Bride and Bridesmaid, much improved in quality, have also advanced in value, particularly the former, stocks of which, to an extent, are used by commission men to influence sales of the more plentiful pink variety. Kaiserin Augusta Victoria, and Killarney are coming in plentifully and the quality is very fine. Prices run to and over the maximum. Richmond is improving somewhat, but is a slow mover. Carnations are good and stocks of all kinds sell readily. Enchantress is easily first in both supply and demand, and is arriving in better shape than most other varieties. In crimsons, Victory is very prominent, and Lawson for dark and Scott's for light pink form the bulk of arrivals. Boston Market and Abundance are prominent among the offerings of white carnations. Violets are coming in regularly but the quality is not such as to attract the best trade. Arrivals are light in color, puny in size, and earthly in fragrance. Although low in value the street merchants evince no desire to include them among their offerings. Lilies are in demand and the supply is rather short. Lily of the valley commands a good price and is not over-plentiful. Asters are about done, and dahlias are a problem confronting many commission men. Of these many good varieties are offered, and the returns to growers should be quite satisfactory. Top varieties are bringing as high as 8 cents a flower, and varieties such as Countess of Lonsdale, in cactus, and Sylvia, in light pinks, bring good prices easily. Bruton, Kreinhilde and a few other choicer varieties bring prices as high as 10 cents, according to grade. Chrysanthemums are freely offered, and yield good prices. Only the earliest of the market varieties are to be had, however, and prices are of the novelty order.

NOTES.

The Rev. A. Scott, brother of John Scott, president of the Florists' Club, was married last week at Boonton, N. J., to Miss Amelia Hopler, of that town. The reverend gentleman since he came to this country, and before his ordination, was assistant gardener on the estate of T. L. Park, at White Plains, also at the "Castle Gould" estate of Howard Gould, at Port Washington. His employment, however, only covered the summer months, the winters and all his leisure time being taken up for study. By hard study and grit he was enabled to enter the ministry, and is at the present time pastor of the Methodist church at Constable.

In some sections there is reported a shortage of small sizes of kentias. There is a fairly good stock in this immediate vicinity, but from the varieties going off it should not last long. Growers who have taken up the question of bringing along kentias from seed will be interested to learn that a shipment of nearly 10,000 seedling kentias was recently made from a New Jersey point to Ghent, Belgium. It seems like "sending coal to Newcastle," to use an old expression, but it is probably only the beginning of what may become a regular trade.

Edw. C. Matthies, the Woodside, L. I., florist, is dividing his time with the coroner just now. A rather unpleasant odor near his greenhouses on Monday led to the discovery of the body of Frederick Stephan, a German of good family, who had been befriended in adversity to the extent of employment and living, by Mr. Matthies, and who had been missing since September 2. The deceased had evidently committed suicide. A revolver belonging to Mr. Matthies was found near the body.

The exhibits at the meeting of the Florists' Club, October 8, will cover orchids, early chrysanthemums, cosmos, and dahlias. Some fine exhibits are looked for, and the probabilities are that the attendance will be more than ordinarily large. Preparations are being made for a ladies' night on the occasion of the October meeting, with some special offerings in the way of entertainment.

Perkins & Schumann, who have lately occupied quarters at 50 W. Twenty-eighth street, have secured part of the store in the Coogan building, on the Twenty-sixth street side, and will move into the new quarters at once. This will make the second wholesale establishment located on the ground floor of this building, but the only one having a street frontage.

Rudolph Fischer, of Great Neck, L. I., known to the trade at large as the originator of the Abundance carnation, and the white freesia Purity, expects to move to California next spring, where he will embark in the business of growing freesias. His family have already located there.

John Scott, of Flatbush, is sending in to John Young, some grand gardenias, the first of his crop. They are excellent in point of size of flower and stem. Mr. Scott expects by Christmas to send in gardenias with stems longer than any ever seen in this market.

Geo. Mathews, of Great Neck, L. I., has just returned from a three-months trip to Scotland and Ireland. He is now in good trim to follow on with the cultivation of the grand sweet peas for which he achieved such a reputation last winter.

Mrs. K. Laufer, of Queens, is one of the many florists on Long Island who have recently benefited by the land boom now existing there. She has just sold a small piece of land near her establishment for $37,000.

Allan E. Smith, well-known in club circles, has associated himself with Arthur C. Dacre, in the retail florists' business at 48 West Thirtieth street, where they will trade under the firm name of "Dacre."

Alfred H. Langjahr is receiving shipments of dahlias at his Twenty-eighth street store, whole wagon-loads arriving every morning, made up of the varieties, Aurora, Sylvia, and Countess of Lonsdale.

C. W. Ward, of Queens, L. I., was in town on Saturday for the first time since his return from his long season of summer travel in the interest of his business enterprises as well as his health.

Mrs. Pfeiffer, wife of Henry Pfeiffer, the Myrtle avenue florist, Brooklyn, died of typhoid fever on Saturday morning. Mr. Pfeiffer receives the sincere sympathy of all in the trade.

Chas. Abrams, the Brooklyn florist, has been forced out of his quarters by tunnel developments in Brooklyn, and is using temporary quarters at Duffield and Fulton streets.

Joseph J. Levy, of John Seligman & Co. is in harness again after his recent marriage. Joe looks unusually hearty and is already rather settled in views benedictorial.

Mrs. Joseph Joslin, the florist of Ninety-eighth street and Broadway, has sold out her business to E. J. Polykranas, who now has three stores.

A. L. Young & Co., the Twenty-eighth street wholesalers, have made an important rear addition to their premises.

The Cottage Gardens Co., Queens, L. I., has just completed the division and planting of 250,000 peonies.

A. M. Henshaw has extended his quarters somewhat at 52 West Twenty-eighth street.

HEADQUARTERS FOR

CHOICE PLANTS

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

TIMOTHY is advancing slightly and seems very firm. Blue grass the same.

KING EDWARD VII. is among the few short varieties of sweet peas this year.

J. E. NORTHRUP left Chicago for home October 1, having improved very much last week.

VISITED CHICAGO: Wm. Hagemann, New York; Hjalmar Hartmann, Copenhagen, Denmark.

THE Canary islands sold $46,613 worth of onion seed to the United States in 1905, an increase of nearly 300 per cent over 1904.

CARRIED over bean stocks of 1904 and 1905 crops are being offered now at such very low prices that one wonders if they will be worth anything at all next spring.

THE wholesale bulb trade is very brisk now. A clean-up in almost everything is the promise at present. Some florists are still asking for Bermuda Harrisii in large sizes.

THE western potato crop reports show a much larger acreage than usual. Michigan has suffered greatly with drought, the yield there being small. Wisconsin is better, likewise Minnesota and the Dakotas.

SAN JOSE, CAL.—Lester L. Morse became the proud father of a baby boy September 28 and the same day Chas. P. Braslan became the proud grandfather of a blue-eyed baby girl. Both children are doing well.

VENTURA, CAL.—W. H. Francis, son-in-law of W. E. and the late Mrs. Shepherd, took over the management of the Mrs. Theodosia B. Shepherd Co. October 1, and will continue the business along the same lines as heretofore.

THE ALFRED J. BROWN SEED CO., of Grand Rapids, Mich., is placing the Davis Perfect forcing cucumber on the market. This new variety was raised by Eugene Davis, the Michigan cucumber expert and originator of the Grand Rapids forcing lettuce.

WAKEMAN, O.—C. S. Clark reports that seed corn is now being harvested and spread on open slat floors in dry barns to cure. The quality is extra fine and the vitality will be quite strong where curing is given proper attention. Where the corn is left in the fields until hard freezing weather the germ is more or less injured.

5,400 ACRES OF GARDEN SEEDS IN CULTIVATION.
Braslan Seed Growers Co.
WHOLESALE SEED GROWERS.
SAN JOSE, CALIFORNIA.

THE Alfred J. Brown Seed Co., Grand Rapids, Mich, says that its crops of peas are very short, especially wrinkled sorts, both early and late. So far as crops are threshed they will not turn out more than 50 to 60 per cent of a yield and it is feared that when they are all threshed they will average below 50 per cent. This firm has quite a full crop of green podded beans with the exception of a few varieties. Wax varieties did not do as well and will not turn out better than 60 to 70 per cent average. Some varieties will average a full crop, while others, such as Wardell's and Davis' Kidney Wax are less than half a crop.

Rochester, N. Y.

Chas. Hollenbach, son of Peter Hollenbach, Chicago, with his bride passed several pleasant days here as the guests of C. H. Vick.

James Vick's Sons are very busy filling bulb orders, retail and wholesale business being far in excess of last year's.

Ohio Vegetable Growers Indicted.

JEFFERSON, O., Sept. 28.—The grand jury today returned an indictment against members of the Ashtabula Lettuce Growers' Association, who are charged with an unlawful combination to control the price of the output of crops grown under glass, notably lettuce, tomatoes and cucumbers. The men indicted are Ernest E. Dunbar, Charles Hopkins, R. W. Criswold, Jr., Frank Luce, Edwin A. Adams, Jay Adams, R. Wilson Rogers and F. and William Stone.

Vaughan's Osage Gem Melon Renamed.

ED. AMERICAN FLORIST:—

We note that D. V. Burrell, of Rocky Ford, Col., is sending out a musk melon called "Burrell's Gem" or "New Rocky Ford cantaloupe with golden meat." We have tested a crate of these melons, shipped under his label as above, and find them to be nothing more or less than our Osage Gem introduced in 1900 in our general catalogue.

We think it only fair that the seed trade should know through your columns that this is the fact about the melon he is sending out.

VAUGHAN'S SEED STORE.

Chicago, October 3, 1906.

Wisconsin Peas and Beans.

The John H. Allan Seed Co. writes as follows, September 29: "Regarding the pea crop in Wisconsin, our crop is about half in, and we can have a very fair forecast of the result. In this section of the state, which stands dry weather better than wet, the crops average well; while in the northern portion of the state, around Sturgeon Bay, they are coming in far short of a good crop, and, indeed, not nearly up to field estimates, as the hot dry weather succeeding the roguing time, when estimates were made, prevented the pods from filling.

"This shortage is so serious that the outlook is quite different from that of a month ago, and it now seems probable that there will be no more peas of desirable sorts than will be wanted; and there is a distinctly firmer feeling in the atmosphere.

"Very few beans have come in yet, size. In these the bulbs are planted but these, as well as peas, are unusually bright and sound, although the deliveries are less than field estimates."

Among Boston Seedsmen.

The first meeting of the executive committee of the newly inaugurated dahlia society will take place October

☞ WRITE AT ONCE TO

Alfred J. Brown Seed Co.

GRAND RAPIDS, MICH.

—(●●)—

(Only a limited quantity of seed to offer this year.)

6, and business of importance for its future welfare will be transacted.

Manager Maurice Fuld, of the W. W. Rawson Co., has just returned from his western trip, and informs us he enjoyed it immensely. Arthur Webster, formerly with the same firm, is now with the H. E. Fiske Seed Co.

The ball game between the employes of the Schlegel Fottler Co., and those of Joseph Breck & Sons, was forfeited to the former team, making two consecutive years they have held the championship.

The Seed Trade Bowling League opens with its first game, Octobed 9.

Several oil paintings of tulips are on exhibition in the windows of R. & J. Farquhar & Co. They illustrate some very artistic bed designs and charming color effects.

In the windows of the H. E. Fiske Seed Co., the past week, a fine collection of Japanese dwarf trees was on exhibition.

The W. W. Rawson Co. announce that they offer for the spring of 1907, seven new seedlings of decorative and show dahlias, considered superior to any of those now on the market. There was an exceptionally fine exhibition of dahlias in its store the past week.

Visitors: S. B. Dicks, London, Eng.; R. Wise, representing David Sachs, Quedlinburg, Germany. F.

Foreign Competition.

At a meeting of the Horticultural Trades Association of Great Britain held early last month J. Harrison, according to the Horticultural Advertiser, brought forward the subject of foreign competition. He gave instances where roses had been sold for six pence per dozen, clematis at one shilling six pence per dozen and rhododendrons, budded, at three to six pence each, etc., etc., and urged that the council should keep this question before them, and be prepared to act as opportunity offered. Mr. Thompson mentioned a recent case where a gardening paper had gone out of its way to recommend foreign stock. J. Brown thought that influence might be brought to bear upon the better class firms with which members were in connection to put down the practice. Messrs. Perkins, Vallance and others thought that one or two English firms were almost as great sinners in this respect as the foreign ones alluded to. Mr. Basham said that local pressure might sometimes be brought to bear upon auctioneers and others to do away with these sales. Several members were of opinion that the mortality in this cheap auction stock was so great that the mischief done was not so large as it appeared, excepting by accustoming the public to absurdly low prices.

Indianapolis.

BUSINESS BRISK.

The stores enjoyed a good business last week, with plenty of funeral work and a brisk counter trade. Roses were in good demand although the teas still show the effects of warm weather. Carnations are small yet, and short of stem; they are little in demand owing to the heavy supply of outside stock.

NOTES.

Thos. Hart, a very extensive and successful grower of outside flowers is one of the faithful. Although a mere youth, only 79 years of age, he is still waiting for the first gray hair. Mr. Hart works 16 hours a day, and this season, besides attending to his stock and the market, modernized his greenhouses himself.

Martin Nelson has just finished a new house 14 x 100 feet. His geranium seedling Umatella is in excellent shape. A prominent wholesaler recently made him a very flattering offer for the entire stock.

F. Conway's new white aster is highly spoken of by Irvin Bertermann, a great admirer and good judge of asters. Two acres of the Conway aster will be planted for seed next season.

Chas. Wheatcraft is preparing for a trip to Texas. Mrs. Wheatcraft greatly enjoyed her vacation at Toronto.

Geo. W. Swain, the present owner of the Vale Seed Co., reports a very good trade in bulbs. J.

Kansas City.

BUSINESS GOOD.

From all sources comes the report of a satisfactory state of trade. Transient trade is again assuming normal proportions with the passing of the flower garden, and the number of out-of-town orders grows larger which is pretty good assurance that the season has begun. Retail show windows give evidence of the improvement of stock. Wholesalers report a good demand for choice stock. Wedding orders so far have been remarkably numerous and many of good proportions. Several department store openings during the past week, have kept the decorators busy, and made use of many cut flowers. The annual fall festivities occurred this week which brought thousands of visitors from the surrounding states. The Priests of Pallas parade, the principal feature of the week, was more artistic and beautiful than ever. Both the Priests of Pallas and the annual mask ball were well attended. These occasions were held in Convention hall which was decorated profusely. Small stores and street stands and other lines of business profited considerably.

NOTES.

Wm. H. Barnes, secretary of the Kansas State Horticultural Society, compiled a table recently showing the number of trees in the state. The report shows 6,654,536 apple trees; 4,621,147 peach trees; 652,257 cherry trees; 602,013 plum trees; 243,451 pear trees, and 190,708 apricot trees in bearing. Leavenworth county is first in apple trees, having 320,979. Jewell county has more peaches; 221,242 trees in bearing. Wyandotte and Reno counties have the largest number of cherry trees. Wyandotte county having 21,539 and Reno 20,998. These figures show a favorable increase over last year's report.

Edw. Ellsworth is lending his efforts toward the organization of a florists' bowling club. We can see no reason why a city the proportion of ours should lack the social and commercial advantages derived from such an organization. Let every individual connected with the trade tender all possible encouragement to this undertaking.

Chas. M. Wise recently disposed of his place at Twenty-seventh and Holmes streets. At present the plant is under the lease of Max Eller. Mr. Wise evidently believes this city a good place to live in, as he expects to be back in the business in a short time.

"Having more flowers than all the other stores combined" is a pretty broad assertion which recently came to our notice, referring to a certain store. However "having them" and disposing of them are altogether different questions.

Every one is wondering what has become of John Schneider. The last recollection we have of him was last Friday. When Saturday came lo! and behold John, fixtures, and the devil fish had suddenly "skiddooed."

E. Kiley, owner of the Budd Park Greenhouses, is making a pansy seed distribution. According to Mr. Kiley's assertions the idea is a great success as an advertising medium.

Miss Peterson is able to make occasional visits to the store. She is recovering from a serious illness which has kept her away from her interests for about three months.

A new plant food has made an appearance in the stores. It is being distributed by Wm. Bastain, who says the demand has been remarkable since its introduction.

The finishing touches were put on W. L. Rock Flower Co.'s store last week This is without a doubt one of the handsomest and most up-to-date stores in the west.

James Hayes and wife, of Topeka, Kans., remained in the city a few days last week on their return from Excelsior Springs, Mo.

Otto Koenig was among a party from St. Louis which were attending a Masonic convocation here last week.

Mr. King, of the Butte Floral Co., Butte, Mont., stopped a few days on his return from eastern points.

Mrs. Lord, of Topeka, spent last Saturday in the city making purchases of supplies.

Murrays were kept busy last week with weddings and a quantity of funeral work.

Who will be first with chrysanthemums?

K. C.

ROCHESTER, N. Y.—Geo. B. Hart has been compelled to move to more commodious quarters owing to extensive increase in business.

UNIONTOWN, PA.—The firm known as Barton Bros., also as the Barton Floral Co., has been dissolved. The business will be continued under the name of W. R. Barton.—J. H. T.

Batavia, Ill.—D. B. Hazen, landscape gardener, has recently purchased a tract of land on which he intends to establish a nursery of ornamental stock, for use in his landscape work.

NYACK, N. Y.—Samuel Decker, when not engaged with his flower business, is a great curio collector. He possesses an Indian head dress which is composed of twigs braided together with deergut and ornamented with bird feathers of various colors and shells cut in symmetrical shapes.

Ft. Wayne, Ind.

W. J. & M. S. Vesey are cutting some fine chrysanthemums. Their first Opah was cut September 17. They are now cutting Monrovia, which will be followed rapidly with the other varieties. So far they have not been able to meet the demand.

Mrs. Lydia E. Auger has had several large wedding decorations for which she used chrysanthemums and American Beauty roses.

John Scherer has built five new houses in the eastern part of the city and expects to grow carnations.

A. J. Lantineer and Geo. Doswell & Son report prospects good for the coming year.

Miss Flick is kept busy with wedding and funeral orders.

GRAND FORKS, N. D.—E. S. Kneeland has just completed a large greenhouse.

ARAUCARIA IMBRICATA FRESH SEEDS

Just received from Araucania, direct importation. Splendid conditions. Complete success. **The Most Attractive Hardy Tree.** Very convenient for avenues, alleys, parks, pleasure grounds, colonies, etc. Price, packing free, $10.00 per 1000. **Funtumia elastica** (silk rubber) rare seeds, known as a rapid grower of superior quality. $5.00 per 1000.

F. R. PIERSON CO., Tarrytown-on-Hudson, N.Y.

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester N. Y., Sec'y.
Thirty-second annual convention, Detroit, Mich., June, 1907.

THE elm came nearer having a soul than any other tree.
OLIVER WENDELL HOLMES.

COLUMBUS, O.—The council has passed an ordinance appropriating $5,000 to defray the expenses of securing landscape gardeners to plan a new park system for the city.

CORNING, N. Y.—At a recent meeting of the park executive committee, it was voted to employ H. A. Caparn, of New York, to investigate conditions here, preparatory to drawing up plans for the complete development of the park.

WENATCHEE, WASH. — Professor A. Van Holderbeke, ex-commissioner of horticulture of this state and J. F. Littooy, former fruit inspector of Snohomish county, will establish a large fruit nursery. They will have an acreage of 80 acres.

DURING the fiscal year ending June 30, 1906, the United States exported fruit to the value of $14,964,158. Our best customers are Great Britain, Canada, Germany and the Netherlands, in the order named. Our most important export fruits in the order of their value are apples, prunes, oranges, apricots and raisins.

Pittsburg.

TRADE EXCELLENT.

Scarcity of stock was the only handicap to the best week of the season this year. Asters, excepting some culls, are over. Carnations are not coming in heavy enough to supply half the demand and good roses were scarce all week. A great scarcity of lilies also fell on us. Lily of the valley is quite plentiful. Chrysanthemums are beginning to arrive in very limited quantities. All green stock is over plentiful. A slight scarcity of ferns was noticed owing to the extreme dry weather.

NOTES.

Geo. Buloumanos, who runs a stand at Union station, Chicago, tried to locate a place to open up here, but when he heard what local rents were he said his money looked better in his pocket.

J. Frank Tilly, of Bellevue, was elected treasurer of the National Board of Steam Navigation at its convention in New York.

A. T. Lorch is sending the Florists' Exchange some Enchantress and Lawson that have the mid-winter quality.

The Pittsburg Rose and Carnation Co. is cutting daily a fair crop of carnations.

J. B. Murdoch & Co. are handling some select American Beauty roses.

C. K. Hoffmeyer, of Carnegie, has commenced cutting carnations.

Visitors: Paul Berkowitz and H. Fancourt, Philadelphia; Joseph Thomas, Greensburg; and Mr. Case, of Pen-Yan, N. Y. J.

Buffalo.

STOCK IMPROVES.

Variable, rain and cooler weather is our latest. Fowers are improving daily, more especially roses. Carnations are still scarce and of only fair quality. Violets are coming in, as also are chrysanthemums. The first chrysanthemums were on sale Saturday. Several small weddings the past week used some flowers but no great quantity. The present month gives more promise.

NOTES.

The flower department of Hengerer's and the Sweeny Co. are both doing a very good business from all reports. They seem to get more trade from the outside than from the business center.

W. F. Kasting was again honored by the democrats. He was a delegate to the state convention.

S. A. Anderson expects to open his Elmwood avenue branch this month.

Recent visitors: E. J. Fancourt, of the S. S. Pennock-Meehan Co., Philadelphia, Pa., and Miss E. B. Schultheis, Scranton, Pa.

BISON.

Toronto.

CONVENTIONS STIMULATE TRADE.

Business in this city has been the best ever experienced in the summer months. There have been an unusual number of conventions, all of which helped the florists considerably. The I. O. O. F., some 30,000 strong, paraded the city and the different floats and delegates on foot were lavish in their use of flowers. Many bouquets and baskets were also presented. Outdoor stock is about over, with the exception of dahlias, which have only started to come in in quantities. Roses have shortened in quantity, though the stock is considerably benefited by the cool nights, and, now that some steam is being put on, mildew is not so prevalent. Of the varieties, Killarney finds most favor. It is being grown very extensively but is disposed of easily and at good prices. Bride and Bridesmaid are scarce, as also are American Beauty and Richmond, and the prices netted the growers are very good. Carnations are showing splendid quality and the supply is sufficient to meet demands. Marguerites, violets and bouvardia help out in the smaller flowers.

NOTES.

The new store of A. Jennings, in the Rossin block, is a credit, and from present indications and the way in which orders are coming in, the business is very promising.

Yellow and white Lady Fitzwygram chrysanthemums are coming from R. Jennings, of Brampton. Violets and good carnations comprise the other part of his cut.

John H. Dunlop supplied the bouquets and cut flowers used for the fall races. The Steele, Briggs Seed Co. looked after the grounds and supplied the plants.

Wm. McKay has sold his place on Dundas street, West, and is given six weeks in which to remove his houses.

G. Mills and G. D. Manton went fishing for pike, but the rough sea and heavy rains spoiled the catch.

D. J. Sinclair has opened a branch commission house in Montreal and reports very favorable business.

Good American Beauty is coming from G. D. Manton; the flowers, stems and foliage are the best noticed here.

The Bedford Park Co. is cutting good roses, but not enough to go around.

Visitors: Wm. Fendley and R. Jennings, Brampton; J. F. Beyer, of South Bend, Ind. H. G. D.

New Orleans.

MARKET ACTIVE.

The past two weeks showed an increase, especially in the plant line. Early fall weddings in addition to a few large funerals helped to dispose of the regular shipments as well as homegrown flowers. Although some of our society people are gradually coming back from the various summer resorts, the majority will not have returned until the end of October. Heat and frequent heavy showers continue, but the nights are getting cooler, which condition shows its beneficial influence upon the immense quantity of all kinds of foliage plants, ferns and the chrysanthemums. The early varieties of this autumn queen of flowering plants are fairly advanced in buds and should no unforeseen natural destruction happen, the local florists will have on record the largest crop for the coming season.

NOTES.

The convention of the supreme lodge and uniform rank Knights of Pythias will be held here October 16-26. The city is making great preparations for this event. From 125,000 to 150,000 visitors from all over the United States are confidently expected. As a number of grand social functions, such as balls, banquets and innumerable receptions are usually given for the entertainment of the illustrious visitors during such conventions, no doubt many of our florists will be kept very busy during the entire period. In case brother knights among the florists should attend the convention they will receive a hearty welcome from the brethren here.

W. Rehm is making a great tour through the south and west. Richard Eichling, the manager of his St. Charles avenue nursery, has everything in the best of condition for the coming season, making a specialty of ferns, palms and foliage plants. He easily succeeded in rooting a top layer of the big Ficus pandurata, up to now the only one in this city, and promises this effective new plant will be a great feature among the local growers.

Chas. Ebele has returned from an extended trip to the S. A. F. convention at Dayton, O., and several large cities of the west. At his nursery is noticed a beautiful nephrolepis seedling, greatly resembling the newest of this grand fern, the Nephrolepis Amerpohli. The prospects for a good stock of this truly exquisite fern are very promising.

Peter Kaul has a fine lot of strong and well shaped Nephrolepis davallioides fureans and his outdoor chrysanthemums are the farthest advanced of those recently seen. CRESCENT.

JEFFERSON CITY, MO. — The Pioneer Floral Co., of Springfield, has been incorporated with a capital of $5,000.

Columbus, O.

Local florists report a great shortage of stock, the demand almost exceeding the supply. Asters are about gone, and roses remain as about the last resource. Carnations, as yet, are not very good, but the roses, especially white and American Beauty, are making a very good showing.

Wilhelmina Metzmeier, wife of Emil C. Metzmeier, died last Thursday at her home, 1382 S. Fourth street. Mrs. Metzmeier has been sick for the last six years with rheumatism. Once she went to Pasadena, Cal., in a vain effort to find relief. Her husband and six children survive her.

C. A. Roth has just completed two new houses, one of which will be used for chrysanthemums, and the other for violets. Mr. Roth hopes to grow quite a few violets this winter, and has built one of his new houses purposely for them.

At the meeting of the Florists' Club, which was held September 25, plans for the coming chrysanthemum show were discussed.

If bowling alleys can be secured for the winter the bowling club will be reorganized as soon as possible.

Graff Bros. have received some very nice white roses, also American Beauty, this week. CARL.

Grand Rapids.

Eli Cross opened a flower store at 25 Monroe street with a full line of everything kept in a first class place. The refrigerator, counters, shelves and show cases are all finished in white enamel and the entire store is handsomely and appropriately decorated in the most up-to-date manner. The counters are of marble. On opening day, September 29, the entire store was adorned with ferns, asparagus and smilax, with small vases of American Beauty roses and carnations around all the mirrors and windows. Directly in the center of the store were two large vases of Kaiserin roses presented to Mr. Cross by Henry Smith, florist at 125 Monroe street. This act on the part of Mr. Smith appeals to every one as an act of courtesy and shows the good feeling which exists between the two florists. If the business of the first day is a sample of the future, it certainly will be a success. Everyone connected with the trade here extends best wishes to the new firm. The basement is being fitted up in the very latest and approved methods for the proper handling of flowers. N. B.

WEST GROVE, PA.—Louis Wintzer, in the employ of Conard & Jones, was suddenly taken ill a few days ago with symptoms of appendicitis and was hurried to the Pennsylvania hospital, Philadelphia, where an operation disclosed the fact that he was suffering from rupture of the bowels. He is now recovering, the prompt surgical work no doubt saving his life.

The Most Beautiful of all American Terrestrial Orchids

Hardy Cypripedium Reginae (spectabile)
Showy Ladies' Slipper.
This is truly the queen of all the family of Hardy American Orchids. It is extremely rare and shy, having retreated to the cold, deep cedar swamps of our northern United States and Canada. The exquisite beauty of the Ladies' Slipper is unsurpasseed, the broadly ovate sepals and petals being of purest downy white, while the large inflated pouch is a soft red rose color. Blooms in June and early July.
We have a splendid stock of strong clumps, now ready to ship. Prices by express, not paid:

	Each	Per 10	Per 100		Each	Per 10	Per 100
1 to 2 crowns	$0.45	$4 00	$35 00	5 to 6 crowns	$1.00	$ 9 00	$ 80.00
3 to 4 crowns	65	5.00	45.00	7 to 8 crowns	1.50	12.50	110.00

A few splendid clumps with 9 to 15 crowns, at 20c per crown.
Always address HARLAN P. KELSEY, Owner, Salem, Mass.

MABELLE, New Pink Carnation for 1907.

Color—A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson Unlike most pinks, the brightest sun does not injure the color. Size—3 to 4 inches in diameter when established. Odor—Pleasing, but not strong. Stems—Invariably strong, but always graceful, ranging from 12 to 30 inches during the season. Habit, etc.—A very quick, active grower, making specimen plants in a short time, even from late cuttings. On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start. Productiveness—Prodigious is the best word we know of to use here. It is the most incessant bloomer, early and late, we have ever grown. Stock limited. Delivery January 5 to 10 and later. Price, $12.00 per 100, $100.00 per 1000.

Araucaria Excelsa

The Best of All Decorative Plants Nature Produces

OUR SPECIALTY.

Every man in business and life to be successful must adopt one thing as his specialty, and that specialty, whatever he select, of whatever nature it may be, he must guard, study and push to such an extent that it not only benefits himself, but he must conduct it so that everyone who seeks his aid, service or his article, which he advertises or practices, will share a slice of his activity and prosperity. I made the importation and cultivation of Araucarias as a special study in my life. The figures below will show my success in business: In the first year I commenced with an importation of 250. In the eleventh year now, 1906, my importations have grown up to 6,000 (come and see it), and on account of the Araucaria growing yearly more in favor by the plant consuming people all over the country, as a much admired decorative plant for the parlor, bed, dining and sitting room, stores, hotels, lawns and porches the outlook will be for an importation at least of 8,000 to 10,000 in spring of 1907. To secure this vast amount for 1907, I am now on the ocean, per steamer New Amsterdam, leaving Hoboken Aug. 15, striking for Belgium, making contract for next year, 1907. I also shall at the same time bring over with me a large lot of choice Azalea Indica and Palms, etc., for Christmas and Easter flowering. No money will be spared in obtaining for my customers the cream of the Belgium greenhouses only.

Please note lowest prices now going on for August and September:

Araucaria Excelsa.

12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old $ .50
12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old. .60
16 to 18 in. high, 5½ to 6 in. pots, 3 to 4 trs., 3 yr. old .75
18 to 20 in. high, 6-in. pots, 5 to 6 trs., 4 yr. old.. 1.00
20 to 24 in. high, 6-in. pots 5 to 6 trs., 4 yr. old.. 1.25
36 to 50 in. specimen, 7-in pots 6 yr. old, $2.50 to 3.00

Araucaria Compacta Robusta, have 1000 of them, never were so nice as this year. Plants are as broad as long, from 12 to 20 in. in height, 3 to 4 perfect tiers, 20 to 30 in. wide across from one tip of tiers to the other, 3, 4 and 5 years old, 6 to 7-in. pots $1.25, $1.50, $1.75, $2.00, up to $3.00 each.

Araucaria Excelsa Glauca, are perfect jewels in shape and size; their beautiful green-blue tiers make them of such a striking appearance that everybody seeing them must fall in love with them on sight, and cannot help it. Plants, 6 to 7 in. pots, 3, 4 and 5 perfect tiers, 15 to 25 in. in height, from 15 to 30 in. across, $1.25 $1.50, $1.75, $2.00 to $2.50 each.

Please bear in mind these mentioned varieties are the cream of Belgium importations. We have thousands of them; can meet all demands.

Kentia Forsteriana, 6-in. pots, 35 to 40 in. high, 5 to 6 leaves, 4 years old, $1.25 to $1.50; 30 to 35 in. high, 4 years old, 6 in. pots, $1.00; 5½-in. pots, 25 to 30 in. high, 3 years old, 75c; 4-in. pots, made up with three plants, 18 to 20 in. high, 25 to 30c. **Belmoreana,** 6 in. pots, 4 years old, 5 to 6 leaves, bushy, 30 to 35 in. high, $1.25; 5½ to 6 in. pots, 3 years old, 5 to 6 leaves, 75c to $1.00 each. Above are the sizes entered in the custom house. **Kentia Forsteriana,** 7-in. pots, made up plants, on elarge in center, three smaller sizes, about 22 to 24 in. high, price $2.00 each.

OUR LITTLE PETS.

By Aschmann, in Philadelphia, I bought
An Araucaria, a pet for our little girl—
Now we have two pets, the pride of our thought,
The little girl so sweet a head full of curls,
And the Araucaria with their everlasting green—
A more joyful home you never have seen.

Nephrolepis Barrowsii, 6-in., large, ready for 7-8 in. 50c; 4-in., large, 25c.

KILL YOUR SCALE.

If you want to KILL scale on your plants ABSOLUTELY there is only one preparation—

WILSON'S PLANT OIL.

Take a can of this preparation, dilute to four times its bulk with water, and wash or spray your palms, ferns, aspidistras, smilax or any plants subject to bugs or vermin and **your plants will be clean. No alkali. Nothing deleterious. Dries at once.**

READ WHAT OTHERS SAY OF IT.

RUTHERFORD, N. J., June 28, 1906.

We have thoroughly tried your Plant Oil with very striking results. We may say this is the first insecticide we have tried on our palms that will remove the scale with the first application. We would like to say this is one of the few things that the florists cannot afford to be without, especially those who are growing palms and decorative plants. After one application of your oil the plants take on an entirely new appearance. We would be pleased to have prospective buyers visit our nurseries and inspect the palms on which we have used your oil.

BOBBINK & ATKINS.

NEW YORK BOTANICAL GARDEN, Bronx Park, New York City, September 5, 1906.

MR. ANDREW WILSON:—Having used your insecticide here, I can testify to its efficiency in destroying scale and other insects infesting plants.

Yours very truly, GEO. A. SKENE.

WRITE FOR CIRCULAR.

ANDREW WILSON, Summit, N. J.

American Institute Show.

The seventy-fifth fair of the American Institute, New York, was held in the Berkeley Lyceum building, 19-21 West Forty-fourth street, September 25-27. Dahlias formed the bulk of the floral exhibits, and the stagings were, as usual, very fine. Exhibitors were not so numerous as last year, and commercial plantsmen were conspicuous by their absence. In the class for ornamental plants there was only one competitor. A. J. Manda, gardener to Mrs. Chas. Pratt, Brooklyn, N. Y., who staged a collection, which for variety and grouping could hardly be excelled. He also exhibited specimen plants of Maranta rosea-picta, Sphærogyne latifolia, Alocasia Sanderiana, Platycerium biforme, and nepenthes. Lager & Harrell, of Summit, N. J., staged a handsome group of orchids, including varieties of Odontoglossum grande, Miltonia spectabilis Morelliana, M. candida, Cattleya Dowiana, C. labiata and C. superba splendens, Dendrobium formosum giganteum, lælia elegence, and oncidiums, for which they were awarded a special prize.

Bobbink & Atkins, of Rutherford, N. J., exhibited several varieties of cut hardy flowers, but for want of room and good location their staging was not seen to advantage. The fruit displays were very creditable, and the exhibits of vegetable and farm crops up to the usual standard. J. M. Thorburn & Co., New York, made an exceptionally fine showing of vegetables, and W. E. Marshall & Co., New York, exhibited vines of a new winter forcing tomato, said to be an unusually prolific cropper. Following are the awards:

Dahlias, professional classes, best collection of 50 varieties, one flower of each: First, W. P. Lothrop, East Bridgewater, Mass.; second, H. F. Burt, Taunton, Mass.

Best collection of 25 varieties, one flower of each: First, H. F. Burt; second, W. P. Lothrop.

Best collection of 10 varieties, one flower of each: First, H. F. Burt.

Best display of single dahlias: First, W. P. Lothrop; second, J. T. Lovett, Little Silver, N. J.

Best display of cactus dahlias: First, W. P. Lothrop; second, H. F. Burt.

Best display of pompon dahlias: First, W. P. Lothrop; second, H. F. Burt.

Dahlias, general class, open to all, best vase 25 blooms, show dahlias, yellow, one named variety: First, H. F. Burt.

Best vase 25 blooms, show dahlias, white, one named variety: First, H. F. Burt.

Best vase 25 blooms show dahlias, pink, one named variety: First, R. Vincent, Jr., & Son, White Marsh, Md.; second, G. W. Young, Deal, N. J.

Best vase 25 blooms, show dahlias, any other color, one named variety: First, H. F. Burt; second, R. Vincent, Jr., & Son.

Best vase 25 blooms, cactus dahlias, white, one named variety. First, J. T. Lovett; second, R. Vinvent, Jr., & Son.

Best vase 25 blooms, cactus dahlias, any other color, one named variety: First, G. C. Rand, Lawrence, L. I., N. Y.; second, E. D. Adams, Seabright, N. J.

Best six varieties, cactus dahlias, 5 blooms each in vases: First, H. F. Burt; second, E. D. Adams.

Best display of pompon dahlias, in vases: First, Chas. S. Smith, Stamford, Conn.; second, H. F. Burt.

Best vase 50 single dahlias. First, J. T. Lovett; second, H. F. Burt.

Best fancy basket of dahlias: First, Chas. S. Smith.

Best centerpiece of dahlias: First, Chas. S. Smith.

Gladiolus.—Best collection of 50 named varieties: First, Geo. Burchett, Little Falls, N. J.; second, W. P. Lothrop.

Best 25 named varieties. John Lewis Childs, Floral Park, N. Y.

Best 10 named varieties: John Lewis Childs.

Miscellaneous Cut Flowers.—Best 30 varieties of hardy flowers: First, Mrs. T. T. Kinney, Elberon, N. J.; second, Bobbink & Atkins, Rutherford, N. J.

Ornamental Plants.—Best group of flowering and foliage plants, in space not exceeding 60 square feet: O. J. Manda, Brooklyn, N. Y.

W. P. Lothrop, H. F. Burt and G. C. Rand were also awarded special prizes in the dahlia classes. John Lewis Childs was awarded special prizes for a vase of montbretia, pure lemon, and a collection of tuberous rooted begonias; and Martin L. Bell of Sparkle, N. Y., gained special prizes for collections of marigolds and celosia.

Spokane, Wash.

One of the centers of interest at the opening day of the Spokane Interstate fair September 24 was the annual aster show of the Spokane Floral Association in the Home Industry building, which was thronged from morning till night. Competition was spirited, the awards being made by Judges Sanders, Matthews and Burt as follows:

In the professional class, best display of asters, Herman Thoeni was first; Spokane Florist Co., second.

In the amateur class, best and finest asters, E. L. Bloom, first; Mrs. A. P. Magie, second.

Greatest variety of asters, true to name, three of a kind, Miss Frances Burchett, first; Mrs. A. P. Magie, second.

Best 25 tall growing asters, E. L. Bloom, first; Miss Frances Burchett, second.

Greatest variety of dwarf asters, George Mills, first; Mrs. A. P. Magie, second.

Best design in asters, Mrs. J. B. Meyers, whose design was a large aster, first.

Best arranged basket, Mrs. S. H. Hosler, first, with a design representing the horn of plenty; Miss Frances Burchett, second, design representing a swan.

Most oriental design, Miss Becky Magie, first, with a design representing an Indian in a canoe; Miss Grace Dunn, second, design representing a bell.

Most artistic arrangement, Mrs. Louise B. Stratton, first; Mrs. A. P. Magie, second.

Greatest variety of flowers, George Mills, first; Mrs. S. H. Hosler, second.

City Parks, Liberty park, first; Manito park, second.

Palms, Ferns, Etc.

JOHN G. ESLER, Sec'y, SADDLE RIVER, N. J.

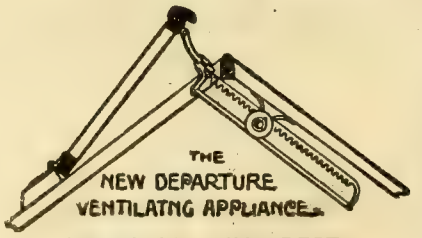
You heard of, if you did not see, our exhibit at the Convention.

HIGHLY RECOMMENDED

for natural prepared variegated Magnolia Wreaths, Adiantums, na ural prepared Chr stmas Trees and Cycas Wreaths with Asters. Keep your "I" on the enterprising florists' supply house.

J. STERN & CO.

1928 Germantown Ave., PHILADELPHIA, PA.



CHEAPEST AND BEST.

If you doubt it try them and be convinced. Send for descriptive price circular.

J. D. Carmody, Evansville, Ind.

Extract from paper read by John H Dunlop before recent convention of the Canadian Horticultural Association:

"Campbell's Sulphur Vaporizer is an English patent and a trifle expensive, but very effective and eliminates almost all of the danger of ignition. We are using eight of them at present with excellent results."

Ventilators, ventilating apparatus of all kinds. Hitchings & Co., 1170 Broadway, New York.

Ventilators, New Departure ventilating appliance. J. D. Carmody, Evansville, Ind.

FUMIGATION METHODS

By PROF. W. G. JOHNSON

Formerly State Entomologist of Maryland

A Practical Treatise and timely work on cheap and effective means of destroying insect pests and other vermin in various places. This work is the outcome of practical tests made by the author, together with the experiences of others, and is one of the most important books published this season and is much needed at this time. It will be of particular interest to

FRUIT GROWERS AND NURSERYMEN owing to the widespread prevalence of the notorious San Jose scale. Hydrocyanic acid gas is the only practical remedy for the destruction of this pest and is being used more extensively than ever before by nurserymen and fruit growers. The perfection of the apparatus for fumigating young orchard trees is outlined in this work. The methods can be easily applied in orchards and nurseries for many dangerous pests at very small cost. The writer is considered the best authority on this subject in this country and has left nothing undone to make this the most complete work of the kind ever published.

GARDENERS AND FLORISTS have found that vegetables and flowers cannot be grown under glass without frequent fumigation for the destruction of insect pests. Hydrocyanic acid gas has solved this problem. The methods of procedure are fully described and every detail is given for generating and applying the gas.

MILLERS AND GRAIN DEALERS have been looking forward to the publication of this work, as hydrocyanic acid gas has been found one of the most important materials for clearing mills and warehouses of insects. The subject of carbon bisulphide for fumigating mills and elevators containing grain in storage is also thoroughly considered. To this trade the work is indispensable and transportation companies have found it of great value for the fumigation of cars, ships and other inclosures infested with vermin.

FARMERS OF THE COUNTRY have here fully described a simple, easy remedy for gophers, prairie dogs, squirrels and other animals in the ground, and rats and mice in any inclosure.

COLLEGE AND STATION WORKERS will find it an up-to-date reference work on this subject. It is complete in every respect and is the only work of the kind ever published. It is written in a popular non-technical style, profusely illustrated, handsomely bound, covering 250 pages, price, postpaid, $1.00.

AMERICAN FLORIST COMPANY,
324 Dearborn St., CHICAGO.

WIRE SUPPORTS.

Wire supports, model extension carnation supports, galvanized wire rose stakes, tying wires, single and double pot hangers. Igoe Bros., 63 Metropolitan Ave., Brooklyn, N. Y.

BOOKS FOR FLORISTS.

The time is coming along when these are needed and opportunity at hand for reading them. Every one of the following should be in your library.

Send prices quoted and we send the books.

GREENHOUSE CONSTRUCTION (Taft).—It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. $1.50.

THE GOLDFISH (Mulertt).—A number of florists find goldfish an attractive and paying addition to their business. The best advice is given in every department of the subject, including construction and care of the parlor aquarium, in this volume of 160 pages, handsomely illustrated. $2.00.

THE PRINCIPLES OF FRUIT GROWING (Bailey).—The entire subject of fruit culture is treated very thoroughly in this illustrated volume of 516 pages. It is a book that no up-to-date fruit grower can afford to be without. $1.25.

CELERY CULTURE (Vaughan).—The important subject of celery culture is thoroughly covered in this illustrated pamphlet of 59 pages. The florist raising young plants of celery and those who grow the plants to maturity will alike find it valuable. 50 cents.

GINSENG (Kains).—At the present time, when so much interest is taken in ginseng, it will be interesting to peruse this volume, which tells all about the plant in a way that all may understand. The 144 pages are freely illustrated. 50 cents.

SUCCESS IN MARKET GARDENING (Rawson).—Written by one of the most prominent and successful market gardeners in the country, and who has the large t glasshouses for forcing vegetables for market in America. Outdoor and indoor crops are treated. Illustrated, $1.00.

MUSHROOMS: HOW TO GROW THEM (Falconer).—The only American book on the subject, 29 illustrations. Written by a practical mushroom grower, who tells the whole story so tersely and plainly that a child can understand it. This book has increased mushroom growing in this country three fold in three years. $1.50.

HEDGES, WINDBREAKS, ETC. (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. $1.25.

Florists' Forcing Bulbs and Roots.

Copyright 1906 by the American Florist Company.

V.—LILY OF THE VALLEY.

Time was when the flowers of lily of the valley could only be had from the middle of January until May, when the last picking of the outdoor crop ended the season. Not so now. The cold storage process and improved cultural methods have led to the production of vast numbers of these flowers at any and all times of the year, and the growing and forcing of lily of the valley must now be considered a most important branch of horticultural industry. Since there is a steady demand at all seasons for well-flowered spikes of lily of the valley, the grower who can furnish them at all times, may safely figure on a fair reward for his labors.

The raising of the pips is mostly in the hands of European experts, who have made this their specialty. It takes from three to four years of skillful preparatory culture to produce pips ready for forcing. The yearly crop is harvested, assorted and shipped in October, usually reaching the American florist about the latter part of November. On arrival a resorting may be necessary if the cases contain the product of various fields and localities. This is all the more important if a portion of the consignment is to go into cold storage. The best place for the storing of newly imported lily of the valley pips is a frame outdoors, in which they will fare best until wanted for forcing during early winter, or until transferred to cold storage rooms, placing the latter in separate frames. So also should those intended for earliest forcing be separated from the others.

This obviates the picking out and turning of the entire contents of the frame every time the regular weekly lot for forcing is taken out, an awkward affair when all is pretty well frozen. This condition, however, does not hurt the pips. After they are unpacked and separated into several grades, to stand the bunches in small boxes deep enough and of a convenient size, with moist earth or sand under, between, and in a thin layer over the pips, placing the boxes in frames, is a good plan, better than heeling-in the bunches in the free soil of the frames, because the transfer of the pips from frame to greenhouse, as they are needed every now and then, thus becomes an easy matter.

As to what constitutes a good pip for retarding and that which should be chosen for early forcing, there still exists some uncertainty in the minds of most growers. It may be taken for granted, however, that a pip with a short, evenly rounded, plump crown, usually of a purplish color, and with roots of medium length, coarse and stubby (the kind grown in heavy clay soils) stands long retarding best, showing least shrinkage and loss of vitality. For early forcing the pip with long, tapering crown of a delicate pinkish hue, the roots long, dense and finely fibered, as grown on light, sandy ground, should be selected. It must here be borne in mind that the pips of lily of the valley stored away in cold frames during the winter cannot be regarded as being held back or retarded in their growth. It is only after March or April when real retarding, with the aid of the cold storage process, and in a temperature of 28° takes place. Pips intended for late forcing should therefore be taken out of frames and stored in early March, before growth takes its natural start, or they may be put in cold storage right after being received. To this end the bunches are dipped in water and repacked in boxes with damp moss under and between them. It is best to have these boxes of a size to hold but one tier of bunches each, the pips closely packed and standing upright with the crowns just showing through the moss. The boxes now being nailed up with slats allows of piling them up one above the other to save room. Four ° below freezing point with as little deviation as possible is the right cold storage mark for lily of the valley.

Newly imported pips are unfit for immediate forcing, and for Christmas and up to the new year cold storage pips must be resorted to for the production

of good spikes. After that the new stock will force, especially if it has a good freezing, but it will take nearly four weeks in a high temperature to bring it into bloom. The later in the season the pips are forced the less time and heat it will take, and the better the quality of the flower spikes. In midsummer and fall it remains but little more than two weeks and no extra heat to coax cold storage pips into bloom. Clumps of lily of the valley roots, the best stock for outdoor plantings, should never be subjected to hard forcing, or indeed to any forcing at all, but slowly brought into bloom in a cool house or frame if needed somewhat earlier than May.

The forcing of lily of the valley in a small way as a desirable side line to the florists' main business calls for no specially devised apparatus. The pips may be planted closely massed in some warm bench with heating pipes underneath and cool overhead, or, a much better way, they may be planted in deep trays or boxes, and these placed on a pretty warm bottom until the flowers are well out, when they should be removed to a cool place to harden off before the spikes are cut for use. Sand or sandy soil will do for the pips, but plenty of water is required to keep this constantly moist.

Especially designed houses, or at least benches, for the forcing of lily of the valley, where this has been made a specialty and large quantities have to be forced in regular succession afford the greatest assurance of unvarying success and render this phase of cut flower production an exceedingly simple affair. A bed of clean sand fills a bench well equipped with piping underneath. Valves, properly placed, enable the grower to increase or reduce the temperature at will and ready means for shading and ventilation are provided.

The pips when brought in and frozen, must first be thawed out by dipping in cold water or by standing them on some cool place for several hours. The long roots are then shortened in by clipping away half an inch or so and the pips are planted in the sand, leaving a space of about an inch between the crowns. The roots should be straight up and down, the crowns just touching the sand at the base, but all the roots must be covered. A sprinkling of moss over and between the crowns will aid in holding moisture, but it is not absolutely necessary. The temperature in the sand should be about 80° or a trifle higher, while the house should be held at 55°. For the first two weeks the bed is heavily shaded and the sand kept in a soaked condition by frequent sprinkling. The shading is then gradually removed and when the bells are opening the overhead spraying must cease but the sand must be kept moist right along until the spikes are cut. A cool stand for a day or two will harden off the spikes sufficiently for bunching, packing and shipping. E.

IOWA CITY, IA.—The board of regents has set aside $3,000 to be used in the construction of a greenhouse for the Department of Botany of the Iowa university. It will be 18x60 feet and half of the structure will be used for growing plants and half for a laboratory.

THE CARNATION.

Seasonable Notes.

The carnations in the houses should now be at a stage where they have attained a sturdy growth and are producing flower shoots freely. Within another couple of weeks one should be able to cut a very fair grade of stock. The plants that have been indoors all summer should be yielding quite freely by this time of a very good quality of blooms or else the indoor culture cannot be considered a success. The cold nights of September and early October, followed by bright sunny days are ideal for carnations, and considerable air should be left on at night if the weather permits. By this I do not mean to keep them down to freezing with the ventilators open, but I would rather see the temperature in the houses down to 45° with a little air on than at 50° and everything closed. Of course it will soon be necessary to start a little firing nights or at least be ready to do so should the weather change suddenly, but generally steady, firing is not necessary until about November 1.

Stem rot has been very prevalent in most parts of the country this season, due no doubt to the rather dry and unseasonable weather we experienced in the summer. Take carnations that stood practically still while in the field on account of lack of water, then lift them in late summer and plant them in the houses and apply water rather freely and there is likely to be considerable stem rot. I believe in watering freely in most cases, but of course the condition of the plants must be taken into consideration.

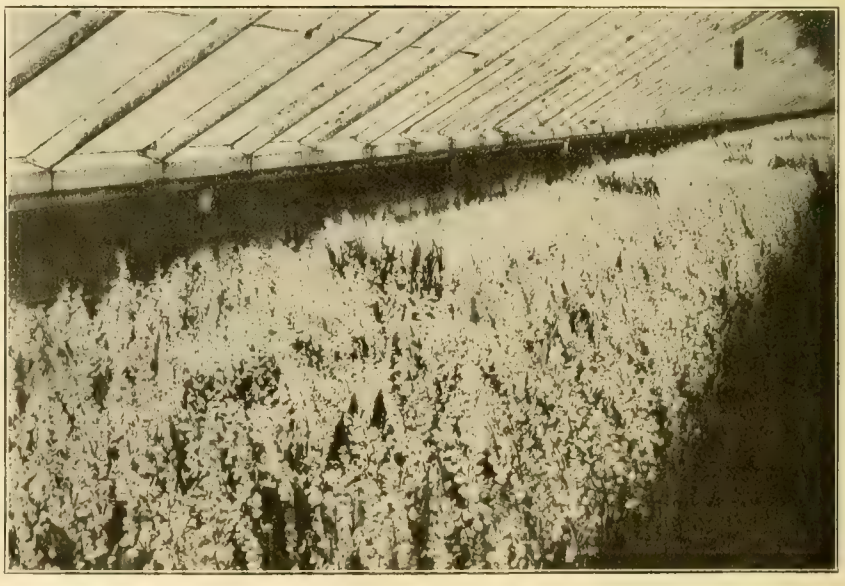
From now on the watering should be done in the forenoon, or by 2 p. m. on bright days. That will give the plants a chance to dry up before evening, a thing most essential in successful carnation culture. The biggest part of the work at present is watering and tying which must be done very effectively and on time. Go over the benches about once a week and attend to the disbudding. Even if there may not be great quantities of buds as yet, it pays to go over them regularly.

This is also the time of the year that one should prepare the soil for next season. If so situated that it is necessary to buy soil it should be hauled in the fall and piled about three feet high. Mix with it about one-fourth cow manure if available. If on the other hand one has the land to take the soil from I advise plowing it in the fall and leaving in the field until ready to haul to the houses next summer. After plowing and cultivating it as often as necessary to get it fine enough add manure according to the richness of the soil. This method is much easier and I consider it better than piling it up at the end of the houses and possibly get it water soaked and sour. It is much better exposed to the frost and air, and can be handled with less than half the labor. J.

Feeding of Carnations.

I believe that there are times when many of us permit our ambition—or shall I call it avarice to acquire the dollar—to overcome our judgment. If in a carnation grower it takes the form of overfeeding the plants, the results will be disastrous. It is true that a carnation soon takes hold of the soil and begins to root, but it should have a good firm hold before any feeding is done. It is supposed that a reasonable amount of old manure was mixed and worked into the soil before it was placed on the benches, and that being the case, it will not be exhausted for some time to come.

I note that of late there has, in some quarters, arisen a sentiment against bone meal, but I have obtained good results by beginning with a fair sprinkling of it. There are several of the commercial fertilizers that are good for carnations, but they should at all times be used sparingly and with caution, particularly in the late fall and early winter the beds should be on the dry



LILY OF THE VALLEY FROM RETARDED ROOTS.—The Garden.

side when bone meal or blood and bone is applied, so as to allow a good watering after. I consider dry fertilizers valueless, and sometimes dangerous to the health of the plants unless well watered. Though admitting that liquid manure shows quick results in bloom, it should certainly not be used until bone or some other building-up food has had time to work.

While mulching in the fall may in some instances bring good results, I do not favor it. At this season it is important that the grower should be able to tell at a glance the condition of his beds. He cannot do so if they are covered by mulch. Furthermore, manure that gives off no stimulant when the beds are watered, as watered they must be, is scarce and not within reach of every grower.

Though it is rather late in the season to write of summer carnations, your correspondent J. writing in the issue of September 22, has so mistaken the meaning of what I previously wrote about summer carnations, that an explanation is necessary. The point of what I did advise was that some early plants (the needs of the grower may govern the number) be brought into bloom in the field, say in July. They will fill a gap until the house plants are flowering. Nobody buys or sells as many flowers in summer as at other seasons, therefore the number of plants may be comparatively small. This has nothing to do with early or late planting for winter flowers, for these plants are not considered as part of the winter crop, though they need not necessarily be lost.

After they are in the field all it costs to grow them is the cultivating and hoeing. In the fall they can be potted in 5-inch pots and sold for house plants. In my locality, and others where I am acquainted, there is always inquiry in the retail stores for such plants.

SPECIALIST.

Diseased Carnations.

ED. AMERICAN FLORIST:—

Under a separate cover I am sending you a sample of my carnations and wish you would examine them and tell me what is the matter with them, giving remedy.

Kentucky. H.

The carnation plants are suffering from two parasites. The long light spots on the leaves and general distortion of the plants result from the attacks of thrips. The dying back of the leaves and the dark spots on them are caused by a fungus, an alternaria. To control the thrips give the house several fumigations of rose leaf extract or some of the nicotine compounds. The fungus trouble may be checked by carefully cutting away all diseased parts, and spraying the plants several times with Bordeaux mixture, the formula for which is given in Farmers' Bulletin 243, U. S. Department of Agriculture.

G.

Experiments With Carnation Soils.

Under the direction of Dr. Galloway, chief of the bureau of plant industry, U. S. Department of Agriculture, Superintendent E. M. Byrnes of the greenhouses is conducting a series of experiments in soils and fertilizers for carnations. A bed, we will say of Enchantress, is divided into sections. In each section there is a different soil, and on each a different fertilizer will be used. Otherwise the plants will receive the same treatment. Experiments are also being made to determine the comparative value of field planting and house culture during the summer. At the close of the season the results of these experiments will be made public and Dr. Galloway and Mr. Byrnes hope to obtain results that will be valuable to the growers of the country. S. E.

BASKET OF LILY OF THE VALLEY.

THE ROSE.

Seasonable Notes.

WATERING.

A great deal of our attention should be given to watering at all seasons, but in the early fall when we are rather uncertain as to what the weather will be for any length of time, it is best to be on the safe side, and not over water. There are times when we can give our plants a good soaking, but it is running somewhat of a risk now. The man that handles the hose should look over the soil carefully and not only examine the surface but be sure to find out how the bottom soil will take the water.

On raised benches this isn't hard to do but the solid beds are more deceptive. I find that a round stick (a piece of broom handle), 18 inches long, sharpened at one end, with notch cut about two inches from the sharpened end made in such a manner that when the stick is shoved into the solid beds the notch will if cut long enough, bring up a portion of the bottom soil for examination. This will hardly disturb the soil or the roots and when one is in doubt, this simple contrivance will be found useful.

As firing has fairly started in most sections, syringing will now have to be done thoroughly, syringing from all sides, and spraying with force well under the foliage. To do this properly one must reach well in through the rows. Red spiders usually make their appearance shortly after firing begins, and it is due to carelessness more than to any other cause that this class of insects gets a foothold. Syringing with pressure, and doing the work thoroughly, is a preventive and cure, all in one.

FUMIGATING.

Fumigate from now on at least once a week and do not use tobacco stems for this purpose. It is not a cheap method by any means for the amount of flowers more or less injured every time tobacco stems are used, will more than pay for the fumigating papers now on the market, or the liquids, any of which are good. I find that tobakine or nikoteen either in the paper or liquid form, if used judiciously, will not injure the flowers or the most tender growth and I consider it far cheaper for this reason, than tobacco stems if I could get the stems for nothing. Five or six sheets of the paper to a house 20 x 100 feet (unless the aphis has overrun things) will be found sufficient, as a weekly application, and if the papers or liquids are used early in the mornings say about 5 a. m. and then followed up with a good syringing, one is rarely troubled with green fly. The night man can attend to this very handily at this season.

DISBUDDING.

The autumn queen, the chrysanthemum, will as usual make the rose take a back seat for a short while, or at least it will have the tendency of keeping the price down on any but the best grades of roses. Therefore I think it best to let only the long stemmed flowers come through the month of October. There are several things to remember. One of them is to have, if possible, the rose cut at its best between October 20 and November 1 if one desires a fair cut for the Christ-

mas holidays. I do not mean by this to crop the roses, but to have them cut fairly heavy at this time. Another thing, all the good wood we can induce our plants to make now will help to pull them through the darker days of midwinter, consequently the short-stemmed flowers should not be allowed to bloom. Rather let this growth build up the plants; try this. E.

Raising New Roses.

In theory it is a simple thing to raise a new rose, a mere matter of placing the pollen from one rose bloom upon the matured stigmas of another; albeit, in actual practice, in the search for pollen, in the timing of the varieties, even in the germination of the seeds, considerable patience and ingenuity is required. But these difficulties are not to be compared to those which arise when we come to consider the question of the mating of varieties, for it is in the faculty of conceiving a particular end, and in discerning how that end may be achieved that the essence of successful rose hybridisation lies. The raiser of new roses must be able to divine qualities more or less latent which, by crossing, may be developed and improved.

When it is recollected how in the past so much has been left to chance, we see how vague and uncertain the indications are on which to depend, and it is then not surprising that so many first crosses give results so much at variance with the raiser's expectations. It is only as he gradually progresses through successive hybridizations that he finds certain tendencies become confirmed, and it is only then that he obtains control and can modify materially these tendencies at his will.

An example of what can be done on these lines will not perhaps be out of place here. When M. Pernet Ducher, now perhaps the supreme exponent of rose hybridization, began his scheme for a new race of hardy yellow roses, he seems to have commenced with several simultaneous crosses of a tentative nature, including the almost daring one with Persian yellow, Soleil d'Or, and, following along these lines, parallel at first, then converging and combining, he evolved that fine race of yellow roses, which possesses the habit of the best hybrid teas with the depths of color of the Austrian briars.

In a wider field the many fine novelties of the Messrs. Dickson, with undoubted signs of descent from previous hybrids, show in their growth and habit characteristics peculiarly their own.

The National Rose Society is to be blamed that in the past it has, in an inordinate desire for conventionality of form, so completely ignored color and perfume, the two most charming attributes of the rose, and it is only in the last two or three years that wiser counsels have to any extent prevailed. Here then is a field which still remains fairly open, and I would suggest to the amateur hybridiser to go back to the species and old-fashioned varieties amongst which to work. Several of the most beautiful kinds of late years, kinds whose greatest charm lies in their distinctness, are first crosses with a species, i. e., those hybrids with Rosa Wichuraiana, whose introduction has added a new feature to our rose gardens; Una, one of a batch of seedlings from the dog rose, crossed with tea roses; the Penzance briars; and the beautiful Anemone, a hybrid of R. sinica and R. indica. All these are evidence of the gains to be in this way obtained. Species which have possibilities are Rosa bracteata, R. rubrifolia, and R. moschata, but there are many others.

The work will be long and tedious, with many failures, for seedlings have a habit of dying off, and it is an unhappy sight to watch the slow decline of a potentially valuable nursling. Yet to create a new rose which is a distinct advance is worth more than all these troubles and pains.

I have a dim recollection from my school-days of some poet of olden time, it was Pindar perhaps, who said, in effect, that a great statue or picture could only be viewed by those on the spot. A rose is not so, for a La France or a Gloire de Dijon may adorn all gardens even unto the uttermost parts of the earth. So that the raiser who perseveres through years of thought and toil will, in some lovely new flower, find his reward, not only in the fruition of his hopes, but also in the delight of his neighbors.

Roses and Dahlias in England.

Just as an excellent rose season is coming to a close a cloud comes over the hearts of rosarians by the death of Harry Turner, head of the firm of Chas. Turner, Slough. He had a wide knowledge of plants and flowers, more especially roses, dahlias and carnations, and was one of the original Victorian medallists in horticulture. To him the famous Crimson Rambler rose owes its popularity. Introduced from Japan about 1889 it was in the hands of Mr. Jenner, of Edinburgh, and Mr. Gilbert, a Lincolnshire nurseryman, but did not make much headway until taken in hand by Mr. Turner who worked up a grand stock and sent it out as Crimson Rambler. Originally it was known as the Engineer, having been the original plant brought from the mikado's kingdom by an engineer and presented to Mr. Jenner. Mr. Turner was of a happy and genial disposition and a capital musician, frequently contributing to the entertainment of his brother horticulturists.

At our exhibitions this year varieties that have been prominent include Bessie Brown, Mildred Grant, White Maman Cochet and Frau Karl Druschki. Dean Hole, less frequently seen, has many admirers. J. B. Clarke, awarded gold medal last year by the National Rose Society, has again been shown in capital form, and is a grand exhibition rose. Killarney is a charming flower captivating hosts of admirers at every show.

Gold medal varieties of this year include Dorothy Page Roberts from Alex. Dickson & Sons, Newtownards and Mrs. Stewart Clarke from Hugh Dickson, Belfast. The former is a hybrid tea of a charming rosy pink hue suffused with apricot and was exhibited in superb form at the National Rose Society's autumn exhibition on September 19. Mrs. Stewart Clarke will also prove a valuable addition to the hybrid teas. It is a cross between Rubens and Tom Wood and the large full flowers are a lovely shade of cerise pink. I recently spent a happy hour among the seedlings in Hugh Dickson's nurseries and noted with interest the systematic manner in which hybridising is carried on. Several good things are on the tapis for introduction in the near future.

Dahlia shows have been quite up to their usual standard and quite a large number of new varieties have received awards and certificates. J. Stredwick & Sons, St. Leonards, have been singularly fortunate in the cactus section and Hobbies, Ltd., Dereham, have also been well in evidence. In show varieties, S. Mortimer, Farnham, maintains a leading position and Claret Cup and Gloria are two of his raising included in this year's list of honors. The peony-flowered varieties, introduced by Copyn & Son, and Gt. Van Waveren and Krupff, both Dutch firms, have been enthusiastically taken up and excellently staged by Hobbies, Ltd., Dereham, Dobbie & Co., Rothesay, and Baker's, Wolverhampton.

At the London Dahlia Union show the Dutch firms named put up an exhibit of splendid blooms showing several new shades of color in the peony-flowered section. I particularly noted the following: Miss Gladys Dawson, yellow shaded salmon; Kaiserin Augusta Victoria, delicate primrose, full flower of good form, long erect stems; King Leopold, yellow, full broad petals, and La Riante, heliotrope shaded pink, free graceful habit. For decorative effects in the garden these varieties may be safely included in every collection. German growers are taking up this class of dahlias in earnest and the introducers exhibited a fine collection at the Berlin dahlia show. Some of our English dahlia fanciers do not take kindly to the new-comers yet, but on the other hand ladies have been captivated by the graceful contour and charming colors and many gardens will be gay with the peony-flowered dahlias next year.

BEE.

The Dahlia.

Until of late dahlias were not very extensively used in their cut state for decorative purposes, because the most beautiful of the type contained but very few varieties that combined in themselves all the essential qualities to commend them to florists for that purpose. But the improvements, noticeable in the cactus type, as shown in the many excellent varieties of one color of recent introduction, have caused them to be used a great deal in decorative work, especially in the making up of set pieces for dinner table decorations. Because there is usually no necessity for the flowers used in these to last longer than one evening they are invariably stemmed.

The cactus type, in its many good varieties, is unrivalled in beauty and when made up well by florists it is as effective as flowers that are scarcer, more expensive and harder to cultivate. Some of the best have not had stems suitable to allow them to be used in

FIVE OF THE BEST DAHLIAS OF RECENT INTRODUCTION.

vases in the way other flowers have been.

For the good of the dahlia in many of the best varieties of recent introduction there is a noticeable improvement in stem. Of the many good varieties of recent introduction in the cactus type I think Santa Rosa is the best in every particular. It is a pure cactus, very large, full and of exceedingly good form and substance and a good strong stem. It is one of the six comprising a set raised by Luther Burbank and sent out this last spring by Vaughan's Seed Store. It has made a very favorable impression wherever seen. I believe it is one of the best red cactus dahlias in cultivation. There is another dahlia, not of the cactus type however, grown this year and raised last year by James Robertson of Newport, R. I. It is a superb single and called Imperialino, under which name it was exhibited and won a silver medal, a deserved award. This variety some what resembles Pink Century, but it is much larger, an average bloom measuring 7½ inches across. It has a strong stem when well grown measuring two feet and over. In color the inside of the petals is a rich dark pink with yellow center shading towards the points to a pale pink. This variety has the other excellent quality of being a good keeper; it will stand well in water for five days.

Single dahlias are very effective for various forms of decoration and when they can be had of good color, strong stem and large bloom they will be utilized to a greater extent than they have been, an eventuality that will help to put dahlias on a good commercial footing, without which they in time would cease to have the interest centered in them necessary to sustain the greatly increased establishments devoted to their cultivation and distribution.

Decorative dahlias, for the reasons before mentioned, were fully as useful to florists as the cactus type, but it is rather singular that growers and raisers of new varieties of dahlias do not pay much attention to the type. I have not seen one new one this year to be compared with Catherine Duer as a red, neither has my eye caught a glimpse of a pink to be compared with Nymphæa. It is true of course that both these varieties are almost as near perfection as is possible to make dahlias of that character, but still that was said of several cactus varieties years ago, while all of a sudden Santa Rosa surpasses them all in some respects.

The season of the year when dahlia flowers are at their best the demand for cut flower material of all kinds is at its lowest ebb. That fact also, in a great measure, prevents them from receiving more consideration from dealers, but when growers come down to a practical working basis with dahlias as they have with other kinds of flowers and grow only such varieties as are suited for the purposes of their business, and grow these in sufficient quantities to meet all possible demands dahlias will find a place for themselves in the commercial world, and a more important place by far than such flowers as asters and antirrhinums, and will equal lilies and other staples.

The accompanying illustration shows five of the best dahlias of recent introduction, four cactus and one single. The cactus varieties are, Santa Rosa, and Phineas, both red, Venus, a very good yellow, and Schneewitchen a very good white, with Imperialino the best by all odds of existing singles in the center. In addition to these the following varieties are also all very good:

CACTUS DAHLIAS RECENTLY INTRODUCED.

Aurora, yellow and rose with white points.
Fairy, a very good white.
Sweet Nell, pink with a pale center.
Thuringia, orange scarlet very large.
Beacon, bright crimson.
Florence M. Stredwick, very fine white.
Northern Star, large, crimson scarlet.
Flamingo, bright scarlet.
Amos Perry, scarlet, one of the best.

H. F. Robertson, true yellow with narrow petals.

Maid of Honor, peach pink.

Mrs. Mawley, yellow, good for late blooming.

Spotless Queen, pure white, very free.

Iceberg, ivory, very pointed petals.

Charm, yellow base, red next, with white tips.

ESTABLISHMENT OF THE COTTAGE GARDENS CO., QUEENS, L. I., N. Y.

New office building and one of the three new greenhouses.—See page 556.

GOOD DECORATIVE DAHLIAS.

Janet Ogilvy, pink and white, the best of recent introduction.

Jeanne Charmet, white with violet red and lilac.

Souv. de Gustave Douzon, orange red.

Mrs. Roosevelt, very large, delicate pink.

M.

O'Mara on Burbank.

A PAMPHLET RECENTLY PUBLISHED.

Following my visit to Santa Rosa, Cal., and a short trip on the Pacific coast, in the summer of 1905, I very briefly alluded to the work of Luther Burbank as a plant breeder before a meeting of the New York Florists' Club, taking the ground that his achievements in that line did not warrant the fulsome and extravagant praises bestowed on him by certain writers in the magazines and current newspapers. The few remarks I made were generally sustained by writers in the horticultural press in the United States and abroad. At the request of many who are interested in the subject I have undertaken to amplify what I said then and incorporate some of what has been written on the subject since that time.

As a fair start, so to speak, be it remembered, that the climatic conditions existing on the Pacific slope are diametrically opposite to those encountered in the east. Many plants which succeed there fail here. A plant that will thrive here is in all likelihood going to thrive there. A notable example is the European grape vine, which does admirably on the Pacific slope and will not thrive here. As a further example I would cite fuchsias and ivy geraniums, they will not flourish here as they do on the Pacific coast.

Practical men have therefore looked for many years with some suspicion on varieties which occur on the Pacific slope, and when they come heralded with all manner of praise—such praise as only the golden west can bestow upon its products—we do not accept them with all the praise that the golden west puts upon them. We go cautiously. We say we will try them here first. Many of the plants that have come out of the golden west have been sad failures in the leaden east, if I may so dub it. I have a very distinct recollection when the Oregon ever-bearing strawberry was launched upon an unsuspecting public. I pricked up my ears and said to the man who urged it upon me, "I am rather inclined to believe that we require the soil and particularly the climate of the Pacific coast to get out of that variety all that you get out of it there." What I feared was the result. The Oregon ever-bearing strawberry was tried extensively in the east and it failed and disappeared completely. Sometime after this the name of Burbank loomed up on the horticultural horizon, and it came to us in a very peculiar way, through a very modest little booklet, his catalogue, modest in appearance but not very modest in its title. It found its way east and it was dubbed "The Creations of Mr. Burbank."

Many are rather inclined to believe that there is only one Creator and once a week at least we bend in reverence to Him. The position which I took in relation to that title when I made my first public utterance upon it has been questioned by very good friends of mine. I still believe that when Luther Burbank assumed the title of a "creator" of new plants, he filed a presumptious claim, and that he has no more right to claim the title of "creator" of new plants than he has to apply it to the bee that flits from flower to flower and carries the pollen; that he has no more right to claim it than the insects, or the winds. However, it gave an index as to what might be expected from such a source, and many were very wary of everything emanating from it. That wariness, up to the present time, has been fully justified by the results. I will not go over the entire list of "creations" but beginning with the potato which Mr. Burbank "created" in Massachusetts, and which was a "volunteer" seedling of the Early Rose not hybridized by him. It was a good potato, but it has outlived its usefulness in the east at all events. It is still, I understand, cultivated in the west; and it is said to be peculiarly adapted to the climate of the Pacific coast, where there is a considerable precipitation of rain.

But there have been other men working on the potato, such as E. L. Coy, who has raised many good potatoes, and I want to say that the Early Rose, which the Burbank was supposed to supersede, is still grown here, while the Burbank has almost disappeared. Mr. Coy also raised the various Hebron varieties, the Beauty of Hebron and so forth. E. F. Carman, late editor of the Rural New Yorker, is also responsible for several excellent varieties of the various Rural potatoes, such as the Rural New Yorker, Rural Blush, Carman Nos. 1, 2, and 3; they are all potatoes which have superseded and outlived the Burbank. So much for that particular part of Mr. Burbank's achievements.

There are three views of Mr. Burbank at the present time; one is the view of the magazine writer, although I can hardly class Mr. Wickson of the University of California in that category, nothithstanding he has written for the Sunset Magazine, contributing splendid articles in relation to Mr. Burbank and his work. These articles were subsequently issued in book form under the title: "Luther Burbank, An Appreciation." Many friends and admirers of Mr. Burbank contend that he is not responsible for the extravagant claims made for him in that publication; but it is well to bear in mind that he helped to circulate it and therefore gave a semblance of sanction to its contents.

When I visited Mr. Burbank's gardens at Santa Rosa, I did not see anything startling in the place (and I want to say it fearlessly and candidly and without prejudice) to warrant the reputation given to Mr. Burbank in the magazines, either by Mr. Wickson or Mr. Harwood. When I returned to New York I was interviewed by the editor of the Florists' Exchange as to my trip. I didn't intend to initiate a controversy, but dropped the remark that I did not see anything on the place to show me that Mr. Burbank was entitled to the reputation he had received from the magazines. That remark called for the reply by Mr. Burpee of Philadelphia, trying to show me the light, but I could not see the light, and at a subseqpent meeting of the New York Florists' Club, I enlarged on the subject, and thus my name became connected with "Burbankitis," as it is called.

Mr. Burbank unquestionably says things very well; at least I think so. He has a happy knack of saying things. A good many of them are somewhat involved, but nevertheless, a thing that one cannot quite understand appeals to us sometimes as being very wise. But he says some things that appear easy to understand, and one of them is this: "Heredity is the sum of all past environment." Now if heredity is the sum of all past environments, it is a foregone conclusion that a plant pro-

duced in the climate of California and raised in that climate will have to dissociate itself from its environment when it is brought east, and therefore it is heavily handicapped before it can achieve distinction in commerce in this section of the country. This is from "An Appreciation," by Mr. Wickson: "For such a gifted seer neither weird altar fires nor incense cloud nor ecstatic state could add to insight. He could hear the 'still small voice' without preparatory earthquake or whirlwind. Like David of old, he could do his work with smooth pebbles from the brook and he cast aside the elaborate armament of his scientific brethren lest it should impede his movements."

There is a desperate attempt being made to make a scientific man out of Mr. Burbank; that is, to put him amongst the scientists, or rather, to make him first among equals, or even to put him above the scientist; in fact above the men whom we florists have come to regard as scientists such as the men in charge of experiment stations and the United States Department of Agriculture.

I want to remark parenthetically, from having read what Mr. Burbank has written, and from Mr. Harwood in the magazines — also from what I have gleaned from his little books of "creations," that I am rather inclined to think his (Mr. Burbank's) science is somewhat of the Mary Baker Eddy or Helen Wilmans order.

The next quotation is: "Plant development is one of the phases of civilization, and it makes new conquests as they are needed in the onward rush of mankind. We are now at the beginning of an epoch of accelerated motion in this direction. Burbank is the prophet of this epoch. Obeying the command of the infinite he is carrying the gates of Gaza. Let not the Delilah of modern organization shear him of his God given strength and make him like other men." Then he reaches out and gets the $100,000.

The other day we had Professor Ostwald of Leipsic lecturing at Columbia university. I do not believe the professor ever met Mr. Burbank, and therefore he must have drawn his inspiration from the published accounts. He believes "that science is able to produce a piece of protoplasm and command it in the first step of evolution; that man has control of vegetable life, taking it out of the slow hands of nature and hastening its evolution from one form to another. The man Burbank, for instance, has so assisted nature in this work that she is almost out of a job. By combination and evolution, he produces new forms at will, and endows them with economic values that nature left undeveloped. We call him a great horticulturist. He is one of the greatest biologists in the use of existing forms to produce others that nature did not make until shown the way." The great poet said: "The art itself is nature."

In Burbank's "creations" for 1901, his foreword in the little booklet reads as follows: "Education and selection are the two greatest forces used in the production of all these fruits and flowers. Not knowing the facts, and because some of them happen to be crossed, people often jump to the conclusion that they are summarily produced by crossing, and with about as little science or ceremony as a wizard would appear to do it with his magic wand."

Cross fertilization is the only process that will produce new varieties, except mutations from buds, these are the only ways in which new varieties are produced. When anyone speaks about "educating" a plant to be a new variety, I think he is mistaken, and that is why I thought that Mr. Burbank's science was of the Mary Baker Eddy or Helen Wilmans order. Others have boldly come out and said that by mental processes exercised on a certain plant they can change its character.

Mr. Burbank says about "educating" a plant: "We do not fill this catalogue with testimonials of the value of these new fruits and flowers, though we have enough to fill one 20 times as large. The best way to judge of the value of any novelty is to look to its source, and the fruits and flowers which has been bred and educated on Burbank's experimental farms and now growing all around the world are the very best testimony which can be given."

Further on in the same book he says: "During the past few years when Shasta daisies were being bred and educated up to their state." I wish to say, and make it as emphatic as possible, that in my opinion no exercise of the human mind by way of suggestive thought directed upon a plant can change one cell or filament of it.

Now, let me say a word about the Shasta daisy. When the magazines and the daily newspapers issued side by side pictures of an ordinary daisy and of a Shasta daisy, my suspicions were allayed at once. I said, "if anybody can produce from an ordinary daisy growing in that climate a flower of this size it will not deteriorate in the east. Therefore, I thought we were safe in taking that. We obtained some Shasta daisy seed. We raised enough plants to fill two frames, and when they bloomed, we sent a man up there with a hoe and he hoed them all out and threw them over the fence, because they were hardly any better than the ordinary field daisy, which grows in the fields of the east. It is only fair to say that I believe the Shasta daisy has been very much improved since that time and is now generally recognized as an acquisition.

On the front of the catalogue for 1901 of the "Creations" of Burbank, there is a picture of a plum tree known as the Burbank plum. The Burbank plum is an importation pure and simple; he got it from Japan and he never produced it at all. In Burbank's catalogue for that year occurs the following, copied from the Santa Rosa Republican. The first line says: "The Creation of the horticultural wizard are so wonderful that even science has to be convinced."

A great many of his friends say that he does not want to be called a wizard and that what is said of him is said without his knowledge and consent, but in this particular matter that somewhat offensive word occurs. The article continues:

An amusing incident in the visit of the Associated Agricultural Colleges and Experiment Stations of America to the Sebastopol grounds give a fair illustration. When the party had traversed but a small portion of the grounds and tested but a few of the fruits therein, one of the professors called a halt, requesting from his brethren their brief attention. Calling upon Mr. Burbank to step forward so that all might the better view him, the producer of the wonders, he delivering the following: Gentlemen, in the presence of you all I wish to make known that one of my objects in coming to this coast was to expose Mr. Burbank's fraud. I have read that man's catalogue annually and I have long considered him about the biggest liar in the United States. I now retract all that and declare that Mr. Burbank has never told one-half the marvels that he might. Gentlemen, hats off to the wizard before you." The motion needed no second.

This needs no comment from me. This I quote from Mr. Harwood. Mr. Burbank is supposed to say:

We say to Miss Golden Cup, or Miss Eschscholtzia as the bon-ton call her.

ESTABLISHMENT OF THE COTTAGE GARDENS CO., QUEENS, L. I., N. Y.

Group of evergreens with tall specimen of Cedrus Atlantica glauca in rear. -See page 556.

this beautiful dress of bright golden hue which you have always worn on all occasions is very becoming to you, and exceedingly appropriate to this land of perpetual sunshine, but, Miss Queen Golden Cup, if you will sometimes adorn yourself with a dress of white, pale cream, pink or crimson, we could love you still better than we do. Now, Miss Eschscholzia, though having her family tastes and characteristics very thoroughly fixed, still belongs to the great papaver race, which has often shown itself willing to adapt itself to the discipline of new conditions, even at first distasteful in the extreme. So, taking Miss Golden Cup into our gardens and constantly making these suggestions to her, she hesitatingly consents to don a dress a shade lighter in color, and then lighter still, until now we have her not only in dresses of gold, but in deepest orange, light and dark shades of cream, purest snowy white, or all these combined, and by constant selection and various educational influence in this line, she will adorn herself in a dress of almost any color which may be desirable and at the same time seems to take the greatest pleasure in improving herself in every grace of form and feature.

This particular flower, as is well known, is the flower of California, which grows all over the fields, making them golden. In Mr. Harwood's book he tells very touchingly of how Mr. Burbank going over a field one evening, noticed a delicate stain of red in one of the flowers. His eagle glance caught it and he saved that particular plant. After four or five years, I have forgotten which, he was able to put upon the market a beautiful crimson Eschscholtzia, which is offered by a Philadelphia seed house this year. That is an achievement in itself without question. But look at another side of it. Over in England 20 years ago Carter, of London, who had been devoting some attention to Miss Eschscholtzia or Golden Cup, produced the variety Mandarin, a distinct break from the yellow, an orange colored one. About seven years ago or thereabouts they produced the Rose Cardinal, a rose colored one. This year they offer the Crimson King. I have not seen the variety, but the color plate, contrasted with Burbank's shows that Carter's variety is by all odds the better of the two. I merely mention that to show that without any great flourish of trumpets, but simply by the ordinary processes of fertilization, selection and propogation, as to this particular flower, others are accomplishing what is said to be a marvellous achievement by Mr. Burbank.

The English people, particularly the Kew authorities, attracted by the noise and furor in the magazines, and seeing that the American people were not sufficiently appreciative of Burbank and that the great catalogue houses were rather chary of offering these wonders, and thinking that perhaps it was the old story of the prophet without honor in his own country, wrote to Burbank and asked him if he would sell or exchange some of these various marvels which he was supposed to have. I quote his letter in reply:

May 8, 1905.

My Dear Sir:—Your esteemed note of April 10 received. I am sorry to say that the press has gotten hold of my work a little too soon. I have a great number of hybrid thornless cacti, but it takes time and thought to select the ones which are to be winners, and I have been obliged to make an invariable rule never to send out anything until it is properly finished.

Then I thought of the Shasta daisies that we hoed out:

The perpetual poppy and fragrant dahlia will probably be sent out by a Chicago firm next season. The pomato will not be ready for a year or two.

This pomato is a cross between the potato and the tomato, they belong to the same family and so will cross; it has been done before; I think it is just 16 years ago last summer since E. S. Carman, in a paper read before the Society of American Florists in Boston, told how he had effected this cross. It was of no particular use. Of course, Mr. Burbank may make use of it, but as an achievement it is nothing.

The coreless apple fraud is none of my work; I must add that it is no doubt worthless; though I have known it for 40 years. I shall be pleased to exchange with you when I have these ready for introduction.

My object in injecting this letter is to show that while these things are probably in existence, yet as far as being of any economic value or being on the market, as most of us were led to believe, they were not available at that particular time.

The cactus is mentioned there. If there is any one plant attributed to Mr. Burbank that has seemed to catch the popular fancy more than another, it is the spineless cactus. I think I have heard more of that than anything else—to think that a man could by manipulation take that miserable thing, that you could not even look at without feeling hurt, and breed all those thorns off of it, so that you might sit down on it if you wanted to. I never crossed the desert myself except on a railroad train, but I can imagine that if a man is crossing the desert and wants to sit down, how handy it would be to have one of these thornless cacti handy; I want to say in all seriousness that so far as I know, the original plant which Burbank had was given to him right straight out of the Department of Agriculture. Harwood in these magazine articles distinctly credits Burbank with having "created" it, and during the months which intervened between the publication of these articles in the Century magazine and the publication of Harwood's book, that statement was never contradicted by Burbank. I realize that he is a very busy man; but it does seem to me that in a matter of that kind somebody representing him at all events should issue a statement saying: "No, I did not 'create' that, but I am breeding from it and I expect to improve it." That's a fair statement. Now, there is hardly a botanical garden in the world that you cannot go in today and find a thornless cactus. In an exhibition that we had down at Herald Square hall, here in New York, given by the American Institute, they exhibited three of these thornless cacti, just to show that such things could be had outside of Santa Rosa. And yet Harwood goes on to say that this is the plant that is going to turn arid deserts into populous plains, and that it will be in a certain sense the vine and fig tree of the desert. Bulletin No. 74, Dept. of Agriculture, is devoted exclusively to cacti as food for stock. It relates in detail how they are utilized at present and states further: "In this connection it may be remarked that were it not for the spines on this class of plants they would probably have been exterminated long ago and there is some doubt whether there would be any use for spineless forms in the future." One poet sung of Mr. Burbank as follows:

He touched the spiculed desert—cacti cursed—
And turned its thorns to figs; its thistles fruit.
He nodded to the daisy half immersed
In dwarfting dust, and lo! a lily mute
Rose from the weeds—a perfume with a flute.

That's the way it affects the poet. They say when a poet gets after a man he is done for. Here is another poem that occurs to me. This man was a florist, and he is supposed to be one of the knockers:

O, Mr. Burbank, won't you try and do some things for me?
A wizard clever as you are can do them easily.
A man who turns a cactus plant into a feather bed
Should have no trouble putting brains into a cabbage head.

One of the first new "creations" in flowers that riveted the attention of the people of the east was the Burbank canna. That was produced probably by the same parentage as a similar variety produced in Italy. Unfortunately for Mr. Burbank, others were working along the same lines as he without his knowledge, and the year that he was ready to send out his canna we received from Europe two varieties, known as the Austria and the Italia. The Italia was such a glorious canna that it eclipsed the Austria completely, and the Austria and the Burbank were identical. It shows how, with the ocean between men working along the same lines, they will arrive at the same results. I could cite dozens of instances where that has occurred. The Austria had the priority of claim, and so it remains today the recognized variety. I cite this as showing what the plain, ordinary hybridizer over in Italy can do as against a wizard.

The White Blackberry. I take issue with Mr. Burbank again in this matter. The magazine writer undoubtedly leads the public to believe that Burbank was the first one to produce white blackberries. He said that it is a fruit which he "created;" he does not say that he had anything at all to work on, while for 60 years or more we have had white blackberries. Fifteen or 20 years ago the trade generally gave up selling them. They had their little day and they drifted out. The old Chrystal White was the last one that we offered, and when Jackson and Perkins, who have a California place, came to us and wanted us to push this "Iceberg" blackberry, we said, "Nonsense, people don't want a white blackberry; they want a black blackberry." But the phenomenal "Iceberg" was issued with a great flourish of triumph—Wickson states that is a feather in the cap of Burbank.

They say that with his psychological instinct he reaches out and gets two species together (the raspberry and blackberry) that had never been gotten together before, and he produced an absolutely new species, and nature was out of a job. This was achieved not only by Mr. Carman, but also by Professor Sanders of Canada about 18 years ago. As to these gentlemen who exploit Burbank in this way, I think if they knew the truth they ought to tell it, and if they do not know they ought to ask somebody who does know.

The Aquilegia Clematidea; that is a spurless aquilegia. Burbank it is alleged bred the spurs off the aquilegia and it is heralded as an achievement, but 200 years ago there were spurless aquilegias. Henderson's Handbook of Plants, shows aquilegias, some with spurs and some without. Now, the beauty of an aquilegia is really its spurs. Without them the flower is characterless, and so the spurless aquilegia gradually drifted out altogether. Nobody cultivated them for years until Burbank produced or found them. There is also a variety in Japan, Aquilegia ecalcarata, which can be bought from European seedmen, which, placed alongside the spurless aquilegia produced by Burbank proves to be exactly the same. The supposition is natural enough in some minds that possibly the seed came from Japan.

I want to call attention to the Bartlett pear plum. In the published matter relating to that it is stated that it is a plum with the flavor of a Bartlett pear, as showing how much can be accomplished by Burbank. It does not say whether that plum is as big or as heavy as a Barlett pear, but by taste it is a pear; and Harwood tells a story of an expert, a man who had been all over the world, he was blindfolded and a plum was handed to him and he was told to bite it and tell what it was; he immediately pronounced it a pear, but it was a plum. It strikes many that the man who doesn't know a plum from a Bartlett pear when he takes it in his hand is not much of an expert. The plumcot we have all heard of, it is a crossing of two species, which may or may not be of value.

Much is made of Mr. Burbank's lilies in magazine articles, but I only want to say that anyone who has ever done anything at all with lilies can get exactly the same results as shown in the published articles on Burbank's achievements in lilies. W. A. Manda is unquestionably a man of some attainments in horticulture, and he told me that he hybridized lilies extensively and got such results. That was confirmed by my own experience of 20 odd years ago.

The article states: "Lily growers from all over the world have stood dazed, intoxicated with the marvels of beauty and the perfumes of this acreage of new lilies in full bloom." Some of the dealers in the east have tried them. I asked one man, and he shook his head sadly and said that he would not try any more of them.

It is told in the magazines how one pleasant evening Burbank was walking along a field by some verbenas and he detected an odor which he traced back to the plant from which it emanated. He saved it and bred scented verbenas. When I was down in the seed fields of C. C. Morse & Co., at Gilroy, at the end of the Santa Clara valley, California, I said to Mr. Landrum, the principal there, as we were driving along: "By the way, have you got any scented verbenas?" He said, "I don't know, I never bothered about them." I said, "In my young days the Sylph type was always fragrant in the whites; that I am certain of." We jumped out of the wagon and we hadn't gone ten feet before I stooped down and picked up a white one. It had fragrance.

One other matter is about the blue rose. Now, if there is one thing that horticulturists have dreamed over for many years it is to obtain a blue rose. There is an axiom that there are three colors not found in varieties of one species, namely, a true blue, a true yellow and a true scarlet. You will get them to a certain extent in the asters, and to a certain extent in hyacinths, but nothing like a true scarlet, a blue or a yellow in varieties of any one species. We have yellow in the rose and a red that is nearly scarlet, so that all we want now to complete the trinity of colors is a blue. In one of these talks Harwood asks Burbank: "Did you ever consider the producing of a blue rose?" "Oh, yes," he said. "Do you think it is possible?" and he said. "Oh, it is a very simple matter, from what I have learned"—or words to that effect. From his investigations he thought it was a very simple matter, but, he said: "My time has been taken up with more important matters, and I have not paid any attention to it." Now, judging from the output that has come from the garden at Santa Rosa, I am certain that Burbank was engaged in matters somewhat trivial, as compared with the production of a blue rose. If it is possible for him to do it, and if he wants to "square" himself with the florists, all he has to do is to produce a good blue rose and they will say: "Come back, everything is forgiven."

"The lost flower—the tragedy in plant life. A tiny pinkish white blossom upon a brilliant green vine. But one morning a workman discovered that in the night every plant had died. The flower could never be recovered because the conditions under which it had been created would never occur again."

There is a prophet; if he had said they never could occur again, it would show that he had some well grounded reason for it in his mind, but he said that they would never occur again, which is a very different thing as I view it. But the description recalls the Dolichos lignosus or Australian pea vine which is one of the most beautiful things in the California country. I think somebody must have been handing out a joke to Mr. Harwood and he didn't know it.

Another thing: "He took a French plum, unknown in America, and grafted it upon a Japanese plum. The graft bore no bloom, but the tree was recreated if you will; its seedlings took on a wholly new life and became hybrids, its vital essence was changed through the medium of the graft."

I do not say that Mr. Burbank is responsible for this except by indirection. It is an old theory since men began to think of the influence of the graft upon the stock. It is useless to thresh it out here and I have no intentions of doing it, but I merely want to show the kind of mental pabulum that has been handed out from Santa Rosa to the body politic and the horticultural public at large.

It would not be fitting, I think, after all I have stated, to close without paying my tribute to Mr. Burbank, as far as I can honestly do it. I believe that Mr. Burbank is a sublime enthusiast. I believe that he has sacrificed much in his efforts to improve plant species. I want to say that I doubt if there is anyone who takes more comfort in the fact that he has been provided with the wherewithal to carry on his researches than I do. All that the professional florist asks is that the truth be known and nothing but the truth, and we say: "We are perfectly satisfied to have you go on as you are going, but don't let matters get out which are discrediting you and us, and which only result eventually in making American horticulture a laughing stock for everyone who stops to think of it." So much has been said about scientists that I am going to close by quoting a letter which I have received on the subject. It is but one of several which I have received from the experiment stations. I also want to say that from men in the trade, both in this country and abroad since I lifted my voice in this matter I have received many complimentary letters, saying to me that they were glad I took the stand which I did and that they coincided with my views; so much has been said about the scientists and the ordinary rag-tag and bobtail of the florists that I will reproduce the following letter without disclosing who was the writer of it:

I have just been reading your article in Florists' Exchange on Burbank, and I want to compliment you on your honest, temperate and straightforward statement of the case. The situation is fast becoming intolerable. The things that are claimed for Burbank are ridiculous—they go beyond hysteria and arrive at lunacy. If any man raises a word of protest the Burbank rooters immediately call him a sore head and say he is jealous of the marvelous achievements of the Master. We poor scientists, in particular (if I may class myself in that category), are discounted in advance. The public is told that the scientists have always been against Burbank and are all jealous of his achievements. The very opposite is true. To my personal knowledge every scientist who has ever said anything of Burbank has gone out of his way to pay him a compliment, and has nearly always rated him higher in print than his actual merits deserve.

But the thing which most makes me want to fight is the vicious and false comparison always made or inferred between Burbank and other plant breeders. From the magazines you would think Burbank has done more than all the rest of the world put together, when the fact is that there are and have been hundreds of men who have done more for the improvement of economic plants than Burbank has ever done, or, in my opinion, ever will do.

Any man who has the backbone to stand up and fight this infernal nonsense deserves public thanks, and for my part I want to assure you that you have struck a chord that will find more than one response among the horticulturists of America.

The fairest test of a man's ability is a comparison with others in the same sphere of work. One of Mr. Burbank's eulogists said: "Luther Burbank has done more for the human race than all other horticulturists." We florists and nurserymen do not endorse that statement, it is derided by every horticultural publication which has spoken on the subject. I even venture to say, from the test of comparison of products, that he is not the superior even of hybridizers in California. The Logan berry, introduced by Judge Logan is better than any of his productions. The Phillips cling peach is of more value to California in my opinion than any fruit which he has produced, and sad to relate, the man who produced it is in the Yuba Co. almshouse, so announced in the Pacific Rural Press of January 6 last.

The contributions to the fruits of the

country by Mr. Burbank are not as valuable for instance as the Concord grape of Epraim W. Bull, the Wealthy apple by Peter M. Gideon, the hybrid grapes by Rogers, Jacob Moore and T. V. Munson, not to mention others. In the realm of flowers he is hopelessly outclassed in this country by John Cook, E. G. Hill, Dr. W. Van Fleet and others in roses; and by Alex. Dickson, Notting, Lambert, Levavasseur and others in Europe. In carnations he is again outclassed, eclipsed I may say, by Fred Dorner, C. W. Ward, Peter Fisher and others. In cannas Antoine Wintzer outclasses him here, and in this connection I must pay a passing tribute to Mons. Crozy who was the originator of the present race of cannas. I also wish to mention the work of Mr. Groff in gladioli, superior to that of Mr. Burbank in its results. As a general improver of flowering plants he is again impressively behind Lemoine of France, whose work in shrubs and soft wooded plants actually borders on the marvelous. In sweet peas Henry Eckford of England stands supreme. But I will not give a catalogue of illustrious men in plant hybridization, sufficient has been said I trust to show the extravagant claims for the superiority of Mr. Burbank in his chosen field. It is further claimed for him as a great achievement in the cause of science that he produces and destroys acres of worthless plants. The really expert plant hybridizer does not do it and would hardly file a claim for fame on that score. Rather by close study of prospective results he aims at improvement by the most direct and least expensive method.

Some Novelties of 1907.

Ernst Benary is offering a number of novelties in seeds for 1907, the most attractive of which on paper are as follows, the descriptions being by the introducer:

ADMIRAL POPPY (Papaver pæoniflorum).—This single peony flowered poppy is of surprising beauty. It is characterized by large round smooth-edged flowers of glistening pure white, with a broad band of brilliant scarlet around the top, occupying a full quarter of the corolla. These two colors form an extremely telling contrast, similar to that seen in the variety Danebrog. Planted in groups the Admiral poppy, which comes nearly true from seed, produces a magnificent effect.

BUTTERFLY RUNNER BEAN (Phaseolus multiflorus Papilio).—Among the climbing plants which deck our arbors and trellises the varieties of the Scarlet Runner bean occupy a leading place, and rightly so as they serve a double purpose, yielding a useful dish for the kitchen and brightening the garden by their gaily hued flowers until far into the autumn. They are seen in the smallest cottage garden, where no room can be spared for anything purely ornamental, and no plant is more widely known and appreciated. This new variety is equal to the old sorts as regards productiveness and quality of fruit, but is quite distinct and far surpasses them in the beauty of its flowers; what chiefly distinguishes the latter is the large size of the prettily waved snowy white wings and the salmon rose of the standard, these two colors making a most agreeable and striking contrast. The vine is also extremely floriferous, its leaves, of a somewhat lighter green than other runners, almost disappearing beneath the clusters of charming flowers which gracefully rise and fall, like butterflies, in the passing breeze. The seed also is distinct, being mottled brown on white ground. In the Butterfly bean we have a beautiful new plant both for the kitchen and pleasure garden, which will certainly soon come into general cultivation and enjoy universal favor.

CHRYSANTHEMUM INODORUM BRIDAL ROBE.—Chrysanthemum inodorum plenissimum is undoubtedly one of our most useful annuals and I am glad to be able

Phaseolus Multiflorus Papilio.
See "Some Novelties of 1907."

to offer a new variety as distinct as it is beautiful. Of very compact and upright habit and not exceeding 10 inches in height, the sturdy plants throw out their finely feathered foliage from the base and deck themselves with a mantle of extra double pure white flowers. With their short closely set petals the latter recall the finest forms of very large flowering double daisies and appear in such number that a large bed in full bloom may well be compared to a drift of snow. Chrysanthemum Bridal Robe, coming almost true from seed, will certainly prove a bedding plant of the very first rank, while also useful for pot culture, and considering the long time the flowers last when cut it is safe to predict for this novelty an uncommonly successful career.

LYCHNIS LAGASCAE ROSEA.—Lychnis or Petrocoptis Lagascæ is one of our most pleasing very early blooming dwarf perennials, for growing only four inches high it forms little bushes with pretty foliage and dotted with conspicuous red flowers, which yield a continuous display of bloom from middle of May until the end of June. Equally charming for pots, edgings, rockeries and carpet bedding, it deserves to be better known. This new variety, which comes quite true from seed, differs from the type by the beautiful bright rose of its flowers and will certainly receive a warm welcome from all lovers of Alpine plants.

PETUNIA KING ALPHONSO.—This fine new petunia of the grandiflora superblissima class, bears very large dark crimson flowers, like those of the variety Prince of Wurttemberg, but the petals of this novelty are boldly waved and frilled to such an extent that the widely-opened brilliant black throat of the flower is often almost entirely concealed. This new hybrid is of a strikingly handsome appearance.

New Sweet Pea Coral Gem.

A sweet pea with 16 to 18 inch stems, and four flowers on a stem and of absolutely new form and color in sweet peas. Such are the claims, backed by expert criticism of the originator, D. V. Tuttle, of Menlo Park, Cal.

The color is best described as a clear light coral self. The shape of the flower is quite unique, the standard being thrown back and curled and rolled unlike any other variety, giving it a most pleasing effect. As a bunching sort for florists it is destined to displace many of the so-called buff and salmon pinks.

Decorated Float at San Antonio, Tex.

The illustration herewith is of a decorated float that appeared in the annual parade of the festival of the battle of flowers in San Antonio, Tex., last spring. Out of over 300 finely decorated vehicles this was the only one using all natural home-grown flowers and grasses. The body of the float is sodded with Bermuda grass and trimmed with daisies, lilies, etc., and laid off with a gravel walk through the center and a small summer house on the rear decorated with natural vines and flowers.

The men shown standing in the illustration, reading from left to right, are: Geo. C. Baker, secretary San Antonio Horticultural Society; S. A. Minear, supervisor public school gardens; E. S. Lewis, landscape gardener.

English Ivy.

The demand for English ivy in all stages of growth is always equal to the supply. There are, year after year, uses appearing for ivy that were not thought of before. On private places it is used in every conceivable way and always seemingly with great satisfaction and a desire to increase its planting.

Florists also now use ivy much more that they did in the past. It is by no means now confined to the making up of funeral wreaths. Its long sprays are used to advantage in winter, especially in the great cities. Even in summer ivy plants, of good growth in small pots, are eagerly sought and very often in some localities enough cannot be had to supply the demand. There is yet time to put in a good supply of cuttings, but do not delay much longer.

M.

KEENE, N. H.—Frank Chapman has purchased of Marcus Ellis, proprietor of the Ellis Bros. greenhouses, a half interest in the business.

PLANT NOTES.

For October.

BOSTON FERNS.—An early potting up of bench-raised nephrolepis is absolutely necessary where stock for a highly discriminating trade is grown. Too often this is delayed until all other seemingly more pressing fall work has been attended to, under the delusive supposition that a prolonged stay in the bench soil will impart additional value, and that a potting up just before the stock is wanted serves every purpose. But Boston ferns, the new and greatly improved varieties also coming under this head, should not be considered marketable stock unless well established in their pots or baskets and thus adequately equipped for a continuous well-being in surroundings and under conditions often exceedingly trying and severely testing the much lauded qualities of Boston ferns as fit subjects for the adornment of parlors, hallways and shop windows. The call for decorative plants will soon be a brisk one and Boston ferns, as heretofore, will claim the larger share of public favor. The main attention of the grower should now be directed to the making of finely balanced specimens out of every potted individual fern. This is easily accomplished by placing them on narrow boards, raised above the bench or on inverted empty pots with ample room between the plants, turning them around from time to time and affording them the fullest light and all the sunshine that comes their way. Cleanliness, moderate ventilation, ample water at the roots and frequent sprinkling overhead are essentials in fern culture.

PRIMULAS.—It is now time to give primulas of the Forbesi and obconica type their last shift. A fresh, light loam, to which one-fourth of leaf mold and one of well decayed manure is added, is good potting soil in their case. Chinese primroses should be in their selling sized pots by this time, 4 or 5 inch, and making rapid headway toward final development. All primulas will now be all the better for being housed. The shading henceforth can be dispensed with and the full light under clear glass will impart the degree of firmness, durability and bright appearance to foliage and flowers, so desirable in primulas. An over-watering from now on, if the pots in transplanting were well provided with draining material, need hardly be feared. A thorough drying out of vigorous, well-established plants on airy, bright days is more apt to turn complete success into partial or entire failure. Primula obconica and P. Forbesi finish up in finer style being fed with weak liquid fertilizer once or twice a week after buds have begun to form. A daily spraying of the foliage is of greatest benefit to all sorts of primulas, if this can be done without wetting the fully expanded flowers. A too crowded stand on the bench or a stand under large, spreading plants as a foreground or undergrowth to effective plant-displays, for which ferns would prove more serviceable, considerably lowers the market value of primulas. Although they are not high-priced stock, they well deserve good treatment, since they are fast sellers and great favorites with all classes of people, and excellent house-plants, free of disease and insects and most useful in many ways.

DECORATED FLOAT AT SAN ANTONIO, TEX.

DAHLIAS.—The growing of dahlias as a midsummer cut flower crop has not been altogether disappointing to venturesome retail florists. In some localities dahlia flowers of the finer types have taken exceedingly well. If grown for this purpose, especially if for the wholesale market, none other but varieties of recognized merit, unquestionable keeping qualities and reasonable productiveness should be chosen. There is no doubt but what such sorts to a grower with good garden land in plenty and in close touch with a large distributing center, would prove a highly profitable crop. Of late, dahlias are much favored by buyers of bedding material in the spring and as their culture presents no difficulties and rapid propagation by division of the roots and by cuttings as well as by seeds is easily effected, nothing should stand in the way of being amply provided with good stock in this line for a coming season's trade. From any collection of varieties, planted out last spring for trial, only the very best should be saved. The roots of these alone will furnish sufficient material for the propagation of a vast amount of stock if properly wintered. After the first frosts have touched the foliage, tender tips and belated buds of dahlias, it is time to cut the upper growth down to within a few inches from the ground, to carefully dig up the clump of roots, freeing them of all adhering soil and laying them out to dry in some sheltered and shaded spot of the garden. After this the roots should be packed in sawdust, coal-ashes or sifted earth in half-barrels or boxes, and be placed where neither frost, heat nor too great a degree of moisture will ruin them.

GLADIOLUS.—Nearly all kinds of gladioli, light shades and scarlet selfs in particular, have sold well all this summer, the early house-grown spikes having proved especially profitable stock. There is little use, however, of growing inferior sorts. It is the great im-

NEW SWEET PEA CORAL GEM.

provement, strikingly manifest in the newer varieties, which has won a place and due recognition for its value for the gladiolus on the cut flower market. Of exceptionally fine sorts there are now so many, that a mistake in making up a fine assortment for even the most extensive culture is a rare occurrence. The corms of gladioli should not be lifted from the ground until fairly well matured, which is indicated by the drying off and yellowing of the remaining foliage. They are wintered much in the same way as advised for dahlias.

PEONIES.—October is the best month in all the year for the making of new peony plantations. The roots, being very sappy and brittle when lifted, break easily. Care should therefore be had in digging them up, in dividing and handling, while packing them for shipment or in replanting them to new fields. Any fair sized piece of root or division with a good, plump crown will in the course of three or four years grow into a pretty large and free flowering plant. The roots should be planted from three to four feet apart, thus allowing room for future spread. The crown of the root, when planting is finished, should be three inches or a trifle more below the level of the ground. It is best to select for peonies a freely exposed, well drained and fairly rich piece of land. Thorough-going preparation of the ground with spade and rake, plow and harrow and a good dressing of manure, before planting, pays well in the end.

CANNAS.—It is most gratifying to anyone interested in floriculture, to note the unvarying success with which cannas are grown in public and private grounds, how rapidly inferior varieties are giving way for sorts of acknowledged merit, and how fast a better understanding as to their culture is gaining pace everywhere. Cannas, thanks to their excellent attributes as the most effective of bedding and border plants, whether grown in isolated groups or in solid masses, now hold a prominent place among stock, raised and handled for a constantly growing plant trade by commercial florists. It is safe to say, they are also one of the most profitable items in the list of bedding plants, and no one now-a-days, in any way connected with this great country's plant business, can afford to ignore or underestimate the importance of cannas. Since people have learned to distinguish good from less valuable sorts, even calling for the better varieties by their correct names, the grower must make it a point to carry none but the latter. In most cases he will do better by procuring his stock in early spring from reputable wholesale houses and growing it into salable size by the time cannas are bedded out, than to try providing ample stock in all the finest varieties by saving the roots of a limited number of plants grown in the out-of-the-way spots of a small garden. But the roots of any sort worth saving, should be lifted and stored under the bench of a cool greenhouse. This should be done before severe frosts have destroyed the entire top growth, an often practiced custom, which invariably results in the partial or entire loss of the roots during the winter.

BULBS.—The planting of hardy bulbs for outdoor effects in early spring, is now in order. Nearly all the varieties of Holland grown bulbs are suitable for the purpose and never fail to give entire satisfaction. It is needless here to hold out detailed instruction to professional florists as to how bulbs of this class should be planted; it is a phase of gardening well understood and not affording much opportunity for the making of blunders. For the lay gardener and amateur explicit information and helpful hints are held forth in all bulb catalogues. But it seems needful and opportune, as it has every year at this time, to remind florist and amateur, that those pleasing displays and grand effects, so much admired every spring, can only be called forth by planting the bulbs in the fall. Any time before a total freezing up of the ground sets a stop to out door operations, hardy bulbs may be planted, but the sooner this is done now the more agreeable will be the task.

VINCAS.—Plants of Vinca major, green, variegated and mottled, are now looked upon as almost indispensable for all sorts of plant arrangements, where trailing and drooping growth must form a pleasing fore ground. They become scarce every spring before the season is half way near its end. It is now time to lift and house what stock of this kind still remains in the open field. Although not so easily harmed by occasional light frosts, it is better to remove it to safe quarters, where the plants, divided or made up into properly shaped specimens, will soon fill their pots with active new roots.

PANSIES.—Good pansy plants for early spring sales may still be secured by sowing the seeds now. Sowing them in trays or boxes and keeping these in any cool greenhouse the little seedlings will be ready for a transplanting into other boxes by the middle or end of December, and by March 1 they will be nice little bushes, ready to go into frames, where they will grow into sturdy, flowering plants in good season. It has frequently been the case that pansies, so raised, finally turned out to be better stock for early planting than that obtained by very early sowings and by a wintering in unsafe or unfavorable quarters. Very early started pansies, intended for winter flowering and cutting, should now be transferred from outdoor frames to a well lighted and amply ventilated greenhouse. They do best in narrow benches with little or no bottom heat and in the richest of soil.

SWEET PEAS.—Benches, on which the taller varieties of chrysanthemums were grown, soon to be cleared off and ready for other crops, are usually just right for the requirements of sweet peas under in-door culture. The soil also, by a liberal addition and intermixture of good old manure and some lime, is readily converted into a compost, in which sweet peas will grow and bloom luxuriantly. Pot-grown peas, raised for this purpose and sown some time ago, should go into the bench as soon as this is cleared and the soil made ready. But sweet-peas, sown at once into the prepared soil of the vacated bench, will not be much later in coming into bloom than those raised in pots and transplanted into the bench. Both will be in full bearing in February and March.

E.

JAPANESE MAPLES TWO YEARS AFTER PLANTING.—See page 554.

St. Louis Moves Ahead.

We take pleasure herewith in reproducing a picture of the home of the Koenigs, where was formed October 5 a society for the promotion of horticulture and floriculture. Otto Koenig's enthusiasm in the business is well known to the trade generally and it is largely due to his efforts that this new association, which has for its object the holding of exhibitions and floricultural meetings, was formed. The veteran, F. C. Weber, issued a call for the meeting and a permanent organization was formed by the election of the following officers: Harry Young, president; Alex. Waldbart, vice-president; Fred C. Weber, treasurer; Otto G. Koenig, secretary. In addition to the foregoing there were present C. C. Saunders, Theo. Miller, F. H. Meinhardt, Geo. B. Windler, Emil Schray and John L. Koenig. Geo. Waldbart was unavoidably absent owing to duties at his place of business. Chas.

Crucknell, the guest of Alex. Waldbart, contributed much interesting information regarding horticultural societies of other cities. Much interesting discussion followed and several committees were instructed to report at the next meeting, when the by-laws and the name of the society will be adopted.

JAPANESE MAPLES FIVE YEARS AFTER PLANTING.

Illinois State Florists' Association.

A meeting of the executive board of the Illinois State Florists' Association was held in the rooms of the State Board of Agriculture in the Dome building, Springfield, October 4, Vice-President Hey presiding. It was decided to accept the invitation of the Bloomington Florists' Club, and the date for the next annual meeting and exhibition was fixed for the second Tuesday in February, 1907, at Bloomington. A committee consisting of A. C. Brown, J. C. Vaughan and A. C. Beal was appointed to draft a suitable resolution emphasizing the importance and magnitude of the floral industry and urging the State Board of Agriculture to provide a suitable place to hold the exhibitions at the state fairs.

A committee composed of J. F. Ammann, H. W. Buckbee, Peter Reinberg, P. J. Hauswirth and A. T. Hey was appointed to confer with R. O'Dwyer, superintendent of floriculture, and to appear before the State Board of Agriculture at its meeting on the second Tuesday in January in order to urge the erection of a suitable building for floricultural exhibits, the revision of the premium list and the appointment of a practical florist to have supervision of all the floricultural exhibits at the state fairs. It was the sense of the assembly that the president call a meeting of the executive board and other members of the association during the Chicago flower show to further state fair matters and especially to decide upon and organize a movement for securing an appropriation from the state for carrying on experimental work in floriculture.

President Ammann was called home before the close of the meeting by the death of a relative. In addition to those already mentioned herein, the following were present: Ed. F. Winterson, and August Poehlmann and wife, Chicago; C. A. Kuehn and A. Meyer, St. Louis, Mo.; W. S. Hizer, J. J. Soper and wife, and H. W. Buckbee, Rockford; Frank Funk and A. R. Knowles, Bloomington; Geo. A. Kuhl, Pekin; F. Schaffer, Pana; G. Gross, Quincy; John Bauscher, Freeport; J. Heinl, Jacksonville; Fritz Bahr, Highland Park; A. C. Canfield, Geo. W. Jack, Carl Rauth and David Wirth, Springfield.

Washington.

THE MARKET.

Though the week's business was hampered by dark and gloomy weather, on all sides were seen evidence of renewed activity and preparation to meet the demands of the opening season. While an occasional lot of good stock comes in, roses are thus far generally of poor quality. A more general sprinkling of early chrysanthemums is to be seen in the stores, but few, if any, locally grown stock is yet in. The carnation, it is hoped, will show in good form by the time chrysanthemums have had their day. There is yet an enormous quantity of dahlias and cosmos on the market, both, it must be acknowledged, adding greatly to the attractiveness of the stores.

FLORISTS' CLUB'S DAHLIA SHOW.

The Florists' Club's dahlia show was held on the afternoon and evening of October 2. An invitation had been extended to the public to attend and from 2 o'clock until 7 p. m., there were many visitors. The noteworthy features were the exhibits of R. Vincent, Jr., & Son, Whitemarsh, Md., and W. R. Gray, Oakton, Fairfax Co., Va.

The exhibit of the Vincents alone covered two long tables, and a fancier who would not find pleasure in comparing the many fine varieties must be considered an impossibility. Their Souvenir de Gustave Douzon, was in size a revelation to many visitors who have not, in these later years, closely followed the developments of dahlia culture. The color of this magnificent bloom is bright crimson.

Jeanne Charmet was another pink that showed to good advantage. Prof. Mansfield, variegated pink and white, was another attraction.

W. R. Gray made a very fine exhibit. To the members of the craft who visited the show, his was probably the greatest surprise, as his name was not familiar to many. It appears that he is one of the men who have been conducting a business quietly, but with results. His Mrs. Roosevelt (blush pink), Cuban, Giant (crimson), and Grand Duke Alexis (white with rose tinge), were such blooms as are but rarely seen in this city, though a number of our retailers are always on the lookout for the best.

THE HOME OF THE KOENIGS.

Where new St. Louis society was formed.

Dr. W. Warrington Evans, of Ivandale, Loudoun Co., Va., exhibited good blooms, this being the only private estate represented.

Certificates of merit were awarded both the Vincents and Dr. Evans' exhibit received honorable mention.

COMMISSION HOUSE PROJECTED.

On the night of October 5 there was a well attended meeting of growers and retailers at the store of Mayberry & Hoover, at which the preliminary steps were taken to open in this city a wholesale flower market and commission house. Prominent among those present were Z. D. Blackistone, David Grillbortzer, W. W. Kimmell, Henry Pfister, C. E. Brooks, J. A. Philipps, Mr. Mayberry and Mr. Hoover. It was decided to incorporate with a capital stock of $25,000, one-half of which has already been subscribed. It was further decided that the holding of any one person be limited to $3,000 worth of stock. Another meeting to perfect the organization will be held this week. This movement should have the sympathy and support of every grower and retailer in the District of Columbia.

AT THE GOVERNMENT GREENHOUSES.

The greenhouses of the U. S. Propagating Gardens are now showing fine stocks. Geo. H. Brown, the veteran landscape gardener and superintendent and his head gardener, Mr. Heuloch, keep well up with and in some lines ahead of the times. They have gathered about them a corps of growers whose work is up to the high standard that is set for such an institution. Of these, the work of Chas. McCauley and Alexander Young in palms, ferns and crotons; W. A. Furmage in roses and chrysanthemums, and Mr. Dawson in carnations, is deserving of more than passing mention. A finer and healthier lot of Enchantress, Lawson, Flamingo and Lady Bountiful carnations cannot be found in the country. The crotons are a noted feature of the gardens, being for variety and beauty unexcelled. The earlier varieties of chrysanthemums are now showing color and in a few weeks the annual show will be held.

Few people realize the scope and extent of the work of the Department of Agriculture. Beginning with the soil, its experts will go to any state and analyze it, thus putting the farmers and gardeners on the right track. Its inspection of foodstuffs is another boon.

On October 1 W. A. Furmage, rose and chrysanthemum grower at the Propagating Gardens, fell from a stepladder while staking chrysanthemums and had three ribs broken.

A number of plants of the California carnation, Hannah Hobart, may be seen in the Department of Agriculture greenhouses. It is a fine flower and should be a success.

One of Kroeschell Bros.' big boilers has just been installed at the U. S. Propagating Gardens.

E. M. Byrnes, of the bureau of plant industry, is well pleased with the Lieut. Peary carnation.

Superintendent W. R. Smith, of the Botanical Gardens, was a visitor to the dahlia show.

NOTES.

J. H. Small & Sons executed a fine decoration for a fashionable wedding at St. John's church, October 3. White roses, lilies and chrysanthemums were largely used. The bridal bouquet was of lily of the valley with corsage of orange blossoms. The seven bridesmaids carried bouquets of pink roses.

The awards committee of the Florists' Club, in the school garden contest for the medals offered by the club, made the following awards: Thos. P. Morgan school, gold medal; Foree school, silver medal. Certificates were awarded to the Garnet and Dennison schools.

Z. D. Blackistone and wife are receiving the congratulations of their friends over the advent of a fine daughter in their family circle. Incidentally, Mr. Blackistone has a fine brand of cigars on tap.

W. W. Kimmell has secured and is now pushing work on an extensive job of landscape work at the new residence of the papal delegate.

A new plate glass show window, 7x20 feet, recently put in the I street side of Geo. C. Shaffer's store, adds greatly to its attractiveness.

S. E.

Boston.

TRADE EXCELLENT.

After a period of three solid months of dull, lifeless trading, which has been the source of much anxiety to the wholesalers and retailers, business has picked up wonderfully during the last fortnight and now it may be said without question or doubt that the cut flower season has opened. So far the season appears to be three weeks backward but strenuous efforts are being made to catch up with usual conditions. But few chrysanthemums that really deserve the name have yet been seen. They are eagerly sought and bring fabulous prices considering the quality of the goods. The general line of roses is rapidly improving and now we have some excellent Chatenay, Richmond, Carnot and some very fair Bridesmaid. The sale of American Beauty has fallen off considerably owing to the improvement of other varieties and to the small supply being received. Carnations are very slow in improving, but the supply at present is below the demand and prices have taken quite a jump. Violets, mostly single, are very cheap owing to the large crops being cut and the light demand. Considering the season they are very good. Double varieties are yet scarce and what are on the market are very poor. Lily of the valley in tremendous quantities, is being consumed, being received principally from out-of-town growers. A variety of orchids, including cattleyas, cypripediums and oncidiums, are seen in most of the first class stores and there is a steady demand for gardenias.

NOTES.

Henry M. Robinson has leased the establishment formerly occupied by Welch Bros. at 15 Province street, directly opposite their present headquarters. It is the intention of this enterprising firm to enter the wholesale commission field, to which branch the new store will be devoted. They will continue in the hardy and dry supply business and with their new departure will be established one of the largest firms in the country.

With an extraordinarily large number of October weddings this fall the season is opening auspiciously. The Thos. F. Galvin corporation, the first three days of the week had eight extensive decorations and many more are already booked for later in the month.

Mann Bros., who have had a corner on the Easter lily market all summer and who still maintain control, bid fair to assume the same position on the output of chrysanthemums. They are cutting white and yellow, but do not attempt to fill all orders.

Welch Bros. are now established in their new quarters and are kept busy explaining the details of their plant to an army of visitors. The thoroughness of each idea and the success with which it is meeting is the wonder of all.

Many of the boys took a day off this week to attend the annual Brockton fair. Among the liveliest parties was that chaperoned by Chas. Evans and Joseph Free, who journeyed for the day in a large touring car.

Henry A. Stevens is among the few cutting good carnations. Among the many different varieties being produced are several new seedlings which he expects will be very popular.

The Exeter Rose Conservatories are again in the market with a stock of excellent Chatenay roses to the growing of which their whole establishment is devoted.

The first pansies to arrive are being brought in by W. C. Ward, the pansy king, who for years has specialized in these little favorites.

Visitors: J. J. Karins, of H. A. Dreer's, Philadelphia; Joseph Heacock, Wyncote, Pa.

B.

Baltimore.

STOCK SCARCE.

We are having autumnal weather, with cold rains and one or two wild wind storms, but at this writing there has been no frost. Business would have been brisk, but for lack of material. Outdoor stock is abundant, but good flowers grown under glass have been lamentably deficient. American Beauty roses are especially short this season in this market. Some growers who have heretofore had one or more houses devoted to this variety are giving them over to other sorts which promise larger profits. Whether it is the soil, the seasons, or a falling off in the vigor of the plants, weakened by long series of propagations, the money returns from this rose are steadily lessening with many growers. Occasionally, however, one hears that some grower has no interruption in the success of their culture.

NOTES.

This week witnessed a general shake-up, "for the good of the service" in the ranks of the district park superintendents. The general superintendent, Wm. S. Manning, was authorized by the park board to take such action as the efficiency of the work demanded, and, though it is intimated there will be kicks and protests, the change will stand as ordered. No charges are made against the official, but it was believed that a general movement of all the pieces on the board was the only plan to get some of the employes out of the ruts into which they had fallen. It was also al-

leged that some of them had been so long in their respective places that they had formed relations and connections which work to the detriment of the parks, and that such relations could best be severed by a general transfer. Following are the changes effected: Chas. L. Seybold goes from Patterson park to Carroll; James Boone, from Druid Hill to Clifton; Frederick Wessler from Carroll park to Druid Hill, and N. F. Flitton from Clifton to Patterson park. Besides the larger parks these men have charge also of the squares and public grounds in territory somewhat adjacent.

The park board has determined to have semi-annual flower shows in the several parks where there are conservatories, beginning with the fall of 1907. This step was warmly urged by several members of the board and General Superintendent Manning approved. He said the extra cost to the parks would be small and that such exhibitions would attract thousands of persons. He will recommend a rule prohibiting the giving away of any flowers grown for the exhibition and that all plants not needed for future use shall be thrown on the dump. The chrysanthemum will, naturally be the main feature of the autumn displays. The city has bought eight acres of land to be added to the new Wyman park, the cost being about $10,000.

D. Blackistone, formerly with his brother, Z. D. Blackistone, of Washington, D. C., has taken charge of the Fernery on N. Charles street. During the past week he has had an interesting and quite large dahlia show in the store, which was inspected by many visitors.

The Johns Hopkins hospital has adopted plans for and will proceed to build a greenhouse to supply plants and flowers for that great institution.

S. B.

St. Louis.

MARKET ACTIVE.

The weather the past week has been very changeable turning from showery and warm to cold and clear. The market, owing to the Veiled Prophets' ball the early part of the week was strong. It fell off again Thursday and Friday. Saturday trade again opened lively and prices stiffened. Carnations have been very scarce. Quite a few American Beauty roses arrive badly crippled. Violets are still very short in the stem and very poor flowers. A few cool days and nights will increase the supply and improve the quality. Quite a demand is expected next week as horse show week brings quite a few out-of-town visitors and society is busy entertaining them. Everyone is now looking for chrysanthemums. At all the wholesale houses a more general run of trade is on and a good season is looked forward to.

NOTES.

F. J. Foster will be a very prominent exhibitor at the horse show. He has 16 entries. Among his fine string of horses are Right O' Way, Foxy Quiller, Chestnut Beauty, Bobby F., saddle pony Get-a-Way and Silver King. Fred is so busy with the horse show that he has somewhat neglected his chronic catarrh cure although he was around the wholesale houses Sunday with a fresh supply which he distributed gratuitously at intervals.

Geo. H. Angermueller was a visitor to the state fair at Springfield, Ill. He visited A. C. Brown's, A. C. Canfield's and Miss Belle Miller's greenhouses. He was highly pleased with the outlook for a good supply of flowers this winter from this point.

It is rumored that Adolph Brix, the enterprising north end florist, will purchase the greenhouses of T. Klockenkemper. Mr. Brix has built up a very large trade and is a hustler. He is ably assisted by his wife and sons.

Andrew Meyer, Sr., has returned from the state fair at Springfield, Ill. Mr. Meyer was judge of cut flowers and floral exhibits. He was well treated and expressed himself as well pleased with what he saw.

The statue of St. Louis at Forest park was unveiled by Miss Wells, the mayor's daughter, a large crowd being present as the mayor had issued a proclamation for a general holiday.

Paul Berkowitz, of H. Bayersdorfer & Co. of Philadelphia, is with us. Mr. Berkowitz is very enthusiastic concerning trade in general, the best in years he says.

Henry Ostertag, of the firm of Ostertag Bros., has had his hands full the last few days superintending private decorations for horse show week.

Arnold Scheidegger is growing some fine violets and carnations. He brought into the market last year some of the finest California violets.

M. Butterfield & Son, of Farmington, Mo., was here hunting a commission house to handle his very extensive crop of Ben Davis apples.

The Eggeling Floral Co. has its houses well stocked with carnations and chrysanthemums which will be on hand next month.

Geo. Waldbart has his windows very beautifully decorated with the choicest of cut flowers, palms and blooming plants.

The Bentzen Floral Co. and Grimm & Gorley had their wagons decorated at the civic parade last Thursday.

W. E. Smith & Co. handled the past week a large quantity of palms and Boston ferns.

The Ellison Floral Co. has several weddings and receptions booked for next month.

C. Young & Sons Co. have their windows specially decorated for horse show week.

Miss Theresa Badaracco has a very artistic show window for horse show week.

W. F.

Kansas City.

STOCK IMPROVING.

Trade in general the past week has been very good. It is safe to assert that the busy season for the florist has begun in earnest. Retailers report a splendid business, especially in the decorating line. Social events become more numerous with the return of society folks. An unusually large number of weddings have occurred during the week which served to keep the decorators busy. The opening of the new Shubert theater made many nice orders for American Beauty roses and other choice stock. Among the wholesalers there is much evidence of improvement in both condition of stock and of trade. American Beauty grown in this locality is poor. Some very fine blooms, however, may be seen, but these are shipped in. Bride, Bridesmaid, Carnot and Golden Gate are much better. Other varieties are improving nicely as the weather becomes cooler. Carnations are still scarce and poor in quality. Dahlias are of fair quality and a trifle scarce. Some good lilies are in evidence. Chrysanthemums have not yet put in their appearance. Most of the growers say they are from 10 days to two weeks late this season. Smilax and asparagus are more plentiful than for some time.

Miss Moseley, of Kansas City, Kans., reports a brisk trade in that part of the city, due to the many visitors attending the carnival there.

Bernard Soden is suffering a severe attack of typhoid fever. The trade extends best wishes and hopes for a speedy recovery.

Edward Ellsworth received a large shipment of palms and foliage plants last week.

Edward C. Stammerjohn, from Boonville, Mo., was among recent callers.

K. C.

OBITUARY.

Henry Cowan.

Henry Cowan, for a number of years a faithful and popular employe at the U. S. Propagating Gardens, Washington, D. C., died September 27 of acute indigestion after an illness of but two days.

Deceased was a native of Washington. He is survived by a wife and three daughters who have the heartfelt sympathy of many friends in this sudden bereavement. His remains were followed to their final resting place in the Congressional cemetery by many of his former associates in the service of the government, who also showed their sympathy by fine floral tributes.

S. E.

Patrick J. Donahue.

Patrick James Donahue, aged about 70, well known as a practical landscape gardener, dropped dead October 2 with apoplexy as he was about to arise from bed. He had been in as good health as usual, and his sudden death was a great shock to many friends. For 15 years Mr. Donahue had been superintendent of the Morris K. Jessup place, Belvoir Terrace, in Lenox, Mass. He came to the place from Newport to do some landscape gardening and Mr. Jessup prevailed upon him with a large salary to stay. He had previously been employed by James Gordon Bennett and John Jacob Astor.

In Lenox and Newport he was considered an authority in gardening by the owners and superintendents of large estates, and was frequently consulted. He was born in Ireland, but came to America as a young man of 21. His wife died five years ago. He leaves two daughters, Miss Katheryn, of Lenox, and Miss Mary, of New York, and a son John, of Lenox; also a brother, John of New York. He was a member of the Knights of Columbus and St. Anne's church.

THE date of Easter is March 31.

HE was an ancient Chinese philosopher who said: "Without going you can get nowhere."

WE are in receipt of Part 2 of the Transactions of the Massachusetts Horticultural Society for the year 1905, containing reports of the annual meeting and the reports of the officers and committees.

THE date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires. Please renew subscription promptly on expiration to make certain of receiving your copy of each issue.

WE learn from the general press that a syndicate is arranging to purchase 15,000 acres of land near Marysville, Cal., to be colonized by families from southern France, who will engage in the production of flowers for market, using the unsalable stock in the manufacture of perfumery.

HERINGTON, KAN., furnishes an excellent opening for a good florist. This town has a population of 4,000 and is within a radius of 25 miles of 15 or 20 other towns of from 100 to 4,000 inhabitants. The Missouri Pacific and Rock Island railroads both pass through here, the latter having three lines, one to Fort Worth, Tex., another to El Paso, Tex., and a third to Salina and Kansas City, Kans. Prominent townsmen will donate a site for a good greenhouse plant.

Some Scarce Items in New England.

Specimen kentias in good condition.
Specimens of cycas in good condition.
Box trees in large pyramid form.
Norway maple in large specimen sizes.
Cut-leaved beeches.
Privet from three to four feet high.
English ivy three to four feet high in 4-inch pots.
Arbor-vitæ in large sizes.

BUYER.

A Kansas Invitation.

The secretary of the Topeka (Kans.) Commercial club will, it is said, issue an invitation to the S. A. F. to hold its convention in Topeka during the summer of 1911, the year of the semi-centennial. The Topeka Capital, in a recent issue, is very enthusiastic in the matter and I presume that even now the Commercial club is figuring on the amount of revenue it will derive from the fattened hotel tariff. Some of these little towns have very distorted ideas of their importance.

OLDTIME CONVENTIONITE.

National Council of Horticulture.

Arrangements have been made for a meeting of the National Council of Horticulture at Chicago, November 9, at 10 o'clock a. m. Delegates are requested to meet at the flower store of P. J. Hauswirth, 227 Michigan avenue, and from there will go to a room in the Auditorium Annex where the sessions will be held.

Details for the press bureau work for the coming year will be considered and acted upon, together with the matter of holding a national congress of horticulture and horticultural exhibition at the Jamestown exposition in 1907. It is expected that a report will be made by Robert Craig, who is making a personal visit to the Jamestown exposition, for the purpose of investigating the practicability of holding a congress and exhibition. Other matters which should be brought before the congress will be considered at this time.

Anyone having thoughts or suggestions for the consideration of the Council is asked to correspond with the secretary, or if possible, to be present at the meeting of the council and present his views.

H. C. IRISH, Sec.

Chrysanthemum Society of America.

EXAMINING COMMITTEES.

President Duckham has announced the committees to examine seedlings and sports on dates as follows: October 6, 13, 20, 27 and November 3, 10, 17 and 24, 1906. Exhibits to receive attention from the committees must in all cases be prepaid to destination and the entry fee of $2 should be forwarded to the secretary not later than Tuesday of the week preceding examination, or may accompany the blooms. Special attention is called to the rule requiring that sports to receive a certificate must pass three committees.

New York, Eugene Dailledouze, chairman, 55 and 57 West Twenty-sixth street, New York, Thos. W. Head and Wm. Turner.

Philadelphia, Pa., A. B. Cartledge, chairman, 1514 Chestnut street, John Westcott and Wm. K. Harris.

Boston, Mass., E. A. Wood, chairman, Wm. Nicholson and James Wheeler. Ship flowers to Boston Flower Market, care of John Walsh.

Cincinnati, O., R. Witterstaetter, chairman, James Allen and Wm. Jackson. Ship flowers to Jabez Elliott Flower Market, care of janitor.

Chicago, J. S. Wilson, chairman, J. B. Deamud and Geo. Wienhoeber. Ship flowers care of J. B. Deamud, 51 Wabash avenue.

BUSINESS FAIR.

Trade as a whole was not so good as last week. Monday found the market with an abundance of most all lines of stock, particularly roses, and a not any too good demand. Prices, however, remained firm and there was but little room for complaint. Stock of all kinds improved wonderfully under the influence of an icy wave which swept the city late last week, continuing four or five days without cessation. It had the effect of placing certain stock at a premium. Carnations shortened up considerably and the quality improved a great deal. Some very fine Boston Market, Enchantress and Lawson are now obtainable but not in sufficient quantities to damage prices. On the contrary good material brings the best of figures. Roses are in plentiful supply. American Beauty, Liberty, Richmond, Chatenay, Kaiserin and other standard varieties can be had in any quantity at normal prices. The stock is excellent as a whole. Bride roses are much better than they have been for some time; the same is true of Bridesmaid, although there is still room for improvement in this variety. Easter lilies have created much comment this week by their scarcity and astonishing demand. Very few could be had for less than $3.00 per dozen and in some cases they were sold at even better figures. Chrysanthemums are beginning to arrive more freely. The earlier varieties are comparatively plentiful, yellow predominating, and some heavy cuts are promised very soon. The quality is first class in every respect.

NOTES.

Residents of Hyde Park, at the present writing, may have some misgivings as to the benefits, moral, financial and otherwise, to be derived from the existence of the South Shore country club. A. Lange, however, could hardly be criticised for holding opposite opinions as it was the result of a fine decorating order which came his way, last week. There were 71 tables used at a banquet given by this club which evidently spared no expense to make the spread a gorgeous one. No less than 1,000 strings of Asparagus plumosus, 10 cases of wild smilax, 1,000 American Beauty, 1,000 Richmond roses and over 400 Easter lilies and snap dragons were used. Mr. Lange had the order for the decorations at the Sir Thomas Lipton banquet this week. One of the incidents of the affair was the presence of a small crocodile, measuring not over two feet, in a box of wild smilax.

A meeting of about 20 Chicago wholesale employes, under the leadership of H. W. Rogers and J. P. Risch, was held in the latter's office, October 5, for the purpose of discussing plans for a dance to be given Hallowe'en night. The popular Columbia hall, Clark street and North avenue, famed for its spacious floor and general facilities for such affairs, was decided upon as the place and $100 was quickly subscribed to defray the expenses of renting, printing, etc. It is aimed to make this a record-breaking event and assure each and all an enjoyable evening.

The Central Floral Co. furnished the decorations for the Lipton banquet held at the Auditorium annex, October 6. A great variety of roses including American Beauty, Killarney, Richmond, and Chatenay and cactus dahlias, ferns, etc., were used. One of the features of the floral decorations was a mammoth shamrock which was hung above Sir Thomas' head.

That most wholesale florists are born sports would seem evident from a trip through the market, the afternoon of October 9. This was the first day of the base-ball fight and a large percentage of florists left their businesses in charge of clerks to witness the pennant struggle regardless of the icy weather. It is rumored that some heavy betting took place.

A wagon of the Schiller estate, while traveling rapidly down West Madison street the evening of October 7, struck a small boy who was crossing the street and injured him fatally. The lad was picked up and hurried to a near-by hospital but died the following morning. Young Schiller, who was driving at the time was exonerated by the coroner's jury.

Vaughan & Sperry are building a cold storage room at the north end of their quarters in the Flower Growers' Market for the preservation of chrysanthemums and other stock this winter. They will have ample space for leucothoe sprays, smilax and stock of that nature and will keep a supply always on hand.

Glass jobbers held a meeting in this city October 4 and advanced prices somewhat owing to the fact that an association is being formed by the manufacturers which, if perfected, will keep prices higher than those that have prevailed the past year.

P. J. Hauswirth has moved his store to 13 Congress street, during the erection of the new addition to the Auditorium annex.

Louis Ostendorp reports a good business at his new Douglas boulevard establisment. He has just installed a $400 heating system.

Miss Luffmann, well known to S. A. F. members, spent a few days in the city last week.

Visitors: Max Wilhelm, of the Barteldes Seed Co., Lawrence, Kans.; Fred Schmeling, Milwaukee, Wis.; C. A. Urbach, Toronto, Can.; F. K. Kramer, Washington, D. C.; J. A. Peterson, Cincinnati, O.; Paul Berkowitz, Philadelphia, Pa.; Mr. Kezer, Rockford, Ill., and Mr. Smith, of the Joliet Carnation Co., Joliet, Ill.

Ogden, Utah.

Trade has been unusually good this year. Increasing business has compelled several of the growers here to build additions to their plants. Among those who have extended their plants are F. J. Hendershot & Son, W. L. Porter and the Ogden Floral Co. J. J. Newman has started with 1,000 feet of glass.

The city parks have been much improved and the city hall square has been remodeled with an addition of 2½ acres. This is now being put into condition for the planting of trees, shrubs, etc. Last spring an improvement league was formed, with J. S. Lewis as president, for the improvement of homes, streets and parks. Already the movement has borne good results.

DEMAND HEAVIER.

Business is improving, there being quite a change in the demand over that of last week. Early October weddings called for choice flowers and kept the market almost bare of American Beauty and other choice roses. Four dollars per dozen is now asked for the best American Beauty, but blooms must have stems close to four feet to bring this figure. The majority sell at from $1.50 to $3 per dozen. Killarney and Maid are improving, $6 per 100 being now asked for the best. Dahlias are plentiful and in good demand, in fact large shipments are on many days sold immediately on arrival. The stock has never been handled better than this season, the flowers arriving in perfect condition. Carnations are not at all equal to the demand, being sold at sight. Two to three dollars is the price. The first double violets arrived on Saturday last and another week will see regular shipments. Singles are plentiful but have little substance and must be sold the day they are received. Chrysanthemums are now coming in daily. The best are from H. Weber & Sons, Oakland, Md., who are shipping fine Polly Rose, Glory of Pacific and an early yellow to S. S. Pennock.

NOTES.

It's an ill wind that blows nobody good, and while adverse zephyrs are not in our line yet it seems that in trying to describe the conditions of the kentia market of this city as it appeared from a more or less personal inspection, we started a breeze which blew all the way from Germantown to Riverton and with a mighty fillip landed the festive "Phil," pipe, sandwiches and all right in the midst of 25,000 kentias. Kentias thousands of them, in such desirable sizes, fine specimens and groups of same in from 7 to 10-inch pots.

He could hardly believe his own eyes, for he had just read in the reliable columns of THE AMERICAN FLORIST that these very desirable palms were scarce, particularly such popular sizes, and here they were in quantity for everybody, which fact he very properly noted so that all he could reach through his column should know the true facts of the case. After he had eaten his sandwich and smoked his pipe he had an interview with Geo. A. Strohlein of the Dreer force who had just returned from Belgium, and he reported marketable or popular sized kentias to be scarce in this, the world's market, and that they were then importing small sizes from England to replenish their stock.

We note in a September issue of "Phil's" generally unreliable journal an editorial caution to those who are not closely in touch with the market, that kentias were advancing and would likely go higher, as there were no stocks in this country that were not sure of a sale and also that stocks were so depleted in Belgium that they could not be imported profitably for sale here.

W. H. Taplin, the noted palm expert of this city, says in an article in the September 29 issue of the Florists' Exchange, in speaking of kentias, "That the scarcity of certain sizes was being felt as early as September 1. The sizes that are in poor supply at present are plants in 7 to 8-inch pots, also strong stock in 6-inch pots. In the light of these facts and warnings I feel that I can assure "Phil" that kentias in popular sizes in this and all other markets are scarce and also congratulate the H. A. Dreer Co. on their foresight in having such a stock at this time and in my little squib having been the means of spreading the news broadcast before their buyers.

The Philadelphia Cut Flower Store, 618 Chestnut, furnished 27 laurel wreaths, all more or less elaborate, for the unveiling of the mounment erected to Dr. Kellner, a prominent citizen of German birth. The orders came from all over the country from different German societies. The work was much admired.

H. H. Battles has a house of as fine Adiantum Farleyense at Thornhedge as has ever been seen in this market. We question if it has been done commercially or in fact by private growers as well before.

The Leo Niessen Co. is handling some very choice American Beauty roses for the season of the year. Although receiving many more of this favorite rose than last year, their extra demand takes them all.

The types were a bit mixed regarding our treasurer in last week's issue. Goldflesh is a good name of the guardian of the funds, but Colflesh is the way Mr. William spells his name. K.

Pittsburg.

STOCK SCARCE.

Scarcity of stock still keeps the wholesalers from getting busy. When the morning shipments arrive it is a merry scramble to secure each person's order of carnations and good roses. Business is then practically over as there is no stock to work on. The once despised dahlia is now eagerly sought, many very good ones arriving from New Jersey and Maryland. Killarney is the best pink carnation on the market, selling well. Lilies are scarce. Many are being shipped in from the west, but these arrive in such a green state that they are very unsatisfactory. American Beauty roses are plentiful although the prices obtained are very good. The last of the gladioli and asters were seen during the week.

NOTES.

The last meeting of the Pittsburg and Allegheny Florists' Club was devoted to outdoor flowers. Many fine specimens of dahlias were shown. Schenley park presented its usual fine collection. President Jones never spares any expense or trouble to show the club fine collections. Albert Lorch showed some carnations he is now cutting, which were very fine.

Chas. Eiberheart, formerly with E. C. Ludwig, has taken a pardner and will now run a stand in the Allegheny Market under the name of Eiberheart & Schwartz.

M. S. Stafford intends adding to his store room a depth of about 20 feet. He has a couple of extra loads of fine palms with which to decorate it.

The firm of Chas. T. Siebert will hereafter be known as the C. T. Siebert Co., with Ernest Sieger in charge.

Mr. and Mrs. Willis, of the Salineville Floral Co., of Salineville, O., were visitors here the past week.

The Florists' Exchange was kept busy during the week unpacking supplies.

Alfred McCoyd opened in the Arcade on Saturday.

Visitors: Geo. Schomer, of Connellsville, Pa.; Jos. Hargraves, of East Liverpool, O. J.

LYNN, MASS.—Thos. Roland has purchased a motor truck for which he is having fitted a special body.

FALL RIVER, MASS. — John Lambert and wife observed their fifteenth wedding anniversary September 22.

MILWAUKEE, WIS.—Gordon Whitnall has entirely recovered from his recent illness and seems to be better than before it came on.

WILTON JUNCTION, IA.—John Beimford has sold out to Fredericksen & Son and will seek a climate more congenial to his health.

SIDNEY, N. Y.—Harry Thorndycraft has built a large new greenhouse. He grows early vegetables, plants, and also for cut flowers.

NEWTONVILLE, MASS.—Many friends speak highly of Patrick D. Connors, and were greatly shocked at his death. He had been here many years.

NEWTON CENTER, MASS.—H. J. McGrady has reopened the flower store at 67 Union street, where potted plants and cut flowers are always on hand.

BRIDGEFIELD, CONN.—A new Lord & Burnham boiler hase been installed in L. H. Biglow's greenhouses, which is equipped with all modern improvements.

DEMAND EXCEEDS SUPPLY.

The market is very much improved, but the improvement is mainly due to a shortage of arrivals. Everything in the way of arrivals is short and there is nothing which could be said to be normal. Roses are very light, but the quality is improved and really good Bride and Bridesmaid roses can be had. Prices are running somewhat above the minimum of quotations. Bride roses are short in supply. Anything in whites is scarce. Ordinary pink and white varieties are plentiful enough, but anything approaching standard stock has to be hunted for. American Beauty is looked for to a large extent and special grades were bringing as high as 50 cents during the early part of this week. Carnations are improving very much in quality and some really good flowers are being offered. White varieties are not much in evidence, according to the demand. Lilies are in demand, and the supply is quite poor, offerings bringing easily above the maximum price. Lily of the valley is not up to the demand and consequently much of the lower grades bring prices approaching the maximum. Violets are arriving freely, but the quality is poor. Chrysanthemums are coming in quite plentifully. Cosmos, feverfew and phlox are among the outside offerings finding ready buyers. Cattleyas are not very plentiful and at times seem quite scarce. Gardenias are coming in quite freely and go off at very good figures as high as $3.50 per dozen.

NOTES.

The windows of many of the retail florists show signs of more careful attention to a display to suit the season just opened. Here and there made-up boxes and hampers are to be seen filled with crotons, dracænas and ferns. Made-up fillers for fern dishes, perforated flower pans, filled with small ferns and Asparagus plumosus, are to be found at some stores. These are carried in a size to suit the common sized round fern dish, and are undoubtedly an advantage. In Fleischman's Madison square store this week were noticed some large imitation specimens of blue hydrangeas in pots. It is not often that the artificial flower maker can find room for his art in prominent Broadway establishments. Many florists are making window displays of art ware covering flower receptacles. J. H. Small & Son showed a fine collection of pottery, plain antique finish and Greek patterns, in their store windows last week, and the goods suitably arranged in display with forms of different kinds proved very attractive.

The New York Florists' Club held its monthly meeting on October 8. The exhibits presented were quite small, and occasioned little attention from the committee of awards. Henry Beaulieu, of Woodhaven, made a very creditable exhibit of dahlias. Resolutions on the death of James Weir, Jr., were read and adopted, and a committee was appointed to draft a memorial on the death of Paul R. Pierson, father of Frank R., Paul M. and Lincoln Pierson. Ant C. Zvolanek, Lester C. Lovett, and Henry Turner, were elected to membership, and Andrew Wilson, of Summit, N. J., was nominated for membership. The resignation of Samuel Thorne was accepted, and on motion Mr. Thorne was made an honorary member. C. H. Totty, of Madison, N. J., was complimented on his admirable showing of the chrysanthemum Mrs. R. Fothergill. The committee on nominations was announced by President Scott, the same being Alex. Wallace, Geo. S. Kene, Walter P. Sheridan and Wm. Duckham.

The employes of the wholesalers are arranging to hold another large ball early in January. A committee has taken the matter in charge and has secured a hall uptown which will allow of the affair being conducted on a larger scale than last year.

The question, "What is a stove plant?" was discussed in lively fashion, and ultimately on motion a committee was named to report on the subject at the next meeting.

J. H. Kemper, of Flatbush, has commenced the building of a greenhouse on the new lot recently acquired by him near his old site.

John Young is receiving some fine shipments of American Beauty roses from his Bedford establishment.

Vincent Zuber, of Whitestone, L. I., is sending in daily a wagon load of dahlias to Alfred H. Langjahr.

Peter Wagner, of Flatbush, is sending in Boston and Scottii ferns, fine in quality and size.

Gunther Bros. are receiving daily shipments of dahlias from Atco, N. J.

Visitors: Thos. J. Grey, Boston, Mass., and H. C. Obergfell, Atlantic City, N. J.

Horticultural Society of New York.

The opening meeting for the winter session of the Horticultural Society of New York will be held October 10, in the museum building of the New York Botanical Garden. In connection with the meeting, there will be an exhibition of hardy flowers, etc., which will be continued on the Thursday. Specimens of interest are solicited. The exhibition not being of a competitive character, the awards will be made on the merits of the individual exhibits. Further application can be made to the secretary, Leonard Barron, 133 East Sixteenth street, New York.

Huntington, N. Y.

The fourth annual exhibition of the Horticultural and Agricultural Society, held the afternoon and evening of September 20, was the most successful of any yet given. The L. I. Railroad's experiment station at Wading River, H. B. Fullerton, gardener, made the principal exhibit. Mr. Fullerton told the story of the Wading River farm. Some fine exhibits were also made from the greenhouses and gardens of Oyster Bay. Henry A. Dreer, of Philadelphia, sent a collection of blooms. H. T. and A. H. Funnel and Wm. O'Hara, both of this city, also had excellent displays.

HEADQUARTERS FOR

CHOICE PLANTS.

Araucaria Excelsa, 5-in. pots, 50c and 75c, 3 to 4 tiers; 5½ to 6 in., $1.00 to $1.25, 4 to 5 tiers; 7-in. pots, $1.50, $2.00 and $2.50; 8-in. pots, 3½ feet tall, $3.00 to $3.50.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

SOME extended reference to Benary's novelties will be found elsewhere in this issue.

THE low lands of the Tennessee holly districts are seriously flooded with water.

THE California onion seed growers at present decline to make any prices for next year.

THE shortage of onion seed in California appears to be greater than was anticipated.

LACK of frost so far makes bulb sales with retailers rather slow. October should show improvement.

HOWARD M. EARL, of W. Atlee Burpee & Co., Philadelphia, Pa., is in California looking for onion seed.

ONE of the largest of the California growers intends to book orders for next year's onion seed crop with prices open.

VISITED CHICAGO: Roland Bolgiano, of J. Bolgiano & Son, Baltimore, Md.; F. W. Maas, of the Planters' Seed Co., Springfield, Mo.

EDWARD DUNGAN, manager of the Wm. Henry Maule concern, Philadelphia, Pa., was a recent caller on the Chicago trade, returning from the California and Nebraska seed districts.

SAN JOSE, CAL., October 5.—A big touring car owned and driven by E. L. Peacock and containing Major and Mrs. Chas. P. Braslan, Mrs. Adele Pieper of this city, and H. M. Earl of Philadelphia, collided in front of the Agnew asylum with an unidentified Japanese cyclist. The automobile, the wheel and the Japanese were thrown off the road into an irrigation ditch, where the heavy car held the cyclist under the water. He was drowned before he could be rescued. None of the automobilists was injured.

The Making of Catalogues.

At this time of year seedsmen are much interested in the making of catalogues. The chief thing about a catalogue is the cover. That must be admitted at all times. A catalogue cover should appeal to everyone, the informed as well as the illiterate customer. The intelligent customer may be interested by the fine work shown on your catalogue as easily as the man or woman of lesser knowledge is attracted by showy pictures. The chief object of a catalogue cover is to attract. In this connection it may not be amiss to glance at some of the latest covers of leading houses. The illustrations herewith show some of these covers reproduced. It should be understood, of course, that the color effect is absolutely lacking in the reproductions and that while many of the covers do not show up well in these reproductions, in their color schemes they

Grant Thorburn.
Founder of the House of Thorburn.

are quite attractive. Perhaps one of the best catalogue covers of recent years is that designed by Mucha, the noted French artist, for Vaughan's twenty-eighth annual spring catalogue, issued last year. Gregory, of Marblehead, said it was the best catalogue cover of the season, and Gregory has seen a good many. For general workmanship, grace of figures and pleasing color scheme, gold and two shades of lilac on gray ground, the design takes first rank.

Dreer's cover shows salpiglossis embossed in natural colors.

Burpee's beans and ear of corn are lithographed in natural colors.

Vaughan's 1906 cover shows Phlox Drummondi lithographed in natural colors.

The Rawson cover is embossed in natural colors.

Livingston's cover is of very pleasing color scheme, in which, however, the detail is entirely lost in the reproduction. The cover is lithographed in natural colors.

Beckert's cover shows a very artistic and effective embossed design.

Thorburn's is perhaps the most expensive cover in this collection. The hand made embossing die has been used here with striking effect. Conventionalized carnations are shown in pink and green and the trade mark of the firm shows up particularly strong in three colors, the entire effect being very delicate and pleasing.

Michell's is an embossed cover in nat-

SOME CATALOGUE COVER DESIGNS.

ural colors and a fairly good design marred somewhat by three patches of printed matter in black and white.

Henderson's catalogue, showing on the front cover a scene entitled "The Garden Beautiful," is quite attractive. In the picture scene of the cover is shown a very delicate shade of sky blue and the entire cover is done in four colors. The embossing is of the most costly character. A companion scene is printed on the back cover entitled "The Garden Bountiful," and is equally meritorious.

Weber & Don have a costly design of gray effect. The general style is quite up-to-date and was drawn so as to give an embossed effect.

Vick's cover shows asters well lithographed in pink, white and purple on a light green ground. The back cover strawberry design is even more effective than the asters on the front.

Farquhar's purple and white campanulas on a yellowish ground makes a very striking cover, the firm name being printed in strong red.

The House of Thorburn.

The illustration herewith shows the latest quarters of perhaps the oldest regular seed firm in America, well known everywhere as J. M. Thorburn & Co., of New York. We also reproduce on another page the portrait of the founder of this illustrious house, Grant Thorburn. The following particulars with regard to this concern may not be without interest at this time. It will be recalled that only a short time ago (see issue of June 30, 1906) we published an exhaustive account of the house of Vilmorin, the greatest seed house in the world. In that connection this sketch of the house of Thorburn will be interesting to those who have followed the development of the seed trade in Europe and America.

The business was established by Grant Thorburn in 1802 at 20 Nassau street. Grant Thorburn was born in Dalkeith, near Edinburgh, Scotland, in February, 1773. Business was carried on at 20 Nassau street and in 1808 by a miracle escaped total destruction by a fire which commenced in a soap and candle factory adjoining the store.

"In 1814 the business was totally prostrated by the proprietor expending his whole capital and more in fruitless preparations and attempts to raise seeds, etc., which could not be imported during the war." This notice appeared as an advertisement on the back cover of G. Thorburn & Son's catalogue of 1827. On the back cover of the 1822 catalogue appeared the following advertisement:

G. Thorburn & Son take the liberty of informing their friends and the public that they are constantly supplied at their seed warehouse, 20 Nassau street, New York, with a general assortment of garden seed suitable for cultivation in the United States and the West Indies: Grass seeds of every important and valuable kind, hawthorn quicks for live fences or hedging, a great variety of flower seeds and roots, procured from various parts of the world; spades, shovels, rakes, hoes, hand ploughs, etc., etc., bird seed of every kind; English split and whole peas for boiling, American and Scotch oatmeal.

The more effectually to accommodate their customers they have connected with the seed trade, a botanical and agricultural book store, where a great variety of the most valuable publications on these subjects, especially the modern works of merit, may now be had, including the agricultural almanacs of the states of New York, Pennsylvania can Connecticut can be had every year as soon as published.

In 1816 Grant Thorburn recovered from the prostration of his business as recorded in 1814 and "with the help of $500.00 advanced by a friend" he commenced anew, "having for nine years past stood the attacks of several powerful opponents, and among the last though not the least, was the great Ruta Baga of Botley, the famous Wm. Cobbett, of political memory." In the 1822 catalogue we notice the following interesting quotations under the heading:

The New Thorburn Store.

Wholesale prices of seeds for the information of those who sell again:

Asparagus	per lb.	$1.00
Beet	"	1.50
Ey. York Cabbage	"	2.50
Carrot	"	1.50
White Spine Cucumber	"	4.00
Mangel Wurzel	"	1.50
Nasturtium	"	2.00
Spinach	"	1.00
Turnip	"	.75 to 1.00
Fine Mixed Tulips		2.00 per doz.
Hyacinths mixed		2.50 " "
Crocus		.75 " "

In 1826 G. T. & Son purchased the Friends' meeting house in Liberty street; the house had been occupied by the Society of Friends' (Quakers) "as a place of burial, school and meeting house for upwards of 140 years." This house is described in the Thorburn catalogue of 1827 as "a commodious two-story brick building, 40x60 feet, lighted with 20 windows."

This "commodious" building contained as well as a large assortment of seeds and bulbs a valuable assortment of song birds—"to the inspection of our whole collection, the public is welcome, every lawful day from sunrise to sunset." The catalogues of the firm between 1827 and 1844 were destroyed by mice.

In 1844 we find the firm James M. Thorburn & Co., at 15 John street, near Broadway, garden and greenhouses at Astoria, L. I., six miles from New York on the banks of the East river near Hurlgate. Stages to Astoria at that time ran several times daily "from Chatham street opposite the city hall," and prospective customers were given at the end of catalogues precise directions (of which above is an extract) as to how to get to the greenhouses with the assurance that the precise plant selected would be sent "carefully packed, to any part of the U. S. or West Indies." Up to this time the Thorburn catalogue was a small volume, indeed measuring only 7½x4½ inches and containing only 60 pages. Yet the assortment of seeds of all kinds including tree and shrub seeds which has continued to be a specialty with the firm, was quite large and cultural direction were given quite exhaustively. In 1865 we notice the price of Daniel O'Rourke peas at $14.00 per bushel. Advancer $1.00 per quart, Champion of England, $12.00 per bushel.

In 1864 the firm introduced the popular New White Peach Blow potato, a variety which in its day, represented the highest achievement in the improvement of the potato. In 1865 we notice listed for the first time Carter's First Crop peas at $2.00 per quart and in 1866 McLean's Little Gem at $45.00 per bushel. We also notice Yorkshire Hero priced at $20.00 per bushel, McLean Advancer $20.00 per bushel, Champion of England, $9.00 per bushel.

In 1867 the firm began to specialize particularly grass seeds and its catalogue of that year gave very comprehensive instructions for the formation of lawns from seed. The varieties of grasses listed as far back as 1865 included about 35 varieties. Since then special attention has been given this subject and the grass seed end of its business is ever on the increase. In 1870 was first listed a collection of "novelties," etc., under which head we find Conover Colossal asparagus, New Egyptian Blood turnip beet, Crosby sweet corn and Alpha peas.

In 1871 hand lawn mowers were quoted and appeared in the catalogue for first time. 14-inch at $25.00. 18-inch at $30.00. In 1872 was introduced Thorburn's Late Rose potato, an unrivalled winter sort of that day. We have not spoken of flower seeds, the firm having issued

special catalogues of flower seeds only up to 1878, when their catalogue embraced seeds for all purposes. In 1878 was introduced by Thorburn & Co. the ever popular potato, Beauty of Hebron, and in the same year Thorburn's First and Best pears. In 1881 came the White Elephant potato, also this firm's own introduction.

In 1882 the Challenger lima beans first appeared; they commanded a price quite high. $1.00 per quart, $25.00 per bushel. In 1867 the firm listed for the first time Trimble's sugar corn, which was carried along for a number of years until 1882, when it took its new and better known name, Ne Plus Ultra. The Country Gentleman variety, now so well known, was first catalogued in 1893, so that this popular late variety is their own introduction.

In 1886 the Thorburn potato was introduced. In 1887 Oemler's Triumph

Seed trade continued page 562.

ARAUCARIA IMBRICATA FRESH SEEDS

Just received from Araucania, direct importation. Splendid conditions. Thirty-second annual convention, Detroit, Mich., June, 1907.

"Oh, sweet it was and fair it was
In the green woods today,
With only the tree-tops bending near
And all the world away."

PROF. VAN DEMAN, the well known pomologist, states an attempt is being made to have the postoffice department issue a fraud order against the original Spencer Seedless Apple Co.

A FLORAL RAILWAY DEVICE—"Tickets, please," is a legend wrought in flowers to be seen in the border at a station on the Northeastern railway between Thirsk and York.—Gardening World.

SYRACUSE, N. Y.—After hearing from the park commission the plans outlined for developing a park and boulevard system in and about Syracuse and arguments in favor of the employment of Geo. E. Kessler of Kansas City as landscape architect and a resolution was adopted to that effect. Under the ordinance Mr. Kessler's employment dates from October 1 this year. He is to receive $3,500 for the first year and $2,000 for each of the succeeding years.

Japanese Maples.

Nearly everyone admires the Japanese maples. They are particularly attractive when their leaves first unfold; in fact that is the time of year when they seem even more beautiful than when the foliage is changing in the autumn. At these times Japanese maples are at their best although they are attractive throughout the season. Japanese maples vary in height from four to eight feet, when they are shrub-like in character, to small trees attaining a height of 20 or 25 feet. In landscape gardening their value is appreciated as testified by the frequency with which they are met. A favorite location for them seems to be near the dwelling or in some of the more favored parts of the grounds. Not only is the foliage attractive but they have a wide range of leaf forms, varying from broad, palmate leaves to the nearly dissected leaves. The color also varies from light yellow to a deep wine red.

The nomenclature of Japanese maples is somewhat mixed, but the varieties are easily distinguished by the character of the leaves. For instance, what many know as Acer Japonicum is really A. palmatum and this again is frequently called A. polymorphum. A. Japonicum has from 11 to 13 lobes in the leaves and includes one or two varieties, as variety aureum and macrophyllum. A. palmatum, however, has from five to seven lobes in the leaf and includes a number of varieties of great merit, some of the best of which are atropurpureum, atrolineare, dissectum, ornatum and sanguineum, all of which are reliably hardy as far north as Massachusetts. Such varieties as reticulatum, crispum, and versicolor are too tender to be satisfactory. Japanese maples are well adapted to planting as individual specimens but it is, perhaps, in a group that they are more appreciated, as the contrast of color and diversity of foliage is more pronounced. Many persons seem to think they are of slow growth. The accompanying illustrations show a growth covering a period of five years. It will be seen that the plants are well placed and are by no means slow of growth. What could have been better for the position they now occupy? They give the grounds and house an atmosphere of privacy, but will never attain sufficent height to cut off the view or air. Give them good soil, stir the ground about them until they are well established, encourage them in their earlier stages and enjoy the results.

FRANCIS CANNING.

Cincinnati.

STOCK SCARCE.

A general scarcity of stock the past week with very little doing is the report from the wholesale district. All the retailers are complaining of poor business but if there had been any demand they would have to skirmish around to get flowers. True, there was some good stock coming in, but shipping trade consumed nearly all of this. Chrysanthemums have not arrived as yet which no doubt can be attributed to the dark, cool weather we have been having, with plenty of rain and but very little sun. Carnations are very scarce with a demand that takes up everything that comes along in this line. There are plenty of short-stemmed roses, which clean up every day, simply because there are no other flowers that can be used for work. American Beauty has the call and is of fine quality. Cosmos and dahlias are about the only thing in outdoor flowers. Green goods are plentiful.

NOTES.

The next meeting of the Florists' Society will be held October 13, at 8 p. m. At this meeting it will be decided whether or not the flower shows will be continued during the season. All that can come should do so and give their opinion.

C. J. Jones, of the Walnut Hill Floral Bazaar, had the decorations for the Kershaw-Price wedding last Wednesday, which was an elaborate affair and used up immense quantities of American Beauty.

Wm. Murphy has returned from his vacation in the woods of Michigan, having left the hay fever there. Will looks well and his trip has been of benefit to him.

Wm. Dittmann, of New Castle, Ind., is shipping a nice lot of American Beauty to this city, which meets with a ready sale.

Henry Glins, who has had a long siege of sickness, is able to be about again, but plainly shows what a tussle he has had.

Will Gardener, the right hand man of Peter Olinger, is back from New Castle, Ind.

Chas. Critchell spent a few days at Lexington, Ky., the past week.

ALEX.

GOSHEN, IND.—The Goshen Floral Co. has purchased the Santschi & Sons' greenhouse and stock. The entire plant will be removed to the West Pike street place.

VALPARAISO, IND.—A. Londenberg & Son, of Hobart, have just completed their new plant at this place, consisting of about 4,500 feet of glass, at 55 and 57 Indiana avenue, opposite the court house. They grow carnations and a general line of plants and report a good business.

PHILADELPHIA, PA.—Wm. S. Maull, 6631 Landsdowne avenue, receiver for L. K. Peacock, Inc., states that legal complications have arisen over some few claims which have caused delay in settlement. If the expenses caused by these complications do not become excessive, there ought to be a dividend of 40 to 45 per cent.

LOGANSPORT, IND.—John A Newby & Son have built another house this year, 30x111 feet. The John C. Moninger Co., of Chicago, did the work. This house is planted in American Beauty, Bride and Bridesmaid roses. This firm also cuts a large crop of Kaiserin. Several other houses are planted with roses and carnations, one house to chrysanthemums and other houses with flowering plants.

WITH THE GROWERS

Cottage Gardens Co., Queens, N. Y.

Visitors to the establishment of the Cottage Gardens Co., Queens, L. I., N. Y., who have not been there recently, will be somewhat surprised to note the improvements made. The first thing to meet the eye is a handsome new office building in the Elizabethan style of architecture. The lower floor is devoted to office uses, there being a large general office, three or four private offices, and a large reception hall, with some smaller apartments. The second floor contains the department for landscape architecture, artists' quarters, a large dining or entertainment room, a catalogue and storage room, and living rooms for the caretaker.

The dining room is to be used for the service of meals to the office staff, and for the general entertainment of special visitors and guests. In connection with the provisions made for the comfort of guests is a service automobile to and from the railroad depot. Fronting on the large lawn is a new Lord & Burnham 46x300-foot greenhouse, and this with the new building gives a grand frontage to the establishment. The lawn is to be redesigned and planted to specimen groups of evergreens, and at each end will be an ornamental entrance leading to the office door. Formal gardens, tennis court and many accessories demonstrating correct and pleasing uses of plants in ornamental gardening will be added to the grounds.

This season the greenhouses have all been benched with carnations to be grown for cut blooms entirely. Only in rare cases will there be any further dissemination of varieties. Two 150-foot houses of Robert Craig look very fine, the last pinching of buds in one having been made. A small house adjoining and a 150-foot house are filled with fine Enchantress stock. A large bench of Enchantress is also seen in another 150-foot house with a bench of Fisher's pink seedling, and another bench of a seedling of C. W. Ward's. The Fisher stock shows up very nicely, throwing out quantities of strong side shoots. Another 150-foot house is benched with Evangeline, Alma Ward and Mrs. C. W. Ward, and another contains Mrs. Patten, and a new crimson seedling which appears to be a quick and very free grower. A fine white seedling fills two 150-foot houses. This variety is a wonderfully free grower, and it is said a small trial house of it last season produced in one week 1,560 cut blooms at a time when they commanded unusually high prices. A similar house is benched with Lieut. Peary, and a bench of another white seedling of C. W. Ward's. Another is filled with Mrs. Patten.

A new 235-foot house is planted with four benches of Fisher's new scarlet variety, Beacon and four benches of Robt. Craig. Beacon looks exceedingly well. Four weeks after benching it shows lots of fine flowering shoots. In the same house are some fine benches of Elsa. The benches in the new houses are of concrete with tile bottoms and cypress bench borders. Another new Lord & Burnham house is filled with the white seedling already mentioned and sufficiently advanced to produce blooms of good quality. There is a house of Octoroon, which is the favorite crimson and found to be a good staple bloomer. Two 150-foot houses are further devoted to Mrs. C. W. Ward, and near it is another benched with Robt. Craig. Two 250-foot houses are filled with Mr. Ward's dark rose seedling Elsa, winner of last year's Lawson gold medal, four benches in one being occupied with a carmine seedling of the habit, growth and freedom of bloom of Scott. The largest, a 300-foot house, is utilized for Alma Ward, an undisseminated variety with the exception of a trial bench for seedlings.

Considerable improvement is under way in the nursery department. The 110 acres comprising the home grounds are being laid out in avenues and drives so that a visitor can inspect most of the stock without leaving his conveyance. An avenue of about a quarter of a mile has already a deep border both sides of its length composed of fine groupings of different varieties of evergreens from the general stock. These are practically sample grounds and obviate generally the necessity for going through the whole nursery. A fine lot of Koster compact blue spruce is to be seen and there is a grand lot of Japanese azaleas. Retinosporas will attract the attention of every visitor. They are growing along here in larger sizes and handsomer shapes than are commonly seen. They are planted four to five feet apart in order to give them every opportunity for development. A long row of five-foot specimens of the variety filifera aurea and another of R. gracilis nana aurea in 4-foot specimens are very striking. There are also to be seen a number of Japanese larches. Larix Kæmpferi, fine 4 to 6-foot stock. Cedrus Atlantica glauca is noticed among the conifers, some of the specimens reaching 20 feet in height. This variety is fine for mixed planting, affording beautiful contrasts, and is perfectly lovely. A large stock of splendid specimens of Sciadopytis verticallata, ranging from 4 to 16 feet in length is also carried. Two and 3-inch stock in Norway maples is also noticed. Perhaps a rather unusual sight is a grouping of English and Irish yews, these trees not being generally supposed hardy in this section. They stood out all last winter, however, and are in grand condition.

The peony grounds are very extensive, the available stock running over 100,000, in 450 varieties. Many rare varieties are in very large supply. Digging for shipment of peonies commenced about September 1. More than ordinary attention is paid to the demand for rhododendrons. The plantings aggregate 20 acres, and cover only such varieties as have proven perfectly hardy, about 15 varieties in all sizes, many of them grown in blocks under such conditions as to give a practical idea of the value of these plants in a variety of situations. They are all nursery grown, and not to be compared with collected stock. The catalogue list embraces the finest hardy hybrid varieties known to the trade. A large storage shed 40 x 250 feet with glass side and roof has been supplemented by another, with glass skylight only 40 x 200 feet, and preparations are being made for building another twice the size.

In the herbaceons grounds considerable rearrangement is in progress, and preparations are made to extend this department. The collection of 25 of the best varieties of phlox is now to be seen in its glory. In the busy season about 75 men are employed in the nursery and about 40 in the summer time.

The sales and landscape department are in charge of R. T. Brown, formerly with the Wagner Park Conservatories.

The nursery growing is in charge of Joseph Dauphin, formerly with Messrs. Croux & Fils, Chatenay, near Paris, France, and the carnation department is under the care of Marius Matheron, who has been Mr. Ward's right-hand man for the past nine years, assisting in the development of the Cottage Gardens' strain of carnations as well as the new methods of growing them.

New Orleans.

BUSINESS CONTINUOUSLY INCREASING.

The recent storm, raging all over the gulf coast passed over New Orleans without doing any damage to the local florists with the exception of a few broken panes of glass. The same can be said of the small sized cyclone which struck a section of the upper part of the city on October 5. Wassend and Milmburg, the two beautiful summer resorts on Lake Pontchartrain near the city and well known to all florists visiting the southern metropolis, suffered great loss, so did a great many truck farmers in the lower section of the town and on the lower coast. The weather at present is warm but very changeable, yet greatly beneficial to everything grown in and outdoors. The chrysanthemums are at present showing color and in the finest condition possible; an immense crop of these flowers is in prospect. The business is gradually increasing and the colder weather up north brings the tourists back more rapidly. Everywhere great preparations are made for the coming All Saints' day on November 1. Certainly one of our ideal clear and warm winter days is needed to make this principal event of the day a financial success.

NOTES.

Joseph A. Schindler & Co., opened an elegant branch store at 833 Canal street. The firm intends to conduct this place as an up-to-date flower store. Mr. Schindler's remarkable popularity socially and fraternally besides his strictly fair business methods are bound to make this new venture a success. Richard Eichling, formerly with U. J. Virgin and of late with Wm. Rehm, is the manager of this new store. He established a record years ago as a designer of striking originality and graceful workmanship.

The Metairie Ridge Nursery Co. opened their new store, situated on Carondelet street, near Canal, October 6. It is at present one of the finest establishments of its kind in the city. Harry Papworth, the genial president of the Metairie Ridge Nursery Co., is all smiles over the anticipation of the coming season, because he has the stock and the place to sell it. CRESCENT.

QUINCY, MASS.—Arnold & Johnson have added a neat electric sign to the front of their store.

OUR NEW OFFICES AND PROPOSED PLANTING SCHEME.

THE continued demand of landscape architects, gardeners and the general trade for specimen nursery stock to produce immediate effects has made it necessary for us to add heavily to our planting each year, until we have now over one hundred (100) acres devoted to the growing of this class of stock alone. All of this stock has been carefully transplanted every two or three years, so that each tree is supplied with a large mass of fiberous roots. They have also been allowed ample space in the nursery row to develop symmetrical tops. The superiority of this stock is easily recognized by our most critical patrons, who as a rule, visit our nursery in person and select the specimens. It is stock such as described above that has made the COTTAGE GARDENS COMPANY famous for its specimen trees, shrubs and evergreens. We have in our nursery large blocks of specimen deciduous trees, ranging from two to six inches in caliper. Amongst these are **NORWAY SUGAR** and **SCHWEDLER MAPLES, ORIENTAL PINES, LINDENS, ELMS, BIRCH,** and a great variety of **OAKS.** We have also a great many thousands of specimen evergreens, amongst which will be found the following: **ABIES, PICEAS, PINES, RETINOSPORAS, JUNIPERS, TAXUS, THUYAS, BIOTAS** and **BOXWOODS,** each species being represented by all the desirable varieties.

RHODODENDRONS

We have over 100,000 of these in well established plants, 50,000 of which are hardy Catawbiense hybrids in twenty of the best varieties. These plants run in height from two to four feet, well set with buds.

AZALEAS are another feature of our nursery, having some 10,000 of these in the following choice varieties: **AMOENA, HINODIGERA, INDICA ALBA, FUJIMANGO, DAVIESI, VASEYI, VISCOSA, NARCISSIFLORA, SCHLIPPENBACHI,** and many other varieties.

PEONIES AND PHLOX

In addition to our general collection of herbacous plants, we make a specialty of these two most useful of all varieties. Out of several hundred of the best sorts, we have after years of careful study, reserved on our list only the most desirable, and have this year planted 250,000 Peonies alone, which is without exception the largest collection of Peonies in the world.

THE COTTAGE GARDENS COMPANY

is now in a better position than ever to fill your wants, and if you are doing a business that requires a high-grade of stock, we invite you to visit our nursery, where you will find the most complete assortment of specimens to be found on this continent, some of which are very rare.

OUR NURSERIES are situated about twelve miles from City Hall, New York, and are easily reached by the Long Island Railroad. Notify us of you coming, and we will meet you with a conveyance at the depot.

PRICE LIST WILL BE SENT UPON APPLICATION.

COTTAGE GARDENS COMPANY,

Telephone 530 Jamaica. **QUEENS, N. Y.**

Syracuse, N. Y.

Carnations are scarce and as a rule of inferior growth which is due somewhat to the warm weather of September. Roses are doing well and a good stock is selling better than it would had the carnations been more plentiful. The weather up to now has been very warm and no frost to amount to anything has been seen.

NOTES.

P. R. Quinlan & Co. have nearly completed the building which they have been erecting this summer, including a 50-foot addition to each of six carnation houses and a new 250-foot American Beauty house, a new 250-foot propagating house and a 50-foot coal house. They are also installing a large new boiler, a duplicate of the one which they have already. This concern has a magnificent house of chrysanthemums, the condition and assortment of which has never been equalled by a Syracuse grower. The violet house has been planted and blooms will be cut inside of two weeks. The cutting of American Beauty has begun.

The first chrysanthemums of the season were displayed in Henry Morris' store Saturday night. Mr. Morris also has a display of carnations from which he has been cutting for the past month. Another thing of which Mr. Morris is quite proud is the house of sweet peas just coming into bloom.

Bard & Davis, the Whedons and Henry Burt have all been doing splendid business this season. Help has been somewhat scarce owing to the prosperity of the country which has caused all the available men to be hired.

A. J. B.

MOBILE, ALA.—Mrs. John Goodbrad reports that the recent storm has left her with scarcely a whole pane of glass, but has strong hopes that everything will soon be all right again.

WATCH US GROW.

Araucaria Excelsa

The Best of All Decorative Plants Nature Produces

OUR SPECIALTY.

Every man in business and life to be successful must adopt one thing as his specialty, and that specialty, whatever he select, of whatever nature it may be, he must guard, study and push to such an extent that it not only benefits himself, but he must conduct it so that everyone who seeks his aid, service or his article, which he advertises or practices, will share a slice of his activity and prosperity. I made the importation and cultivation of Araucarias as a special study in my life. The figures below will show my success in business: In the first year I commenced with an importation of 250. In the eleventh year now, 1906, my importations have grown up to 6,000 (come and see it), and on account of the Araucaria growing yearly more in favor by the plant consuming people all over the country, as a much admired decorative plant for the parlor, bed, dining and sitting room, stores, hotels, lawns and porches the outlook will be for an importation at least of 8,000 to 10,000 in spring of 1907. To secure this vast amount for 1907, I am now on the ocean, per steamer New Amsterdam, leaving Hoboken Aug. 15, striking for Belgium, making contract for next year, 1907. I also shall at the same time bring over with me a large lot of choice Azalea Indica and Palms, etc., for Christmas and Easter flowering. No money will be spared in obtaining for my customers the cream of the Belgium greenhouses only.

Please note lowest prices now going on for August and September:

Araucaria Excelsa.

12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old.$ .50
12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old. .60
16 to 18 in. high, 5½ to 6 in. pots, 3 to 4 trs., 3 yr. old ..... .75
18 to 20 in. high, 6-in. pots, 5 to 6 trs., 4 yr. old.. 1.00
20 to 24 in. high, 6-in. pots 5 to 6 trs., 4 yr. old.. 1.25
36 to 50 in. specimen, 7-in pots, 6 yr. old, $2.50 to 3.00

Araucaria Compacta Robusta, have 1000 of them, never were so nice as this year. Plants are as broad as long, from 12 to 20 in. in height, 3 to 4 perfect tiers, 20 to 30 in. wide across from one tip of tiers to the other, 3, 4 and 5 years old, 6 to 7-in. pots $1.25, $1.50, $1.75, $2.00, up to $3.00 each.

Araucaria Excelsa Glauca, are perfect jewels in shape and size; their beautiful green-blue tiers make them of such a striking appearance that everybody seeing them must fall in love with them on sight, and cannot help it. Plants, 6 to 7 in. pots, 3, 4 and 5 perfect tiers, 15 to 25 in. in height, from 15 to 30 in. across, $1.25 $1.50, $1.75, $2.00 to $2 50 each.

Please bear in mind these mentioned varieties are the cream of Belgium importations. We have thousands of them: can meet all demands.

Kentia Forsteriana, 6-in. pots, 35 to 40 in. high, 5 to 6 leaves, 4 years old, $1.25 to $1.50; 30 to 35 in. high, 4 years old, 6 in. pots, $1.00; 5½-in. pots, 25 to 30 in. high, 3 years old, 75c; 4-in. pots, made up with three plants, 18 to 20 in. high, 25 to 30c. **Belmoreana,** 6 in. pots, 4 years old, 5 to 6 leaves, bushy, 30 to 35 in. high, $1.25; 5½ to 6 in. pots, 3 years old, 5 to 6 leaves, 75c to $1.00 each. Above are the sizes entered in the custom house. **Kentia Forsteriana,** 7-in. pots, made up plants, on elarge in center, three smaller sizes, about 22 to 24 in. high, price $2.00 each.

OUR LITTLE PETS.

By Aschmann, in Philadelphia, I bought
An Araucaria, a pet for our little girl—
Now we have two pets, the pride of our thought,
The little girl so sweet a head full of curls,
And the Araucaria with their everlasting green—
A more joyful home you never have seen.

MICHIGAN CUT FLOWER EXCHANGE

WM. DILGER, Mgr. 38 and 40 Broadway, formerly Miami Ave., DETROIT, MICH.

Indianapolis.

BUSINESS RATHER SLOW.

Business in the stores as well as on the market has been rather slow the past week. All kinds of flowers are plentiful and of good quality. Among outside stock dahlias are more in evidence than ever before. Barnes & Foster, dahlia specialists, of Spencer, have a grand collection and supply most of the retail stores in this city. The cactus type seems to enjoy the greatest popularity.

NOTES.

The October meeting of the association was fairly well attended. The meeting was an interesting one and the little social following was evidently much enjoyed by all. It is the policy of the present officers of the association to have the business part of the meetings as short as possible, so as to give ample time for informal discussion and amusement, which is certainly a move in the right direction.

Mr. Hatfield has added a mustang mare to the equipment of his Broadripple home. He says "Dolly" can turn around on less space then any horse he ever saw, and he can make her do anything she wants to do.

A runaway team ran into August Rieman's surrey recently. He and his family had a very narrow escape, the surrey was ruined and one horse slightly injured.

John Hartje has sold his greenhouses, to be taken down next spring; he has not yet decided on a site for his new establishment.

Walter Bertermann lost his trotter Rex, one of the best roadsters in this city. He recently refused $600 for the animal.

John Rieman has finished remodeling and enlarging his store, which is now one of the best flower stores in the city.

Phillip Conway has invested in a new phaeton.

Frank Harrett is suffering from dyspepsia. J.

Wakefield, Kans.

Percy R. Walter reports that he has been unable to keep up with the demands for vegetables and flowers this season. He will put up about 2,000 feet of glass in the spring.

E. F. Walter, Junction City, is putting up a rose house, 20x60 feet.

S. D. Brant, of Clay Center, had a fine display of ferns and palms at the county fair.

H. R. CARLTON, Willoughby, O.
INTRODUCER and ORIGINATOR.

MABELLE, New Pink Carnation for 1907.
Color—A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson. Unlike most pinks, the brightest sun does not injure the color. Size—3 to 4 inches in diameter when established. Odor—Pleasing, but not strong. Stems—Invariably strong, but always graceful, ranging from 12 to 30 inches during the season. Habit, etc.—A very quick, active grower, making specimen plants in a short time, even from late cuttings. On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start. Productiveness—Prodigious is the best word we know of to use here. It is the most incessant bloomer, early and late, we have ever grown. Stock limited. Delivery January 5 to 10 and later. Price, $12.00 per 100, $100.00 per 1000.

PETER REINBERG,

51 Wabash Ave., CHICAGO.

The House of Thorburn.

(Continued from page 553.)

water melon was introduced by J. M. Thorburn & Co. In 1882 the Thorburn extra early Refugee bean was first brought to light and the same year the firm introduced it's Market Gardener Private Stock lettuce.

In 1889 appeared Thorburn's Pride of Newton beans, Thorburn's Improved Stonehead heavy red Dutch cabbage, Thorburn's Market Gardener private stock, large late flat Dutch cabbage, and in the same year the firm introduced the still popular seedling potato, Rural New Yorker No. 2.

In 1890 we find the following introductions all our own: Refugee wax beans, Extra Early flat turnip beet, new Everbearing cucumber, Coldframe White cabbage lettuce.

In 1892 appeared Thorburn's Commercial pickle cucumber and Thorburn's Long Keeper tomato. In 1893 the first dwarf lima bean ever introduced was placed on sale by J. M. T. & Co. (their own introduction). This is probably the finest dwarf lima bean in cultivation today and to the firm of J. M. T. & Co. is due all the credit of it. In the same year they introduced two new tomatoes, viz; Lemon Blush (Thorburn's) and Terra Cotta (Thorburn's).

In 1894 came the world famous Carman No. 1 potato, introduced by J. M. T. & Co. and, in the following year Carman No. 3, also introduced by J. M. T. & Co. This firm has done more for the improvement of the potato than any other in existence and when the announcement came in 1905 of the great new potato, "Noroton Beauty," the greatest of them all, it was received with much acclaim and met with almost unprecedented sale. We might go on noting the firm's own new introductions if space and time would permit.

J. M. Thorburn & Co. was incorporated in 1895, with F. W. Bruggerhof, as president, Mr. Bruggerhof having been connected with the business and associated in its earlier days with James M. Thornburn, for over 50 years. Mr. B. is still actively engaged and is conversant with everything going on, himself superintending everything.

In the fall of 1898 they were obliged to vacate the building occupied for upwards of 60 years at 15 John street, the property there having been condemned. They have been since located at 36 Cortlandt street from which they have been compelled to move owing to the condemnation of the building and many condemnation of our building and many others in the same block for tunnel and railroad purposes.

The new warehouse, 33 Barclay street, is a model one and has just been completely remodelled. It is five stories high and has in addition to the basement a subcellar. Some idea of the floor space can be had when the depth of the building is considered. It extends through to 38 Park place and is 160 feet deep, (5 floors, a basement and a subcellar) and has a frontage of 25 feet on both Barclay street and Park place.

The Park place entrance will be used for shipping and receiving goods. A new elevator has just been installed at Park place and the structure is therefore decidedly modern and up-to-date. The path of advancement of the firm has certainly been very marked and it is interesting to note for the sake of comparison the dimensions of the "large and commodious" building at 67 Liberty street of 1827 and the new modern twentieth century structure now occupied by the firm at 33 Barclay street and 38 Park place.

It will therefore be seen that J. M. T. & Co. have been in the city for about 104 years and have almost from the beginning conducted both a wholesale and retail trade. The following facts will give an idea of the extent of the business today. Building runs through the entire block from Barclay street to Park place, with an entrance on each street. It is 160 feet deep, five stories high and has a basement and sub cellar. They have 28,000 square feet of floor space. There are over 1,200 drawers and closets for vegetable seeds; about 150 bins for vegetable seeds in bulk; about 2,000 flower seed drawers, over 250 receptacles for free and shrub seeds alone and over 40 bins for grass seeds. The building is modern and up-to-date in every respect, neither trouble nor expense being spared in making it probably the finest seed store in America.

Toronto.

TRADE EXCELLENT.

Business is ever increasing and now that stock is good and getting more plentiful each day, the trade is firmly settled and not so erratic. Chrysanthemums predominate and can be had in all colors. The stock is good for the early varieties and reports promise an over-abundance of good blooms later. Violets have picked up in quality and very good ones are seen, but not enough as yet to go around. Roses in all varieties and excellent quality are about equal to the demand, while carnations are more plentiful and in many varieties as good as midwinter stock. Though there are not many elaborate wedding decorations, there is a good demand for flowers for this purpose and lily of the valley has at times been scarce. Galax, so much used in this section, is not to be had, but the new crop is promised in a few days.

NOTES.

The prize list has been issued for the chrysanthemum show for November 6-10, and those interested should not fail to secure one as there are many good prizes offered. As a feature, the famous Black Dike band, of England, will render the music.

A number of the florists are experimenting with Canadian coke. It is of a different substance than the Pittsburg variety, but the heating qualiies are supposed to be the same, and is considerably cheaper.

President Dunlop, of the American Carnation Society, is busy making arrangements for the next meeting. Adequate and convenient space for the exhibition is likely to be had in the big city hall.

Geo. Graham, of the government house, is putting up some new greenhouses. Good stock is the rule here and space has always been cramped; the new addition will no doubt alleviate this.

Thos. Manton is the possessor of a letter from the old country advising him that his Aunt Aliza bequeathes him something like $3700 besides some property.

J. S. Simmons has an attractive autumn window, a rustic bench with a hat lying on it and a surrounding of colored foliage.

R. Guthrie, of the Steele, Briggs Seed Co., has been in Markham, where he was judge at the fair.

Chas. Tidy is showing some good cattleyas and oncidiums.

Visitor: Wm. Dykes, representing Edward Jansen, New York.

H. G. D.

Montreal.

TRADE SHOWS IMPROVEMENT.

Trade last week showed a good improvement over the previous weeks, there being a number of wedding decorations of note. As outdoor flowers are badly frozen and indoor flowers are still scarce, the market assumes a busier aspect than business really feels. Roses are of better quality although the foliage seems in many cases to be infected with mildew, but the flowers are of better size and longer stem. Carnations are scarce yet and of short stem, but the flowers leave nothing to be wished for, being of good size and color. Chrysanthemums have made their appearance at Hall & Robinson's. Opah and a yellow variety are the varieties shown.

NOTES

Camille Lagare has erected for his son, A. C. Lagare, a large block of houses for carnation growing. Part of it is already planted with field-grown plants. Mr. Lagare puts his greatest hopes in Lawson in all its varieties. For white, Lady Bountiful, Boston Market and Glacier are seen; for red, Crane, which is entirely free of disease, red Lawson and Flamingo are grown, and for crimson, Harlowarden. Also a trial is made of a number of new varieties. The soil seems to be well suited for carnations as it has produced the best plants around this city this year. The other part will be used for growing lettuce, Mr. Legare's specialty. The block of five houses is 125x225 feet, all connected. King construction is used throughout and the plant is heated by steam.

The Gardeners' and Florists' Club held an interesting meeting last Monday night. Chas. J. Eddy gave a very interesting paper on his trip to the Pacific coast, but gave only half of it. He promises the other half for next meeting. G. A. Robinson was the next essayist, his subject being the Toronto exhibition and after-thoughts of the Canadian Floricultural Association convention. Mr. Robinson regretted that with such a grand prize list as they had, competition was not keener. In most classes prize money simply went begging. The after-thoughts of the convention were of a humorous nature. G. Trussel and J. Walsh recited the experiences they had in Ottawa, special attention being called to the hospitality that was extended to them.

The Wright Floral Co.'s store is open now and makes a striking appearance.

Wm. Rennie, a Toronto seedsman, will open a branch in Montreal.

LUCK.

PALMS, FERNS and DECORATIVE PLANTS

We Offer Good Value. Saving in Express and Freight west of Ohio.

ARAUCARIA EXCELSA.

(Norfolk Island Pine.)

We have a large quantity of these popular Christmas plants. All are perfect, well shaped plants, and will give good satisfaction.

MYERS & CO.
BUILDERS OF
Modern Greenhouses
HEATING BOILERS.
1122 Betz Bldg.,
PHILA., PA.

Please mention the American Florist when writing.

CAMPBELL'S PATENT SULPHUR VAPOURISER.

Extract from paper read by John H Dunlop before recent convention of the Canadian Horticultural Association:

"Campbell's Sulphur Vaporizer is an English patent and a trifle expensive, but very effective and eliminates almost all of the danger of ignition. We are using eight of them at present with excellent results."

—SOLD BY—

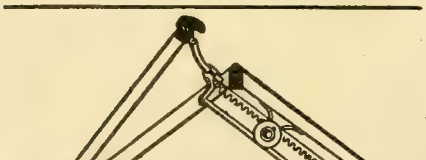
VAUGHAN'S SEED STORE, 14 Barclay St., New York.
A. T. BODDINGTON, 342 West 14th St., New York

Always mention the American Florist when you order stock.

—THE—
Florists' Hail Association
Insures over 23,000,000 square feet of glass. for particulars address
JOHN G. ESLER, Sec'y, SADDLE RIVER, N. J.

You heard of, if you did not see, our exhibit at the Convention.

HIGHLY RECOMMENDED
for natural prepared variegated Magnolia Wreaths, Adiantums, natural prepared Christmas Trees and Cycas Wreaths with Asters.
Keep your "I" on the enterprising florists' supply house.
J. STERN & CO.
1928 Germantown Ave., PHILADELPHIA, PA.



CHEAPEST AND BEST.
If you doubt it try them and be convinced.
Send for descriptive price circular.
J. D. Carmody, Evansville, Ind.

Tobacco Dust
FOR FUMIGATING.
It would pay large users of dust to communicate with us and get samples and prices.
Edwin L. Koppelman & Co., 81 PINE STREET, NEW YORK.

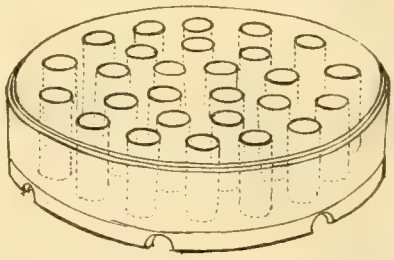
M. V. GARNSEY,

131 So. Waiola Ave., LA GRANGE, ILL.



BOOKS FOR FLORISTS.

The time is coming along when these are needed and opportunity at hand for reading them. Every one of the following should be in your library.

Send prices quoted and we send the books.

GREENHOUSE CONSTRUCTION (Taft).—It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. $1.50.

THE GOLDFISH (Mulertt).—A number of florists find goldfish an attractive and paying addition to their business The best advice is given in every department of the subject, including construction and care of the parlor aquarium, in this volume of 160 pages, handsomely illustrated. $2.00.

CELERY CULTURE (Vaughan).—The important subject of celery culture is thoroughly covered in this illustrated pamphlet of 59 pages. The florist raising young plants of celery and those who grow the plants to maturity will alike find it valuable. 50 cents.

FUMIGATION METHODS (Johnson).—A practical treatise on cheap and effective means of destroying insect pests. Handsomely bound and profusely illustrated. 250 pages. $1.00.

THE PRINCIPLES OF FRUIT GROWING (Bailey).—The entire subject of fruit culture is treated very thoroughly in this illustrated volume of 516 pages. It is a book that no up-to-date fruit grower can afford to be without. $1.25.

GINSENG (Kains).—At the present time, when so much interest is taken in ginseng, it will be interesting to peruse this volume, which tells all about the plant in a way that all may understand. The 144 pages are freely illustrated. 50 cents.

SUCCESS IN MARKET GARDENING (Rawson).—Written by one of the most prominent and successful market gardeners in the country, and who has the largest glasshouses for forcing vegetables for market in America. Outdoor and indoor crops are treated. Illustrated, $1.00.

MUSHROOMS: HOW TO GROW THEM (Falconer).—The only American book on the subject, 29 illustrations. Written by a practical mushroom grower, who tells the whole story so tersely and plainly that a child can understand it. This book has increased mushroom growing in this country three fold in three years. $1.50.

HEDGES, WINDBREAKS, ETC. (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

LANDSCAPE GARDENING (Maynard).—The development of landscape art within the past few years compels the wide awake florist to keep posted on this branch of the business. The many suggestions of this book will be found helpful every business day. It contains 338 pages, 165 illustrations. $1.50.

Florists' Forcing Bulbs and Roots.

Copyright 1906 by the American Florist Company.

VI.—NARCISSI.

The great value of narcissi for outdoor planting, the exquisite fragrance and long lasting quality of the flowers, and the ease with which most of the varieties can be brought into bloom at a season when the absence of bright flowers is felt most, have made them popular with all growers and lovers of bulbous plants. The genus embraces many species, but their culture in the main is alike. A few varieties of the poet's and star narcissi, and one or two of the double flowering daffodils, as alba plena odorata for instance, cannot be forced, but there should be scant cause for regret when the number of beautiful sorts, that readily yield to indoor culture and forcing, is so large, and includes the finest types of all the species.

Narcissi are not at all exacting as to soil. Any good kind of friable, moderately enriched garden loam suits them. The bulbs may be grown in pots, for which they are well adapted. One bulb of the large varieties, three or more of the smaller and from six to nine of the smallest, such as jonquils, will creditably and effectively fill one pot, deep pots of the regular standard sizes here to be preferred to shallow pans. Narcissus orientalis or Chinese sacred lily, however, requires no great depth of pot and can be successfully flowered in bowls of water, pebbles and gravel holding the bulbs in position.

For mass forcing there is nothing better than boxes of a fair depth and handy closely together, just so they do not touch one another. They should go into the soil to the depth of a trifle more than half their length, then watered down and stood away in some dark or shaded and very cool place. There is no necessity of covering them with a layer of soil or ashes, unless this is removed in good season to permit of unrestricted top development, which with narcissi starts almost simultaneously with root formation. Narcissi of the polyanthus section may be covered for three or four weeks and the top growth will then be just starting, as they are much slower in this than most other types. Paper White, belonging to this class, can be had in bloom in November if planted as soon as the bulbs arrive. Most other single and double narcissi on the other hand, do not come as early and their flowering season under a course of mild forcing is in midwinter, extending away into spring. Narcissi in pots or boxes, being kept outdoors late in the fall, must be guarded in some way against frost, which should never be allowed to touch these bulbs where they are intended for forcing.

Narcissi, unlike most other bulbs, object to any sort of severe forcing, but they should be well provided with roots before any attempt at forcing is made. A cool, light bench in a house with abundant ventilation, and an even temperature of about 50° or 55°, suits any and all types of narcissi. In short, the treatment accorded ordinary greenhouse stock is also right for narcissi. It is true, they can be hastened by increased heat and made to flower much sooner in a hot, moist house, or on a bench with bottom heat, than on an ordinary greenhouse staging, but the outcome will not be up to expectations. Grand Primo, Paper White, Princeps and Henry Irving will give good results in a temperature of between 55° and 58°. Von Sion, Trumpet Major, Golden Spur, Maximus and Staten General produce their finest flowers over a cool bottom, under a well ventilated, clear glass roof, and in a temperature never higher than 52° at night.

VII.—ROMAN HYACINTHS.

Among bulbs for early forcing no class is in greater favor with florists and amateurs than Roman hyacinths. They may be had in bloom as early as November, are a never-failing and highly profitable crop at Christmas and good property throughout the entire winter. Whether grown in pots for the house or conservatory or massed in boxes and forced for their flowers alone, they are always certain to bloom and also allow of being timed with the utmost pre-

cision. There are several distinct shades in Roman hyacinths, snowy white, dark and light rose, blue and even yellow, but the pure white takes first rank as the earliest and most useful variety for commercial growers.

For very early forcing the bulbs must be planted as soon as they can be had, which is usually in August. Although the dry bulbs retain their vitality undiminished for months, which enables growers to plant in the months of autumn for mid-winter forcing, it is well, even for that purpose, to plant early and rather keep over the bulbs intended for late forcing after they are rooted, which in cool quarters is an easy thing to do. No matter how long they may be kept in a dry state they are ever-ready to form roots and do so immediately after being planted, whether late or early.

If potted plants for the holiday or winter trade are desired it is best to plant several bulbs in one pot or shallow pan; three bulbs for a 4-inch pot and four for a five or 6-inch pan being about right. But where any large quantity of bulbs is to be forced, boxes or flats, three or four inches deep and of a convenient size for handling, are more serviceable. Almost any good soil, not containing any fresh manure, will do for these hyacinths. The old soil out of rose or carnation benches, after having been spread out and exposed to the air for a short time, is excellent. The bulbs are placed quite close with a space of about half an inch between them, and the planting is done by merely pressing them into the soil, leaving fully half of the bulb above ground. On some freely exposed place outdoors a trench-like excavation is made, a few inches deep, of convenient width and having a level bottom, and in this the boxes, as also pots, pans, etc., are placed side by side. After having been thoroughly watered clear through, they are covered with the soil, previously thrown aside in making the trench, to a depth of not less than four inches. No farther covering will be needed for these early planted bulbs, but any planted later require an additional covering of some loose litter to keep out frost. Nor will there be need of another watering before the boxes are taken out, which will not be before seven or eight weeks, when the bulbs should be well rooted.

When brought into the house the bulbs are then ready for forcing, always provided they have formed roots. The boxes are placed on a warm bottom, given an abundance of water right along and several times daily a spraying over-head. A good shading all around for the first two weeks will give length to the flower spikes. Nearly every bulb will throw several spikes, but only the first cut gives high grade blooms. In a temperature of 60° with bottom heat 10° higher, it will take a bout 24 days to force out Roman hyacinths.

E.

PORTLAND, ORE.—J. J. Butzer reports that fall business is opening up in good shape and stock is moving well. Roses and ornamental stock will be very short again this fall, as the demand is extra large. Everyone is planting roses. More bulbs also are being planted than ever before.

THE VIOLET.

The Violet Industry at Rhinebeck, N. Y.

This beautiful little town of 1500 inhabitants is situated 90 miles directly north of New York and three miles east of the Hudson river and Rhinecliff, its railroad shipping point on the New York Central. Here are seen many quaint old homes as well as quite a few modern ones of pretentious dimensions together with a number of cozey cottages of the humbler classes, all sharing alike the shade of the stately old trees that line the streets on either side.

For many years this place has been justly famed for the production of the finest and greatest number of violets grown in any part of the country, and when one observes or even closely studies the soil, water and other natural conditions existing here the mystery seems greater and greater why such phenomenal success has attended the efforts of nearly everyone who has engaged in the industry in the vicinity since its inception about 15 years ago. At that time, Geo. Saltford made the first attempt at violet growing in this district and his unvarying success attracted the notice of others, who soon engaged in the work and shared with the pioneer the expected success in the industry which assumed an almost national importance in a few years.

Visiting the establishments here at the present time, the beginning of the violet season, is exceedingly interesting and affords perhaps the best opportunity in the whole season to study the different aspects of violet growing as here conducted.

One cannot fail to be impressed at once with the magnitude of this local industry, that now numbers nearly 150 different establishments. Over 300 persons are directly engaged in the work and nearly as many more indirectly. Nearly 1,000,000 plants are now grown here which produce in a season about 60,000,000 flowers.

This enormous product is disposed of chiefly through commission houses in New York, Philadelphia, Buffalo and Chicago with heavy shipments direct to retailers in the same cities, also in Pittsburg, Cleveland, Detroit and many smaller towns; and while the more distant points receive the flowers almost devoid of their natural fragrance, nevertheless, their immense size, deep color and lasting qualities, readily commend them to even the most critical buyers and their sale is usually assured.

Up to three years ago this locality was practically immune from violet diseases of any kind, and the farmer, the carpenter, the groceryman, the stage driver and even the blacksmith who joined the ranks of the violet growers were as uniformly successful as their predecessors with more experience and skill.

About that time troubles began to appear and they are still increasing and some say they can see "the hand writing on the wall;" others minimize the threatened ills and are determined to overcome them. These ills are in the form stem rot, black rot, root rot, gall fly, black fly, green fly, red spider, etc. All of the growers agree that the gall fly is the most "galling" and more attention is given to this enemy than all the others combined. But there is the greatest diversity of opinion among them as to just what the gall fly is. The effect of its attacks are everywhere the same but the diagnosis of the evil is with one grower entirely contradictory to that of his neighbor. Some say that the fly deposits eggs upon the tops of the unfolding young leaves. These eggs then develop a maggot that eats the young growth and most effectually prevents the development of the leaves as well as the nearby flower beds. Others maintain the trouble emanates from the soil, where the insect is hatched out, and works the injury in the very crown of the plants. Numerous conflicting theories are advanced by other victims who are all equally confident of their correctness.

Some growers who have thus far escaped the visitations of the gall fly claim that the exercise of vigilance in the rudimentary principles of violet growing is alone necessary for success and feel no apprehension. Others who have as faithfully observed those principles have been and are yet victims to a more or less extent, and they assert with equal confidence that Rhinedeck will finally meet the same fate that has overtaken other parts of the country where violet growing is no longer profitable. They say that it is now a Wall street game, and purely so, and if any measure of success is to be had in the future, it will follow a scientifically determined diagnosis of the malady, that can as correctly be treated and kept checked or entirely eradicated.

No one has yet been able to really identify the "fly" but certain it is that all winged insects that are seen in the houses are quickly chased out and various methods adopted for their destruction. The most general cure-all is the gas generated by the combination of water, sulphuric acid and cyanide, but the application of this remedy is often attended by fatal results and very recently several thousand plants (the entire contents of one house) were entirely destroyed by too strong an application. This danger, which is always liable even in the hands of the most careful, is due to the varying strength of the ingredients used to make the gas, and constant caution in its application is most necessary. This "gassing" operation as they call it, is destructive of the fragrance and also fades the color of the flowers even when mildly applied and therefore there is always reluctance to use it.

A distinctive feature of violet growing here that impresses the visitor is the apparent similarity of methods practiced

by nearly all who are engaged in the work. This applies to the construction of the houses, arrangement of the tables, or, more correctly speaking, the beds (for perhaps 99 per cent of them plant in solid beds), method of heating, the shading, the distance apart in planting, the manner of propagation, etc.

The houses are usually 23x150 feet; with side walls four feet high boarded up to the gutters. They are heated by hot water in 4-inch cast iron pipes though some use 3-inch. The side beds are each seven feet wide, the center one six feet and the two walks each 14 inches wide. The surface of the beds is 16 inches from the walks, many of the latter cemented. The query will here arise as to how the plants are reached in picking the blooms on the side beds seven feet wide. A board is used for this purpose, one end resting on the edge of the plank along the walk and the other end upon the hot water pipe on the inside wall. Another query that here suggests itself to many growers in other parts is, how do the plants succeed on a bench close by the side walls, which are boarded up fully three feet above the plants to the glass? That does not concern the grower here, as the plants in close proximity to the high dark walls are, at least at this season of the year, even better than the other parts of the beds where they have more light and sunshine.

Propagation is done soon after May 1 by making cuttings of the side runners, putting them in sand which is placed on a cleared portion of the bench and on the original soil where the plants are grown. The young rooted plants remain in this position until planting time, June 1 to 15, when they are set out in their permanent location in the beds nine inches apart each way. The glass is then completely shaded with lime and remains so until about September 15, when it is removed from the lower lights only. A little later it is removed a little distance farther up the bars and thus gradually until between November 1 and 10, when the remaining top lights are cleared. Marie Louise is the variety most generally planted, though some grow a few Swanley White and Farquhar, the latter variety being considered by some as an earlier producer of good flowers than Marie Louise though it runs out sooner in the spring. About October 1 a mulch of half rotten horse manure is given covering the entire surface of the soil and thereafter water is used most sparingly until the warm days of spring.

In this age of national trade organizations and the popularity and utility of local florists' clubs in places where the trade is well represented, it is indeed most surprising and lamentable that this large and important community of violet growers is without an organization of any kind to promote their common interests, and the mere mention of the probability of such a society here is met everywhere with a dissenting voice indicating the utter futility of such an attempt, were it made. But, reflecting seriously upon the whole situation here as conditions really exist, and after closely examining the chief factor in plant growing, the soil, and finding it as diversified in its composition as is found elsewhere, and having interviewed the successful growers here, many of them mere boys, the wonder is all the greater why Rhinebeck has produced in the past, and some of its growers are still producing with apparent ease and unconcern, the finest violets in the country.

J. F. S.

CHRYSANTHEMUM OCTOBER FROST.

Diseased California Violets.

ED. AMERICAN FLORIST:—

California violets, showing a good strong growth and otherwise in a healthy state, have yellow diseased leaves like those enclosed herewith. Please state the cause and remedy.

N. E. D.

The California violets are suffering from what is called Mosaic disease. The unfavorable condition is understood to have some connection with the nutrition of the plants, but no method of controlling the trouble can be suggested. If grown for flowers the yield will not be much affected, but if for leaves, the plants may as well be at once destroyed, for while such plants sometimes recover, usually they do not.

B. T. G.

Chrysanthemum October Frost.

The illustration herewith shows a bloom of Chrysanthemum October Frost, to which frequent reference has been made in these columns. As the introducers state in their catalogue, early buds are most desirable as they produce flowers larger and more double than where the late buds are selected. The flowers are of large size, early and the variety is very easy to grow well. No doubt it will become as popular as many of the previous introductions of Nathan Smith & Son, Adrian, Mich.

Chrysanthemums for Exhibitions.

ED. AMERICAN FLORIST:—

Please give the names of the best 10 chrysanthemums to be grown for exhibition pot plants in the eastern states, the plants to be on exhibition about November 1.

M. L.

White, Mutual Friend, Ivory, Ada Byron; pink, A. J. Balfour, Arethusa, Iora; yellow, Marion Henderson, Jennie Falconer, Hooper Pearson, Black Hawk.

T. D. HATFIELD.

Children's Gardens in Charlotte, Mich.

The Fuller Floral Co., of Charlotte, Mich., sends us a clipping from the Charlotte Tribune which shows the amount of interest taken in both cut flowers and bedding plants, and, for a town of but 5,000 population and being the first season business has been pushed, it certainly is a very good showing.

Continuing, the Fuller Floral Co. writes: "The interest shown by the children in flowers can easily be understood when over 300 bouquets were exhibited besides many boxes and single plants and over 3,000 visitors attended the show. We have found that our assistance to the children's flower gardens, etc., has brought us many friends and when Jack Frost has done his work we expect to reap our reward."

The children's flower show in the Ketcham building the afternoon and evening of September 8 was a bower of beauty according to the Charlotte Tribune, and a revelation, to the throng in attendance, of the interest of the Charlotte schools in the home gardening movement inaugurated last spring through the efforts of the club women of this city.

The club women acknowledge their appreciation of the kindness of the Fuller Floral Co. in furnishing an abundance of beautiful plants for window decoration and their generous co-operation in the home gardening work in Charlotte from the beginning. More than 1,000 souvenirs were given away by them to ladies alone in the afternoon, which is the basis on which an estimate of more than 3,000 attendance during day and evening is made.

The principal prizes offered at the flower show were for the schools, rather than individual children, the object of the club women being to interest them in beautifying school grounds and awakening a sort of civic pride in this direction. The Fuller Floral Co. had a special contest in this show open to citizens in which there were 25 entries.

CHILDREN'S GARDEN WORK IN AYER, MASS.

Lower town hall in Ayer, Mass., presented a very interesting scene the afternoon and evening of September 12 on the occasion of the fifth annual exhibit of children's home garden products. The vegetables and flowers were arranged upon separate tables, those of each year being placed together, among the exhibitors being children who have had gardens one, two, three and four years.

To add to the interest of the occasion, some of the gardeners among the townspeople had been asked to send some exhibits. A collection of 100 pressed flowers from California and some mosses and lichens collected by Miss Lois Leavitt formed a unique feature of the fair.

The home gardens of the children have been in charge of the social service committee of the woman's club and they have been visited regularly by these ladies and other club members during the season. Quite a number were also visited by members of the Massachusetts Horticultural Society.

Propagating Salvia and Other Plants.

ED. AMERICAN FLORIST:—

Kindly let me know which is the better way of propagating Salvia splendens, from cutting now or from seed, also when to sow it from seed. Should Begonia semperflorens Vernon be raised from cuttings or seed? I have taken cuttings from different kinds of shrubs in September, put them in the propagating bench, kept them shaded and still nearly all died, especially the hardy rose cuttings. Why is this?

N.

The plan in these days, generally speaking, is to grow Salvia splendens from seed, sown any time about the month of March. There are several varieties which have become quite well fixed by judicious selection, among them being Bonfire or Clara Bedman and a quite drawf variety is Little Lord Fauntleroy. To grow from cuttings old plants should be taken up and potted before injured by frost and the long shoots shortened in some and kept in a night temperature of from 45° to 50°, as when grown warmer they are more liable to be attacked by red spider, the salvias being great favorites of this little pest. Cuttings may be put in the propagating bed as late as April and yet make plants suitable for bedding-out towards the latter end of May.

The varieties above named come sufficiently true to seed for all practical purposes, but if among them is noticed one or more plants possessing marked characteristics worthy of being developed, lift them as recommended above and in due course an abundance of cuttings will appear, which may be rooted and planted out either for bedding or for seed, and, if for the latter, in due time, by rigid selection, a new variety that will come comparatively true to seed may be established. This is how the varieties mentioned were secured and how many novelties among other plants have found their way into commerce.

As to Begonia Vernon, that also is easily raised from seed or from cuttings, but if a large quantity is needed, raising from seed is to be recommended. Seeds may be sown thinly. Begonia seeds are as fine as dust, so that it is quite a feat to sow them thinly, but it is better to thus sow them when possible, as the young plants grow so much larger in a shorter time than if sown too thickly—and need not be handled so soon. It is better to transplant them, as soon as large enough to handle, half an inch or so apart in flats or pans, thus aiding them to develop into fair sized plants as soon as possible for they grow very slow in the early stages of their existence. To have seedling plants large enough for spring sales or bedding in May, the seed would not be sown later than the first week in January, and the plants would be of course, larger if planted a month or so earlier.

If it is desired to raise Begonia Vernon or any of a similar type from cuttings, care must be exercised in the taking of the cuttings, that there is a growth bud at the base of the lower leaf and not a flower or flower stem, or disappointment will surely result, for such a plant would not break into new shoots from the base thereof. Begonia Gloire de Lorraine, when shoot cuttings are used, has the same characteristic.

The failure of cuttings as mentioned by N. of different kinds of shrubs, to grow in September, may be accounted for possibly, if every requirement of a cutting was strictly attended to (lots of water and shade, etc.) by the fact that the wood may have been a bit too hard. Most deciduous shrubs root without much loss when taken in July or early in August. I have never tried them as late as September. Many evergreens will root successfully when put in sand as late as November, but that is another story.

Roses as a rule do not root very successfully if the cuttings are taken from plants that have been growing outdoors, but if the cuttings are taken from plants that have been growing under glass all the time, the loss will be quite small in the hands of an attentive propagator, and the results would be better

NEW ORCHID HOUSE OF SIEBRECHT & SON., NEW ROCHELLE, N. Y., AND 3 000 NEWLY IMPORTED PLANTS OF CATTLEYA TRIANÆ.

if the cuttings were taken in October and not September for we frequently have quite hot weather in the latter named month, which renders the propagating of roses more risky.

Speaking, generally, the tea scented section of roses roots with more certainty than the hybrid remontant; especially does this apply to the middle section of the country, whereas in California and some other of the Pacific coast and southern states if the remontant, when dormant, is cut into lengths of a foot or so and placed close together in a trench outside, they will nearly all root, but the tea section is more precarious. As it is not mentioned in the query what part of the country same came from the above reply is given accordingly. EDWIN LONSDALE.

TWO NOVELTIES OFFERED BY WATKINS & SIMPSON.

Nasturtium Queen of Tom Thumb Scarlet. Alyssum Compactum Little Dorrit.

Some Novelties of 1907.

Watkins & Simpson offer the following in their novelty catalogue of 1907. The descriptions are by the introducers and the novelties are thus indicated:

BEET, DROOPING CRIMSON, WILLOW LEAVED.—This is by far the most ornamental foliaged beet for bedding, a selection out of the dracæna leaved, which we have been improving in our grounds for several years. The leaves are long and narrow like a willow, but of the darkest crimson bronze, of bushy elegant form, with leaves drooping over. We can strongly recommend this new improvement as the most suitable crimson foliage for bedding purposes. We have proved this to be very suitable for edging or bedding contrasted with either pyrethrum, lobelia or Dactylis variegata and far superior to perilla or iresine.

ALYSSUM COMPACTUM LITTLE DORRIT (Novelty).—A grand improvement on the already much grown variety, Little Gem, being much more compact. This new variety forms a perfect little bush with miniature white rocket flowers. A perfect gem for borders or beds.

CINERARIA HYBRIDA COMPACTA STARFISH (Novelty).—This grand new strain of cineraria we feel sure will be found a great acquisition. The plants are of strong vigorous habit, dwarf and compact, with flowers of enormous size, petals twisted and curled like a single cactus dahlia which gives the plant a very striking appearance. The colors are various, including all the bright shades usually found in the ordinary cineraria.

ESCHSCHOLTZIA ERECTA COMPACTA INTUS ROSEA.—After many years of close selection we have succeeded in fixing this new and charming variety. In color it surpasses anything yet introduced in eschscholtzias, a beautiful rose color, the petals both inside and out being of one color never before found in eschscholtzias. The plants are also of a compact upright habit after the style of the well known varieties Mandarin Erecta Compacta and Rose Queen Erecta Compacta.

Hunnemannia Famariœfolia.

HUNNEMANNIA FAMARIOEFOLIA (perennial poppy).—This elegant half-hardy perennial grows about one and one-half feet in height, upright bushy habit, with flowers of a lovely bright yellow with rich orange stamens which last longer in water than any poppy or eschscholtzia, glaucous foliage. If sown clearly in March in the open will flower same year.

NASTURTIUM QUEEN OF TOM THUMB, SCARLET, VARIEGATED FOLIAGE (Novelty).—This new color in our already popular variegated leaved variety (Queen of Tom Thumb) will be found a fine addition to the nasturtium family. The color, a brilliant orange scarlet, forms a grand contrast to the beautiful silver variegated leaves.

SWEET PEA NORA UNWIN (Novelty).—This charming variety especially takes its place easily in the front rank of pure whites, far outdistancing Dorothy Eckford, which was hitherto considered the finest white, being larger, purer and finer form. It has the same bold wavy standard as Gladys Unwin, and like all the progeny of same, it is true to name and does not sport.

SWEET PEA MRS. ALFRED WATKINS (Novelty).—A superb pink of Gladys Unwin type, color a pale pink much like the old Princess Beatrice, which was thought so much of when it was introduced many years ago; but the flowers of Mrs. Alfred Watkins are very much larger and have the beautiful bold wavy standard of Gladys Unwin. It will be found one of the best market varieties for cut bloom.

SWEET PEA FRANK DOLBY (Novelty).—A lovely pale blue, the same shade as Lady Grisel Hamilton, but very much larger, and being also bred from Gladys Unwin, it has the same bold wavy standard and large size of its parent. It is today the finest and largest pale blue sweet pea.

SWEET PEA E. J. CASTLE (Novelty).—A magnificent addition to the Gladys Unwin class, with the same large flowers and bold wavy standard of its parent. The color is a very rich carmine rose with salmon shading in the standard, and this, over and above its other merits, has a rich striking effect, especially in artificial light.

Storing Canna Roots.

ED. AMERICAN FLORIST:—

What is the best way of keeping canna roots through the winter?

A. C.

After the foliage has been slightly frozen by the first frosts, cut the tops off within 6 to 8 inches of the soil. When lifting merely shake off the loose soil from the clump, place the clumps under the greenhouse benches, first putting down some old boards so the roots

will not rest on the damp soil which will start growth action. Under carnation benches is best if you have them as they can be kept more free from drip than under benches with pot plants, and the temperature of a carnation house is about right. J. S. W.

To Be Done Now.

IN THE GREENHOUSES.

In cutting Asparagus Sprengeri avoid leaving stubs of the stem as these grow again causing a thick undergrowth that leads to damage.

Now that cooler conditions prevail Chatenay buds may be left until they commence to open before cutting.

Too great a heat on steam pipes when applying sulphur leads to burning of the flowers especially of pink roses.

Carefully avoid wetting the young growths of semi-established odontoglossum from now on, and maintain a night temperature of not less than 50°.

Woodlice are getting troublesome. Sugar, flour and paris green is an old remedy difficult to beat if placed where the insects have free access to it.

Continue to remove all runners and decayed foliage on violets or flowers will be few.

Avoid leaving the racemes of Oncidium varicosum and others a day longer than is really necessary as they constitute a severe strain to the plants.

A day's drying now of the upper surface of the soil on the rose benches is very beneficial in checking green slimy growth.

IN THE STORE.

In using new packing boxes see that all choice flowers are covered with tissue or oiled paper to prevent dust from injuring them.

Although individual flowers of most orchids last well when cut, sprays of some of the scandent oncidiums are easily injured and only a few should be exposed at a time.

Window displays are often ineffective owing to the changing of several tints of one color. It is especially to be noted in the pink and purple chrysanthemums just now.

Crotons and similar pot plants grown in hot houses are soon ruined now in a drafty or cold window or doorway.

Cut fronds of maidenhair ferns may be kept close in a tin or other box and ample moisture is necessary, but asparagus may be kept a little drier.

In sponging palms and other foliage plants rub very lightly to remove the dust without injury to the leaves.

In making up designs in which rose foliage appears keep the latter in water until the last minute before use as it so quickly wilts.

Cyperus or umbrella plant is almost an aquatic so must not be allowed to get dry at the roots in the store.

OUTDOORS.

If all rubbish and weeds were collected and burnt in a slow fire a useful heap of material would result and many attacks of insects and fungoid pests be averted.

A firm yet well divided root run is more to be desired than a very rich soil in which to plant fruit and flowering trees.

Don't be too anxious to clean out fallen leaves from outdoor violet beds as these are a useful protection in frosty weather.

Hardy shrubs that are plunged in pots should be looked over now, and the pots covered with new pluming material if needed.

Newly potted and boxed bulbs must on no account be heavily covered with ashes; a couple of inches is ample.

Cutting the Coal Bill in Two.

Under this heading, page 484, issue of October 6, Thaleon Blake gives us all advice to use slack as a much cheaper grade of fuel. This is good counsel for those who can procure the slack, which not every one can, and for those who can get it and are fortunate enough to have a fireman with good enough judgment to get all the heat out of it without wasting the material, it is excellent advice.

But the important part of the article is the arrangement for supplying heated air direct to the fire, and I doubt not many other florists in the country, as well as myself, would be more than willing to travel a good many miles to see the proposed saving of fuel in practice. If Mr. Blake can inform us where such a system is in use, with the saving of half the coal bill, I trust Mr. Blake will not think me troublesome if I ask him to give us, through the columns of THE AMERICAN FLORIST, answers to the following questions:

First.—Of what material is the best to make the drum of that he places at the back of the fire grate, on the bridge wall? Second.—How does he prevent it being burnt out in a very short time, placed as it is in direct contact with the greatest heat from the fire? Third.—What kind of grate bars does he use to stand the extra strain which they must have, by direct contact with superheated air, always acting on their surface?

In my experience in firing, during about 50 years, I have tried this method in a small way, though not exactly as directed by Mr. Blake, but have found in every instance that by cutting off the cold bottom draft entirely, and depending on the heated air only, with a very hot fire, the grates soon become twisted, warped, and break, making it necessary to have a constant supply of new grates on hand. This soon becomes expensive and troublesome, as it always occurs in the coldest weather, when steady hard firing is absolutely necessary. The heated air is undoubtedly beneficial when applied to the top surface of the fire, as it creates better combustion, hence more heat direct on the surface of the boiler, at the same time greatly helping to consume the smoke, thereby a twofold advantage.

Mr. Blake struck the right keynote when he said, cutting the coal bill in two, and a note that will appeal to every florist, and if he will kindly answer the above questions it will be a great help to all of us to know how we can safely adopt his plan. Many of us are more or less wedded to a method which we have found in the past gave fairly good results, but I think a very large proportion are ready to adopt any new method, especially when it is a saving in their bank account, and I think many, like myself, will feel very thankful to Mr. Blake for his timely, concise and practical article, for it is just such articles that set the live florist thinking out schemes to his own advantage, thereby a great benefit to all.

JOHN N. MAY.

THE SMALL FLOWER STORE.

That of Geo. Giveas, Randolph and State Streets, Chicago.

COLORADO SPRINGS, COL.—Cash prizes aggregating $98 were awarded the Colorada Springs Floral Co. at the Pueblo state fair. This same firm also recently won 19 first prizes at the flower show of the El Paso County Horticultural Society.

THE RETAIL TRADE

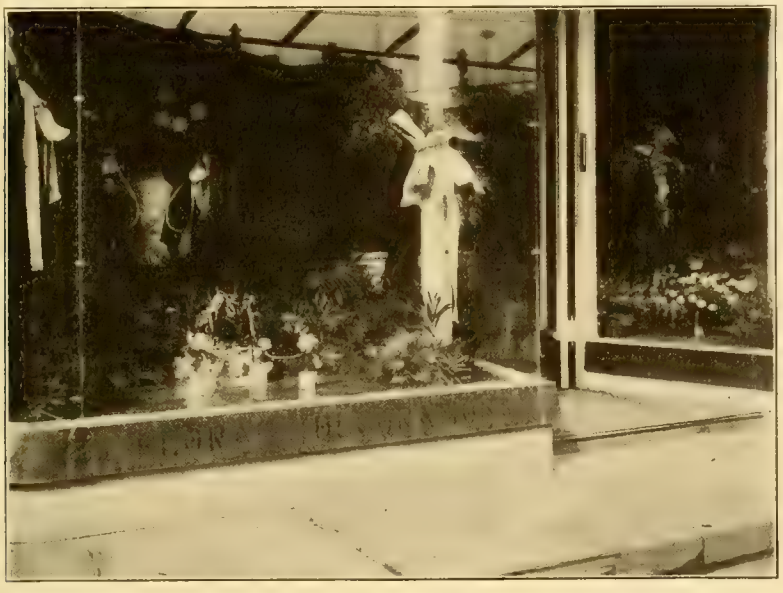
The Small Flower Store.

Of late years, the growth in the number of retail stores has been very large. This is partly due to the increased output of the growers and the advent of the Greek as a retail florist, who has heretofore occupied the entrance of a big building or the more convenient street corner. Most of this class of retailers have erected small establishments which seem to be doing a thriving business.

This is amply demonstrated by the flower shop of Geo. Giveas, Chicago, situated near a bustling corner and covering a floor space of about 7x9 feet, with the exception of the window which is fully five feet wider than his store front. A curious arrangement with his landlord allows him the use of this additional space and gives him a total window frontage of about 14 feet. The window contains an artistic arrangement of moderate priced flowers, carnations and roses, predominating. The entrance is decorated with palms and bay trees, and, in fact, the entire display is well calculated to lure in the prospective purchaser. The walls and ceiling are plainly calcimined, the former having two mirrors about five feet high which run the length of the room. The store contains nothing in furniture save a shelf, desk, chair, and a single counter. Most of the stock carried is placed outside.

Another Chicago Store.

Frank Williams is one of Chicago's most successful retailers. The illustration herewith shows only the smaller of his two stores. The dimensions of the room are 12x18, a moderately sized establishment, well kept, and handling only the best grade of stock. A small refrigerator containing several glass shelves and mirrors makes an excellent display. Here is arranged a tempting assortment of roses, carnations, lilies, etc. The room has but little furniture. There are two tables, covered by marble slabs, a cashier's desk and several chairs. The window measures about six feet in width and is very deep. In here an excellent assortment of fresh stock is kept.



MINIATURE WEDDING DECORATION IN R. G. WILSON'S WINDOW, BROOKLYN, N. Y.

See New York notes.

WAGON LOAD OF DAHLIAS ARRIVING AT A. H. LANGJAHR'S, NEW YORK, AT 6 A. M.

Idlewild Greenhouses, Memphis, Tenn.

The grand opening of the new and beautiful store of the Idlewild Greenhouses, Memphis, Tenn., occurred October 8. The store was thronged with visitors all day. The front window was a bower of ferns and was starred with hundreds of American Beauty roses and Easter lily. On the side was one continuous bank of ferns; this, also, was starred with American Beauty. The canopy of asparagus, wild smilax, ribbons, white roses and carnations was very effective. Under the canopy the height of the floral art was shown in the execution of the mantle decoration.

The next attraction was the bride's table. In the center of this was an immense shower bouquet of Bride roses and lily of the valley, the streamers of which extended to each place. Around the edge of the table, draped in a very artistic manner, was smilax. Over the entire table roses were laid in a very careless manner which gave a very graceful effect. On the library table was another large shower bouquet. This was made of Madame Chatenay roses and lily of the valley, with streamers of ribbon.

Many admired the beautiful orchids and double violets, also chrysanthemums, which, by the way, were the first shown in this city this season. Another very novel feature were the bouquets of roses and carnations frozen in ice. Twenty-five thousand flowers were given away as souvenirs. Otto Schwill, Jr., the genial proprietor of this concern, deserves credit for the generous spirit of his display.

What Some Chicago Retailers are Showing.

Business continues very brisk in the retail stores here, and although prices rule rather high the quality of the material shown is excellent.

A. Lange, Madison street, is showing fine roses and chrysanthemums in all the leading varieties and reports that wedding and social orders are coming in briskly. Mrs. Marshall Field and Chatenay were in excellent order here, also the showy red water lily, Nymphæa Zansibaxensis.

John Mangel in his first floor show rooms has a very fine assortment of palms, bays and green foliage plants generally. A few orchids, such as Odontoglossum grande and Cattleya labiata brighten the store windows. Here too we saw magnificent American Beauty roses and especially fine Mrs. Marshall Field with grand leafy stems two feet

in length, this superb variety at its best in short, also good Liberty, Killarney and Kaiserin, with fine chrysanthemums in variety.

Harry Rowe has a good assortment of small pot plants and reports very satisfactory business. Fine assorted chrysanthemums, roses in all leading sorts and water lilies help to make a showy window and some pots of the variegated box show what an excellent and hardy subject this is for cold or drafty positions.

In spite of the inconvenience incidental to rebuilding and consequent removal P. J. Hauswirth, in the Auditorium Annex, appears smiling and busy with a good stock of leading varieties. Large bouquet orders are frequent and the counter trade good.

The south side retailers appear to be sharing in the general briskness, W. J. Smythe having lots of work on hand, including the decorations at Mr. Harry Morris' house on the occasion of Sir Thos. Lipton's visit, when a scheme carried out in American Beauty roses was much admired. After cleaning and alteration the store has a very bright appearance, the windows showing tasteful arrangements of baskets of capsicums and ferns.

Adiantum Farleyense is used with good effect among small foliage plants in Chas. Samuelson's windows on Michigan avenue and here too the reports as to business are of the best.

Washington.

MARKET STEADILY IMPROVES.

Business continues to improve. October weddings call for considerable decorative work, and the national encampment of the Spanish war veterans, and convention of veteran telegraphers, during the past week also contributed something to the total. The quality of greenhouse stock improves slowly but, good or ill, it is now all there is, as killing frost on the nights of October 11, 12 and 13 put all the outdoor flowers out of business. Chrysanthemums are beginning to put roses and carnations in the back ground and that condition will, as usual, prevail until the crop is cut. There is a moderate demand for violets with a very limited supply. The stocks of the few local violet growers are quickly taken and Virginia stock seems to come in slowly. Small lots of an excellent quality of Rhinebeck doubles are occasionally seen. There is considerable trade in ferns and other seasonable pot plants.

NOTES.

There is a great deal of conversation over a commission house, which has not yet crystalized into results. However, it seems a certainty that one will be started in the near future, if not by a stock company by individuals, and if local capital is too timid to invest in such an enterprise it will be taken up by outside men. The local retailers, who do not grow, are almost a unit in favor of a commission house, though they are not unanimous as to the methods to be pursued in securing it. At present the chief obstacle seems to be the opposition of several large growers who also retail. With reference to them, a prominent store man has this to say: "They have no uniformity of prices. Though we patronize them liberally they are just as likely to charge us a retail as a wholesale price if they think they have us cornered. The business of Washington demands a flower commission house and it is bound to come." Said another retailer: "No honest grower need fear the results of a commission house being established."

Lord & Burnham will at once begin work on two new houses at the U. S. Botanical Gardens. It is the understanding that work will be pushed to the limit that the work may be completed before severe weather sets in. I learn that the contract for this work was let to other parties but there was a hitch somewhere and it was taken out of their hands, after some trouble. It is getting pretty hard to fool Uncle Sam with "something just as good."

F. R. Pierson, of Tarrytown-on-Hudson, was a recent visitor to this city. It is hoped that in the future Mr. Pierson will be a more frequent caller. Incidentally it is hoped that the dissemination of Winsor and Helen Gould will be successful. As shown here, a year ago, they promised to be valuable contributions to the select carnation circle.

W. R. Smith has been entertaining a party of Scotch friends and accompanied them north on their return trip, when the horticultural features of New York and Boston were inspected.

F. H. Kramer has returned from his trip to Mexico. He is the picture of health and brought the hot tamale habit home with him.

Baltimore.

TRADE GOOD.

Trade is about what it should be at this season, and the supply just about keeps up with the demand. The weather has been variable, and after the cool "snap" it will not be surprising if we have a continuance for several weeks of fine and warm days.

NOTES.

Great interest centers here in the announcement that the Johns Hopkins university has made provision for a botanical garden and a large, modern greenhouse. The former is to be laid out on such a scale that it will not fail to rank high among such valuable adjuncts to the investigation of plant life, just as the greenhouse will give large opportunity for studies in pathology. Dr. D. S. Johnson, professor of botany at the university, is developing the scheme and is enthusiastic over the possibilities which it involves.

The greenhouse will differ, naturally, in some respects from commercial and show houses, in that it will not be devoted to propagating large quantities, nor to the displaying of handsome individuals, being, in fact, rather a laboratory in which to pursue botanical inquiries and the study of normal and abnormal plant-life manifestations.

In the gardens the effort will be made to combine the practical and the beautiful, and while the planting will be done according to the most approved plans for exhibiting genera and species, an attempt will be to so dispose of the various groups as to present features which will not destroy, but rather accord with the general scheme of landscape gardening, which will be adopted. The professor is in consultation, with this idea in view, with Frederick Law Olmstead. Work at the university in botanical courses has been done heretofore at a great disadvantage, but the new facilities will doubtless add to the interest in these branches.

S. B.

TEMPORARY STORE OF THE ART FLORAL CO., SAN FRANCISCO.

Bricklayers are pushing work on J. Louis Loose's building at Fourteenth and R streets. S. E.

NEW HAVEN, CONN.—The County Horticultural Society's dahlia exhibit September 18 brought out many notable displays. Among the most attractive were those of President Robt. D. Pryde, J. H. Slocombe, Ernest Carroi, gardener to N. W. Kendall, A. J. Thompson, of West Haven, and John H. Marroy, of the Yale school of forestry.

St. Louis.

MARKET STRONG.

The market this week was very strong for several reasons, the cold snap and the almost entire absence of outdoor flowers figuring most prominently. The lateness of chrysanthemums coupled with the great scarcity of carnations increased the demand in other lines. Roses had to be used in all design work and therefore prices stiffened on these. American Beauty has fallen off in quality as well as in quantity; bullheads and crippled blooms hurt the prices. Carnations in the main still have short stems. Long stemmed blooms are bringing top prices. A few yellow and white chrysanthemums are in the market of medium quality.

NOTES.

There is quite a stir in local trade circles at the announcement of the formation of a new horticultural society for this city. The names of the officers and gentlemen connected with the organization are those of men well versed in horticulture. The majority of the officers being practical growers should commend the movement to those who desire to see the florists' business raised to its dignity and occupy the position it should in the eyes of the public. The building of a hall in this city in which semi-annual exhibitions could be held, alone would commend itself to all who have the work and interest of the trade at heart. We need a society where personalities and prejudices shall be obliterated and whose only aim shall be to encourage the masses in the love and admiration of flowers.

Frank M. Ellis has just returned from Panama. He has been absent a month. Mr. Ellis has a chocolate plantation, also 4800 acres in bananas. He expects a bright future for his new enterprise. Frank looks the picture of health although much thinner.

F. J. Foster received two prizes at the horse show this week, one second and one third. Fred got back at the judges on Saturday. Had he done so earlier in the week he might have received fairer treatment which he deserved.

We regret to announce the serious illness of Miss Armstrong, daughter of Luther Armstrong, of Kirkwood, Mo. She is suffering from appendicitis and is at the Jewish hospital where she is progressing favorably.

Miss Theresa Badaracco had the Scarrit-Keller wedding, Wednesday, and several thousand double violets and lily of the valley were used. She also had her new wagon on exhibition at the horse show.

A trip to Henry Felter's greenhouses will convince anyone that his chrysanthemums are as good as any that can be found in this locality.

Plans for beautifying and parking of the city of Kirkwood, 13 miles out of this city, are under consideration.

The Schoenle Floral Co. reports business as flourishing. This firm has several large wedding orders booked.

W. H. Kruse reports trade as first class. He has a very large trade which is spreading out in all directions.

G. H. McNeil, Jackson Tenn., was a visitor. W. F.

Cincinnati.

STOCK SCARCE.

A heavy frost last Wednesday night put a stop to all outdoor flowers and stock has been very scarce ever since. The greatest demand is for carnations with a scarcity never before equalled in the history of the business. From present indications they will remain scarce for a long period. Blooms with medium length stems of fair quality bring three cents and about 90 per cent of orders are turned down at that. Roses are good and of course are required to take the place of carnations; consequently a good demand prevails. Chrysanthemums have made their appearance in greater quantities and sell out clean every day at profitable prices. Some very good lily of the valley is to be had, in fact we cannot recollect the time it was better. A few violets were received the past week but they are hardly worth mentioning. Green goods are plentiful and in good demand.

NOTES.

The meeting of the Florists' Society has been postponed until October 25, when the subject of a big chrysanthemum show to be held next fall will be thoroughly discussed. By the way what is the matter with having the Chrysanthemum Society of America hold a big show in our city? There is no better adapted and more centrally located place for a thing of this kind than here and our celebrated Music hall is big enough for any exhibition.

There are some big weddings to be held the coming week, which no doubt will create a big demand for flowers. A. Sunderbruch's Sons have two immense orders, one of which will consume several thousand lily of the valley. F. W. Hardesty & Co. have placed orders for large quantities of chrysanthemums and cattleyas.

Albert McCullough, of the J. M. McCullough's Sons Co., sent about 500 lily of the valley to this market, which would be hard to beat anywhere. They were forced from pips which are being tested in Mr. McCullough's private greenhouse and they look to be all that is claimed for them on the other side of the big pond.

The Kreimhilde dahlia, which has been very popular in this city, owing to the heavy frosts of the past week will be severely missed from the counters.

Al. Grey, of the Ohio Cut Flower Co., left the past week for Montgomery, Ala., which city he hopes to make his future home.

Gus. Meier is again this season sending in some of those fine Bride and Bridesmaid roses for which he is noted. ALEX.

Cleveland.

COLD WAVE MAKES STOCK SCARCE.

The cold wave that struck this section on October 10 was the most severe for this time of the year experienced in a long time. The thermometer hung around the freezing point for three days which meant the last of all outside stock. Scarcely any cosmos has been seen in this market and from all reports there will be none. Dahlias were also ruined by the snow storms. Carnations and roses were never known to be so scarce at this time of the year. Prices in all lines are on the incline and with all outside stock out of the way there is no doubt but that stiff prices will obtain from now on.

ANOTHER CHICAGO FLOWER STORE.

That of Frank Williams, 37 Randolph Street.

NOTES.

At the last meeting of the Florists' Club the following members were elected as officers: Chas. Schmitt, president; Wm. Stade, first vice-president; Wm. Warnke, second vice-president; I. Kennedy, secretary; A. Hart, assistant secretary, and H. A. Hart, treasurer. Adam Graham, Sr., introduced the new officers with an eloquent address, which was thoroughly enjoyed by those pres-

ent. Mr. Kennedy has filled the position of secretary for six consecutive terms and Mr. Hart 11 terms as treasurer.

On October 8 a few close friends of Isaac Kennedy were invited to his plant at West Park to view his new white rose, a sport from Bride, which is a world beater. While there the party were informed that it was the twenty-first anniversity of the wedding day of their host and hostess. Then Mrs. Kennedy served a fried chicken dinner which all greatly enjoyed.

Horace G. Welty has rebuilt the old Wamalink place on Woodland Hill avenue, having installed new boilers and put the whole place in first class shape.

The Ohio Cut Flower Co. has moved to its new location on W. Twenty-fifth street. This store, when completed, promises to be one of the finest in the city. The company has a fine automobile delivery wagon.

Ogden Gaul, formerly with Wm. Brinker, seedsman, has taken a position as traveling salesman for the Cleveland Cut Flower Co., covering Ohio with a line of florists' supplies and wire work.

The J. M. Gasser Co. is in its new store on Prospect street, which is about as fine a location for their business as could be had in the city.

The Ohio Floral Co. is sending in some fine chrysanthemums for so early in the season.

Smith & Fetters have been displaying some fine novelties in baskets the past week. OHIO.

Detroit.

STOCK SCARCE.

Coming immediately upon the fall revival of business activity is the present general scarcity of flowers of all kinds. A hard and unexpected frost last week destroyed every flower outside, which fact greatly stimulated the public demand which found the dealers almost totally unprepared for it. All the local growers are off crop with their carnations and roses too are very scarce. Chrysanthemums are later coming in this season than usual and very few are yet to be had though heavier receipts are daily expected and when they come will be readily disposed of. Violets are quite frequently called for but very few have yet appeared in the market and they were small, soft and off color.

NOTES.

Gus. Knoch, Woodmere, is suing the local gas company this week for a loss sustained by the company's refuse contaminating the water that flows through his place where he grows water hyacinths. His sale of these exceeded 75,000 plants this season. Mrs. Knoch is now in New York where she has been selling much of their stock.

Geo. A. Rackham is just finishing the installation of a hot water system in his greenhouses using the Holly-Castle circulator. His son Harry, who has been dangerously ill with typhoid fever, is somewhat improved but not yet out of danger.

Fred Miesel's heating system was partially dismantled when the unexpected cold snap came last week injuring some of his plants. His splendid stock of cyclamen plants was uninjured.

Thos. Browne, Greenfield, sustained a painful and dangerous injury to his knee about four weeks ago, and is still confined to the house.

Miss Luffman called upon her friends, Chas. Maynard and wife, here on her way west to Spokane, Wash., where she at present resides.

The L. Bemb Floral Co. is building a commodious and elegant refrigerator and making other improvements in its Bates street store.

James Taylor, Mt. Clemens, is changing his heating system from steam to hot water, using the Holly-Castle electric circulator.

John Carey's daughter, Miss Belle, of Mt. Clemens, left October 17 for Denver, Col., where she will spend the winter.

Mr. Pennock and wife, 1514 Chestnut street, Philadelphia, were visitors last week.

The Late Paul Goebel.
See obituary.

Philip Breitmeyer is on an extended business trip in eastern cities this week. J. F. S.

Kansas City.

THE MARKET.

Quite a change, in both conditions of trade and of market has occurred during the past week. Heavy frosts throughout Missouri and Kansas, have destroyed everything in the way of vegetation. In some localities in this vicinity, the thermometer registered as low as 25° with ice over an inch thick. The sudden change has caused somewhat of a scarcity in the supply, only the usual stock of staple flowers being obtainable. The advent of the horse show brought many orders. American Beauty is in good demand with the supply hardly sufficient to fill requirements. Bride, Bridesmaid, Golden Gate and Chatenay roses are the most plentiful, and of fairly good quality. Some of the finest Killarney ever placed on this market were to be seen last week. The good results shown by this variety is somewhat of a surprise to many who disregarded it when it first came to notice. Carnations are in good demand at advanced prices; Norway, Lady Bountiful, and Boston Market comprise the white sorts; Joost, Lawson and Enchantress, are varieties in better flower than others. Violets have begun to arrive in small quantities and show much improvement with the cool nights. Some chrysanthemums find their way to the market, but the supply is limited. Monrovia and Polly Rose are about the only varieties. A number of growers will be in this week with other early varieties. Green goods are plentiful.

NOTES.

"Considering the circumstances, business is all that can be expected," says William A. Bastain. "We have completed arrangements with several large growers for their stock this fall, which will relieve the situation, as soon as cutting has fully begun."

"The fall season is opening with an exceptionally large amount of work," says W. L. Rock; "social affairs of every nature have been unusually numerous for this time of the year; a very good indication of the general evidence of prosperity."

Everything bears the appearance of being in fine condition at Edward Humfeld's place. He says trade for September was far in advance of the same month last year.

Among recent visitors was L. J. Stuppy, of St. Joseph, Mo. Mr. Stuppy says that indications point to a very busy season in that city.

The regular monthly meeting of the Missouri Valley Horticultural Society will take place October 20 at Edwardsville, Kans.

Samuel Murray had the decorations for the Knife and Fork club dinner at the Coates house last week.

Edward Quinn, of Springfield, Mo., has taken a position at the W. L. Rock Flower Co.'s plant.

Ed. Bunyar, of Independence, Mo., has made an addition during the summer to his plant.

Lawrence Schwager was in the city last week, paying visits to friends in the trade.

W. H. Humfeld was busy last week with a large amount of funeral work.

F. J. Farney, of the A. L. Randall Co., Chicago, was a recent caller.

W. J. Barnes reports a very satisfactory trade in his new location. K. C.

Columbus.

MARKET STEADY.

The local market has been quite steady this week, there being no trouble in getting or disposing of stock. American Beauty baskets seem to be having a run here and some very pretty ones have been made. Dahlias are steadily growing in favor and a great many have been sold here. The dahlia makes a very serviceable flower for a great many purposes, and as a low priced vase flower it is unexcelled.

James McKeller, of Groff Bros., has been quite sick with rheumatism for the last two weeks. He had just come home from a sanitarium at Magnetic Springs, O., a short time ago, but it seems that in spite of this his trouble has returned. CARL.

San Francisco.

TRADE FAIR.

The past week has not been bad for the trade. In fact, the cut flower dealers are unanimous in ascribing credit to September for having done well in a preliminary way in ushering in what is confidently expected will be a good, old time fall and winter season. Flowers for the last couple of weeks, owing to the excessively hot weather, have not been, either in quantity or quality, equal to the demand, but before another fortnight, the growers say there will be no cause for complaint in this particular.

HORTICULTURAL SOCIETY MEETING.

John McLaren, superintendent of Golden Gate park, was the pre-eminent feature at this week's meeting of the Pacific Coast Horticultural Society. It was the first time the meeting was called to assemble in Park Lodge, an attractive gothic structure located in the midst of a grove of magnolias just within the main entrance to the park. Superintendent McLaren is a member of the Pacific society and has his residence within the park enclosure a few steps distant from the Park Lodge. It was noticed that during the meeting's earnest discussion as to whether or not the society's usual annual flower show in November should be passed, and the exciting annual election of officers that followed, that Superintendent McLaren didn't seem to take the usual interest, but passed out every few minutes to his home. This was not understood at the time, yet no comment was made.

Adjournment followed, but at the close of the concluding ceremony Superintendent McLaren popped into the hall and announced that he wanted every member to accompany him to his home. This was done without question and every member remained at the home until quite late, for the surprise banquet that was there spread for them, and the way Mr. McLaren wined them, was the tastiest thing of the kind that has transpired here since the earthquake-fire.

After the meeting decided to postpone the flower exhibition till spring, the following officers were elected: J. W. Bagge, president, re-elected; F. Sulty, vice-president; T. F. Taylor, recording secretary; J. H. Atkinson, financial secretary; F. Cleis, treasurer; John Thiergarten, librarian; H. Plath, usher.

NOTES.

The valuable Brandegee collection of botanical specimens, together with the Brandegee library of over 3,000 volumes of botanical works, and the furniture and fixtures for the care of the herbarium, have been presented to the botany department of the University of California. This gift is a most important one to the department for the reason that the herbarium contains over 100,000 specimens of plants, gathered principally in southern California, Arizona and Mexico, a region which is but little covered in the original collection of the university. The university herbarium is now one of the largest and most valuable west of Harvard.

Fifty thousand dollars made in the cut flower business in this city is being invested in the upbuilding of greater San Francisco. J. W. Shanahan, locally well known as the proprietor for years of the Shanahan Floral Depot, in Powell street, is the man who is doing this. He is erecting a business structure on Howard street, between Eighth and Ninth streets.

The dean of all the rank and file of Pacific coast floriculturists, E. Gill, proprietor of Gill's Nursery, near the University of California, is off on another tour of observation. He recently returned from an expedition to the bulb growing plantations in Holland, and now he has gone on a visit to the trade in Oregon, Washington and British Columbia.

Our sympathy is still with the attaches of flower stores yet living in tents, particularly one young man and his wife, whom I knew before the fire as proprietors of a flower store on Fourth street. These feelings must be shared by W. J. Dingee, a Golden Gate park commissioner, for this week he sent his check to the relief committee for $5,000.

When Generals Grant anl Lee were concluding business at Appomattox that all America was vitally interested in, Mr. Gill was conducting an 8-acre flower-producing plot in Oakland, but now his nursery of more than 100 acres adjoins the city limits of Berkeley, and he is ranked with the very wealthy men of the Pacific coast.

Incorporation papers have been filed for the Sievers Floral Co., with a capital stock of $25,000. The incorporators named are Frederick J. Autz, J. George Ils and John R. Sievers. John R. is a son of John H. Sievers.

JESSE WHITE.

Denver.

Business has been very good the last month. We are getting some very good stock now. Chrysanthemums are coming in fine. Violets are very plentiful at fair prices.

NOTES.

We have a new concern which has just started under the name of the Sylvia Floral Co. The florist is a girl who has worked for the Alpha Floral Co., and her place of business is 427 Sixteenth street. It is a fine establishment, all in white, with a great many mirrors, etc.; in fact, she has a prettier store than the Alpha.

Ben Boldt left last Saturday with his family for Germany, and expects to spend the winter there. He will return in the spring and go into the growing business again.

Mr. Braidwood is doing very well at Harris. The firm has incorporated under the name of the Braidwood Floral Co., and capitalized at $25,000.

Phil. Scott has returned and is in the harness at the Scott Floral Co. His many friends are glad to see him.

PLATTE.

St. Paul.

TRADE GOOD.

Only roses and carnations are seen now in quantities and while they are improving in quality, it is hard to find much good stock. Violets have made their appearance but in very limited quantity and are sold on sight. Chrysanthemums, such as they are, have made their appearance. There has been a big call for these, but when customers were asked $4 and $5 per dozen for flowers that did not equal good asters they usually backed out. Frost has done its work outdoors and there is nothing to cut from except when protected. A good deal of late outdoor stock has been sold this fall, Hardy asters, boltonia, Pyrethrum ulignosum, etc. Trade has continued good with a good call for plants from people returning from their summer homes. Several good wedding orders are in prospect this fall, with some booked already. All indications point to a very busy season.

NOTES.

Holm & Olson will be in their new store by the first of next week. It will probably be the largest store devoted to a florist's retail business in America. Scarcity of labor and unforseen obstacles have delayed the work of getting it ready for occupancy.

J. D. Ramaley of the Ramaley Floral Co., left last week for a visit of three weeks in California. It is Mr. Ramaley's intention to dispose of his store here and remove to California if his plants do not fail.

S. D. Dysinger, for many years with L. L. May & Co. and lately with Sears, Roebuck & Co., of Chicago, is now with Holm & Olson and is busy shaking hands with old friends here.

O. J. Olson has been passing cigars around, the occasion being the arrival of another florist at his home.

Jack Hoffman, manager of L. L. May & Co.'s store, reports business as very satisfactory.

Gus Colberg, of the Swanson Floral Co., has a good call for funeral work.

O.

Louisville.

BUSINESS VERY GOOD.

Business the past week has been very good, especially the latter half, when good stock, especially in carnations, lilies, and American Beauty roses were almost impossible to secure. We had a very heavy frost one night which ruined almost everything in the way of dahlias, cosmos, etc., and this had a great deal to do with the extra demand for other stock. The demand for roses has been very good, and the stock and supply was very good with the exception of American Beauty. If it would have been possible to push the blooms out of the carnation plants the past week, no doubt several would have worked over time. It was impossible to get a quantity of them at any price Saturday, but the few that were to be had were good. A few violets were on the market, and sold readily. Lily of the valley has had a very good demand, and the supply promises to be adequate very soon, likewise with lilies. A few chrysanthemums were on the market, and in a few days the supply will be very good. Green goods are very plentiful with the exception of Asparagus Sprengeri, which has had a very heavy demand.

NOTES.

The regular monthly meeting of the Kentucky Society of Florists was held Tuesday night at Mrs. C. B. Thompson's Fourth avenue store, with but a few present. "What's the matter boys?" Five applications for membership were accepted as follows: Mrs. Kunzman, Mrs. Carrie Quarles, Miss Edith Walker, Robt. Miller and Wm. L. Korb.

Prosperity is certainly among the lo-

cal florists. It's a girl and the price of carnations will probably go up. Ask Louis Kirch.

Wm. Walker had an appropriate window, the horse show and races both being represented.

The next meeting of the Florists' Bowling Club will be Tuesday night, October 23.

Have you heard the noise at Fourth and Chestnut? See August Baumer's new paper. F. L. S.

Indianapolis.

PRICES STIFFER.

Business has decidedly improved since last week. The retail men report plenty of funeral work, good counter trade and quite a number of weddings and openings. With the outside stock completely frozen and the bulk of early chrysanthemums not yet on the market, flowers were actually not equal to the demand and prices stiffened considerably. The scarcity was more apparent in carnations than in any other stock. The demand for orchids has increased remarkably. Next week will see many thousands of early chrysanthemums in the market in this vicinity.

NOTES.

H. W. Rieman has completed the renovation of his place. This makes the place practically new with all vital parts constructed of iron and cement. His houses are located almost in the heart of the city and aggregate 22,000 feet of glass. The stock, in spite of all the building, looks very promising. A feature of this place is a reservoir for rainwater, which Mr. Rieman prefers to city water. The reservoir is under a 5-foot bench, it is four feet deep and long enough to contain 300 barrels.

The Smith & Young Co. experimented with cyanide for scale on orchids with good results. Four badly affected Cattleya Harrisoniæ were exposed for 20 minutes to the gas and came out clean and without the slightest injury. Fifteen one hundredths of a grain of cyanide of potash per cubic foot of space was the strength used.

E. Huckriede & Son have carnations and smilax, that come up to the top notch of perfection.

John Heidenreich has a fine house of Scottii fern; he thinks very favorably of this variety.

A. Heitz, formerly of Madison, intends engaging in business in this city. Mrs. Fred Dorner, Jr., of Lafayette, was a visitor here.

Edward Bertermann is in bed with rheumatism. J.

Allentown, Pa.

John Sykes, formerly with Horn Bros., has started a place for himself in South Allentown and erected three fine greenhouses. He heats them with a Kroeschell boiler and is very much pleased with it.

John Horn has put in a large steam boiler and furnished out three of his houses with solid beds with cement sides.

Earnest Ashley, who has rented the Ellsworth greenhouse for several years, has some very fine chrysanthemums.

A. B. E.

Nashville.

SEASON OPENING UP WELL.

The season is opening up well, and all dealers are looking forward to a successful winter. Chrysanthemums are nearly ready for the market, though the earliest blossom has not yet put in an appearance. Violets will soon be on in quantities, some advance guards being already in the stores.

EXHIBITS AT STATE FAIR.

One of the finest floral exhibitions ever made in this city was made at the state fair. The local florists entered into it with zest and put up some beautiful exhibits. A premium was offered for the finest and best collection of palms, ferns and decorative plants, and was captured by the Joy & Son Co., whose display was large and composed of some of the finest specimens of decorative plants of every description. These successful florists also made a most complete and beautiful display of cut flowers and captured the blue ribbon. They had all the new and beautiful varieties of roses, including Killarney, Kaiserin, Richmond, Golden Gate, Madame Chatenay, Wellesley, American Beauty, Ivory, Bridesmaid, Miss Louise Moulton, Bride, Enchantress, Lawson and other carnations, 25 varieties of dahlias, gladioli, Farleyense ferns and adiantums, making altogether a pleasing and beautiful picture. Above the cut flowers were suspended six large hanging baskets of ferns which were very effective. These also took a prize. But the most striking feature of the floral display were the baskets and designs. Mr. Joy exhibited a superb floral wreath on an easel three feet in diameter, with a background of of palms, filled in with Bride roses, lilies of the valley and orchids. He has been peculiarly successful with orchids this season, producing a quantity of splendid blossoms of Cattleya splendens. As he expressed it, they "have grown almost as weeds" with him. Several floral baskets contained fine specimen of roses, American Beauty, Killarney and others, none of them prize winners. A graceful urn made of dahlias and filled with the same was a unique exhibit and attracted much attention, winning a blue ribbon. Joy & Son distributed several thousand roses to the visitors to the exhibit. The enterprising firm of Geny Bros. also made some fine exhibits. Their display of palms, ferns and decorative plants captured the red ribbon. Their hanging baskets were large and luxuriant and very effective in the decoration. In their floral designs and baskets they carried off several prizes. A large floral basket of Richmond and Bride roses, filled in with adiantum was a beautiful exhibit and was awarded a first prize. Another basket of pink roses was given a second prize.

C. A. Birn, who has an establishment on Broad street, near the union station, starting in late last spring, has had rather a hard time, but prospects are good and he looks forward to a prosperous season.

Miss Eda Birn will change her location January 1, the owners of her present store having raised the rent "out of sight." M. C. D.

Albany, N. Y.

The local florists are interested in a movement started by F. N. Briare, of Whittle Bros., which has for its object the regulation of the hours of closing during the several months of the year. As outlined by Mr. Briare the plan provides for the closing of the florists' stores at 6 p. m. during the months of July, August, September and October; at 6:30 p. m. during February, March, April, May, June and November; and at 8 p. m. during December and January. It is also proposed to close every Saturday evening at 9:30 o'clock. As yet not all interested have signed the agreement, but it is expected by those who are furthering the movement that a satisfactory adjustment will be made along the line of the plan outlined.

Henkes Bros., Watervliet, are putting the finishing touches on two new houses, 20x100 feet, which will be devoted to general bedding stock. When completed the firm will have seven houses. Three of the number have an average width of 25 feet and in length are, 225 feet, 200 feet and 200 feet and are devoted mainly to carnations. A new Kroeschell boiler has been received and will be added to the heating plant.

W. W. Hannell, another Watervliet grower who has been in business about four seasons, is planning to extend one of his 70-foot houses to 150 feet. He has a rose house 24x150 feet and a carnation house of the same dimensions. Mr. Hannell has recently received from Chicago a No. 4 Kroeschell boiler which he will add to his plant. His establishment includes about 20,000 square feet of glass.

Marble, tile and plate glass workers are busily engaged in installing a handsome marble and plate glass refrigerator for cut flowers in the store of H. G. Eyres. The improvements will also include handsome wall mirrors and other decorations. When completed it is believed that the store will be about the handsomest establishment of the kind in this section.

F. A. Danker has just completed a new greenhouse, 20x80 feet, for azaleas, hydrangeas and other half hardy plants. A hot water system has been installed to heat the building. The work of stocking the house will be begun in a short time.

Sambrook Bros., who conduct a prosperous retail store on Fulton street, Troy, have just added to their establishment at Watervliet a new carnation house 20x100 feet. The firm has also added a new steam boiler to heat the additional area.

Patrick Hyde is preparing to erect an office and dwelling at his place, No. 488 Hudson avenue, Albany, this fall. He expects the buildings to be ready for occupancy about January 1, 1907.

R. D.

Madison, N. J.

Final arrangements for the coming flower show of the Morris County Gardeners' and Florists' Society took up most of the time of the 26 members present. This show will be on Noveember 1 and 2. Each member took his quota of tickets to sell and a bundle of

posters to put up. They believe they have the goods on hand and are determined to bring the people to see them. Two new members were elected and four proposed. The judges are from Lenox, Mass., this year. E. R.

Oceanic, N. J.

The Monmouth County Horticultural Society held its monthly meeting October 5. Wm. Turner showed some fine seedling greenhouse melons. They averaged 7¾ pounds and scored 98 points. We never tested a finer flavored or saw a better shaped melon. Geo. H. Hale showed as fine a collection of dahlias as can be seen. They scored 95 points. Mr. Hale is known as a dahlia expert. He has several good seedlings of his own which will be on the market next year. Final arrangements were made for the chrysanthemum show, etc., and final premium lists were distributed.

B.

Orange, N. J.

The regular monthly meeting and floral display of the New Jersey Floricultural Society took place on October 5, with dahlias as the principal attraction. Prizes had been offered, open to all competitors, for the best 24 in six varieties, the best 12 in three varieties and the best vase of 25 in variety, and flowers were sent in from a wide territory. While the season has not been as favorable, the growth of the dahlia in public favor has increased as was in evidence in exhibits and from the number of visitors, principally ladies, during the evening. The varieties in favor were the cactus and new single variety strains.

Walter M. Gray, of Maplewood, was the winner of the first prize for the best 12. William Runkle, D. Kindsgral, gardener, first for the best 24; A. B. Jenkins, George von Qualin, gardener, second for the best 24. A. C. Van Gaasbeck, William Bernett, Gardener, for the best vase of 25 and Walker Gray second. For exhibition, among the most notable were 25 vases from J. C. Williams, of Montclair, containing all the new varieties and Herbert Bradley, Robt. Cruthers, gardener, 32 varieties all bearing marks of superior cultivation; vases from A. C. Gillespie, Geo. Oakley, gardener; Mrs. Stewart H. Hartshorne, A. T. Caparn, gardener; Sidney & Austin Colgate, Wm. Read, gardener; Col. H. A. Potter, William Phillips, gardener, and Chas. Harkaway, Max Schnyder, gardener, the above receiving the society's certificate; and a magnificent vase of Grand Duke Alexis and Cuban Giant with long stems, entered not for competition by Peter Duff, gardener to John Crosby Brown.

Fruits were entered by J. C. Williams, vegetables by Stewart Hartshorne and Mrs. Wm. Pierson, orchids from Lager & Hurrell, Joseph A. Manda and Wm. Barr, and decorative plants from John Crosby Brown, Wm. Barr and Wm. Runkle, these, with others, filling all the available space of the society's rooms and auguring well for the forthcoming fall show in the hall of the Woman's Club of the Oranges to be held November 5 and 6. Two new members were elected and various provisions made for the fall show. J. B. D.

Montreal.

A. C. Wilshire takes great pride showing his new refrigerator of immense size, standing near the entrance of the store. Its large plate glass doors offer customers a good view of its contents. Mr. Wilshire is satisfied that it is a better way of showing cut flowers than on the counter, which custom, by the way, is on the decrease and soon will be done away with entirely.

At Hall & Robinson's, a gallery has been erected which is neatly decorated with climbing plants, ferns and foliage plants and gives one a splendid view of the general display of the whole store.

T. Martell, landscape contractor, has the work of laying 6,800 square yards of sod this fall for the Mount Royal tennis club, Westmount.

Newport, R. I.

TRADE BRISK.

Trade is increasing day by day. Stock is getting better in quality although carnations are still short in stem. Roses of all kinds are plentiful. American Beauty sells readily. Single violets are good and plentiful, the double are small and scarce. The demand is not yet brisk. Dahlias are now better than they have been all summer. Chrysanthemums are just coming in.

Philip Caswell, who for many years supplied the retailers with roses, carnations and chrysanthemums, has sold all the greenhouses, boilers, etc., at auction.

The Newport Horticultural Society's meetings are now held every second and fourth Tuesday of each month.

Topeka, Kans.

The floral department of C. E. Hubbard's seed house is coming to the front, and the man in charge, J. Ralph Sonder, expects to show some chrysanthemums equal to any of the eastern markets. His house of carnations is looking fine, and some good Enchantress is being cut.

Hiram Hulse is picking and marketing his crop of apples from his farm in western Kansas. His roses and carnations are looking fine. Prospects are good for an early crop of carnations.

Mrs. Lord's new flower room is quite attractive; she receives her many friends, acquaintances and customers with a smile, consequently gets her share of the business.

James Hayes has his range of houses planted to roses, carnations and chrysanthemums. He has his downtown store filled with seasonable plants and cut flowers.

Mrs. M. E. Hollcraft has a new gold sign on her window. She succeeds in keeping her supply of stock equal to the demand of her well established trade.

J. E. Rodman has his new range of houses completed, and moved his store to his old location on West Eighth avenue.

HOUSTON, TEX.—The thirteenth annual chrysanthemum show will be held November 13-15, at Turner hall, under the auspices of the Faith Home Association. The rules which will govern the exhibit and the premium list have just been issued.

OBITUARY.

Paul Goebel.

Paul Goebel, the veteran florist of Grand Rapids, Mich., died at his home on Hall street October 5 after an illness extending over two years. He leaves a wife and four sons—Eugene, Max, and Charles, of Grand Rapids, and Frank, of Wabash, Ind.

Mr. Goebel was born in Lohrensdorf, Germany, on May 15, 1833. While learning the trade most of his time was working for a nobleman and later was a landscape gardener at Berlin. He was gardener for many years to the King of Prussia. In 1883 he came to America first going to Chicago. After a short time he moved to Grand Rapids buying the establishment of Mr. Sutter on East Fulton street, afterwards moving to Hall street where he has been for 20 years. Mr. Goebel was one of the old-school florists, perfect in growing everything and thoroughly versed in all matters pertaining to plants.

N. B.

Rudolph Ulrich.

Rudolph Ulrich, 65 years old, a well known landscape gardener, died at Santiago, Cal., October 15. The cause of his demise is not known. Mr. Ulrich figured prominently in the trade for many years and his loss will be keenly regretted by his many friends and business associates. He was superintendent of Prospect park, Brooklyn, N. Y., under Mayor Schieren, and was engaged in laying out the Chateau Kearney park at Fresno, Cal., at the time of his death. Mr. Ulrich had been superintendent of grounds at the Chicago, Buffalo and Omaha expositions. He was born in Weimar, Germany, in 1841, but had made his home in Brooklyn, N. Y., for many years where he is survived by a widow, two daughters and two sons.

William Sprague.

Wm. Sprague, of the Sprague, Smith Glass Co., of Chicago, well known to the greenhouse trade in this and other cities, died at his home, October 10, aged 70 years. He had been ill for about two years, when angina pectoris, a hardening of the arteries about the heart, caused his death last week. Mr. Sprague came to Chicago in 1857 where he was engaged in the glass business up to the time of his demise. He was a familiar figure in business and society circles, having been a member of the Union League club, Apollo Musical club, Chicago Thomas Orchestra association and was prominent in Presbyterian church work.

Patrick Knight.

Patrick Knight, of Geneva, N. Y., died at the family home October 9. The cause of death was general debility. Mr. Knight was born in Ireland and came to this country about 40 years ago and located in Geneva. He followed the nursery business for a number of years, but retired several years ago. He is survived by nine children, four daughters, Mrs. Frank E. Beamish, Bridget, Anna and Julia Knight and five sons, Patrick, Edward, James, John and Martin Knight, all of Geneva.

LEGAL POINTS.

Water Leaking Through the Floor.

No evidence of negligence could be found in the case of Conrad Fechter against Simon Phillips, which was tried in the district court at Paterson, N. J. Consequently, Judge Lewis granted a non-suit after the defence had presented its testimony.

Fechter maintains a store at 428 Main street, and Phillips lives above it. Some time ago a vessel, containing dirty water, was upset in Phillips' apartment and the water trickled through the ceiling to the store. It was distributed over natural and artificial flowers and also over a pair of pants, a straw hat and other wearing apparel. Damage to the amount of about $30 was caused and suit was started in district court for the recovery of that amount.

Lawyer David Bilder asked for a non-suit, which was opposed by Lawyer Geyer on the opposite side. Judge Lewis in giving decision said that if a person carrying a pail of water in rooms on the second floor of a building, were seized with a paralytic stroke, so that the water pail would drop to the floor and the water run through the cracks of the floor below, there would be no cause for sign of negligence in that.

As the plaintiff failed to show how the water in this case was upset he had the right to presume it was an accident. No negligence was proved, so there was nothing left to do but to grant the non-suit.

QUERIES.

To Remove White Wash Shading.

ED. AMERICAN FLORIST:—

Several of my rose houses are too heavily shaded with white wash which the rains we are having does not remove. What is the best way to remove this shading?

T. G. O.

In case the rains do not remove the shading, it will be well to wet the roof thoroughly and then use a brush. By placing it on the end of a long handle it will generally be possible to remove enough of the white wash to answer until the fall rains and frost come to complete the work.

L. R. T.

Slope of Hot Water Heating Pipes.

ED. AMERICAN FLORIST:—

In a greenhouse heated by hot water should the boiler be placed low and the pipes gradually rise to the far end of the house and then downward toward the boiler, or should the highest point be over the boiler with a downward slope to the pipes all the way around?

A. M.

To get the best circulation the water should be kept as hot as possible until it has passed the highest part of the system, and begins to descend on its way to the boiler. On this account it is well to use moderately large main flow pipes and to have the highest point as near the boiler as possible. This would mean running all of the pipes downhill. The higher the pipes are placed above the boiler the better the circulation, but although there are limits to this it is always a good plan to carry the pipes as high as possible and to keep the boiler well down below the returns.

However, fairly good results can be obtained when the flow pipes run uphill to the farther end of the house, and if that system seems better adapted to the conditions it may be used.

L. R. T.

Extending Chimney.

ED. AMERICAN FLORIST:—

I have two flues, one 9x13 and one 13x13 in one brick stack, the flues being independent from boiler to top of stack. I am thinking of extending the height by means of an iron stack and wish to know what diameter of stack would give best results.

C.

The data furnished is not sufficient to give any very definite advice. Although the increased height secured by the use of the iron stack will improve the draft in case the two flues have in the past been insufficient to provide the necessary draft, it will be well to use a stack nearly equal to the combined areas of the flues. It is probable that a 15-inch stack is as small as should be used, while a 16-inch is more likely to be satisfactory.

L. R. T.

Paint for Greenhouse Pipes.

ED. AMERICAN FLORIST:—

What is the best paint for preserving pipes in a greenhouse, and that will not injure the plants? W. E. S.

Whether the paint will injure the plants grown in the house depends upon what is is composed of. If the pipes are painted with coal tar, or with a paint of which coal tar forms an ingredient, it will never be possible to grow plants successfully in the house, so long as the tar remains on the pipes.

Black asphalt paint is much used for the painting of piping. Although not advisable for the painting of greenhouse coils it seldom causes much trouble, if a good quality of paint is used. As a rule, if the fires are started while the weather is mild so that the ventilators can be opened to allow any injurious gases to escape it will do no harm.

As a dull, rough surface gives the most efficient radiation, an excellent paint for greenhouse coils can be made by mixing lampblack and linseed oil so as to make a fairly thick paint.

L. R. T.

NEWS NOTES.

BANGOR, ME.—C. P. Lodes has his new greenhouse nearly completed.

SARATOGA, SPRINGS, N. Y.—T. J. Totten is erecting a new greenhouse 30x100 feet.

LISBON FALLS, ME.—H. W. Blenthen will shortly build a 150-foot addition to his greenhouse.

HARTFORD, CONN.—W. S. Andrews has been making extensive improvements in his greenhouses.

SOUTH NORWALK, CONN.—Robt. E. Morrison has completed a new greenhouse at the rear of his home.

NEW YORK.—A greenhouse, 109 feet square, will be built on Geo. W. Perkins' place on Independence avenue and Two Hundred and Forty-eighth street, at a cost of $20,000.

ALTON, ILL.—Mrs. Albert Dietschy has transferred her cut flower business to her assistant, Miss Louise Van Buren, who will move to new quarters on E. Second street.

LOS ANGELES, CAL.—Geo. Watson, foreman at J. W. Wolfskill's establishment, is on his way from Europe and expects to call upon his Chicago friends about October 20.

WASHINGTON, D. C.—Geo. C. Shaffer's store was entered through the cellar recently. The safe was opened and all the loose bills and change taken. The cash register was also rifled.

IONIA, MICH.—Delbert L. Vincent has changed his location from Jackson street to E. Main street, and now has four houses 28x100 feet, with even span Garland gutters and iron posts in which carnations and all kinds of bedding stock are being grown.

NORTHAMPTON, MASS. — The prize awards in the eighth annual Carnegie flower garden competition, were made September 30 in the Carnegie house of the Home Culture group, by Geo. W. Cable. There were 548 contestants this season against 366 last.

LEXINGTON, KY.—Floral hall was thrown open to the public September 18. The first floor, in charge of D. B. Honaker, was devoted entirely to exhibitions of plants and cut flowers. An orchestra, hidden behind a bank of ferns, furnished the music.

ROCHELLE, ILL.—Augustus Caspers reports one of the best summer seasons for trade in his 28 years of business experience. Sales on plants and cut flowers have been excellent, and funeral work has been especially heavy. Carnations at this plant are looking fine.

LYNN, MASS. — The thirty-first fall exhibit of the Houghton Horticultural Society came to a successful conclusion September 27, with a banquet 275 persons being present. Many interesting speeches were made, Mayor Chas. N. Barney and John W. Duncan, assistant superintendent of the Boston parks, being among the speakers.

EXHIBITIONS.

Illinois State Fair.

The following is the full official report of the floricultural features of the Illinois state fair, recently held at Springfield. This was, perhaps, the most successful exhibition from a floricultural standpoint that has yet been held under these auspices, and thanks to the efforts of the State Florists' Association, it has assumed the important position to which it is entitled.

Collection of stove and greenhouse plants effectively arranged, Geo. Van Horn, first; David Wirth, second; Albert T. Hey, third.

Twelve palms grouped for effect, David Wirth, first; Geo. Van Horn, second.

Six palms, three varieties, two of each, David Wirth, first; Geo. Van Horn, second.

Two palms, Geo. Van Horn, first; David Wirth, second.

One palm, Geo. Van Horn, first; David Wirth, second.

Twenty-five ferns, distinct, 1 of each, Vaughan's Seed Store, Chicago, first; Albert T. Hey, second.

Twelve ferns, distinct, 1 of each, Albert T. Hey, first; Vaughan's Seed Store, second.

Six ferns, distinct, 1 of each, Geo. A. Kuhl, Pekin, Ill., first; Albert T. Hey, second.

Four adiantums, distinct, 1 of each, Albert T. Hey, first.

One araucaria, large specimen, any variety, Vaughan's Seed Store, first; Albert T. Hey, second.

One specimen fern, any variety not less than 10-inch pot. Vaughan's Seed Store, first; Geo. A. Kuhl, second.

Collection of geraniums, not less 25 plants, David Wirth, first; Albert T. Hey, second.

Collection of begonias, including ornamental foliage and flowering kinds, David Wirth, first; Albert T. Hey, second.

Collection of succulents, including cacti, agaves, aloes, escheverias, etc., H. T. Jaussen, Springfield, first; Albert T. Hey, second.

Collection of bulbs, correctly named, Vaughan's Seed Store, first; A. C. Brown, second.

Collection of Baby Rambler roses, not less than 15 plants, Vaughan's Seed Store, first; Albert T. Hey, second.

American Beauty roses, 25, Poehlman Bros. Co., Morton Grove, Ill., first; A. C. Brown, Springfield, second.

Golden Gate roses, 25, Poehlman Bros. Co., first; H. W. Buckbee, Rockford, Ill., second.

Liberty or Richmond roses, 25, Poehlman Bros. Co., first; H. W. Buckbee, Rockford, Ill., second.

Bride roses, 25, Poehlman Bros. Co., first; A. C. Brown, second.

Bridesmaid roses, 25, Poehlman Bros. Co., first; A. C. Brown, second.

Killarney roses, 25, Poehlman Bros. Co., first; A. C. Brown, second.

Mme. Chatenay roses, 25, H. W. Buckbee, first; Poehlman Bros. Co., second.

Sunrise roses, 25, Poehlman Bros. Co., first; A. C. Brown, second.

Collection of roses, six varieties, 12 flowers each, Poehlman Bros. Co., first; A. C. Brown, second.

Uncle John roses, Poehlman Bros. Co., first.

Any other variety rose, Poehlman Bros. Co., first.

Harlowarden carnations, 50, John Bauscher, Jr., Freeport, Ill., first.

Mrs. Thos. Lawson carnations, 50, Poehlman Bros. Co., first; John Bauscher, Jr., second.

Cardinal carnations, 50, Poehlman Bros. Co., first; H. W. Buckbee, second.

Boston Market carnations, 50, J. D. Thompson Carnation Co., Joliet, Ill., first; John Bauscher, Jr., second.

Gov. Wolcott carnations, 50, Poehlman Bros. Co., first.

Enchantress carnations, 50, Poehlman Bros. Co., first; J. D. Thompson Carnation Co., second.

Fiancee carnations, 50, Poehlman Bros. Co., first; A. C. Brown, second.

Mrs. Patten carnations, 50, Poehlman Bros. Co., first; J. D. Thompson Carnation Co., third.

White Lawson carnations, 50, Poehlman Bros. Co., first; A. C. Brown, second.

Any other variety carnation, 50, J. D. Thompson Carnation Co., first; Poehlman Bros. Co., second.

New variety carnation introduction of 1905, 12 flowers, J. D. Thompson Carnation Co., first; A. C. Brown, second.

Collection of miscellaneous cut flowers, 6 varieties, 6 flowers each, Albert T. Hey, first; A. C. Brown, second.

Collection of dahlias, double named, Vaughan's Seed Store, first; Albert T. Hey, second.

Collection of asters, Albert T. Hey, first.

Collection of gladioli, Albert T. Hey, first.

Collection of geraniums, Albert T. Hey, first.

Collection of petunias, double, Albert T. Hey, first.

Collection of verbenas, Albert T. Hey, first.

Collection of tuberoses, Albert T. Hey, first.

Collection of cosmos, Albert T. Hey, first.

Collection of antirrhinum, Albert T. Hey, first; A. C. Brown, second.

Collection of scabiosa, Albert T. Hey, first; A. C. Brown, second.

Collection zinnia, A. C. Brown, first; Albert T. Hey, second.

Collection of Phlox Drummondi, Albert T. Hey, first; A. C. Brown, second.

Collection of phlox, hardy, Albert T. Hey, first.

Basket of cut flowers, Albert T. Hey, first; A. C. Brown, second.

Basket of roses, David Wirth, first; A. C. Brown, second.

Bouquet of roses, A. C. Brown, first.

Bouquet of various flowers, A. C. Brown, first.

Dinner table arrangement, Albert T. Hey, first; Geo. A. Kuhl, second.

Flat bouquet of roses, Geo. A. Kuhl, first; A. C. Brown, second.

Flat bouquet carnations, A. C. Brown, first; Geo. A. Kuhl, second.

Bridal bouquet, Albert T. Hey, first; A. C. Brown, second.

Ivy panel decorated, 30 inches, Geo. A. Kuhl, first; A. C. Brown, second.

Standing cross not over 4 ft., John Bauscher, Jr., first; Albert T. Hey, second.

Corsage bouquet and usual accessories, Albert T. Hey, first; A. C. Brown, second.

Collections of carnations, Mrs. E. H. Turner, Springfield, first.

Collection of tuberoses, Leonard Trainer, Springfield, first.

Collection of gladioli, Leonard Trainer, Springfield, first.

Collection of gaillardias, Mrs. Geo. Kinehan, Springfield, first.

Collection of asters, Mrs. J. S. Kirk, Springfield, first; Mrs. E. R. Jeffery, Springfield, second.

Collection of dahlias, double, Mrs. E. H. Turner, first; Mrs. J. S. Kirk, second.

Collection of dahlias, single, Mrs. E. H. Turner, Springfield, first.

Collection of petunias, double, Mrs. E. Harris, Springfield, first.

Collection of petunias, single, Mrs. E. Harris, first; H. T. Jaussen, second.

Collection of nasturtiums, Georgia E. Gould, Springfield, first; Elsie Staley, Springfield, second.

Collection of dianthus other than carnations, Mrs. Geo. Kinehan, first; Mrs. E. R. Jeffery, second.

Collection of balsams, Mrs. L. M. Moorhead, Springfield, first; Mrs. Geo. Kinehan, second.

Collection of everlastings, Leonard Trainer, first; Mrs. J. S. Kirk, second.

Collection of pansies, Mrs. Geo. Kinehan, first; Mrs. J. S. Stewart, Springfield, second.

Collection of phlox, annual, Mrs Geo. Kinehan, first; Leonard Trainer, second.

Colection of roses, Mrs. E. H. Turner, first.

Collection of zinnias, Mrs. J. S. Kirk, first; Mrs. Geo. Kinehan, second.

Collection of miscellaneous cut flowers, Mrs. E. H. Turner, first.

Collection of correctly named wild flowers, Mrs. J. C. Stewart, first; Leonard Trainer, second.

Colection of correctly named wild grasses, Leonard Trainer, first; Mrs. J. C. Stewart, second.

Collection of correctly named ornamental grasses, Leonard Trainer, first; Mrs. J. C. Stewart, second.

Design for funeral, Mrs. E. B. Brittin, Cantrall, Ill., first; Mrs. E. B. Brittin, Cantrall, Ill., second.

Design for festival, eLonard Trainer, first; Georgia E. Gould, second.

Hand bouquet roses, Mrs. E. H. Turner, first.

Hand bouquet flowers, Mrs. E. H. Turner, first ;Mrs. J. S. Kirk, second.

Vase of various flowers, Mrs. E. H. Turner, first; Mrs. J. S. Kirk, second.

Awards at Missouri State Fair.

The awards in the department of floriculture at the Missouri state fair, October 2, were as follows:

Best collection palms, six varieties, 12 plants: Gelven & Son, first; Chas. A. Pheiffer, second.

Best collection ferns, 15 varieties, 25 plants: Gelven & Son, first; Chas. A. Pheiffer, second.

Best collection orchids, 12 plants: Gelven & Son, first.

Best 12 geraniums in bloom: Chas. A. Pheiffer, first; Gelven & Son, second.

Best 12 carnations in bloom, Gelven & Son, first.

Best 12 plants, five varieties, Rex begonia: Gelven & Son, first; Chas. A. Pheiffer, second.

Best and rarest cacti, 12 varieties, 12 plants: Gelven & Son, first; Chas. A. Pheiffer, second.

Best collection suceulent plants, other than cacti, 15 varieties, 15 plants: Gelven & Son, first.

Fancy leaved caladiums, 10 varieties, 12 plants: Gelven & Son, first; Chas. A. Pheiffer, second.

Best six varieties coleus, 12 plants: Gelven & Son, first; Chas. A. Pheiffer, second.

Best 10 varieties blooming begonias, 15 plants: Gelven & Son, first; Chas. A. Pheiffer, second.

Best five varieties Dracænas, 10 plants: Gelven & Son, first.

Best three varieties ficus, 10 plants: Gelven & Son, first.

Best 12 tropical plants, other than those named in the other collections: Gelven & Son, first.

Best six pandanus, three varieties: Gelven & Son, first.

PLANT SWEEPSTAKES.

Best and largest display of above collection of plants: Gelven & Son, first; Chas. A. Pheiffer, second.

CUT FLOWERS FOR FLORISTS.

Best and most artistic floral design, not over 30 inches in height: Gelven & Son, first.

Best and most artistic floral design, flat not over 18 inches in diameter: Gelven & Son, first.

Best vase Bride roses, 25 to a vase: Gelven & Son, first.

Best vase Bridesmaid roses, 25 to a vase: Gelven & Son, first.

Best vase New Richmond roses, 12 to vase: Gelven & Son, first.

Best vase, 25 pink carnations: Gelven & Son, first.

Best vase, 25 white carnations: Gelven & Son, first.

Best vase, 25 red carnations: Gelven & Son, first.

OUR PASTIMES.

Denver Florists' Bowling League.

At a meeting of the Denver Florists' bowling league, held on the evening of October 5, a committee was appointed consisting of R. S. Mahan, N. A. Benson and J. A. Valentine, and instructed to secure enough more members to make a total of 16, and then to arrange four teams. The committee was also instructed to prepare a schedule. The membership has been completed, and the teams arranged as follows:

Columbines: J. A. Valentine, E. S. Kennedy, G. H. Cooper, C. Espelin.

Violets: C. Mauff, C. Benson, A. M. Lewis, W D. Smith.

Beauties: R. S. Mahan, E. Glauber, F. Fraser, Will Wilmore.

Carnations: N. A. Benson, A. H. Bush, H. Wislander, E. J. Reynolds.

Games will be rolled on alleys 8 to 11, inclusive, on the ground floor at the Brunswick, play beginning at 8:15 each Monday night, beginning with Monday, from October 15 to April 15, excepting the nights of December 24 and 31. Each team should come prepared to select a captain promptly before beginning of play. The entrance fee was fixed by the vote of the meeting on October 5 at $7.50, and it was voted that the full amount should be paid on the opening night. Come early if possible, so as to get your receipt from the secretary, and not delay the beginning of the games.

At St. Louis.

The bowling match between the retailers and the wholesalers resulted as follows:

THE article on "Raising New Roses," which appeared in our last issue, was by G. L. Paul, of England, and was reproduced from the Gardeners' Magazine, to which journal it should have been credited.

THOSE employers who put would-be employes to the trouble of long and expensive journeys with rosy promises that do not materialize are a miserable lot of frauds and some day, soon perhaps, the law will be made to fit their cases. The sooner the better.

THE Society of Southern Florists and Ornamental Horticulturists, with a view of advertising the approaching convention of that organization, proposes to issue monthly and distribute gratuitously 1,000 copies of a trade publication to be called the Southern Florist.

ON the night of October 10 in the central west and presumably many other points, occurred the most severe freeze known to the oldest inhabitant. Nearly all perishable outdoor plants were frozen to the ground. This included cannas, geraniums, dahlias and like stock. Quite a few perishable plants were injured in transit. From newspaper reports the damage to celery and potatoes has been very great.

THE National Council of Horticulture is sending out three seasonable articles to the general press as follows: "Lilies for Fall Planting," "Hardy Dutch Bulbs," and "Poenies." Florists generally should urge their local papers to make application for these excellent articles to Prof. H. C. Irish, Missouri Botanical Garden, St. Louis, Mo. This service is absolutely gratuitous and it promotes business.

Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

The Conard & Jones Co., West Grove, Pa., submit for registration the following:

Rosa rugosa magnifica, (Rugosa x Victor Hugo). Habit, vigorous flowers five inches in diameter, double; color, bright crimson; foliage resembles rugosa.

Canna Meteor. Foliage green; flowers, large, deep crimson, in enormous trusses; height, five feet.

Canna New York. Seedling No. 1549; flower, true orchid form, unusually thick petals; foliage, veined and splashed with bronze; height, six to seven feet.

WM. J. STEWART, Sec'y.

Telegraph Code for Flowers.

Many dollars could be saved the florists if some additional code words were added to the telegraph code. For instance, if 20 American Beauty, 20 to 24-inch stems are wanted, one code word could stand for the last six words and save 10 cents or more by using the code word. We offer the following as an addition to the telegraph code for ordering cut flowers, just as a starter:

FOR AMERICAN BEAUTY ROSES.

For 15 to 18-inch stems, "shorts."
For 18 to 20-inch stems, "bums."
For 20 to 24-inch stems, "butts."
For 24 to 30-inch stems, "dandies."
For 30 to 36-inch stems, "excels."
Extra long stems, "goppers."

FOR VIOLETS.

When single violets are wanted, code word, "singles."
When double violets are wanted, code word, "doubles."

CARNATIONS.

When red carnations are wanted, "cardinals."
When light pink carnations are wanted, "pinks."
When dark pink carnations are wanted, "blushes."
When white carnations are wanted, "whites."

Many other additions could be made to advantage with a saving of time and money. H. G. WALKER.

Chrysanthemum Society of America.

EXAMINING COMMITTEES.

President Duckham has announced the committees to examine seedlings and sports on dates as follows: October 6, 13, 20, 27 and November 3, 10, 17 and 24, 1906. Exhibits to receive attention from the committees must in all cases be prepaid to destination and the entry fee of $2 should be forwarded to the secretary not later than Tuesday of the week preceding examination, or may accompany the blooms. Special attention is called to the rule requiring that sports to receive a certificate must pass three committees.

New York, Eugene Dailledouze, chairman, 55 and 57 West Twenty-sixth street, New York, Thos. W. Head and Wm. Turner.

Philadelphia, Pa., A. B. Cartledge, chairman, 1514 Chestnut street, John Westcott and Wm. K. Harris.

Boston, Mass., E. A. Wood, chairman, Wm. Nicholson and James Wheeler. Ship flowers to Boston Flower Market, care of John Walsh.

Cincinnati, O., R. Witterstaetter, chairman, James Allen and Wm. Jackson. Ship flowers to Jabez Elliott Flower Market, care of janitor.

Chicago, J. S. Wilson, chairman, J. B. Deamud and Geo. Wienhoeber. Ship flowers care of J. B. Deamud, 51 Wabash avenue.

BUSINESS BRISK.

Business maintained a lively gait throughout the past week. Most lines of stock arrived freely. The demand kept good pace with the supply and prices accordingly remained firm. However, there was a noticeable scarcity in several lines of stock, principally carnations, which caused much disgruntled comment among retailers. The cold weather of some days ago froze outdoor carnation plants and ruined the supply from this source, leaving only the indoor stock to supply the demand. Consequently, carnations brought all sorts of figures, ranging from 2 to 4 cents, and in some cases even reaching the 5 cent mark. In view of such circumstances, it is notable that the shipping trade received a larger percentage of this material than usual, many wholesalers being forced to purchase stock from each other to fill their shipping orders. Roses are in good supply and bring normal prices. American Beauty is not over-plentiful but there is enough on hand to fill orders at satisfactory prices. Liberty, Chatenay, Bride and Bridesmaid are of first class quality and sell well. Chrysanthemums, however, hold the center of the stage just at present, the sale of this stock having been phenomenally large. A greater amount of chrysanthemums have poured into the market this season than for several years past, yet there remain many orders each day that cannot be filled. Reports from various sections of the middle east indicate that the stock is quite late in arriving, which, of course, has had a beneficial effect on this market. As a whole, the material is first class, and brings the best of prices. There is a general feeling of satisfaction at the present state of affairs and all are looking forward to a prosperous season.

CLUB MEETING.

The Florists' Club held its regular monthly meeting October 11, with President Hauswirth in the chair. There was an attendance of about 40 and considerable business was transacted. Officers for the ensuing year were nominated as follows: H. N. Bruns, president; Leonard Kill, vice president; Edgar Saunders, treasurer; L. H. Winterson, recording secretary; Henry Klunder, financial secretary; Flower show matters occupied most attention and a banquet, to be held November 8, was decided upon. This will occur the Thursday of show week and a committee consisting of A. I. Simmons, Henry Klunder, and F. F. Benthey were appointed to make arrangements for this affair. Among other things, the resolutions recently adopted on the death of James Hartshorne were read by Geo. Asmus.

NOTES.

The wholesale market is displaying a number of large attractive posters announcing the dance of the Florists' employes at Columbia hall, N. Clark street and North avenue, October 31. The committee in charge of arrangements has placed a number of tickets in the hands of each wholesale establishment where they can be obtained by all those who desire to attend. If one may judge from the enthusiasm so universally taken in this affair, it will surpass anything of the kind ever given by florists in this city.

Bassett & Washburn are doing an exceptionally large chrysanthemum business this season. Two dozen Mme. C. Touset were sold to O. J. Friedman at $5 per dozen one day last week which is probably the high water mark in the the price of chrysanthemums.

F. N. Smith, of Smith & Fetters, Cleveland, O., spent a few days in the city last week purchasing stock. He says chrysanthemums were very late in reaching the Cleveland wholesale market and retailers are forced to send their orders to this city.

Gus Fredricson, of St. Joseph, Mich., spent a few days in the city last week. The cold weather of a week ago, he says, brought the heaviest frost Michigan has ever known for that time of year, doing much damage to outdoor crops of all kinds.

Frank Hayes, vice-president and treasurer of the H. M. Hooker Co., well known in the trade as dealers in paints and glass, died in Limerick, Me., whither he went three weeks ago to visit friends, accompanied by his wife. Mr. Hayes was 62 years old.

The chrysanthemum season thus far has proven eminently satisfactory to all Chicago wholesalers who are handling this stock. It is said that it has been years since chrysanthemums sold as rapidly and brought such excellent prices as at present.

Peter Reinberg is daily receiving a fine lot of long-stemmed Marshall Field roses. "Once bought, always bought," seems to be the appropriate slogan, as the orders of their customers are growing larger every day.

J. Simpson, 1588 Ogden avenue, is remodeling his entire establishment, putting in a window of electric lights and adding a greenhouse to the rear of the store, in addition to many minor improvements.

S. M. Raisek, 442 W. Twelfth street, is erecting a two-story building, the lower floor of which he will use for a first class retail store. He intends to add a greenhouse when the building is completed.

John Risch and most of those retailers who handle roses in large quantity, say Killarney, when of good quality is more popular than ever.

The E. F. Winterson Co. is handling a very fine crop of W. N. Rudd's pink chrysanthemum, the Rosiere.

The John Zech is a mild beverage popular in the wholesale market district.

On the Chicago Market.

A tall, well dressed young lady entered the store of the E. F. Winterson Co. one day last week, and indicating with a shake of her head a stock of W. N. Rudd's pink chrysanthemums, said: "Give me a dollar's worth of those chrysanthemums, please."

Ed. Winterson eyed her doubtfully while she fidgeted with her pocketbook.

"Are you in the trade, madame?"

"O my, yes," elevating her eyebrows, "I am Mrs. Wm. Pfund of Oak Park."

"O, beg pardon," said Ed. "Just a minute, madame."

Turning around he espied old Nic Armbrust, also of Oak Park. "Here, Nic, this is Mrs. Pfund of Oak Park, isn't it?" with an apologetic nod to the lady.

"O my heavens, no!" gasped poor Nic, "You're not Mrs. Pfund—I cannot tell a lie, lady—I—"

But she had fled.

DEMAND INCREASING.

The situation is improving. The fall weddings are causing quite a demand and in addition the debutantes' teas have commenced and from the published lists in the social columns of the newspapers the prospects for a big demand for these important occasions is promising. American Beauty roses are more plentiful, as are other roses. There is also quite a noticeable improvement in quality all along the line, but not much advance in price, as the chrysanthemums are beginning to be a factor. Some good flowers are seen and on account of their novelty they are often preferred to other high class flowers. Carnations are scarce, more so than at any time for several years past at this season. There are not so many planted for this market as last season and in many places they do not appear to have moved well from the field. Jack Frost has been a big factor the past week and all outside stock is done for. All this should help the chrysanthemums, which we predict will sell up clean.

Autumn leaves are now beautiful and add much to the appearance of the store decorations. Wild smilax has been tabooed in some quarters, particularly in department stores, by fire underwriters, who claim that when dry it is very inflammable. This embargo should be removed at once, as there is absolutely no danger from this form of decoration, at least much less than from the bunting and other light cotton goods that are constantly used for decoration and display in all the large stores. At one time the John Wanamaker Co., of this city, used about 1,000 pampas plumes for one display, which was almost like inviting disaster, but they fortunately escaped. There is absolutely nothing to take the place of southern smilax of like nature that would be free from this objection.

NOTES.

The Leo Niessen Co. has been handling some very choice Polly Rose and Glory of Pacific chrysanthemums the past week, also fine yellow. Myers, who sent the largest part of his cut of American Beauty roses to this company last season, said that previous to that time they had always sold direct to the consumer or retail dealer, but since his experience with this company he would never go back to the old plan, as his returns were so very much better now than before and he would confine himself to the growing hereafter and let the Niessen Co. do the selling.

They have lively times at the S. S. Pennock-Meehan Co.'s these mornings, its four trunk lines of the Keystone telephone controlling eight phones being all reported busy to one caller several times on Saturday last. Some of the first double violets are seen here, very nice flowers for the first. One dollar per 100 is the price.

Pot chrysanthemums are now coming in, hardly ready yet, just showing color, but are wanted for planting out and window boxes. James Cole, of Fifty-fifth and Walnut streets, has his usual fine lot, many of them already sold, in fact being grown to order. J. W. Colflesh also has a fine lot.

Postal card advice from Switzerland informs us that Godfrey Aschmann was due to arrive at New York October 15 on the S. S. Amsterdam, returning from Europe. K.

Boston.

TRADE BRISK.

A tremendous demand for funeral work of all kinds has been the means of keeping the retailers exceedingly busy and consuming the short supply of flowers on the market leaving ample room for the disposal of much more stock were it procurable. Beside this branch of trade the usual number of October weddings have also utilized great amounts of stock. The market is seriously affected as a result of the extremely hot weather during August and September and every class of stock is inferior to the quality usually displayed during the fall season. Chrysanthemums are now just beginning to be seen, two weeks later than usual. From appearances now at hand it is thought that the supply from local growers will be very short. The carnation market is in a deplorable state; the quantity being cut is in no wise adequate to meet the large demands which are constantly increasing. First class carnations have yet to appear. Everything, regardless of quality, sells at good prices as there is no variety of cheaper filling-in stock. Fair Maid and Enchantress lead in quantities with a very limited supply of white, crimson and deep pink. Almost every variety of rose is now being cut by one grower or another. There is a good supply of American Beauty coming in, principally of medium and small grades. The very long-stemmed roses are scarce but their scarcity is not apparent, owning to the fine quality of the stock at hand. Single violets are abundant and very cheap, while double are scarcely seen.

NOTES.

Among the fancy roses displayed none is more attractive than W. H. Elliott's Richmond. He is cutting this variety in large quantities and has succeeded beyond expectation in putting on the market the best blooms of this variety yet seen here. This establishment is also sending to market the first chrysanthemum plants which are very good.

Thos. Roland, of Nahant, is in the first rank of chrysanthemum growers and is cutting some excellent white, yellow and pink. They exceed in quality anything in this line seen on the market so far this season.

The old Honigan estate at Sharon is now very much in evidence with its supply of famous yellow marguerites. This year the season has begun earlier than is usual and the flowers show the results of expert attention.

The genial manager of the Park Street Market, Joseph J. Tree, is receiving the congratulations of his many acquaintances upon the arrival of a young son in his home October 6.

Henry Collins, who last winter attended to the buying for Houghton & Clark, has returned from his summer position, resuming his former place. B.

Pittsburg.

SCARCITY OF STOCK.

The heavy frosts of late together with the first snow of the season killed all outdoor stock. This would have been welcomed had chrysanthemums been a little earlier; as it was it almost left the market bare and store men had great difficulty in filling orders. The chrysanthemum season is now well on as nearly all local people are cutting. Roses are more plentiful and of good quality. American Beauty is very plentiful and quality very fine. Carnations are becoming stronger every day. The scarcity of these is felt more than all other flowers combined. All green stock is quite plentiful.

NOTES.

It has come out that the controlling stock of the Chas. T. Siebert Co. is held by Randolph & McClements; as these two stores are the only ones in the east end the merger should be a good one.

The Pittsburg Cut Flower Co. is receiving a nice cut of Bergman chrysanthemums from the Pittsburg Rose & Carnation Co.

F. H. Westhoff, of De Haven, is sending the Florists' Exchange some good Monrovia.

P. J. Demas is spending a week in Philadelphia.

Visitors: John Meyers, of Meyers Bros., Altoona, Pa.; Paul Berkowitz, of Bayersdorfer & Co., Philadelphia, Pa. J.

WAPPINGERS FALLS, N. Y.—The flowers at the show here were very poor, owing to the very dry weather. The Burbank and Santa Rosa and Estrella marigolds were fair, but not at their best.

LITTLE OUTDOOR STOCK ARRIVING.

The market has undergone a marked change in conditions since last midweek. The cold weather and frosts experienced played havoc with late outside stock, consequently dahlias and other tender flowers have disappeared. Cosmos, which is usually very plentiful at this time, has suffered to such an extent that very little is arriving. Semiprotected chrysanthemums have suffered somewhat. In other lines the weather has had a contrary effect. Roses are much better in quality, and in quantity have increased so much that prices have very materially declined, and cleaning up is far from easy, particularly in the lower grades. Many growers, who two weeks ago made shipments quite small for the size of their establishments have doubled, and in some cases more than trebled their shipments, and this condition meets a demand which is not at all proportionate. The street merchant is an appreciated factor just now, and stands between legitimate business and the ash barrel. American Beauty in the higher grades in very plentiful and selected stock hardly goes above the maximum of quotations. Bridesmaid roses are over plentiful, and although the special and fancy grades sell pretty well, short stemmed stock is in over supply, and much of it can only be moved at sacrifice prices. Bride roses are in somewhat better supply than they have been, but the improvement is largely confined to the higher grades. Short stemmed stock is still quite scarce, and wholesalers use their holdings to force the trade in the more plentiful pink variety. Killarney and Chatenay are strong favorites among the most prominent retailers, and clean up quickly. Carnations are fairly steady, and in supply are on the short side. They continue to improve in quality and some really fine stock is available. White sorts are perhaps scarcer than others. Violets are coming in fairly well, and doing as well as they did last year at this time. Single violets are to be had but are rather small. Lilies are scarce, and come from few sources, consequently prices are rather high. Lily of the valley is not over plentiful and moves easily. Chrysanthemums are a feature of the market just now, and bring fair prices, but an avalanche of them is in sight and they are likely to become a troublesome problem any day. The early varieties, Monrovia, Polly Rose, Glory of Pacific and Omega are still about all the varieties available, the yellows being most limited in supply. Outside protected crops are beginning to arrive, and there is plenty of short stemmed flowers to be had. Indoor grown sweet peas are to be seen in a few places, and some fine pansies figure among off season commodities.

The Market, October 17.—The market today as regards prices is moving rapidly downward. The lower grades of roses are in oversupply and sacrificed.

THE HORTICULTURAL SOCIETY.

The opening meeting for the winter session of the Horticultural Society was held October 10 in the museum building of the New York Botanical Garden. The business of the meeting was of a routine character, but before adjournment it was decided to hold the proposed conference on hardiness in December, 1907. In connection with the meeting was an exhibition of hardy flowers, and vegetables. There were no classes in the schedule governing exhibits, and awards were made on the merits of the individual exhibits.

The exhibits of dahlias were very fine, although not as extensive as would have been the case had the weather been milder. The number of new varieties shown was rather remarkable, and in this respect the recent exhibition at the American Institute was eclipsed. F. R. Pierson Co., of Tarrytown, N. Y., was awarded a special prize for a collection of dahlias, which included many of the newer sorts; and they also exhibited vases of Anemone alba, A. rosa and A. elegans. The silver medal of the society was awarded to T. A. Havemeyer, of Hempstead, L. I., for his collection of new cactus dahlias. One of the most attractive specimens in this collection was Edward Drury, a medium sized flower with outer petals of canary yellow and inner petals of solid white. Capt. Aaron Ward, of Roslyn, L. I., was awarded a bronze medal for his fine collection of outdood hybrid tea roses.

There was a fine exhibit of Lilium Philippensis by R. J. Farquhar & Co., Boston, Mass. The plants were grown from bulbs planted in the open ground, and demonstrated the value of the variety as a late flowering lily, blooming when prices for cut flowers usually rule high. The exhibit was awarded a silver medal. E. D. Adams, of Seabright, N. J., gained a special prize for a fine collection of show and cactus dahlias.

J. M. Thorburn & Co., of New York, were awarded a bronze medal for a very fine collection of vegetables, and Martin L. Bell, of Sparkill, N. Y., was awarded special prizes for his collections of onions, peppers, egg plants, squashes, pumpkins, gourds, corn, and other vegetables.

The next meeting of the Horticultural Society of New York will be held at the American Institute, 19-21 West Forty-fourth street, November 14. The lecturer for the evening will be Leonard Barron, and his subject "Lawns."

NOTES.

Robert G. Wilson, the Brooklyn florist, had a rather unique display in one of his large windows recently. It was a miniature wedding decoration consisting of small kentias, bordered steps of white satin ribbon, the ribbon continuing to a ceremonial group of larger kentias enlivened with carnations; an arch of sweet peas made an entrance and gates were made of pink orchid tassels with Asparagus plumosus interwining. Standards of asparagus with small bunches of sweet peas marked the guest rows.

Patrick J. Donohoe, head gardener and landscape architect for Morris K. Jesup, of Lenox, Mass., who died at Lenox October 1, was very prominent in horticultural circles, and much of his work will serve as a lasting monument to his ability in his inherited and chosen profession. His association with the Jesup estates was of 16 years' standing. He was an uncle of Wm. H. Donohoe, the Twenty-ninth street and Fifth avenue florist, who attended the funeral at Lenox.

James B. Kidd, formerly with the Hinode Florist Co., but now with Wm. Elliott & Sons., is receiving the sympathy of his many friends in the trade on account of the death of his daughter, Belle, in California. The deceased was 27 years of age, and her death was attributed to the exposure and shock incident to her experiences during the recent earthquake and fire in San Francisco, where she was residing.

J. M. Hodgson furnished the greater part of the decorations at the Sands-Blight wedding at Newport last Thursday, one of the largest of the season. Palms, cosmos, asparagus and white roses were used for the chancel decorations at the church. The bride's bouquet was of Kaiserin Augusta Victoria roses, and jessamine, Carnot and Chatenay roses were used for the bridesmaids' bouquets.

Ford Bros. have built an auxiliary office at the front of their Twenty-eighth street store which is proving a great convenience. The store front was painted this week, and everything looks spick and span for the season just opened. The store front of Edward C. Horan is also looking bright after repainting.

R. C. Pye, of Nyack, has returned from a three months' trip to England. His greenhouses appear to have been well cared for in his absence, judging from the fine quality of Bride and Bridesmaid roses he is sending into Moore, Hentz & Nash.

Andrew Wilson, of Summit, N. J., the plant oil man, is an active member of the fire department of Summit. He runs with the chemical engine and his big official badge bears the number "23." He skiddooed on three alarms last week.

The windows of prominent florists, which for some weeks have been set almost exclusively with ferns and other plants, are now enlivened with vases of chrysanthemums, and orchids.

A. C. Zvolanek, Boundbrook, N. J., is among the new comers at the N. Y. Cut Flower Exchange, where he has rented a stand. He is bringing in some fine Omega chrysanthemums.

Walter F. Sheridan has installed a telephone exchange in his store, which has necessitated a change in his call number; 3532 and 3533 Madison square now locate him.

Thos. Young has secured the spacious floor above his main quarters, 41 West Twenty-eighth street, to which his wholesale cut flower business will be transferred.

Siebrecht & Son expect to occupy their new store, adjoining their old store at Thirty-seventh street and Fifth avenue.

Herman Dreyer of Woodside, L. I., has been spending a few days shooting in Sullivan county.

Philip F. Kessler is about building a substantial office in his quarters in the Coogan building.

G. F. Neipp, late of Aqueduct, is operating his new establishment at Chatham, N. J.

Perkins & Schumann are occupying their new quarters in the Schumann building.

The Seed Trade.

American Seed Trade Association.
H. W. Wood, Richmond, Va., Pres.; C. S. Burge, Toledo, O., First Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas. Twenty-fifth annual convention at New York, 1907

NITRATE OF SODA has recently advanced about $4 per ton.

VISITED CHICAGO:—Chas. N. Page, of the Iowa Seed Co., Des Moines, Ia.

MINNEAPOLIS, MINN.—Jesse E. Northrup's health continues to improve slowly.

IT is reported that a big Chicago mail order house will discontinue its seed department.

SOME of the novelties offered by Watkins & Simpson are described elsewhere in this issue.

SEEDS to the value of $1,249,371 were imported at Leith, port of Edinburgh, Scot., during 1905.

COLDWATER, N. Y.—The Joseph Harris Co. is building a large addition to its seed storehouse.

BOUQUET GREEN has not been picked to any extent yet, though at present the weather is very fine for the work.

SOME Connecticut onion growers report that they will deliver about 60 per cent on their onion seed contracts.

MILFORD, CONN.—The corn crop is curing up splendidly, but as before reported the acreage is remarkably light.

HOLLY districts in Tennessee which have provided good stock in former years report a full crop of berries this season.

NORTHRUP, KING & Co. are advertising wild rice in an attractive booklet, the cover of which is reproduced herewith.

SOME important seed crop reports were held over last week owing to the pressure on the space of this department.

THE United States Department of Agriculture has recently issued an illustrated bulletin of 48 pages on a new type of red clover.

HOLLY reports from Delaware and Maryland districts indicate light supply and that packers will look to Virginia for much of their shipments.

LOS ANGELES, CAL.—Johnson & Musser are making considerable improvement in their store, building a deck and in general changing things around.

JOHN MICHIE, for some time chief assistant in the seed department of Sears, Roebuck & Co., Chicago, is now with the S. M. Isbell Co., Jackson, Mich.

5,400 ACRES OF GARDEN SEEDS IN CULTIVATION.
Braslan Seed Growers Co.
WHOLESALE SEED GROWERS.
SAN JOSE, CALIFORNIA.

RECENT appraisers' decisions show that plants for public institutions are exempt from duty and that pumpkin and asparagus seeds are not admissible as drugs.

A NUMBER of peddlers and farmers were recently arrested at Chicago for using short weight measures in disposing of fruits and vegetables. It is evident that the "honest farmer" is being corrupted.

SEDALIA, Mo.—Archias' Seed Store won first premium for its display of seeds at the state fair. This is the fifth year that the firm has held this honor. Its exhibit was one of the finest ever made of its kind.

F. W. WILSON, formerly of the Cleveland Landscape Co., and at one time employed in Philadelphia, and the first part of 1906 located at Scranton, Pa., under name of the Reliable Seed Co., is reported to have disappeared from that point, leaving many unpaid bills.

Cover of Advertising Booklet.

A RECENT decree of the republic of Ecuador provides for the free importation of seeds and plants for 10 years, but should such seeds and plants be offered for consumption otherwise than for planting they shall be considered contraband.

NEW YORK, October 15.—The steamer Peninsula, which arrived Sunday, brought part of the cargo of the wrecked steamer Brooklyn, which carried when she left Marsailles, France, about August 1, about 1,000 cases of French bulbs. The consignees are not yet aware of the condition of the stock.

ONE of the largest clover seed shipments recorded this season was made last week from Hiawatha, Kans., by John Sterns. It contained 600 bushels and brought Mr. Sterns $3700. He bought the seed from farmers paying them from $5.75 to $6.00 per bushel for it.—K. C.

Burrell Claims the Melons Are Different.

ED. AMERICAN FLORIST:—

Referring to the claim of Vaughan's Seed Store that the Burrell Gem musk melon is that firm's Osage Gem renamed, I wish to say this is absolutely without foundation. The netting on Vaughan's Osage Gem as illustrated in that firm's 1900 catalogue is not closely laced and consists of small growths varying from a speck to a strip about one-half inch in length, each growth being separate from the other. The interstices between the growths are wide, averaging wider than the growths of netting so that from one suture to another, not over 40 per cent of the space is covered with netting. The netting on the Burrell Gem is very closely laced and inter-laced; from where the netting starts at one suture to where it ends at another there are absolutely no breaks. The interstices between lacing are very small so that fully 90 per cent of the space between the sutures is covered with netting. The sutures of the Burrell Gem are wider than those of Vaughan's Osage Gem. The Burrell Gem is more oblong than Vaughan's Osage Gem. Next week I will furnish you with illustrations of both of these melons, and will also give some of the records which my melon has made on the market.

It is unfortunate that Vaughan's Seed Store should have a melon of such merit introduced to the public seven years ago and that some of his customers have not been able to place it on the market so as to make a record, but the concern is rather hasty in claiming the Burrell Gem is their melon re-named.

If you are interested in these melons it will be to your advantage to watch the next issue of THE AMERICAN FLORIST.

D. V. BURRELL.

[We would suggest that Mr. Burrell give the parentage of his melon so that the apparent similarity can be rightfully explained if the origin is different. —ED.]

The Question of Discounts.

AN OPEN LETTER TO SEEDSMEN.

In looking over the various catalogues for inspirations, etc., I find that you make quite an item of premiums, discounts, etc. Do you not think it is about time that seedsmen awakened to the fact that we are giving away altogether too much to people that purchase, as most of them do, once a year? Are you aware of the fact that all your expenses such as wages, printing, paper, bags, rent, in fact everything else is from 25 to 50 per cent higher than it was five years ago, and that we do not get any more for our goods than we did then? What is this going to lead to? Had we not better do some figuring and realize conditions as they are?

We have been thinking of omitting discounts entirely, but on looking over the catalogues of the various seedsmen we find that we would be practically alone in this undertaking. While we do not think that a discount brings us much more business, we would dislike taking the risk of discontinuing them practically single-handed.

We would like to have your views on this subject. SEEDSMAN.

The Seed Crops.

CAMBRIDGE, N. Y., OCTOBER 3.

The crop of beans of nearly all the garden varieties is turning out very well and it looks now as though there would be beans enough to go around on most sorts. At the same time we do not count on any surplus.

On sweet corn of all varieties the acreage planted this year has been limited, but the product of the acreage that was planted, while not an extra large crop, is going to be of good quality, will be well cured out and ripened up and will make good seed. There will probably be enough sweet corn to fill the bill, but like beans there will not be a surplus.

As regards peas, none of the growers as yet have made estimates as to what will be delivered on contract orders and therefore it is impossible at this time to say regarding the delivery that will be made by the growers of peas on contract. The crop is now coming in from the farmer. A little later on the grower will be able to give information regarding the deliveries. But one thing we think we can safely say and that is that there will not be a surplus on any variety this year.

Shortages in onion seed seem to be quite apparent, especially in the yellow sorts and in some varieties of white onions. The crops of cucumbers and musk melons are also going to be on the short side and market values are advancing. On the whole the season seems to be an active one and there will be a large demand for seeds of all kinds and at fair prices for the spring of 1907.

FREMONT, NEB., OCTOBER 5.

The cucumber crop is going to be below the average yield, varying, according to the sections of the country and the varieties of cucumber being grown, from 25 per cent to 50 per cent of an average crop, while in a few cases, the crops will run a little better than 50 per cent of an average crop, and in others, there will be nearly total failures. We hardly think, however, that the general crop will average more than 100 to 150 pounds per acre.

The musk melon and watermelon crops also show considerable variation according to the different sections of the country in which they are grown, and while we expect to have a limited surplus of a few varieties, we are going to be short in our deliveries for quite a number of the standard varieties.

The pumpkin and squash crops are generally looking better than the cucumbers and melons, but they also in a number of cases have not set fruit as thickly as the conditions of the vines would seem to warrant.

Squash crops seem to have made a rank growth of vines and look healthy and strong, but for some reason the squashes were very thin on the ground.

The sweet and field corn crops are at present the best we have had for several years, and are practically free from worm eaten and rotten ears, and in most cases are entirely out of the way of danger from frosts. The acreage, however, of sweet corn is considerably smaller than it has been for several years, so that we do not look for any large surplus stocks, especially in the earlier varieties.

MARBLEHEAD, MASS., OCTOBER 10.

Sweet corn has done exceptionally well, both ear and kernel, having grown to abnormal size. The long, warm, dry fall has favored its ripening. Cucumber here has never been blighted so badly nor so universally. Fortunate are those who have carried over a sufficient supply from last season's crops.

As a general rule the squash crop has been a good one. The onion seed crop promised exceptionally well early in the season but just before maturing some pieces disappointed their owners. Many varieties of beans rusted badly; among them the Refugee wax and Valentine were marked exceptions being affected by neither rust nor rot.

There is some potato rot, but less than in average seasons. Early Noroton, maturing before the dog days, were nearly free, while the famous Scotch seedling, Eldorado (which three years ago sold in England at about $1,000 a pound) and the violet-colored French variety (which is claimed to be a seedling of Solanum Commersonii) maintained its reputation established last season at the experiment station of one of our agricultural colleges as being just about rot proof, there being but a single rotten tuber in each crop.

The crop of carrot seed in this vicinity is almost a total failure. The growers would have to receive several dollars per pound to even recover their investment. Nevertheless the price will probably be about as usual at the dictation of the general market.

SAN FRANCISCO, CAL., OCTOBER 5.

Crops of onion seed have turned out worse than we expected. While not so badly injured by mildew, the hot weather of about six weeks ago blighted a great deal of seed. It has been figured out that growers will be able to deliver on contracts as follows: red varieties, from 80 to 100 per cent; white varieties, from 40 to 90 per cent; yellow varieties, about 30 per cent. All the growers lost money on onion seed, as the yield varies from 50 to 200 pounds to the acre.

Carrot crops have turned out better, and contracts will be filled in full, and there will be some surplus. Sweet peas were badly damaged; the crop will not be over 50 per cent, and some varieties are almost total failures. Lettuce is a good crop, and the celery crop is also good, and full deliveries will be made in both. There will be a surplus of the

early varieties in garden peas. There is also a large crop of onion bulbs for the coming season, of all the leading varieties, so that an increased acreage will be planted.

SAN FRANCISCO, CAL., OCTOBER 8.

Crops are practically all harvested but will take some three weeks yet to finish cleaning. The onion seed crop proves to be one of the poorest ever harvested. Other things, however, are fairly good.

WATERLOO, NEB., OCTOBER 3.

Sweet Corn: Good crop, but acreage less than usual.

Cucumber: Spotted. Some good crops and many poor ones. We are short on some kinds and long on a few.

Musk melon: Light crop. Are short on most kinds.

Water melon: Small acreage as most of the trade on this item has gone south. Probably enough for orders.

Squash and pumpkin: A fair crop on the whole though some kinds are short.

WATERLOO, NEB., OCTOBER 9.

Corn is in splendid condition, being free from worms and thoroughly cured. Cucumber turns out better than was expected; there will probably be half a crop. Musk melon seeds are in very good condition; there will be about half a crop. Watermelon will yield a fair crop. Squashes are promising a normal crop. Onion sets are being shipped to buyers. Everything is sold but a few hundred bushels of whites.

Solanum Commersoni.

The potato illustrated on this page is a sample of one of the varieties of Solanum Commersoni, the Urugayan potato to which reference has been made on various occasions in these columns. European growers are making strong efforts to improve its quality, as it is said to be disease proof and does well in the soils and locations which are usually considered unfit for Irish potatoes. Hasslach & Roumanille are exploiting it and this is one of the illustrations they use. The potato may be all right but it does not look it in the picture.

Grass and Clover Seed in Europe.

L. C. Nungesser, of Darmstadt, Germany, has issued the following report on grass and clover seeds, dated September 5, 1906:

The European crop of all grasses can be defined as satisfactory, so that prices are not higher, taken all round, than last year. American crops, however, are stated to have turned out less favorably, excepting orchard grass cocksfoot, which was cropped in good condition. Australia yields also a medium crop of the latter.

Agrostis stolonifera (German creeping bent grass) is a good crop of apparently good quality, prices ranging as last year. The accounts from America generally are not as favorable as for years and the prices quoted as yet are fairly high.

Aira cæspitosa (tufted hair grass) and Aira flexuosa (knotted hair grass) yield good medium crops, prices accordingly.

Avena elatior (tall meadow oat grass) also came in well, prices remaining the same.

Anthoxanthum odoratum (true sweet vernal) yields only a short crop, prices being higher than last season's whereas Puelli (annual sweet vernal) yielded well and is very cheap.

Avena flavescens (true golden oat grass) cannot yet be truly estimated.

Alopecurus pratensis (meadow foxtail). This crop has not come up to expectations and prices are exceptionally high, such as only a very short crop would warrant. Time will show whether prices can be maintained, the probability being disputed in many quarters.

Bromus inermis (awnless brome grass) and Bromus pratensis (meadow brome) also crop well and are moderate-priced.

Ceratochloa australis (Schrader's brome grass, a prairie grass) is reported to have a small crop.

Cynosurus cristatus (crested dog's-tail) is stated to have yielded well as is evidenced by the fine qualities

Solanum Commersoni.

A tuber of one of the forms which have been recently developed.

hitherto offered and it is to be assumed that this first-class grass will be more extensively sown.

Dactylis glomerata (orchard grass). As already stated America has a good crop and is in a position, for the first time for years, to export. Only a small percentage however is fit for export to Europe as the qualities generally are not sufficiently clean although the color is bright. New Zealand seed on the contrary is perfect in respect of color and purity, but the percentage of germination is somewhat below that of former years. The European crop cannot compete with the above, being too insignificant in quantity and quality.

Festuca ovina (sheep's fescue) and Festuca duriuscula (hard fescue) are lighter in crop than last year, still there will be sufficient for the demand. Qualities in many cases do not tempt and are mixed with trefoil, etc., so that first-class stock will at least command the same values as last season.

Festuca ovina angustifolia (small-leaved fescue) is a fairly satisfactory crop, but not free from other seeds, so that well cleaned qualities will not be much cheaper than last year.

Festuca rubra (red fescue) and Festuca heterophylla (various-leaved fescue) are rare and rather dear.

Festuca pratensis (meadow fescue) is stated to have yielded poorly in America and high prices are asked. As considerable stock is left over from last year, buyers will do well to be cautious.

The crop of Festuca elatior (arundinacea, a tall fescue), that excellent grass so much in demand, is reported to be plentiful and good. Prices will doubtless range lower than last season. Up to date no sales have been registered.

Holcus lanatus (wooly soft grass) is a good crop.

Poa pratensis (smooth stalked meadow grass) is a very poor crop as far as can be gathered from the reports to date and quotations are unusually high. It remains to be seen whether buyers will not hold back in the face of such high prices, especially as the seed is one pound per bushel lighter than in 1905.

Poa nemoralis (wood meadow grass) has only a medium crop of not tempting quality. First-class samples will hardly come cheaper than last year in consequence of the loss in cleaning and dressing.

Poa trivialis (rough-stalked meadow grass) has become so necessary for certain soils that it has maintained its price easily for years and it is not likely that values will vary much this year in spite of the reported good yield.

Phleum pratense (timothy) is stated to be a short crop and opening prices are much higher than usual in former years. It remains to be seen whether they can be kept up.

Phalaris arundinacea (reed Canary grass) is a small crop.

It is too early to report definitely concerning clovers generally, particularly is this the case with red clover and Alsike. The prospects in Europe are excellent for all sorts.

Bad accounts have just come to hand concerning the results of the crops of Medicago sativa (Alfalfa). The yield is said to have turned out very poorly, so that at the best the same prices as last year may be expected.

Crops up to date, such as Medicago lupulina (yellow trefoil) which yields well in choice quality, Hedysarum Onobrychis (simple sainfoin) which is far behind last year's quality and short in crop, and Trifolium repens (white clover), yielding a full crop of prime quality, will not be offered in bulk for some weeks.

Trifolium incarnatum (crimson clover) also yields well, but prices do not coincide being fairly high and I am of the opinion that more favorable quotations will rule during the winter.

Lotus villosus (greater birdsfoot trefoil) and Lotus corniculatus (common birdsfoot trefoil) yield about the same as last year and prices are expected to range equally favorable.

Rye grasses yield satisfactorily and qualities are choice.

Near to Nature's Heart.

A $75,000 automobile rolled through the $60,000 bronze gates and up the $35,000 winding avenue to the $20,000 marble steps.

Descending from the machine, the billionaire paused a moment to view the smiling $500,000 landscape.

Across the $90,000 lawn a $125,000 silver lake lay sleeping in the shades of early summer evening, and beyond it rose a lordly $80,000 hill, whose crest, cloaked with forest at an expense of $200,000, glowed in the last rays of the setting sun.

The billionaire sank luxuriously into a $2,000 ivory porch chair and rested his feet on the rosewood railing of the $160,000 veranda.

"It is pleasant," he observed, "to get back to nature once in a while. After the cares and worries of the business day I certainly love to run out to this quiet little $60,000,000 country club of ours and taste a bit of simple life. It is good to keep in touch with the soil; for what is man but dust, after all?"

Feeling restored, he passed in through the $400,000 doorway to his $1,500 dinner.—Newark News.

NEW YELLOW CALLA

(Richardia)

"MRS. ROOSEVELT."

Awarded a silver medal by the Massachusetts Horticultural Society, 19 2.

Awarded a silver medal by the Society of American Florists, Boston, 1903.

DESCRIPTION—Flowers, light clear yellow, produced very freely on long stems. Foliage, deep rich green, distinctly and freely blotched with white, making the plant very effective for banking and other forms of decorations, and more distinct and showy than Fancy Caladiums for many purposes. It does particlarly well planted outside, grows strong and flowers freely. Probably the best calla for this purpose extant. It is fine novnovelty for catalogue trade.

PRICES—1000 bulbs, $80.00; 100 bulbs, $10.00; 1 dozen bulbs, $2.00. 250 at 1000 rates; 25 at 100 rates. Electros, $1.00. We supply an electro free of charge with every order for 250 bulbs.

Bulbs ready for delivery about December 1.

THE AMERICAN FLORIST.

The Nursery Trade

American Association of Nurserymen.
Orlando Harrison, Berlin, Md., President; J. W Hill, Des Moines, Ia., Vice-President; George C. Seager, Rochester, N. Y., Sec'y.
Thirty-second annual convention, Detroit, Mich., June, 1907.

THE American Civic Association opens its annual convention at Milwaukee with an elaborate programme October 24, continuing three days.
ED ?

THE fifth annual convention of the National Nut Growers' Association opens at Scranton, Miss., October 31 and continues through November 1 and 2.

HILLSBORO, ORE.—One of the largest realty deals ever made in Washington county was closed recently when the Oregon Nursery Co., for years doing business in Salem, paid out over $90,000 for farm and orchard lands three miles east of this city, involving over 900 acres of choice prairie, and all cleared.

The Coniferae.

Paper read by Geo. Vair, of the Education department grounds, Toronto, at the annual convention of the Canadian Horticultural Association at Guelph, August 29-30, 1906.

The subject before the meeting this afternoon is evergreens, or in other words, coniferæ, their utility and usefulness from a florist's standpoint. It will be very generally admitted by all present that the landscape, whether of a limited or extended form, is not complete, at least to my mind, unless said landscape is well interspersed with plenty of evergreen foliage. The expert landscape gardener is fully alive to this great essential. When laying out grounds of even a very limited extent, he has to have an eye to the placing and planting to produce the best shading effect, with the material he has to use.

The present day florist has to study this point when called upon to decorate halls, churches, drawing rooms, corridors or staircases. Considerable taste may be displayed in the grouping or banking of plants, as they are generally called at our exhibitions, in order to produce the very best shading effect with such material as he can procure.

I now come to the different species of plants which are familiar to all and which form the base line of all decorations. Palms of different varieties are, of course, essential and cannot well be dispensed with, but no matter how well disposed of, and however thrifty and well grown, they alone to my mind do not produce shade enough to make complete the artistic effect that might be produced if the many shades of green were more carefully considered. Such decorations are simply landscape gardening on a much reduced scale. The introduction of coniferæ in such grouping would, to my mind, produce very satisfactory results. I feel glad that the hard working committee of this association has, in its wisdom, allowed this matter of coniferæ to be one of the subjects taken up by this convention. Notwithstanding the truism, that we have in Canada a rather severe and erratic climate, there are many coniferæ, or evergreens, that might be used with very satisfactory results by those florists who are called upon, sometimes quite frequently, to build up such decorations, to meet the demands of the aestheticism that is fast growing among our people, more particularly the wealthy, as might be expected.

I will here enumerate, Mr. Chairman, a few of the varieties which the florist might use to considerable advantage, when called upon to perform such work. They are not costly, which of course is a great consideration to the hard working and struggling florist, they require but ordinary care, a low temperature, in fact a fuel saving plant, and can be moved with impunity in winter months. The stock can be kept up at comparatively small cost to replace those that are disposed of in the ordinary business way. The varieties here enumerated, are:

(1) Araucaria—Excelsa Cookii and Bidwillii, the latter, as most of you know, is of a very dark green shade, most effective when mixed with lighter shades of fern particularly.

(2) Taxus baccata—Fastigata and Canadensis aurea, each of these very neat in their habit.

(3) Cupressus—Pisifera aurea and obtusa aurea, both of which show up well.

(4) Cryptomeria Japonica, a well known species from Japan, and of a most graceful habit.

(5) Cupressus — Lawsoniana lutea, also Lawsoniana nana, the former dark shining primae, silvery underneath; almost indispensable.

(6) Cupressus—Pisifera filifera aurea; very delicate.

(7) Thuya — Dolobrata, dense in habit and fine shade of green.

The florist can make his own selection of any of those here enumerated as will best fill his own requirements. Flowers, or possibly I ought to say bloom, is indispensable for such decorations. But the arranging of the shades of green are also important for effect, and never should be forgotten. I am well satisfied the florist who but takes up this question and acts upon it, will have no cause in the future to regret it. A small house with abundance of light, and a mere modicum of heating surface, are all that would be required to tide over very severe weather, and besides, he can go in at any time and make his selection for the immediate requirements of the day.

The coniferæ, however, are not without their enemies. I think the well known red spider is the worst. No doubt this is caused by maintaining too high a temperature. I have seen many plants, more especially of araucaria, almost ruined by the red spider. And one thing more, they are not particular with regard to soil; strong loam will keep all going with but little care otherwise.

Toronto.

BUSINESS GOOD.

Business has been good the past week and now that the frost has cut off all the outdoor flowers, there is naturally a large scarcity. Chrysanthemums are scarce as yet and with most growers are from 10 days to two weeks behind last year. The cool weather has shortened the supply of roses and carnations and many orders are being refused for stock. Roses continue to show improvement and some really good stock is coming in. The growers have mostly increased their space and also the varieties, so with the extra Richmond, Killarney and Chatenay which are planted the outlook for large quantities of white is dubious. Killarney has taken a great hold and is much sought. Though some excellent carnations are coming in, it is too early for quantities and many shipping orders are being refused. Violets are also considerably later than last year and only a few of the select blooms are coming in. The very heavy advance on the price of palms has kept a number of the growers from stocking up and some of the houses look rather thin.

The carnation show in January will be held in City hall, President Dunlop was advised on Thursday, and he is delighted that such excellent quarters are available for the convention.

Wm. Jay & Son had the decoration for a fashionable wedding on Wednesday. The display of flowers was lavish and the bridal set larger than usual.

Good long-stemmed American Beauty is coming from Geo. Allen, of Toronto Junction.

A. Jennings on King street west, is showing an attractive window of oncidiums.

Large numbers of funeral orders have been keeping Thos. Plumb busy of late.

HIBISCUS SYRIACUS MEEHANII

WE now offer to the trade our new hardy variegated leaf Hibiscus Syriacus Meehanii. This plant attracted much attention when exhibited at the American Nurserymen's Convention at West Baden, Ind., and American Florists' Exhibition at Asheville, N. C. Foliage beautifully variegated; never sun-scalds or reverts to the green; flowers single, very large, satiny lavender; blooms during four months; prices on application. Orders booked now.

For a complete list of seasonable decorative and other stock see our current wholesale list.

HENRY A. DREER, 714 Chestnut Street, PHILADELPHIA.

Los Angeles, Cal.

Mr. Hamilton, of East Hollywood, is building his third cucumber house. These houses are thoroughly up-to-date and he is making preparations for a good planting this season. His houses are 22x200 ft.

Wm. Badger, for several months seedsman with Chas. Winsel, has taken a similar position with Sam. H. Church, on S. Main street. Mr. Church is enlarging his place and preparing for the winter rush.

Geo. Watson, manager for J. W. Wolfskill's greenhouses, has been on a 3-month's trip in Europe; he is expected to return about October 29.

Many fine cut blooms of chrysanthemums are coming into the market now—a good many from San Francisco and vicinity.

Abert Cohn is building another glass house for growing winter vegetable plants to supply his store. S. E.

Richmond, Ind.

Ten thousand feet of glass have been used in the new greenhouse establishment of the E. G. Hill Co. on the west side of the city. The new houses are now ready for occupancy, only a few of the minor details of the work needing completion. It is the intention of the firm to move the whole plant to the west side and this will be done only as fast as the old houses on the present site are dispensed with. Mr. Hill recently stated that he thought it would probably take 10 years to complete the moving process.

Carnations will be grown in the majority of the houses during the coming season, while one house will be devoted exclusively to sweet peas for the Christmas demand.

Davenport, Ia.

The regular monthly meeting of the Tri-City Florists' Club took place on the evening of October 12 at the house of Julius Staack & Sons, of Moline, Ill. Emil Boehm, superintendent of the Davenport public park system read a very interesting paper on "The Diseases of Geraniums." The paper was followed by a general discussion of the subject. Two other subjects of vital importance were taken up: "The Autumn Planting of Trees and Shrubs," and "The Storing of Cannas during the Winter;" both of these papers brought out some fine points. As usual a goodly number were in attendance. Light refreshments were served after the informal discussion.

NOTES.

A killing frost, the first of the season, occurred on the night of October 9, and has helped business considerably. Business has been brisk the past week with hardly enough flowers to fill the orders. Chrysanthemums, however, are beginning to come in and as ever, florists have plenty of them. A shortage in cut flowers will not be looked for again for a long time.

Owing to sickness Theo. Ewoldt was unable to attend the Florists' Club this month, the first time Ted has missed a meeting for nearly a year. Mr. Ewoldt is improving and is able to look after business again.

Theo. Ewoldt and John Temple, of Davenport, will go to Dubuque, October 16 to attend the state convention of the Iowa florists. Mr. Ewoldt is vice-president of the state association. T. E.

AZALEAS For Forcing
Christmas to Easter.

Our stock this season is handsomer than ever. Anybody in want of a quantity will do well to inspect our plants before placing their order. We have only popular Ameriaan varieties: Schryveriana, Niobe, Paul Weber, Prof. Wolters, Raphael, Simon Mardner, Vervaeneana, Louis de Kerchove, Mme. Van der Cruyssen, Deutsche Perle, Dr. Moore, John Llewellyn, Mme. Cam. Van Langenhove, Mme. Jos. Vervaene, Paul de Schryver, Memorie de l' Van Houtte, Sigismund Rucker.

We are pleased at all times to receive visitors at our nurseries. We have 100 acres planted with the most interesting nursery stock in the country. **SEE WHOLESALE CATALOGUE.**

BOBBINK & ATKINS, Nurserymen and Florists, Rutherford, N. J.

Utica, N. Y.

CARNATIONS SCARCE.

A marked feature of the business during the past two weeks has been the scarcity of carnations. The growers claim they are cutting more than usual but for each 100 that is cut there is about an average of three buyers after them. In another week the growers will be cutting some good chrysanthemums which will relieve the market of its present scarcity and give the retailers a little more variety. Roses of good quality are plentiful.

NOTES.

The October meeting of the Florists' Club was held at the store of Spencer & Martin. It was decided to hold the winter meetings at the homes or business places of the members, which from the beginning has been a great success, giving the members an opportunity of seeing and discussing the good points of each grower. The next meeting will be held at the home of Wm. Pfiefer November 6.

Peter Crowe has completed the additions to his fern houses and has just installed a new 80 H. P. boiler. Everything is in good working order at this place. Adiantum Croweanum bids fair to hold its record as the best maidenhair on the market.

Wm. Pfiefer has about 10,000 carnation plants which are in fine shape. Mr. Pfiefer has a large crop on now and bids fair for another as soon as chrysanthemums are gone.

Frank McGowan has repiped his houses throughout. He now has a first class steam system. Carnations and chrysanthemums at this place rank among the best to be found in the city.

Geo. Benedict is cutting some very fine American Beauty, Liberty and Richmond roses. He has no trouble finding a market for them.

Chas. F. Seitzer has discarded roses and has his houses filled with carnations. His Enchantress is of exceptionally fine quality.

Although business in general is fine there has been a noticeable but unaccountable drop in the sale of bulbs.

BUD.

Rochester, N. Y.

Asters were in great demand for September 23 for the ceremony of the blessing of graves and brought good money.

Thos. Cogger, at 41 North street, has bought 16 acres of land and two greenhouses in Irondequoit. He overhauled the greenhouses and put in a new No. 4 Duning boiler. One house is for carnations, the other for flowering plants.

Geo. Hart has moved to larger quarters. His business is on the increase. Good luck for hustling George. Florists here find a commission house a handy thing all times of the year.

MONTREAL, QUE., CAN.—The first autumnal flower exhibition under the auspices of the Westmount Horticultural Association was held in Victoria hall, September 7, and was well attended. The judges were C. A. Smith, of Lachine, and Joseph Bennett and John Walsh, of this city.

WATCH US GROW.

Araucaria Excelsa

The Best of All Decorative Plants Nature Produces

OUR SPECIALTY.

Every man in business and life to be successful must adopt one thing as his specialty, and that specialty, whatever he select, of whatever nature it may be, he must guard, study and push to such an extent that it not only benefits himself, but he must conduct it so that everyone who seeks his aid, service or his article, which he advertises or practices, will share a slice of his activity and prosperity. I made the importation and cultivation of Araucarias as a special study in my life. The figures below will show my success in business: In the first year I commenced with an importation of 250. In the eleventh year now, 1906, my importations have grown up to 6,000 (come and see it), and on account of the Araucaria growing yearly more in favor by the plant consuming people all over the country, as a much admired decorative plant for the parlor, bed, dining and sitting room, stores, hotels, lawns and porches the outlook will be for an importation at least of 8,000 to 10,000 in spring of 1907. To secure this vast amount for 1907, I am now on the ocean, per steamer New Amsterdam, leaving Hoboken Aug. 15, striking for Belgium, making contract for next year, 1907. I also shall at the same time bring over with me a large lot of choice Azalea Indica and Palms, etc., for Christmas and Easter flowering. No money will be spared in obtaining for my customers the cream of the Belgium greenhouses only.

Please note lowest prices now going on for August and September:

Araucaria Excelsa.

12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old.$ .50
12 to 14 in. high, 5½-in. pots, 3 to 4 trs., 2 yr. old. .60
16 to 18 in. high, 5½ to 6 in. pots, 3 to 4 trs., 3 yr. old ..... .75
18 to 20 in. high, 6-in. pots, 5 to 6 trs., 4 yr. old,. 1.00
20 to 24 in. high, 6-in. pots 5 to 6 trs., 4 yr. old.. 1.25
36 to 50 in. specimen, 7-in pots, 6 yr. old, $2.50 to 3.00

Araucaria Compacta Robusta, have 1000 of them, never were so nice as this year. Plants are as broad as long, from 12 to 20 in. in height, 3 to 4 perfect tiers, 20 to 30 in. wide across from one tip of tiers to the other, 3, 4 and 5 years old, 6 to 7-in. pots $1.25, $1.50, $1.75, $2.00, up to $3.00 each.

Araucaria Excelsa Glauca, are perfect jewels in shape and size; their beautiful green-blue tiers make them of such a striking appearance that everybody seeing them must fall in love with them on sight, and cannot help it. Plants, 6 to 7 in. pots, 3, 4 and 5 perfect tiers, 15 to 25 in. in height, from 15 to 30 in. across, $1.25 $1.50, $1.75, $2.00 to $2 50 each.

Please bear in mind these mentioned varieties are the cream of Belgium importations. We have thousands of them; can meet all demands.

Kentia Forsteriana, 6-in. pots, 35 to 40 in. high, 5 to 6 leaves, 4 years old, $1.25 to $1.50; 30 to 35 in. high, 4 years old, 6 in. pots, $1.00; 5½-in. pots, 25 to 30 in. high, 3 years old, 75c; 4-in. pots, made up with three plants, 18 to 20 in. high, 25 to 30c. **Belmoreana,** 6 in. pots, 4 years old, 5 to 6 leaves, bushy, 30 to 35 in. high, $1.25; 5½ to 6 in. pots, 3 years old, 5 to 6 leaves, 75c to $1.00 each. Above are the sizes entered in the custom house. **Kentia Forsteriana,** 7-in. pots, made up plants, on elarge in center, three smaller sizes, about 22 to 24 in. high, price $2.00 each.

OUR LITTLE PETS.

By Aschmann, in Philadelphia, I bought
An Araucaria, a pet for our little girl—
Now we have two pets, the pride of our thought,
The little girl so sweet a head full of curls,
And the Araucaria with their everlasting green—
A more joyful home you never have seen.

To A Geranium.

Geranium, beauteous with the glow of many blooms in one,
Flower most beloved that in my garden grows,
Redder than heart's blood, thy day has just begun
When it is saddened by the dying rose,
And brilliancy left o'er from summer's noon,
Is still thine own when first the aster wakes.

Full many a fickle, fragile blossom, in the boon
Of one rare breath of fleeting fragrance breaks,
Then vanishes; but thou, from glad June's jubilee
Until the autumn whispers of the end,
In soft bestowal of thy spiced perfume, art constancy,
Oh, flower of all that blow, the truest friend! —Boston American.

Omaha.

BUSINESS BRISK.

A lot of funeral designs were made the last two weeks and all the stock sold out well. Roses are more plentiful than carnations. Stock is fine, especially American Beauty roses.

NOTES.

October 1 was one of the busiest days for the florists. Four of our leading concerns had openings and strange to say all moved into new buildings. More than $1,000 worth of flowers were used, American Beauty taking the lead. One store was presented by their employes with a six-foot horse-shoe made by Hess & Swoboda. A. Donaghue made one of five feet, S. B. Stewart one of five feet, Peterson Bros. one four feet 6 inches, and others from two to three feet. It looked more like a flower show. Good workmanship could be noticed in the floral designs. One six-foot basket of American Beauty roses made by Hess & Swoboda and one by Peterson Bros. were very much admired by visitors.

Last week we had our fall festival which always brings thousands of visitors to the city and creates business, the florists getting their share. L. Henderson had to decorate the hall for the dance which is generally the wind-up of the festivals.

The Omaha Florists' Club held its annual election September 13. The old officers were re-elected by acclamation: J. J. Hess, president, S. Faulkner, vice-president, L. Henderson, secretary, G. Swoboda, treasurer. GRIPPE.

Santa Barbara, Cal.

P. Reidel has leased Robt. Armstrong's place at Montecito where he has about 1,000 feet of glass. Mr. Reidel does considerable landscape business and grows largely to supply material for this. He also has about 12,000 kentias, and grows cut flowers for local retailers.

Dr. F. Franceschi is always importing and experimenting with new plants and has on his new place quite an assortment of rare plants, in fact one of the most complete botanical gardens in southern California.

Verhelle & Lejeune have a nice place on the main street and grow besides a general stock many kentias and ferns.

PORT TOWNSEND, WASH.—F. Schlager, the only florist here, reports that trade has been steadily improving since establishing himself about three years ago. He has just completed a carnation house, 18x60 feet.

H. R. CARLTON, Willoughby, O.
INTRODUCER and ORIGINATOR.

MABELLE, New Pink Carnation for 1907.
Color—A peculiar shade of lovely pink, with a faint yellowish cast; several shades lighter than the Lawson. Unlike most pinks, the brightest sun does not injure the color. Size—3 to 4 inches in diameter when established. Odor—Pleasing, but not strong. Stems—Invariably strong, but always graceful, ranging from 12 to 30 inches during the season. Habit, etc.—A very quick, active grower, making specimen plants in a short time, even from late cuttings. On account of its rapid growth, requires supporting very soon after benching. Gets away rapidly, blooms early and gives long stems right from the start. Productiveness—Prodigious is the best word we know of to use here. It is the most incessant bloomer, early and late, we have ever grown. Stock limited. Delivery January 5 to 10 and later. Price, $12.00 per 100, $100.00 per 1000.
